The Lord Mayor (1931-1932), J. C. (1088.
Recorder, Edward G. Henmerde, K. C. (1909).
President, Court of Passage, Sir Wm. F. Kyffin Taylor, K B E., K.C.
Town Clerk, Walter Moon, £3,300 (1922).
Clerk of the Peace, R. D. Cripps.

MANCHESTER.

MANCHESTER (Lancashire), the centre of the world's cotton trade, is 189 miles N W. of London. The municipal area is 22,257 acres dound. The municipal area is za,zg7 acres (about 34 square miles), the population at the census of zg31 being 766,333. In April, zg31, the area and population were increased by the addition of the Wythenshawe area.

Manchester is the distributing centre of the

cotton spinning and weaving of Lancashire for the whole world, and of butter and foodstuffs for the most densely populated part of England. It also contains large engineering and machinery works and factories of hats, clothing, india-nubber goods, chemicals, &c. The city is con-nected with the sea by the Manchester Ship Canal (opened in 1894), which has a total length of 35½ miles, a depth of 38 to 30 feet, and a minimum width at the bottom of 189 feet. The minimum with at the bottom of racitett. The net tonnage of ships engaged in the Foreign Trade was 3,677,681 for arrivals and 3,698,698 for departures in 1929, the value of the sea-borne trade of the port being £99,886,957 in 1929. The net tonnage of arrivals in the Coasting Trade was Sea 463, and of departures 1.071,756 net tous in 1920. In 1920, the weight of sea-borne merchandise which passed over the Waterway amounted to 6,344,005 tons, as compared with 6,021,316 tons in 10

tons, as compared with e.car, 346 tons in 1928.

The principal buildings are the Town Hall, erected in 1877 from the designs of Alfred Waterhouse, R.A.; the Royal Exchange, built in 1869, enlarged at cost of £800,000 and reopened by the King, 1921; the Free Trade Hall, erected from the designs of Walters, in

Library (1899), which includes the Althorp collection; the University (Owens College); and the 18th century Cathedral (formerly the parish church). Manchester is one of the principal centres of political, literary and scientific advancement, and the Halle Concerts have placed the city in the forefront of musical development. The Manchester Guardian newspace archives and supposed the property of the control o paper exercises a widespread influence through-

out the English-speaking world.

The town received a charter of incorporation in 1838 and was created a city in 1853. The City Council will consist (from April z, 1921), of 36 Aldermen and 108 Councillors. Manchester returns 10 members to Parliament. The Latin

returns so members to Parliament. The Latin name of the city was Manconium.

Principal City Officers.

The Lord Mayor (1932-1933), E. Green.

Recorder, Sir Walter Greaves-Lord, K.C., M.P. (1925).

Stipendiary Magistrate, J. Wellesley Orr (1927).

Town Cierk, F. E. Warbreck Howell (1929).

Clerk of the Peace, E. M. Redhead.

SHEFFIELD.

SHEFFIELD (Yorkshire, West Riding), the chief centre of the heavy steel and cutlery trade, is situated in the extreme south of Yorkshire, zsg miles N.N.W of London, at the junction of the Sheaf, Porter, Rivelin and Loxley with the river Don. The city has an area of 34,163 acres (about 53 square miles), with a population at the census of 1921 of 521,745. The principal industries are the manufacture of heavy steel (armour pletse rath tyres alles engine castings. &c.) plates, ralls, tyres, axles, engine castings, &c.), cutlery, and instruments, in addition to engines and general machinery, tanning, confectionery, bicycles, iron and brass founding, silver refining, bicycles, iron and brass founding, silver refining, brush making, and many other industries. Exchange, University College, Hospital and Eye Infirmary. New University College, opened July 10, 1938.

Snotengalam or Notingeham, "the home of the sons of Snod "(the Wise), is the Anglo-Saxon mame for the Celtar Tangopolaua, "Cave Homes." The city possesses a Charter of Henry II., and was created a city in 1897. The Corporation comprises a Lord Mayor, 16 Aldermen and 48 Councillors. The city returns 4 members to Parliament.

Principal City Officers.

Lord Mayor (1931-1932), William Green.

Recorder, Henry Holmes Joy, K.C. (1928).

Town Clerk (1918) and Clerk of the Peace (1921),

William John Board, O.B.E.

STRATFORD-ON-AVON.

Shakespeare's Burthplace (April 23, 1864), at Stratford on-Avon, has been for over 20 years the goal of pilgrims. It was bought for £3,100 in 1847 and given to the nation. (Restored in 1857.) Managed by 26 Trustees (16 ex-officio). Holds library of rare editions, pictures, and relics. In the garden are many trees and plants named by the poet.

Clopton Bridge, built of stone, on 19 arches, about 1490 by Sir Hugh Clopton, Stratford native, and Lord Mayor of London.

Guild Chapel and Guildhall.—Built A.D. 1296. In the old hall young Shakespeare could witness strolling companies performing (mentioned in Records). In chapel were discovered beneath whitewash, 1804, numal allegorical paintings, done by mediawal priests, further discoveries being made in 1292.

Hall's Croft.—Unaltered old-timbered residence of Susanna, poet's daughter, wife of Dr. John Hall, churchwarden and poet's executor.

Harrard House. — Built 1896 by Alderman Thomas Rogers, whose descendant (John Harvard) founded Harvard University, U.S.A.

Hathaway Cottage.—At Shottery, one mile from Stratford, is the little thatched farmstead, the undisturbed birthplace of Anne Shakespeare, poet's wife, who bore him three children, Suanna, Hamnet, and Judith. Contains curious Tudor and Jacobean furniture. National property, controlled by Birthplace Trustees.

King Edward VI. School.—Founded by Thomas Jollyfic, priest, in Henry VI. reign; incorporated by Edward VI. Here Shakespeare acquired his "small Latin and less Greek," and matchless English. The Shakespeare Memorial.—Mainly due to munificence of C. E. Flower (1830-32) and his wife. Group comprises Library, with 10,000 volumes of Shakespeare editions and ana, including lare Wm. Jaggard collection. Gallery of pictures (including unique "Droeshout" portrait). Museum of antiques and relics (including Irving collection). Tower, affording views of 50 miles. Gardens, and Statuary (Lord Ronald Gower's gift). Theatre, burnt down in 1936, has been rebuilt by international subscription. Special spring and summer performances, with floral procession to tomb, commence on the birthday, April 23, each year.

New Place.—Site of the poet's retirement. Shakespeare bought this estate in 1597; letired to it about 1500; died there April 23, 1516. House was rebuilt about 1700, and demolished by Francis Gastrell, the iconoclast, 1759.

The Cage.—For 36 years the home of Judith, poet's younger daughter, who married Thomas Quiney, vintner.

Town Hall.—Erected 1633; rebuilt 1768. Con tains details of the unbroken sequence of Balliff and Mayors since A.D. 1292 (including the poet's father, John Shakespeare). Exhibits: Gains borough portrait of Garrick; four Corporation Macea, gittaliver of 15-16th Century, and ancient Corporate Sword.

Trinity Church.—Dates from A.D. 69s. O cathedral-like proportions. Shelters remains o poet and family.

Wilmoote.—The house of Shakespeare's mother Mary Arden, was purchased in 1930, with 60 aute of land at Welcombe, part of 107 acres bought by Shakespeare in 1605; now open to the public.

THE PRINCIPALITY OF WALES.

PHYSICAL GEOGRAPHY.

Position and Extent.—The Principality of Wales occupies the extreme west of the central southern portion of the island of Great Britain, with a total area of 7,467 aq. miles. It is bounded on the N. by the Irish Sea, on the S. by the Bristo Channel, on the E. by the English counties of Cheshire, Saloy, Hereford and Monnouth, and on the W. by St. George's Channel. The greatest length from N. to S. (Point of Air to Barry Island) ingth from N. OS. (Point of Air to party island is 136 miles, and the greatest breadth from W. to R. (St. David's Head to the English border) is a miles Separated from the mainland by the Menai Stratz is the Weish island-county of Anglesey or Mön (276 89, miles), communication with which is facilitated by the Menai Suspension with which is racilitated by the alenai Suspension Bridge (x,coo ft. long), built by Telford in 1826, and by the tubular railway bridge (x, xoo ft. long) of the L. & N.W. Railway, built by Stephenson in 1830. Holyhead harbour, on Holy Isle (N.W. of Anglesey), provides accommodation for a fast steam packet service to Kingstown and Dubin (70 miles).

Population.—The population at the Census of x93x was 2,593,024 (inclusive of Moumouthshire)

Relief.—Wales is generally mountainous, the chief systems being those of North Wales (Snowdon 3,571 ft., Carnedd Llywelyn 3,484 ft., Carnedd Dafydd 3,426 ft.), Berwyn (Anan-fawddy 2,970 ft.), Powys (Pilulinumon 2,462 ft., Drygan Fawr 3,115 ft., Radnor 2,163 ft.), and the Black for the Back of Mountain, Brecknock Beacons and Black Forest ranges (Carmarthen Van 2,632 ft., Brecon Beacon 2,862 ft., Pen-y-gaver fawr 2,660 ft.).

Hydrography.—The principal river of those rising in Wales is the Severn (see England), which flows from the slopes of Plinlinmon to the English border, dividing Montgomeryshire on its way. The Wye (130 miles) also rises in the slopes of Plinimmon, and flows between Radnor and Brecon on its course to England. The Usk (56 miles) flows into the Bristol Channel, through Monmouthshire. The Dec 70 miles) nees in Bala lake and flows through the Vale of Llangollen, where an aqueduct (built by Telford in 1805) carries the Pontcysyllte branch of the Shropshire Union Canal across the valley. The estuary of union canal across the valley. The estuary of the Dee is the navigable portion, x4 miles in length and about 5 miles in breadth, and the tide rushes in with dangerous speed over the "Sands of Dee." The Tony (68 miles), Teh (50 miles), Taf (ac miles), Dorey (30 miles), Til (x5 miles), and Conway (x4 miles), the last named broad and navigable, are wholly Welsh rivers The largest natural lake in Wales is Bala (Llyn Teorid) in Merionethabire. 4 miles long and about.

The largest natural take in water is Batta (Llyin Tegid) in Merionethahire, 4 miles long and about 1 mile wide; Lake Vyrney is an artificial reservoir, about the size of Bala, and forms the water supply of Liverpool, while Birmingham is supplied from a chain of reservoirs in the Elau and

Claerwen valleys.

EARLY HISTORY.

Celts and Romans.—The earliest inhabitants of whom there is any record appear to have been subdued or exterminated by the Goidels (a people of Celtic race) in the Bronze Age, and a further invasion of Celtic Brythons followed in the ensuing Iron Age. The Roman conquest of South Britain and Wales was for some time successfully opposed by Caradog (Caratacus), King of the

Silures, a tribe inhabiting the present counties of Glamorgan, Brecon, Radnor and Monmouth. In A.D. 78 the conquest of Wales was completed under Julius Frontinus, and communications were opened up by the construction of military roads from Chester to Carleon-on-Usk and Caerwent, and from Chester to Conway (and thence to Carmarthen and Neath). Chrustianity was introduced (during the Roman occupation) in the 4th century, and the faith thus established was preserved (after the withdrawal of the Roman garrison) by native effort, and was carried to the northernmost corners of the British Isles by missionaries to the Hebrides and to the Orkneys and Shetlands.

The Anglo-Saxon Attacks.—The Anglo-Saxon invaders of South Britain drove the Celtic Gordels and Brythons into the mountain fastnesses of Wales, and into Strathelyde (Cumberland and S.W. Scotland) and Conwall, giving them the name of Waelse, or Welsh (=Foreign). The West Savons victory of Deorham (577) isolated the Wachse of Wales from those of Cornwall, while the battle of Chester (672) similarly cut off communication with the Wachse of Strathclyde. In the 8th century the boundaries of the Welsh were further restricted by the amexations of Offa, king of Mercia, and counter-attacks were largely prevented by the construction of an artificial boundary from the Dee to the Wye (Offa's Dike). In the 5th century Rhodi: Mace united the country against further meursions of the Saxons by land and against the raids of Noise and Danish pirates by sgams the tasks of worse and paints pirates by sea, but at his death his three provinces of Gwynedd (N.), Powys (Mid.) and Dehenbarth (S.) were divided among his three some-Anarawd, Mervyn and cadell—the son of the last-named being Howel Dda, who confried the laws of the country, while Lewelyn ap Seissyllt (husband of the heness of Gwynodd) again united the provinces and reigned as Prince from 1015-1022.

The Norman Conquest — After the Norman conquest of England William I. created Palatine conducts of England within I, created raisting counties along the Welsh frontier, and Robert FitzHamon, the Norman Earl of Gloucester, raided South Wales and creeted fortresses from the Wye to Milford Haven. Hemy I. introduced Flemish settlers into South Wales, but after his death the Welsh rose under the leadership of Grifith ap Rhys and routed the Norman-Hemsh forces at the fords of the Teifi (Cardigan) in 1136. From the carly years of the 13th century the house Gwynedd, in the north, gained an ascendency over the whole of Wales, and Llewelyn ap Iorwerth was in constant strife with England for recognition as an independent sovereign; but Llewelyn, the son of Iorwerth, was killed in 1282 during hostilities between the Welsh and English, and his brother David was captured and executed by the English in 1283.
On Yeb. 7, 1301. Edward of Camaryon, son of Edward I, was created Prince of Wales, a title thenceforward borne by the heir apparent to the throne of England.

The Welsh are a distinct nationality, with a language and literature of then own, and the national bardic festival (Eisteddiod), instituted by Prince Rhys ap Griffith in 1276, is animally maintained. These Eistedifodau (sessions) form part of the Gorzedd (assembly), which is believed to date from the time of Prydian, a ruling prince in an age many centuries before the Christian era.

Radnor B. P. Lewis G. W. Moseley A. S. Michael . .

CARDIFF.

CARDIFF (Glamorgan), at the mouth of the rivers Taff (Caer Taff), Rummey and Ely, the port of the South Wales coal fields, has a municipal area of 13,628 acres, and a population (1931) of 23,648. The principal industries include of a3,048. The principal industries measure ship repairing, tope making, steel, copper, lead and zine works, iron and steel foundries, patent fuel works, engine wagon works, flour mills, chemical factories, paper mills, breweries, Jam, vinegar and ice factories, tin plate and paint works. The chief imports are grain, timber, pitwood, ore, fruit, butter, cheese, frozen and chilled

wood, ore, fruit, butter, cheese, hozen and chilled meat, live cattle, canned goods, sugar, potatoes. The exports include coal, coke, patent fuel, iron and steel manufactures, ir plates, &c The principal buildings are taidiff Castle, built in the 11th century, the National Museum of Wales, Public Library, the University College of South Wales and Monmouthshire, the Registry of the Hulvarity of Wales. Technical College in the University of Wales, Technical College, City Hall and Law Courts, and Glamorgan County Hall. The city returns 3 members to Parliament.

The Lord Mayor (1931-32), C. W. Melhuish. Stipendiary Magistrate, W. Hugh Jones, K.C. Recorder, Roland E. L. Vaughan-Williams, K.C. Town Clerk & Clk. of Peace, Cecil G. Brown, LL.B.

SWANSEA

SWANSEA (Glamorgan), at the mouth of the River Tawe, is the chief centre of the copper, tuplate and spelter industry of the United Kingdom, and contains the largest tube works in the country. The trade of the port also includes coal (the largest authorite port), patent fuel, ores, and the import and export of our (National Oil Refineries). There is also a large chip, repairing industry. The tends to oll (National Oil Remerice). And a second large ship-repairing industry. The tado is principally with France, Italy and Belgium. The muncipal area is 24,193 acres, with a population at the census of 1931 of 764,885. Included in the borough is the health resort of Mumbles

The principal buildings are the Norman castle (re-built in 1330), the Royal Institution of South Wales, founded in 1835 (containing Museum and Wales, follings in 1935 (containing a use an and Library), the linversity College at Singleton, and the 17th century Granmar School, founded by Hugh Gore Swansea was chartered by by High Gore Swansea was chartered by King John, and incorporated as a borough by Hemy III. The borough returns a members to Parliament

Mayor (1931-32), J. B. Owen. Recorder, E. W. Milner-Jones. Town Cterk, H. L. Lang-Coath.

THE KINGDOM OF SCOTLAND.

Position and Extent.-The Kingdom of Scotland occupies the northern portion of the main island of Great Britain and includes the Inner and Outer Hebrides, and the Orkney, Shetland, and many other islands. The Kingdom lies between 60° 52′ 30″ and 54° 38′ N. latitude and between 10° 45′ 32″ and 60° 14′ W. longitude; its southern neighbour being the Kingdom of England, with the Atlantic Ocean on the N. and W., and the North Sea on the E. The greatest length* of the mainland (Cape Wrath to the Mull of Galloway) is 274 miles, and the greatest breath (Buchan Ness to Appliecross) is 154 miles. The total area of the Kingdom is 31,510 square miles (land and water). The population (at the census of 1001 Ness 4.848,548, a decrease of 30,43 since island of Great Britain and includes the Inner and of 1931) was 4,842,554, a decrease of 39,943 since the census of 1981.

Relief.—There are three natural orographic divisions of Scotland. The Southern Uplands divisions of Scotland. The Southern Uplands have their highest points in Merrick (a.,764 feet), Rinns of Kells (a.,668 feet), and Cairnsmuir of Carsphairn (a.6x2 feet), in Kirkendblight; Hartfell (a.6x3 feet) in Dunfries; and Whitecomb (a.6x3 feet), in Peebles The Central Lowlands include the valleys of the Tay, Forth and Clyde, and the cities of Edinburgh, the capital of the Kingdom, and Glasgow, its principal scaport. The heather-clad Northern Highlands extend almost from the extreme north of the mainland to the central loylands, and are divided into a almost from the extreme north of the mainland to the central lowlands, and are divided into a northern and southern system by the Great Glen; they contain, in the central Grampian lillis, Ben Novis (4,406 feet), the highest point in the British Isles, and Ben Musch Dhui (4,305 feet). The Cheviot Hills form a natural boundary between Scotland and England, their highest point being Cheviot Hill (2,676 feet)

Hydrography.-The principal river of Scotand is the Clyde (soe miles), one of the most important rivers in the world, with the greatest commercial estuary in Scotland The Clyde is commercial escuary in scotland. The Clyde is formed by the junction of Daer and Pot trail water, and flows through the city and port of Glasgow to the Firth of Clyde. During its course it passes over the picturesque Falls of Clyde, the largest falls in the British Isles, (7)nde, the largest falls in the British Isles, Bonnington Linu (30 feet), Corra Linu (34 feet), bundsff Linu (30 feet), and Stonehyles Linu (30 feet), above and below Lanark. The Tweed (95 miles) has important woollen industries ("Tweeds") in its valley. The Tay, noted for its salmon, and the longest river in Scotland (177 miles), flows into the North Sea, with Dundee (the centre of the jute industry) on the estuary, which is spanned by the Tay Bridge (s miles 73 yards), opened in 1837 to replace that destroyed by a gale (Dec. 28, 289). The Des (90 miles), a noted salmon river, flows through scenery of unequalled beauty to the North Sea at Aberdeen. The

OF SCOTLAND.

Spey (are miles), the swiftest flowing river in the British Isles, and also noted for its salmon and its scenery, flows into the Moray Firth. The Forth (66 miles), navigable to Stirling, is spanned by the Firth Bridge, constructed 1883-9 at a cost of £3,000,000, with a length of 5,300 feet (with approaches £395 feet).

The lochs are the principal hydrographic feature of the Kingdom, both on the mainiand and in many of the Islands. The largest in the Kingdom and in Great Britain is Lock Lomond (as miles long), with Lochs Awe, Tay, Rannoch and Ericht in the Grampian valleys; Lock News (as miles long and 800 feet deep), with Lochs Olch and Lochy, in the Great Glen; and Lochs Shin (so miles) and Marce in the northern Highlands. Highlands.

Orkney.—About 6 miles N. of the Caithness coast, separated from the mainland by the Pentland Firth, is the island country of Orkney, a group of so islands and islets ("holms" and "skerries"), of which one-third are inhabited. "skerries", of which one-third are minamed. The total area of the group is 373½ square miles, with a population (1921) of 25,896. Kirkwall, in Pomona (or maniand), the largest island of the group, is the capital of the county. Many of the Orkney (and Shetland) Islands contain brocks (Pictish towers) and other Pictish and Scandinavian remains. Scapa Flow, between Pomona and Hoy, was the war station of the Grand Fleet from 1914-9 and the scene of the scuttling of the surrendered German High Seas

Southing of the surrounder Street Gune st, rays).

Shetland.—About so miles N. of Orkney (with the detached Fair Isle at sg miles N.) is the island county of Shetland, a group of about roo islands and islets, of which sp are inhabited. The total area of the group is 551 square miles, with a population (spr) of 27,92x. lerwick, in Manuland (the largest and piniopal island), is the capital of the county Fair Isle, the southernmost of the group, is famous for hand-knitted hosiery, and Unst for the finest of the Shetland woollen work, for which the county is famous. Muckle Flugga, about x mile N. of l. nst, is the most northerly of the group and of the British Isles (60° 51' 30" N. lat).

Western Islands.*—Off the W. coast, at varying distances, and extending from Sutherland to Argyll, are over see islands and islets, of which see are inhabited. The total area of these Western Islands is s.81s square miles, with a population of close on 80,000, but owing to the mountainous surface of the land only about 300 square miles are under cultivation. The Inner Hebrides include the island of Skye (643 square Hebrides include the island of Skye (643 square miles—capital, Portree, famous as the refuge of Prince Chailie after his defeat at Culloden, Invernessshire, in 1746), which contains the Culline (Squir-na-Banachiche, 3,843 feet), Red Hills (Ben Caillich, 2,403 feet), and many other picturesque mountains; Mull (367 square miles containing Ben More (3,185 feet), Ben Buy (2,354 feet), and Ben Creach (2,289 feet); Jura

e Land's End to John o' Groats — The customary measurement of the Island of Great Britain is from the site of John o' Groat's home. near Duncanshy Head, Caithness fat the N.E. extremity of the island) to Land's End Cornwall (at the S.W. extremity), a total distance of \$57 miles in a straight line and (approximately) see by road, But the site of the house of John de Groot (with its \$ doors and octagonal table, to solve the question of precedence between John and his 7 brothers) is about \$4 miles S.W. of Duncanshy Head, while Duncanshy. John de Groot is believed to have obtained permission to settle in Caithness (room the Stetherhands) in the reign of James IV (2488-1573)

^{*} The Hebruca.—Until the closing years of the right century "The Hebrides" included other Scottland alands in the Firth of Uyde, the penissule of Kintyre (Arryllahire), the Isle of Man, and the Irish Isle of Rathlin. The origin of the name is stated to be the Greuk Eboudes, latinised as Hebruces by Pliny and corrupted to its present form. The Norwegian name Sadrayar (Southern Islands) was latinised as Sederessee. a name that survives in the Anglican Mislopric of "Sodor and Man."

(160 square miles), with a chain of hills culminating in the Pape of Juro, Beinn-an-Oir (a.gyz feet), and Beinn Chaolais (a.407 feet); Islay (a33 square miles), and many smaller islands. The Outer Hebrides, separated from the mainland by the Minch, include Levus-with-Harris (770 square miles), celebrated for its homespun "Tweeds," North Uist, South Uist, Barra and other islands. Thirteen miles W. of Stornovay (the largest town of Lewis and of the Hebrides) are the "Drudical" remains of Calernish, a well-preserved series of monolithic circles, cruciform in general arrangement, but generally regarded as a heathen monument of the remote Stone Age.

Climate.—The climate of Scotland is influenced by the much indented coast line and (like that of South Britain) by the Gulf Stream Dryft, which emerges from the Gulf of Mexico as a strong current about 20 miles in width, with a speed of about 4 miles per hour; the stream gradually loses its velocity and becomes shallower and cooler, until at about 35° N. lat. (off Cape Hatteras) it ceases to be a distinct stream and its surface waters are carried across the Atlantic by the prevailing westerly winds. The climate is more bracing and less treacherous than that of England, the average duration of sunshine on the east coast of England, while the south-western section is no wetter or more relaxing than the corresponding section of England. The mean winter temperature is in the neighbourhood of 35°, and that of summer about 35° Fabrenheit.

The offices of the Scottish Travel Association

The offices of the Scottish Travel Association are at 37, George Street, Edinburgh.

EARLY HISTORY.

Prehistoric Man.—North Britain appears to have been invaded in Palacolithic times by a succession of races, who died out or were exterminated by other immigrants. The earliest race of which there is any record is that since known as the Picts, believed to be of non-Aryan origin, and stated to have been named Picts by the Romans on account of the tribal habit of painting the body. The Picts seem to have inhabited the whole of North Britain and to have spread over the north of Ireland. Picts' Houses are most frequent in the northern counties of Catthness and Sutherland and in the Orkney Islands, and it is generally believed that the Picts were driven northwards by later Celtic immigrants. Celtic Goideis and Brythons arrived from Belgic Gaul during the latter part of the Bronze Age and in the early Iron Age, and except in the extreme north of the mainland and in the islands the civilization and speech of the Bronze have over definitely Celtic at the time of the Boman Invasion of Britain.

or the Boman Invasion of Britain.

The Roman Invasion.— In A.D. 80 Julius Agricola extended the Roman conquests in Britain by advancing into Caledonia as far as the "Grampian" Hills, but after a victory at Mons Graupus (since corrupted to "Grampius") he was recalled, and no further advance was made for about 60 years, when the Roman frontier was carried to the isthmus between the Forth and Clyde and marked by the Wall of Pius, towards which ran military roads from the Cheviots. The Roman occupation of Southern Caledonia was not so effective as that of South Britain, and before the close of the second century the newthern limit of Roman Britain had receded to Hadrian's Wall, from the Tyne to Solway Firth, where it was maintained until about A.D. 450.

The Scots. - During the later years of the Roman occupation the garrison was continually harassed by Pictish tribes north of the Wall, aided by by Pictish tribes north of the Wall, aided by Scota (the Gaelic tribe then dominant in Ireland), and when the garrison was withdrawn these Picts and Scots were the principal enemies of the Celtic Brythons, who are believed to have called in the Saxons to protect them from the invasions of their neighbours. A relic of the struggle between Pict and Brython is still to be seen in the Catrail or Picts. Work Dyke of seen in the Catrail, or Picts' Work Dyke, of Roxburgh (from Torwoodle, near Galashiels, to Peel Fell in the Cheviots). Christianity was introduced into Southern Caledonia about 360 by missionaries from Romanized Britain, who penetrated to the northern districts and islands. After the withdrawal (or absorption) of the Roman garrison of Britain there were many years of tribal warfare between the Picts and Scots, the Brythonic Waelisc (Welch) of Strathclyde (South-west Scotland and Cumberland), and the Anglo-Saxons of the Lothians. The Waelisc were isolated from their kinsmen in Wales by the victory of the West Saxons at Wales by the victory of the West Saxons at Chester (512), and towards the close of the 5th century the Scots under Kenneth Macaipine became the dominant power in Caledonia. In the reign of Malcolm I. (943-954) the Brythons or Whelisc (Welch) of Strathclyde were broughtinto subjection, the lowland kingdom of the English (Lothian) being conquered by Malcolm II. (1005-1024). From the close of the 3th century until the middle of the 5th there were constant. (1005-1034). From the close of the 11th century until the middle of the 16th there were constant wars between Scotland and England, the outstanding figures in the stringle being William William, who defeated the English at String Bridge (1997), and Robert Bruce, who won the victory of Bannockburn (1314). James IV. and many of his nobles fell at the disastrous battle of Flooden (1513), and in 1603 James VI., the Stuart King of Scotland and the heir to the Tudor line of England (his mother, Mary "Queen of Scots," was the great-granddaughter of Henry VII.), succeeded Queen Elizabeth on the throne, his successors reigning as Sovereigns of Great successors reigning as Sovereigns of Great Britain. After the abdication (by flight) of James VII. and II., the crown devolved upon William III. (grandson of Charles I.), and Mary (daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.) and, their issue failing, upon Anne (second daughter of James VII. and II.). Anne's children died young, and the throne devolved upon George I. (great-grandson of James VI. and I.). In 1689 Graham of Claverhouse "roused the Highlands" on behalf of James VII. and II., but died after a military success at Killiecrankie. In 1715, armed risings led to the indecisive battle of Sherriffmuir, but the movement died down until 1745, when the the movement died down until 1745, when the "Young Pretender" defeated the Royalist troops "Young Fretender deleased the Moyana thouse under Sir John Cope at Preston Pans and advanced to Derby in England (1746). From Derby, the adherents of "James VIII, and III." (the title claimed for his father by the Young Pretender), fell back on the defensive, and the Jacobite movement was finally crushed by the

Jacobiz movement was many crushed by the Royalist troops under the Duke of Cumberland at Culloden (April 26, 2746).

The Hebrides did not become part of the Kingdom of Scotland until 1266, when they were ceded to Alexander III. by Magnus of Norway. Orkney and Shetland fell to the Scottish Crown as a pledge for the unpaid dowry of Margaret of Denmark, wife of James III., in 2468, the Danish suzerainty being formally relinquished in 1590.

EDINBURGH.

EDINHURGH, the Capital of the Kingdom, has a municipal area of 3a,40a acres, and a popula-tion (Census of 1931) of 438,998 (over the en-larged area). The boundaries were extended in 1920 so as to include the Burgh of Leith and part of the suburban district of the County of Midodian. The city is built on a group of hills and contains in Princes Street the most beautiful thoroughfare in the world. The principal buildings are st. Glies's Church (restored 1879-83), and St. Mary's (Scottash Episcopal) Cathedral (Sir Gilbert Scott), the Castle (which contains, in St. Margaret's Chapel, the oldest building in Scotland', Parliament House (the present seat of the judoature, containing the Advocates and Signet Libraries), the University, the General Register House (Robert Adam), Royal Scottish Academy, National Portrait Gellery, and Holyrood Palace (containing parts of the royal palace of James IV. and V.). The city is governed by a town council of 72 members, and sends 6 members to Parliament (including the member for Leith). Rt. Hon. Lord Provost (1929-32), Sir T. B.

Whitson. Town Clerk, Sir Andrew Grierson, LL.D., S.S.C.,

City Chamberlain, John D. Imrie, M.A., B.COM.

GLASGOW.

GLASGOW, a Royal Burgh, City and County of a City, and the principal commercial centre in Scotland, has a municipal area of 30,046 acres, and au estimated population of 1,089,479. The city occupies the north and south banks of the Clyde, one of the chief commercial estuaries of the world, and its trade was valued to 1,000 to at £8z,695,33s in 1929, the total net tonnage of the ships entering (1930-31) being 6.916,744 tons; to those cleared 6.848,469 tons. The principal industries are iron and steel works, shipbuilding, chemicals, leather, woollens, muslin-weaving, distilling, tobacco, cotton-mills and furnidistilling, tobacco, cotton-mills and furni-ture. The chief buildings are the Early English Cathedral, built early in the 13th century, and incorporating part of an earlier structure, the University (Sir Gilbert Scott), the City Chambers, the Royal Infirmary and the Western and Victoria Infirmaries, the Art Galleries and the Witchell Chamber The City Chambers, the Art Galleries and the Mitchell Chamber The City is consequed by Mitchell Library. The City is governed by a town council of 113 members, and sends 15 members to Parliament.

Rt. Hon. Lord Provost (1929-22), Sir Thomas Kelly.

Town Clerk, David Stenhouse, J.P. City Chamberlain, A. C. McMillan, C.A.

• The Cities of Edinburgh, Glasgow, Dundee, and Aberdeen are each a County of a City, and the Lord Provost of each is entitled, by virtue of his office, to be appointed Lord Lieutenant.

DUNDER.

DUNDER, a City, Parliamentary, Municipal and Royal Burgh, on the left bank of the River Tay, 42 miles N. of Edinburgh, has a municipal area of 6,678 acres, and a population (Consus 1931) of 175,583 (an increase of 7,268 since 1921) The principal buildings are University College (St. Andrews University), the Technical Institute, High School, Albert Institute and the Caird Hall Buildings. One of the finest Public Baths is in Dundee. The harbout affords dock accounmodation of nearly 38 acres. The principal industries are jute manufacture in all its branches, and various forms of linen weaving, the making of preserves, shipbuilding, engineering, dyeing, and brewing. The City is governed by a town council of 34 members and sends a members to Parliament.

The Lord Provost (1930-32), G. A. Johnston.
Town Clerk, W. H. Blyth Martin.

ABERDEEN.

ABERDREN, a City and a Royal, Municipal and Parliamentary Burgh, 130 miles N.E. of Edinburgh, received its charter as a Royal Burgh from William the Lion in 1179. The numicipal area is 6,748 acres, with a population (Census 1931) of 167,859 (an increase of 8,890 since 1931). The tonnage of the ships entered in 1320 was 965,035 tons (and fishing vessels 1,344,565 tons). The chief industries are granite quarrying and working, white fish, salmon and herring fisheries, engineering, chemicals, brewing, distilling, shiphuilding, paper-making, and woollen, jute and line manufacture. The principal buildings are the East and West Churches of St. Nicholas, Municipal Offices, Marischal College, King's College, Roman Catholic pro-Cathedral, Public Library, H.M. Theatre, Art Gallery and Museum, and the Cathedral of St. Machar (14th century). The City is governed by a Town Council of 37 Members, and sends a Members to Parliament.

The Lord Provest (1930-32), James R. Rust. Town Clerk, George S. Fraser.

Position and Extent.—Ireland lies in the Atlantic Ocean, to the West of Great Britain, and is separated from Scotland by the North Channel and from Wales by the Irish Sea and St. George's Channel. The land area of the island is 32,532 sq. miles and its geographical position between 51° 56° and 55° 32° N. latitude and from 5° 32° to 10° 30° W. longitude. The greatest length of the island, from N.E. to S.W. (Torr Head to Mizen Head), is 300 miles, and the greatest breadth, from E. to W. (Dundrum Bay to Armagh Head), is 74 miles. On the N. coast of Achill Island (Co. Mayo) are the highest cliffs in the British Islands, 2,000 feet sheer above the sea. Ireland is occupied for the greater part of its area by the Central Plain, with an elevation of 50 to 320 ft. above mean sea lovel, with isolated mountain ranges near the coast line. The principal mountains, with their highest points, are the Sperrim Mountains (Sawel 2,240 ft.) of County Tyrone in the North; the Mountains of Mountains (Tyrone in the North; the Mountains of Mountains (Britigal 2,466 ft.) of County Donegal in the North-West; the Commencea Mountains (Twelve Pins 2,695 ft.) of County Galway in the West; Macquilic-cuddy's Reeks (Carrantuchill 3,424 ft, the highest point in Ireland) in the South-West; and the Galtee Mountains (3,026 ft.) of County Tripperary, and the Knockmealdown (2,609 ft.) and Comeragh Mountains (2,670 ft.) of County Waterford, in the South. The principal river of Ireland (and the longest in the British Islee) is the Shannon (240 miles), rising in County Cavan and draining the central plain. The Shannon flows through a chain of loughs to the city of Limerick, and thence to an estuary on the westen Atlantic seaboard. The Slaneu flows into Wevford Harbour, the Laffey to Dublin Bay, the Boppe to Drogheda, the Lee to Cork Harbour, the Blackwater to Youghal Bay, and the Swir, Nose, and Barrow to Waterford Harbour. As in Scotland, the principal hydrographic feature is the Lough, of which Lough Neagh (250 sq. miles) in the north-east is the lar

Primitive Man.—Although little is known concerning the earliest inhabitants of Ireland, there are many traces of neolithic man throughout the island, while the use of bronze implements appears to have become known about the middle of the xyth century B.O. In the later Bronze Age a Celtic race of Goidels appear to have invaded the Island, and in the early Iron Age Brythous from South Britain are believed to have effected settlements in the south-east, while Peter from North Britain established similar settlements in the north. Towards the close of the Roman occupation of Britain, the dominant tribe in the Island was that of the Scoti, who atterwards established themselves in Scotland.

Legendary History.— According to Irish legends, the island was settled by a Milesian race, who came from Scythia by way of Spain, and established the Kingdom of Tara, about 500 R.C. The supremacy of the Ardir. (high king) of Tara was acknowledged by eight lesser kingdoms (Munster, Connaught, Albech, Oriel, Ulidia, Meath, Lennster and Ossory) ruled by descendants of the eight sons of Miled. The basalt columns on the coast of Antrim, eight niles from Portrush, known as the Giant's Cansensay, are connected with the legendary history of Ireland as the remnants of a bridge built in the time of Finn M'Coul (Fingal) to connect Antrim with Sotiland (Staffa).

Christianity.—Christianity did not become general until the advent of St. Patrick St. Patrick was born in Britain about 38, and was taken to Ireland as a slave about sixteen years later, escaping to Gaul at the age of 22. In 422 he was consecrated Bishop at Auxerre and landed in Wicklow to establish and or ganish the Christian religion throughout the island.

Later History.—The Roman conquest of Entain was not extended to Ireland, and little is known of the history of the country until the invasions of Northmen (Norwegians and Danes) towards the close of the 8th century A.D. The Norwegians were distinguished as Findgalli (White Strangers) and the Danes as Dubgaill (Black Strangers), names which survive in "Fingall,"

"MacDougall" and "MacDowell," while the name of the island itself is held to be derived from the Scandmavian Ina-land (land of the Irish), the names of the Provinces being survivals of Norse dialect forms (Ulade-tir, Laigins-tir, Mumans-tir and Kunnak-tir). The out-standing events in the encounters with the Northmen are the Battle of Tara (980), at which the Hy Neill king Maelsechlainn II. defeated the Scandinavians of Dublin and the Hebrides under their king Amlaib Cuaran; and the Battle of Contarf (1014) by which the Scandinavian power was completely broken. After Clontarf the supreme power was disputed by the O'Brians of Munster, the O'Neills of Ulster, and the O'Connors of Connaught, with varying fortunes. In 1152 Dermod MacMurrough (Diai math Mac-Murchada), the deposed king of Leinster, sought assistance in his struggle with Ruaidhri O'Connor (the high king of Ireland), and visited Henry II. the Norman king of England. Henry authorized him to obtain armed support in England for the recovery of his kingdon, and Dermod enlisted the services of Richard de Clare, the Norman Earl of Pembroke, afterwards known as Strongbow, who landed at Waterford (Aug. 23, 1170) with 200 knights and 1,000 other troops for the reconquest of Leinstei, where he eventually settled, after marriage with Dermod's daughter. In 1172 (Oct. 18) Henry II. himself landed in Heland, with a force larger than Strongbow's, and obtained homage from the Irish kings, but Anglo-Norman rule underwent many fluctuations in the succeeding centuries, being confined in the early 15th century within the English "Pale" of 600 square miles. In the reign of Henry VII.
English rule was greatly extended, and the
administration of Irish affairs was anglicised by Robert Poyning, Lord leputy of Ireland, who summoned the Parliament of Drogheda (Dec. 1494), at which were enacted the Statutes of Drogheda, afterwards known as Poyning's Law, making the legislature of Ireland subordinate to and dependent on that of England. A later parliament conferred on Henry VIII. the title of King of Ireland.

Otherservices are maintained at regular intervals and there are also indirect routes and Greenore and Holyhead and Kingstown and Holyhead.

and notyless and Angstown and Indyness.

Railrosys.—The principal railways are the
Great Northern, L.M. & B. (Northern Counties
Committee), Belfast and County Down, London
derry and Lough Swilly, and the Clogher Valley.

The total railway mileage in 1930 was 766 miles.

TOURIST ASSOCIATION.—The Ulster Tourist Development Association, 6, Royal Avenue, Belfast.

Saorstat Eireann—The Irish Free State. THE GOVERNOR GENERAL.

His Excellency James McNeill, born March 27, 1869, appointed Governor General Dec. 15, 1927 CONSTITUTION AND GOVERNMENT.

UNDER the Irish Free State (Agreement) Act, four ministers shall be members of the Chamber, 1922, the Irish Free State (Sacretat Eireann) is a and a number not exceeding eight chosen from coequal member of the Community of Nations forming the British Commonwealth of Nations. The Constitution, as issued by the Crown, June 76, 7922, contains five Sections, of which Section I. is declaratory of Fundamental Rights (1) The coequality of the Irish Free State. (2) Power of government derived from the people, in accordance with the Constitution
(3) Irish domicile for seven years, or Irish
parentage on either side, conferring Irish nationality, and men and women having equal rights as citizens. (4) Irish the national language, English being recognised as an official language. English being recognised as an omeiat language.

(3) No titles or holours may be conferred on any citizen, except with the approval or advice of the Executive Council. (6) Liberty of the person inviolable. (7) Dwelling of each citizen inviolable.

(8) Freedom of conscience and profession and practice of religion, and no law establishing or prohibiting religion may be passed. (9) Free speech and right of lawful assembly. (20) Free education for all citizens. (22) Natural resources of the State inalienable.

Section II. provides for a legislature (Orreachtas) of the King and two houses, the Chamber of Deputies (Dail Erreann) and the Senate (Scanad Erreann), the former elected by secret ballot and by direct vote of all citizens above the age and by direct vote of an entreme above the age of an years who comply with the existing electoral laws and consisting of not less than one member for each 30,000 of the population and not more than one member for each 30,000 of the population. The latter, consisting of 56 Senaton and of a Senators from each University. elected by all oftizens above the age of 30 years who comply with the existing electoral laws. Every citizen who has reached the age of at years is eligible for the Chamber of Deputies; the Senate is composed of citizens who have reached the age of 35 years and have done honour to the the age of 35 years and nave done monor to the nation by reason of useful public service, or who are specially qualified as representing important aspects of the nation's life. Parliament shall hold at least one session each year. Provision is made for the "Initiative" of proposals for laws or constitutional amendments on a petition of 50,000 voters on the register; and for the submission of any bill passed by both houses to a "Referendum" for the decision of the people. In this Section also Article 45 declares that the Parliament (Orreachius) has the exclusive right to regulate the raising and maintaining of such armed forces as are mentioned in the scheduled Treaty in the territory of the Irish Free State, and the Parliament. Save in the case of national invasion, the Irish Free State shall not be committed to active participation in any war without the assent of the Parliament.

Section III. vests the Executive Authority in the King and provides for its exercise as in the Dominion of Canada, by the representative of the Crown. The Executive Council (Arreacht) is responsible to the Chamber, and consists of not more than twelve Ministers (Airi) appointed by the representative of the Crown, of whom

all citizens eligible for election to the Chamber, who shall not be members of Parliament during their term of office, and who, if at the time of their appointment they are members of Parliament, shall by virtue of such appointment vacate then seats; provided that the Chamber may from time to time, on the motion of the Presi-dent of the Executive Council, determine that a particular Minister or Ministers, not exceeding three, may be members of Parliament, in addition to the four members of the Chamber above

mentioned.

Section IV. establishes a Judiciary, consisting of Courts of First Instance, and a Court of Final Appeal to be called the Supreme Court (Citari Onchitarach) The Courts of First instance include a High Court (Ard Churt), nivested with full original purisdiction in and power to determine all matters and questions whether of law or fact, civil or criminal, and also Courts of local and limited jurisdiction with a right of appeal as determined by law. The decision of the Supreme Court shall in all cases be final and conclusive, and shall not be reviewed or capable of being reviewed by any other Court, Tribunal or Authority whatsoever. Provided that nothing in the Constitution shall impair the right of any person to petition his Majesty for special leave to appeal from the Supreme Court to his Majesty in Council or the right of his Majesty to grant

Section V. contains certain Transitory Provisions to meet the special circumstances incidental to the establishment of the Legislature, &c.

Hon. Treasurer Sir George J. Marjoribanks, K.O.V O.

Comptroller of Club Brig.-General Sir Frederick Gascoigne, K C.V.O , C.M.G , D.S O.

This is one of our great National Institutions, where Sailors, Soldiers and Airmen can go when on leave or passing through London; a place where they may obtain at moderate charges good meals and comfortable bedrooms and good means and commission begans of a club, including Library and Writing Room, Billiard Room, Baths, Barber's Shop, and also a Club Shop in which articles of everyday use and almost everything that Service men require may be purchased. The Club is open throughout be purchased. T

The Union Jack Club was erected by public subscription as a National Memorial to those who had fallen in the South African War, and other campaigns, and was opened on July 1st, 1907, by His late Majesty King Edward VII. Membership is open to those below the rank of Officer who are serving on the Active List of the Regular Forces, honorary membership being extended to the Colonial Permanent Forces and Powers visiting England. A limited number of ex-Service Warrant Officers, Petty Officers, N.C.

officers and men may also be elected members of the Club.

The Club is managed by a Council and a General Committee, which includes representatives of the members

A considerable extension of the Club with funds raised in all parts of the Empire to commemorate the services of our gallant fighting forces in the Great War of 1914-18 and to provide increased accommodation was completed in 1923.

Since rest the Council has been enabled, through the anonymous gift of one of its members, still further to colored the second of the members, still further to colored the second of the members. bers, still further to enlarge the premises, bringing the number of beds available to 816, as against the original so8 when the ('lub opened.

THE UNION JACK HOSTEL.

Exton Street, Waterloo Road, S.E. z. Tel : Hop. 2724. Opened June, 1913. Patron-in-Chief His Majesty the King. Patroness-in-Chief. Her Majesty the Queen. Patron: H R.H. the Duke of Connaught, K.G.

President. Brig.-General Sir Frederick Gascoigne. K.C.V.O., C.M.G., D.S O. Vice-President : Sir Herhert J. Creedy, K.C.B.,

h.C.V.O. Hon. Treasurer: Sir George J. Marjoribanks, K.C. V.O.

Secretary: J. R. Hayward, M.B.E. Warden . Miss B. R. Morris.

The Hostel provides lodging and accommoda-tion for the wives and children (with or without their husbands and fathers) of members and ex-members of the Naval and Military Forces of the Crown, below the rank of Officer. It is managed by a Council, and though run closely in connexion with the Union Jack Club, the organisation and finances of the two institutions

The Indian Empire.

The Indian Empire extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King-Emperor through the Governor-General of India, or through any governor or other officer subordinate to the Governor-General of India; while "India" means British India, together with any territories of any prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government.

Boundaries.—The political boundary of India marches with Persia and Afghanistan from the Gulf of Oman to Povalo Schveikovski on the Taghdumbash Pannir. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire and Nepal, till the limits of French Indo-China are reached on the Upper Mckong. The Indian frontier, on leaving the Mckong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay pennisula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive and Minicov Islands, Aden and Perin, besides protectorates over Socotra, Bahrein, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Delb, the new capital, lies in 77° E. long.

Area and Population.—The total area of India proper is about 1,805,000 square miles, with a population of nearly 353 millions (about three-fourths of the population of the British Empire). The British Provinces, as distinguished from the Indian States, comprise 61 per cent. of the area, and nearly 77 per cent. of the population. The details of the 1931 Census (revised totals) are as follows:—

In this table the population shown in the Census Tables of 292x have been adjusted with subsequent changes of area

• Districts and Administered Territories

Physical Features.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region,

the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naim Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauma are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, benr, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarm or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. The sources of two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus, and the Ganges, which, during a journey S.E. and E of about 1,550 miles, drains almost all the Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges, 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Gauges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. The richness of the Indo-Gangetic plain, with its ample rainfall, enables it to support a dense population, almost wholly agricultural. The density of the population rises in some districts to 900 per square mile. On the other hand, in Baluchistan there are only 6 persons to the square mile. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Bhar and the United Provinces. In Northern India. there are two harvests, rabi (spring) crops being reaped in March and April, kharif (autumn) crops in October to December. In the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, byenas, jackals, squirels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India States. To the N W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Himdu Kush and Suleiman Mountains on the N W. form natural barriers of defence for Himdustam, so do the Vindhya Mountains, running almost due E from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhyas. The Eastern and Western Ghauts all but complete this environing triangle of mountain ranges. In the extreme N.W., south of the Vindhyas, and parallel to them, but north of the Western Ghauts, we find the Nerbudda and the Tapti flowing westwards, their basins being sharply defined by the Satpura Mountains, which he midway between them. As the Western Ghauts lie close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapti; all the rivers flow eastwards, through defiles in the Eastern Ghauts, into the Bay of Bengal. The four chief rivers are the Mahanuddy, in the extreme N.E. (520 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical

geography of Sonthern India has shaped its history: the S.W. coast, shut in by mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghauts, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oil-seeds, coffee, tea, indigo, tobacco, and chinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern tableland has furnished considerable supplies of minerals. At present the minerals principally worked are coal, manganese ore, mica, monazite, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaldy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs, while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamium, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced on a considerable scale, and jade, wolfram, and rubies are mined. The fauna include monkeys, jackals, tagers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the moisoon rains. The S.W. moisoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mointains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Decean, but is small in Sind and Rajputana. Madras benefits by the N.E. moisoon in the autumn.

Population.—The sixth general census of India was taken on the 26th February, 1931. The returns (revised totals) gave a population of 354,986,876, as compared with 318,942,480 in 1921 (for details see p. 641), an increase in the ten years of 106 per cent. The census total of 1931 is divisible into 271,749,312 (or nearly 77 per cent.) for British India, and 81,237,564 (or over 23 per cent.) for Indian States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burna, Assam, and elsewhere a much larger population might subsist. There were in 1931 37 towns with a population of over 100,000. Urban areas of over 5,000 people comprise only about 10 per cent. of the

total population.

Caste—Owing to the operation of the caste system ludin is broken up into a large number of mutually exclusive aggregates, the members of which are forbidden by an inexorable social law to marry outside the group to which they themselves belong. A caste may be defined as a collection of families, or groups of families, bearing a common name, which usually denotes or is associated with a specific occupation. The boundary of a caste may be said to be fixed by the rule restricting internarriage, but its social status depends on the occupation of its members and their habits in respect of diet. The chief castes are:—Sheikh (33,388,000), Brahman (14,255,000), Chamar (11,225,000), Ahir (9,032,000), Rajput (8,773,000), Burmese (7,827,000), Jat (7,375,000), Maratia (6,566,000).

castes are:—Shekh (33,388,000), Brahman (14,255,000), Chamar (11,225,000), Ahir (9.032,000), Rajput (8,773,000), Burmese (7,827,000), Jnt (7,375,000), Maratha (6,566,000). Helupons.—The population by religions in 1921 includes 216,734,586 Hindus (68 per cent. of the total), 68,735,233 Muhammadans (21 per cent.), 11,571,268 Buddhists (3.6 per cent.), nearly all in Burma, leaving nearly 7 per cent. for all other religions, including 4,754,064 Christians (seven-twelfths of whom are in Madras, Travancore, and Cochin), 3.238,803 Sikhs, 1,178,596 Jams (a decline), 101,778 Parsis, and 9,774,611 described as Primitive or Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are influenced by the caste system and other Hindu characteristics. The number of Indian Christians has increased nearly threefold since 1872.

Occupations.—Over 72 per cent. of the population was in 1921 dependent on agricultural and pastoral pursuits. Industrial occupations support 33,000,000 persons, of whom nearly one-fourth are dependent on textile industries. The most important of these are industries connected with cotton, which employ nearly 6.500,000 persons, the majority of whom depend on hand-weaving. The public services comprise over 4.825,000 persons.

Sex—Marriage is almost universal owing to religious obligations. The movement against infant marriage and enforced widowhood is gaining ground. There were in 1921 over 26,834,000 widows in India. The males outnumbered the females in 1921 in the proportion of 1,000 to 945, and 1,000 to 943 in 1931.

The Languages.-India has 222 vernacular languages, of extraordinary variety. languages spoken by 316,056,000 persons in 1921 are grouped in seven families. The principal languages are Western Hindi (spoken by 96,714,000 persons), Bengali (49,295,000), Telugu (23,601,000), Marathi (18,798,000), Tamil (18,780,000), Punjabi (16,231,000), Rajasthani (12,681,000), after which come Oriya, Kanarese, Gujarati, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and is the lingua franca of India. English is understood by many.

LARGE CITIES WITH POPULATIONS EXCEEDING 122,000 (including Cantonments).

Enumeration incomplete

A Brief Sketch of Endian Wistory.

ALEXANDER'S invasion of India (326 B C) is the first landmark of Indian history A dun outline of earlier events can be traced from the evidences of race and language, from the traditions con-tained in ancient Indian literature, from accounts by later Greek and Chinese writers, and from coins and inscriptions The oldest Indian books are supposed to date from about 2500 B C.; they are written in Sanskiit, a language akin to Persian and to the principal European lan-guages. The writers of these books were Aryans, a lace which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of

while in the Code of Manu we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the Aryas (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities In the sixth century B.c. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kahetriya caste, who took the name of Buddha, the "awakened, and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the found in India, and conquered, a population of and died about 457 B.C. Its supposed remains yellow-shinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types buddhist gospel Buddhism was, in India itself, there are still survivals. The religion and metaphysics of the Aryansare to be found in the Veitas of caste and the exclusiveness of the Brahman and Vyanishdats, their epics, the Mahabhatata presthood. It prevailed widely from 350 B.C. to and Ramayana, extol their mythical heroes; 350 AD, but was never quite general, and existed

The principal latest official publications relating to India, are:—Pailiamentary Papers (Session 1930-31)—India Finance Act, 1931 (H.C. 120). Moral and Material Progress Report, 1939-30 (H.C. 121); Burma Criminal Law Amendment Act, 1931 (H.C. 120); East India Budget, 1931-32 (H.C. 123); Burma Criminal Law Amendment Act, 1931 (H.C. 120); East India Budget, 1931-32 (H.C. 123); Constitutional Reforms (Cd. 3700, 3713); Round Table Conference (Cd. 3783, 3778, 3778); Statistical Abstract, 1939-30 to 1938-39 (Cd. 3882). side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam. China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.0) did not penetiate beyond the tributaries of the Indus, though he sailed down the river. his death his Iudian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. gasthenes describes the democratic village communities of the Punjab, speaks of the people as brave and truthful and adverse to hitigation, and notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this period, was a convert to Buddhism, became the State religion Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China who visited the country between 399 and 695 A D.
The influence of the Greek conquest was

swept away by the Scythians, who poured in many waves, between about 165 B C and 320 A.D., over Northern India. Their imoads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hundus. The sixth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, made himself master of Northern India, and ended his reign in picty and peace

From about 650 to 950 anarchy prevailed
The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (m Afghamstan) began a long series of mensions into India, no fewer than fifteen expeditions taking place between 999 and 2027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar The succeeding dynasties of Afghan kings held power in India for soo years, but their advance was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kuthnd-din, whose memory is perpetuated by the Kuth Minar, near Delbi. The first Muhammadan invasion of the Decean took place in 1294.

THE MOGUL EMPIRE. - The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus During the regu of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Dellu in 1308, and laid waste a great part of Hindustan A peniod of weak dynasties followed, frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by about this time, the Mahiattas rapidly extended the Mogul Emperors In 1946 Babar, a direct their territory and influence, conquering Gujarat,

descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the Mogul EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humapun (1530-55), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah Sur, who reigned from 1540-1545. Albar the Great, Humayun's son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerbudda Moreover, of the Muhammadan kingdoms of the Deccan, Ahmeduagar, Berar and Bidar were also bed, and Bigapur and Golconda forced to pay tribute. Akbar followed up quests by important financial reforms Akbai followed up his con-He was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindin, Todar Mall, his able finance munister, Abul Fazl, the historian of his leigh; and Fazz, the pict Jahangir (x605 27) icceived in 1616 Sir Thomas Roe, the ambassador of James I. Under Shah Jahan (1627-1658) the Mogul Empire reached the zenith of its glory Many stately buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahau's reign was embittered by the rivalues of his four sons Amangzeb (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666) Amangzeb had great ability and comage, but religious intolerance, distrust and dissimulation characterised his chequered career. 161gn, in some respects splendid, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore But from this time the decline of the empire began. Four sons disputed the right of succession, and Bahadur Shah (1707-12) secured the crown. After four short-lived emperors Muhammad Shah (1719 48), grandson of Bahadur, came to the throne His vicetoys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Decean About 1724 part of the Decean became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam) In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Dellin, gave oders for a general slaughter of the inhabitants, and carried off enormous plunder All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, Almad Shah (1748-1754) and Alamqu II (1754-1759), occupied the throne, and were succeeded by Shah Alam (1759-1806), who came to terms with the British.
THE MARKATTAS.—As the Moguls declined,

the power of the Mahrattas increased were Hindins, and their country was in the Western Ghats, to the cast of Bombay. The founder of their power was Sivan (1627-1680), a chieftan of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom Balan Vishranath (1712-1720) Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family, Sivair's descendants thenceforth holding a merely nominal position. I nder the Peishwas, aided by Scindia, Holkar, and the Gackwar, who formed independent States

Malwa, Berar, and Orissa. Although they were everely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. With the Pindaris, a horde of freehooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who had gradually extended their

power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay or the requi-empire gave the opportunity, not to a nation, but to a religious sect, united by military dis-cipline, to establish territorial dominion. The founder of the Sikh religion was Nanak Shah, a of the Mahrattas. There the decay of the Mogul Hindu reformer, born near Lahore in 1469. He preached the one God, purity of life, and abolition of caste. He had ten successors, named gurus or apostles, ending with Govind Singh (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation It became a power under Runt Sinah (1780-1839), who, revolting against the Afghau Anir, by whom he had been appointed dovernor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision with the British, and after two wars the Sikh kingdom was annexed, and became the pro-

vince of the Puniab (z840)

EUROPKAN ADVENTURE. - From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 1sth century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calleut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 1sth century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India The sea route round the Cape of Good Hope was discovered by round the Cape of Gront Inope was uncovered by Vasco da Gama, who anchored before Calicut in May, x498. From that time until they lost their naval supremacy, a century later, the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, the control of the cont Francis of Almeida (1505-1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominon, notably on the Malabar coast This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. Up to the union of the crowns of Spain and Portugal in 1580 under Philip II., the Portuguese brought Indian pro-Philip II., the Portuguese brought Iudian products to Lisbou, whence the Dutch carried them to other parts of Europe But when Philip II, on account of the Dutch verolt, shut Lisbou against them, the Dutch were driven to trade directly with the East In 150a, by annalgamating evisting trading companies, they formed "The Dutch East India Company," and the principal Portuguese settlements in the East very grainally cantured By 1556 the Portuguese

guese held only those remnants of their Indian possessions which they still hold. The Dutch, who had some small trading factories, were in turn forced by the British to relax their hold on India. French and Danish East India Companies were established in zooz and zozo respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION — At the close of the 16th century the English became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 3rst December, 1600. There were say subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual The Portuguese resisted the new competitors, who nevertheless obtained a permanent footing at Surat after several stubborn engagements off Swally in z6za In z6z5 the British ambassador, Sir Thomas Roe, supported by the Emperor Jahangir, greatly improved the position of the Company. In 1639 the English acquired a strip of land on the east coast, built a factory there, fortified it, and named it Fort St. George: m 1653 this settlement of Madras became a Presidency. Charles I.'s reign rival enterpuses led to confusion and piratical excesses, but in 1657 co-operation and discipline were secured by the charter granted by Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1652, Charles II. married Katharine When, in x65a, Charles II, married Katharine of Braganza, a part of her down from Portugal was the Island of Bombay; in x658 he transferred all his rights over it to the Company for an annual pa, ment of £xe. In x687 Bombay replaced Surat as the seat of the western Presidency, Although in x633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in x65x a factory had been established at Hooghly, yet in that part of India they held no territory as in Bombay and Madras. In x688 the Muhammadan rulers and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but being invited to return, they laid, in 1690, amid swamp and jungle, the foundations of the Presidency of Fort William, which was destined to develop into the city of Calcutta. In 1693 a new charter was granted to the company. In 1698 a charter was granted to a rival company called "The English East India Company," to distinguish it from the old "London Company" After a brief period of conflict and trude losses, the rival companies came to terms in 1702; and in 1708 they were amalgamated under the title of "The United Company of Merchants of England trading to the East Indies"

When Great Britain engaged in war with France in 1744, the lival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix been well supported from home, he might have founded a French empire in India. The first reverses of the English were retrieved "The Dutch East India Company," and the principal Portuguese settlements in the East was followed up by a scries of brilliant move-were gradually captured. By refer the PortuFrench army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. Since then the territory retained by the French in India has been insignificant, and in it they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawah of Bengal

in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal m 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Ben-1703 the English were again chinories in Loring gal, but completely defeated their opponents at Buxar (1764). In 1765 (live (now Loid Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. Owing to Chve's efforts, the Company in 1765 received from the Emperor at Delhi the discant or fiscal administration of Bengal, Bihar and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under their government Thus were laid the foundations of England's

territorial dominion in India

After an interval of misrule Warren Hastings : After an interval of misrule Warren Hastense (2773-85) was appointed Governor of Bengal, and in 1774 Governor-General, on the creation of that office under the Regulating Act of 2773. He vigorously reformed the revenue system and judicial procedure. Hastings was the first great administrative organiser of the Bittsh possosions. He greatly increased the power and territory of the Company, not-withstanding the opposition of his Council Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple albance of the Nizam, the Mahrattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached on a number of charges, but acquitted.

The first administration of Lord Cornwallis

(1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of a permanent settlement of the land revenue, by a reform of the judicial system, and by the third Mysore Wat, in which he detented Tippoo, the son and successor of Hyder All. The rule of Sir John Shore (1793-98) was uneventful.

The administration of the Marquess Wellesley

(1798-1805) was distinguished by many important events. Tippoo, as hostile to the English as Hyder, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire.

Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tippoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassein (1808) broke up the Mahratta confederacy, but led to the Second and Third Mahiatta Wais, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Loid Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at

making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a political power with a preponderating influence throughout India. During the brief second administration of Lord Cornwalls (180g), and that

of Sir G. Barlow (1805-7), Wellesley's policy of subsidiary alliances was reversed

Lord Minto (1807-13) established peaceful relations with the Punjab, Afgianistan, and Persia, through the mediation of Metcalfe, Elishington and Melecular Co. Persia, through the mediation of Metcane, Elphinstone, and Malcolm teapectively. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was sholished. Under the Marques of Hastings (1814-23) a severe struggle with Nepaul ended with the

Treaty of Sagouli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions Lord Hastings in the same year crushed the marauding Pindans of Contral India, who had devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their causing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India He encouraged education Lord Amherst (1823-8) succeeded Lord Hastings Encroachments on Butish districts by the King of Ava and his insolent refusal of all rediess led to the first Burmese War, which cost so,ooo lives and nearly £14,000,000, but gave to India the provinces of Aracan and Tenasserim, and, practically, Assam. While Lord William Bentinck was Governor-

General (1828-35), steam communication with India was introduced, suitee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and abolished the restrictions on the residence of British subjects in India. The resolution of Lord Auckland (1835-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan Wan (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of Lord Ellenfrom Cabon. The administration of Love Esterio-borough (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). Lovid Hardinge (1844-48) conducted in person the first Sikh War, and fought a series of severely contested intitles, ending with Sobrason (1846). Lovid Dalhomei's administration (1848-50) was fruitful in events. The Second Sikh War resulted, after seven the bline, in the submission of the

after sevene fighting, in the submission of the Sikhs and the annevation of the Punjah (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promotod steam navigation with England via the Red Sea, and opened the Ganges Canal. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer

In 1849 this "doctrine of lapse" was applied. He took the first step in currency reform by to Satera, and in 1857 Jhans similarly became British territory, while on the death of the hat of the Mahratta Proces of Nagnu, his territory was anneved, and became the Central Provinces in 1853 In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or figliting.

Harl Canning (1857-62), who succeeded Lord Dalhouise, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened British rule in India A mutmy of sepoys broke out on the toth May, 1857, at Meerut, and spread through the whole Bengal Army Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt The siege of Delhi, the massacre at Campore, the relief of Lucknow, and the Central India campaign stand out among the stiring events of that momentous Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the great mutmy was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown

INDIA UNDER THE CROWN—The "Act for the Better Government of India" established the authority of the Crown, and a Proclamation to the Princes, Chiefs, and People of India, dated the xst Nov., x858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honomable East India Com-Legislative Councils were established Lord Canning was succeeded in 1862 by Lord Elgen, who, however, died in Nov., 1863.

Sir John (Lord) Lawrence (1861-69) reformed the finances, which had been seriously buildened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Blutan Wai (1864) and by the terrible Orissa Famine of 1866. He encouraged irrigation Lord Mano (1869-72) effected many administrative reforms, instituted State railways, pro-

moted the construction of roads and canals, and mangurated the system of provincial finance,

which has since been extended.

During the tenure of office of Lord Northbrook (1872-76) the late King Edward VII, then Prince of Wales, visited India The Viceroy devoted attention to finance and to famine relief 1875 the reigning Clackwar of Baroda was deposed for misrule and disloyalty

Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India and by the Second Afghan War In **1877** the Queen assumed the title of EMPRESS OF INDIA

The peaceful term of the Marquess of Ripon (1880-84) was marked by the extension of local self-government, and by fiscal, judicial, educa-

tional, and other reforms

His successor was the Marquess of Dufferin (1884-88) In 1885-6 occurred the Third Burmese War, by which Upper Burma with the Shan States was annexed. The N.W frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. National Congress met in 1885 The first Indian

The Marquess of Lansdowne (1888-94) continued his predecessor's policy of strengthening the army and consolidating British influence on the frontier. The Indo-Afghan boundary was defined,

of a native State to the British Government. and a serious outbreak in Manipur was suppressed, closing the Indian mints to the free coinage of silver. He reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation

and criticism in financial matters.

The vicerovalty of Lord Elgnn (1894-99) was full of events. In 1895 an outbreak in Chitial made necessary a large military expedition to relieve the garnson Plague broke out in 1896, and has raged more or less severely ever since In 1896.7 an area of 307,000 sq. ms, with a population of 70 millions, was visited by a grievous famme In 1807 the border tribes from Chitral to Baluchistan 10se against the British garrisons. In the Tirah campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong. The frontiers of Afghamstan, Persia, and China were also defined. The general Customs tauff, abolished in 1882, was reimposed in 1894.

Lord Curzon (1899-1904 and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupce, at the exchange of Rs 15 to £r. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq ms with a population of 60 millions. Loid Curzon's term of office was a period of reform He appointed Commisand reconstruction sions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. He instituted agricultural banks and departments, and initiated legislation to free the cultivators The famme codes from the money-lenders were amended. A new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901) The Aden and the Frontier Province (1901) The Aden and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was maugurated Educational policy was reviewed and reforms introduced A muchneeded reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam In 1904 a mission with a military escort proceeded to Tibet, and secured favourable treaty. During Lord Curzon's absence in England for a few months in 1904 Lord Ampthall occupied the post of Viceroy. Lord Curzon was reappointed in Dec , 1904 In 1905 the treat; with Afghanistan was renewed The Viceroy reduced the dimensions of Bengal, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. He carried out great reforms in the Army in conjunction with Lord Kitchener (appointed Commander in Chef in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Govern-

ment, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905.

Prince of Wales (now H.M. King G made a tour in India during the winter of 1905-6. For some years after 1905 there was agitation among Bengalis owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov, 1907 In his Budget speech in 1907 the Secretary of State. Viscount Morley, foreshadowed important reforms in Indian administration, designed to associate the people mo e closely with the Government. He

nominated two Indian members to his own Council, and an Indian member to the Governor-General's Council—He appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action was taken on their reports. In roos the unrest in Bengal assumed an anarchical character. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. Owing to the continued unrest in 1909 and 1910, a Press Act, to control printing

presses, was passed

Lord Hardinge succeeded in Nov , 1910 Indian Legislative Council in June, 1911, pro-hibited indentined emigration from India to Natal after 1 July, 1912, and a new Seditious Meetings Act was passed. A great Durbar was held at Delhi on 12 December, 1911, by H M King George, to announce his Coronation On this occasion the King-Emperor also made announcements of new and fai-reaching steps in Indian policy, viz., the transfer of the seat of Government from Calcutta to Delhi, and the creation of a Governoiship for the presidency of Bengal, of a Lieut-Governoiship for Bihar, Chota-Nagpur, and Orissa, and of a Chief Com-missionership for Assam. Delhi was chosen as the capital on geographical, historical, and political grounds The provincial changes involved a partial rescission of the partition of Bengal and the abolition of the province of Eastern Bengal and Asam, created in 1905 Bengal as recon-stituted is a compact Bengali-speaking province, placed under a Governor in Council. A new province, Bihai and Orissa, was formed, includ-ing Chota-Nagpur and the Sambalpur district Assam agam became a separate province, under a Chief Commissioner The reconstituted provinces came into existence on r April, 1912 In pulsuance of recommendations by the Decentialisation Commission, enhanced powers in respect of appointments and expenditure were granted to local governments having a quasi-permanent provincial settlement over, greater permanency was arranged for in financial settlements with the provinces, the control of the Government of India being relaxed In Dec. 1212, the Viceroy took formal possession of the new headquaters at Delhi The State entry was maired by an attempt on the life of the Viceroy The outbreak of The Great War in August, 1914, was the signal for an outburst of loyalty and devotion to the King-Emphero on the part of the princes and peoples of India. Practically all the inling chiefs placed their military forces and the issources of their states at the disposal of the Government.

Following on the outbreak of war serious disturbances were started in the Punjab and elsewhere by emigrants returning from Canada and the United States imbued with revolutionary ideas Order was iestored as a result of measures taken under the Defence of India Act, which was passed in March, 1915 Lord flarding's sterm of office as Viceroy was extended from November, 1915, to Vlarch, 1916 The Viceroy amounced in March, 1916, that it had been decided eventually to abolish the system of indentured emigration from India Lord Hardinge put forward proposals for post-war constitutional reforms.

Lord Chelmsford succeeded in April, 1916 The year 1917 was marked by certain symptoms

of unrest and the development of an agrication for constitutional changes towards self-government, or, in its extreme form, "Home Rule for India

The Public Services Commission, appointed during Lord Hardinge's administration, reported. Towards the end of 1917 the Secretary of State visited India in connexion with a development of constitutional progress. The Bombay Government took the first steps tobounday to the control in the steps 20 wards obligatory pinnary education, a policy of more complete local self government was decided on by the Government of India. The influenza epidemic spread to India, and it is estimated that over 12 million deaths in British India and Indian States resulted The Industrial Commission, appointed in 1376, issued a report. In 1379 a bill was introduced into Parliament embodying the proposals of the "Montagu-Chelmstord Joint Report," and eventually passed During the year considerable distress occurred in consequence of the partial failure of the xgx8 autumn crops throughout Northern India and the Pennsula, and telief measures were undertaken Serious disturbmeasures were undertaken Serious disturp-ances in the Punjah and Dellin, iesuiting in many deaths, followed on a "passive resistance" movement, mangurated by Mr Gandhi against the "Rowlatt" Bills, introduced by the Govern-ment of India, on the recommendation of the "Rowlatt" Committee, for renewing some of the powers with which the Government had as med themselves during the War to deal with sedition. The murder of the Amir and the subsequent events in Afghanistan were followed by an inroad of Afghans and some frontier tribes into India, necessitating prompt military action by the Government of India The "Sadler" Commission on the Calcutta University reported during the year, and made diastic proposals for recasting the Indian secondary and university educational system The Home Parliament, by rules, laid down the details of the constitution of the new Central and Provincial Governments (see pp. 655, 657) The Ann's representatives visited India and discussed with officers of the Indian Government the possibility of a resumption of more friendly relations Fighting with the Mahsuds on the North-West frontier continued throughout the year, in consequence of which the Vicercy announced Government's intention to occupy Central Wazinstan, and to continue the railway from Jamud towards the Khyber. Further steps towards employing more largely Indians in the various Government services and for the improvement of conditions of service and pay of both European and Indian members of the same were taken. The tecommendation of the Exchange and Currency Committee for the linking of the rupee to gold and the adoption of an exchange rate equivalent to one-tenth of the gold contents of the sovereign, v, an exchange rate of Rs to to the ξ , was adopted A High Commissioner for India in London, with a separate establishment, responsible to the Government of India for certain agency work, previously per-tormed by the India Office, was appointed. The Army in India and the Medical Services Com-mittees respectively reported The Army in India Committee attempted to determine the part to be played by the Army in India in a scheme of Imperial Defence and to analyse the steps which must be taken to make the Aimy, both in its administration and its personnel, more efficient and more attractive to the right type of soldiers.

In January, 1921, the new Indian Legislature, Provincial Councils, and the Chamber of Princes, were inaugurated by the Duke of Connaught.

Lord Reading succeeded in April, xgaz. The battle between constitutionalism and revolution continued. A conflict between Sikhs at Nankans resulted in many deaths. Mr. Gaudhi, the Ali brothers, and their associates, continued to advocate non-co-operation with the Government and boycott of the reforms. The utterances of the Ali brothers forced Government to order their arrest. The Moplahs (Muhammadan fanatics of Malabar) resisted the ordinary processes of law, and a widespread outbreak of violence ensued which forced the authorities to take strong military measures for its suppression. Frontier disturbances and fighting con-tinued. Failure of the crops in some parts necessitated the opening of relief works. Special missions were cont. to Afghanistan and Tibet. The Railway Committee reported and recommended drastic changes, including the termination of the system of management of railwavs by Government companies domiciled in England. The Jalis Committee reported, and Government announced its intention to abolish the Andamans penal settlement.

In November the Prince of Wales visited India. In zoza the Government arrested Mr. Gandhi, who was sentenced to six years' imprisonment. The Government found it necessary to give to Ruling Princes some measure of protection against attacks in the Press.

The Fiscal Commission (appointed in rost) reported and advised the adoption of a policy

of protection.
The Hon. V. Srinivasa Sastii visited the Dominions, as a representative of the Government of num, as a representative of the Government of India, to discuss with the leaders of political thought the disabilities of Indians in the self-governing Luminions. Twenty-three Acts and Regulations supplementing the criminal law were repealed A Central Advisory Board for Railways was established.

In 1923 Burma was constituted a Governor's Province The "Inchcape" Retrenchment Committee, appointed in 1922, reported and recom-mended a total reduction in the Budget of nement a control fettion in the marget of the principle of Protection, but declared that it should be applied with discrimination; hitherto the Indian tariff had been a revenue tariff. A trade Convention was concluded with Afghanistan. A Bill was passed providing for the removal of existing racial distinctions in the criminal procedure applicable to Indians and non-Indians. The new frontier policy further developed by the completion of various roads for mechanical transport within Waziri-stan and along the Derajat border: Jandola and stan and along the Derajat bortier: Jandola and Razmak were held by regular troops pending the completion of this road programme. At the Imperial Conference, a Resolution was passed recommending each Dominion of the Empire concerned to set up a Commission to consider, in conjunction with a Commission of equal number from India, how far the principle laid down by the Imperial Conference of rest, that Indiana leavally resident overseas should that Indians lawfully resident overseas should not suffer derogation of rights of citizenship, had been given effect to and to what extent it could be further applied. Conspiracies and methods of violence to further political aims were revived during the year, and the Bengal Government was given special powers to deal with violent

crime. The Punjab was greatly disturbed by the Sikh invasion of the Nabha State. The Royal Commission on the Superior Civil Services, appointed in 1923, reported and recommended financial improvements for the Indian Civil and other Services. Further Indianisation of the Services was recommended. During the year a Legislative Council was set up in Coorg.

Early in 1928, the Swarajist leader, Mr. Das, repudiated the policy of violence, but asked in return for the cessation of "repressive' mea-A committee was appointed to enquire into the difficulties arising from or inherent in the working of the Constitution, and recom-mended many alterations, particularly that the control of the Secretary of State should be relaxed in purely Indian matters. The terms of relaxed in purely Indian matters. The terms of reference did not, however, extend to the larger question of a complete revision of the Constitution, contemplated in the Montagu-Chelmsford scheme of rors. The Viceroy came home to confer with the Home Government, and on his return to India announced the decision that the moment for such an enquiry had not arrived. The Government extended the policy of protection by granting a bounty on steel manufactured in India. The Khyber Pass Bailway, 27 miles in length, from Jamrud—some three miles from the entrance of the Pass—to Landi Kotal, on the Afghan border, was opened.

In 1026 the Finance Member announced, for the fourth year in succession, a balanced budget, and that, consequently, more expenditure on medical research, education, sanitation, &c, was contemplated. The Cotton Excise duty

was abolished.

It was decided to reconstruct the Royal Indian Marine as a combatant force so that India may ultimately undertake her own naval defence. The Government of India decided to prohibit the export of opium for medical pur-poses, thus taking the lead in initiating the measures for which the Geneva Protocol provides. Lord Irwin succeeded Lord Reading as Viceroy in April, 1926.
In the United Provinces a Bill was passed

to improve the lot of tenants in Agra Province by facilitating occupancy tenme and for the prevention of unauthor ed imposts by laud-

lords.

The Royal Commission on Indian Currency and Finance recommended that the gold value of the rupec should be fixed at 18.6d., that the currency authority should be put under a statutory obligation to buy and sell gold or gold exchange at appropriate prices to maintain the ratio, that a central bank should be created apart from the Imperial Bank and that measures should be taken to establish a gold standard for India Government announced their intention to adopt the ratio of is. 6d. and to pass the necessary legislation to put the matter on a statutory basis.

Following the success of the Government mission for the suppression of slave trading in the Hukawing valley an expedition was sent to the Kachin tribal chiefs in Burna with the object of endeavouring to persuade the chiefs to agree to the abolition of the system of tril al slavery in the area lying between the head waters of the Irrawaddy. In Nepal the slave liberation scheme, formulated by the Prime Minister of

that State, was completed at a cost of £275,000. Important changes in the administration of the State of Hyderabad were made by H.H. the

Nizam following representations by the Supreme Government.

During the year there was a recrudescence of communal and religious strife between Moslems and Hindus, and serious riots, with great loss of lives, occurred in most parts of India, particu-larly in Kohat, Calcutta and Delhi. The Government of Bengal was obliged to proclaim a state

of emergency.
The elections for the Indian Assembly and Provincial Councils were held towards the close

of the year. In 1927 a continuance of the measures for the protection of the Indian steel industry, in a modified form, was recommended by the Indian Tariff Board, whose main proposals were accepted by the Government of India. It was also decided to protect the cotton textile in-dustry against competition in cotton yarn produced under conditions which enable such yarn to be produced at a cost below that at which it can be produced in India, by an alteration in the import duty on cotton yarn, and to abolish the duty on imported mill stores, etc. An Act for the registration of trade unions came into force. The rupee was stabilised by legislation, at rs. 6d., and a bill for the estab-lishment of an Indian Reserve Bank was introduced. The Bombay Back Bay Reclamation Committee recommended the carrying on of a certain portion of the work, but that it should in future, as far as possible, be undertaken by contract agency.

A substantial and progressive Indianisation of the Indian Army was recommended by the Sandhurst (Skeen) Committee in order that, by 1952, 50 per cent. of the cadre of officers should be Indians

A settlement was reached with the Government of South Africa on the question of the position of Indians in the Union. A Public Services Commission was formally constituted. The new Council House at New Delhi was opened. The Indian Princes met in conference to consider their future status. His Highness, the Maharajah of Patiala, sanctioned a scheme of compulsory education in his State. Slavery was abolished in the State of Kalat (Baluchistan).

In the Home Parliament the Indian Navy Bill and the Indian Church Bill were passed. The and the Indian Church Bill were passed. latter provides that the Church in India shall

be an autonomous body.

In November the Home Government announced its intention to set up a Statutory Commission, with the Rt. Hon. Sir John Simon as Chairman, to report to what extent it is desirable to establish the principles of responsible government in India, or to extend, modify or

restrict the degree of responsible government.
In 1928 the Commission visited India, but was unfavourably received by many who were dissatisfied with the terms of reference. Boycotts and sympathetic strikes were organised. Towards the end of the year the Commission succeeded in securing the offer of the co-operation of most of the political parties and groups previously hostile. A Committee was appointed, with Sir Harcourt Butler as Chairman, to consider the relations between the Paramount Power and the Indian States, with special reference to the financial and economic relations between British India and the States.

The Royal Commission on Agriculture in India (appointed in 1926) issued its Report and the first step to carry out its recommendations was taken by the opening of a Conference in India to draw up schemes for co-ordinated action.

In 1927 it was amounced that in future, the number of direct vacancies open to Indian candidates at Sandhurst will be doubled, that a certain number of vacancies will be reserved for Indian officers holding the Viceroy's commission, and that Woolwich and Cranwell will be open to Indian aspirants for King 8 Commissions.

In 1999, power was given by the Appellate
Jurisdiction Act to appoint Indian judges, etc.,
as additional members of the Judicial Committee of the Privy Council for the hearing of
appeals from India. The Statutory Commission continued its labours, but met with a considerable amount of opposition organised by some of the political groups in India. Indian leaders attempted (but with little success) to draw up proposals acceptable to the main re-cognised political parties for submission to the Commission. A bill was introduced in the Assembly providing for the removal from India of non-Indian communist agents and a few days later an attempt was made by commu-nists to destroy members of the Assembly by throwing bombs at the Government benches. The Bill was passed later as an Ordinance owing to the refusal of the President of the Assembly to allow its discussion on the ground that some to allow its discussion on the ground that some of its provisions were sub radice in view of a trial of some conspirations then proceeding. There was considerable unrest in parts of India during the year, particularly in Bombay. An Act was passed providing for the investigation and settlement of trade disputes; under it strikes and lock-outs in utility services are penalised, strikes and lock-outs having any object than the furtherance of a trade dispute within the trade or industry in which the strikers or employers are engaged, or are designed to inflict severe general and prolonged hardship upon the community and government are illegal.

A Royal Commission was appointed to report on the existing conditions of labour in industrial undertakings in British India, on the health, efficiency and standard of living of the workers, and on the relations between employers and employed. A Committee was also appointed to consider the general problem of road development.

An Act was passed providing that the age of marriage shall not be less than 14 and the age of consent not less than 16.

The Indian States Committee presented its Report. It recommended that the Viceroy, not the Governor-General in Council, should in future be the Agent of the Crown and that important matters of dispute between the states themselves, between the states and the Paramount Power and between the states and British India should be referred to independent Committees for advice. The Committee dealt with the relationship between the Paramount Power and the financial relations between British India and the states, particularly the claim of the states for a share in the maritime customs, the proceeds of which are enjoyed at present exclusively by British India.

In view of the impending issue of the Report of the Statutory Commission it was decided to extend the term of the Central and Provincial

legislatures, thus postponing the elections beyond the end of the year.

In 1930 the outstanding event was the issue of the Report of the Statutory Commis-

sion (the Simon Commission). The report was unanimous A survey of the facts, containing an analysis of the trend of political thought in India was first published (Cmd 3568), then, after a short interval, the Com-mission's Recommendations (Cnd. 3569) These, though m no sense revolutionary, foreshadowed many changes: First, the separation of Burna, whose political association with India is not based on any natural or racial affinity, but is a mere accident of history; and, secondly, a number of radical reforms in the constitution of India proper. Broadly these may be summarised as the grant of the greatest possible measure of independence to Local Governments within their own sphere, and the substitution of a Federal system in place of the existing arrangements Measures were also proposed whereby representatives of the Indian States will join with representatives of British India for the discussion of matters of common concern in a "Council of Greater India," to be appointed not by Statute but by Royal Proclamation

A notable feature of the Statutory Commission's scheme was its insistence on the principle that the constitution to be framed should be such as will not require to be revised and overhauled by external authority at stated intervals, but should contain within itself provision for adaptation by a process of natural growth, to meet new cucumstances and changing conditions, thus avoiding the unsettlement caused by periodic enquires. The ideal of a Federation for All-India was held up as one to be attained by degrees as the Feudatory States come to realise the desirability of entering into closer political relations with British India; and the reconstruction of the consti-tution of British India on a federal basis was advocated as an essential preparatory step

towards that ultimate objective

It was proposed that the Provinces should be provided with enlarged financial resources Their Governments would no longer be "dyarchic," as under the Montagu-Chelmsford Constitution, but unitary, every Member being required to accept joint responsibility for all acts of the Administration Ministers, whether chosen from the local Legislature or not, were to be nominated by the Governor, and would have charge of those branches of the administration which are now "reserved" to the Official Side of the Government, e.g. control of the Police and maintenance of Law and Order The Commission recommended that reserve powers should be vested in the Governor for such essential purposes as the protection of minorities and of the rights of the Services, and the carrying on of the Government in any emergency such as the breakdown for any reason of the normal arrangements; that Legislatures should be enlarged, the franchise-basis widened, and constituencies reduced to more manageable size Moreover, a certain elasticity was recognised as indispensable, and measures were indicated whereby each Province may advance towards self-government on the lines found best suited to its individual needs, provided always that the rights of minorities were not invaded by any constitutional changes thus effected.

Other recommendations were that in the Central Government the "Legislative Assembly" should become the "Federal Assembly"; the Council of State, or Upper House, to continue with its existing functions and constituent clements.

The Commission suggested that it may be desirable to treat the defence of India as a matter falling within the responsibility of the Governor-General (advised by the Com-mander-in-Chief as at present) as repre-sentative of the Imperial Authorities instead of as a function of the Governor-General in (Executive) Council in association with the Indian Legislature The possibility that this suggestion might be held to decogate from the prestige of the Indian Government was recogmised . the Commission made it only because on any other basis they regarded the military problem as an "almost memperable" obstacle to the carrying out of the policy laid down in 1919 of the "progressive realisation of responsible government." It was submitted that so government." It was submitted that so long as British troops are required for the defence of the Indian frontier the British Parliament cannot surrender to any subordinate or independent authority effective control in

this sphere The Commission's Report, published in June, was received with a storm of disapprobation in Indian political circles, and was the signal for a recrudescence of the non-co-operation movement in an acute form There were serious riots and bomb outrages in various parts of India. In the course of the measures taken to restore order Mr. Gandhi and numerous other political leaders were brought to trial, convicted, and

sentenced to terms of imprisonment

In September the Round Table Conference was convened in London as the next stage in the process of settling the future constitution

On the North West Frontice there were repercussions of the unrest in India itself Repeated raids by tribesinen necessitated defensive and retaliatory measures, particularly by the Royal Air Force.

General elections to the Indian and Provincial Legislatures took place in the autumn

In 1932 the various Committees of the Round Table Conference presented their Reports, one of the most important being that of the Federal Relations Sub-Committee outlining the constitution of a Federal Government of India. The representatives of the Indian States had expressed then willingness to consider their entry into a Fedcial system The Conference adjourned in January. Later, there was considerable disorder in India, but eventually negotiations resulted in an agreement for the cessation of civil disobedience and of the boycott of English goods

New Delhi was inaugurated in February. The Earl of Willingdon succeeded Lord Itwin as

Viceroy in April.

The Round Table Conference re-assembled in I ondon in October, and during the month discussed the composition and functions of the proposed Federal Legislature, the Federal Court, the representation of minorities, the States' places in the Legislature, &c. On November z it was an ounced that the Federal Structure Committee's Draft Report (subject to alterations and amendments by the Committee) contained proposals for the constitution of a Federated India, with a scheme for a Legislature, consisting of (z) an Upper House (200 members), composed of representatives of the Provinces and of the States, "elder statesmen," and a small propor-tion of members appointed by the Vicercy; (a) a Lower House (300 members), including roo representatives of the States elected by the free vote of qualified voters from territorial constituences, and special representatives of the landloid interest, commerce and labour. Other proposals were that members should be required to take an oath of allegiance, that Bills to become laws should be assented to by both Chambers, that power should be vested in the Governor-General to call a Joint Session in case of disagreement, and that the same course should be followed in financial legislation.

During the year it was decided to convene a Round Table Conference to consider the future constitution of Burma and the relations of Burma with India. The position of the North West Frontier Province in the proposed Federation was considered by a Committee appointed by the Government of India. The Royal Comnussion ("Whitley") on Labour, appointed in 1929, submitted their Report and recommend-ations In September the Finance Minister announced that, in consequence of the developments in the first half of the year, it was proposed to impose a temporary surcharge of as per cent. on all but one of the existing taxes, including the salt tax, applicable to all customs and excise duties, income tax and super-tax, but not to the customs duty on exports. Inland postal and telegraph rates would be increased by so per cent The duty on artificial silk piece goods would be raised from 20 per cent to 40 per cent.; the duties on boots, brown sugar and electric bulls would be increased in varying degrees; machinery and dyes would be taxed to per cent, and raw cotton; annua a pound lyperial Legislation — Legislation for India

in England is chiefly of a constitutional or financial character. The Regulating Act (1773), which created the first Governor-General, a Council of five members, and a supreme court with a chief judge, was the first statute that recognised the East India Company as a ruling body. Pitt's India Act (1784) left the business and most of the pationage to the Court of Directors. but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while on the next tenewal in 1833 the Company's monopoly of the China trade was abolished, and they became a non-commercial governing body. In 1853 the Company's charter was renewed for the last ine, and the Indian Civil Service was thrown open to competition By "An Act for the Better Government of India" (1858), all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State or Control were vested in the sections of some for India, assisted by a Council Under this Act as amended by Acts of 1889, 1907, 1915 and 1919, at least one-half of the members of Council must have served in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of (3) thembers may be ra and must not be less inheritans, and is at present 9. Their term of tomar office is now 5 years, with power of extension races.

assumed the title of Empress of India. assumed the other of mipress of mark. By the Indian Councils Act (1909) the imperial and provincial Legislative Councils were en-larged, their powers of interpellation and criticism enhanced, and the elective element extended, special provision being made for the representation of landholders, the professional classes, Muhammadans, and European and Indian traders and planters. The executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in provinces under Lieut Governors Government of India Act (1922) created a Governor of Bengal, established an Executive Council for Bihar and Olissa, and authorised the creation of legislative councils in provinces under Chief Commissioners The Indian High Courts Act (rorr) empowered the Government of India to increase the number of High Court judges from 15 to 20, to establish new High Courts, and to appoint temporary judges. An Act to consolidate the Imperial Legislation relating to the Government of India was passed in 1915 The Government of India Act, 1919, confers on provinces a larger measure of independence of the Government of India; it distinguishes the functions of local governments and local legislatures from the functions of the Governor-General in Council and the Indian Legislature; it provides for the devolution of authority in respect of provincial subjects to local govern-ments, for the allocation of revenues to those governments and for the use under the authority of the Governor-General in Council of the agency of local governments in relation to central subjects, it provides for the transfer of some provincial subjects to the administration of the Governor acting with Ministers. It gives borrowing powers to local governments.
It lays down that the major provinces shall be governed, in relation to reserved subjects, by a Governor in Council, and in relation to transferred subjects by a Governor acting with Ministers, appointed from among the elected Members of the local legislative Council. It confers extended powers on local legislatures. For the Supreme or Central Government, it provides that the Legislature shall consist of the Governor-General and two Chambers, viz., the Council of State and the Legislative Assembly It provides for the appointment of an Auditor-General and a Public Services Commission on India.

By the Government of India Act, 1929, His Majesty may by Orden in Council bansfer the control of the military government of Aden to such person or authority as may be specified in the Order.

INDIAN LAW—The law administered in the Indian courts consists mainly of: (z) The enactments of the Indian Legislative Councils (imperial and provincial) and of the bodies that preceded them; (a) statutes of the British Parlianent applicable to India; (3) the Hindu and Muhammadan laws of inheritance and domestic law; (4) the customary law affecting particular castes and races.

The Gobernment of India.

EMPEROR OF INDIA-H.I.M. GEORGE V.

Secretary of State-The Right Hon. Sir Samuel Hoare, Bt., G.B K , C.M.G., M.P.

THE SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is solely responsible to, and represents the supreme authority of, Parliament. Subject to the provisions of the Government of India Act and rules made thereunder, the Societary of State can impose his orders on the Government of India. In matters requiring secrecy (e.g., foreign policy and the affairs of Indian States) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office and at the office of the High Commissioner for India (see page 245).

page 314 15). The king-Emperor appoints the Governor-General, the Governors of the 9 major Provinces (Isengal, Madras, Bombay, the United Provinces, Bihar and Onissa, the Punjab, the Central Provinces, Assam and Burma), the Commander-in-Chief, the Members of the Executive Councils of the Governor-General and of Governors, and the Judges of the High Courts. The term of these appointments, except judgeships, is usually s

VÕÄI K.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council The Governor-General's Executive Council now contains 7 members including the Commander-in-Chief (three of whom must have served in India 10 years), as well as himself Ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special cu cumstances to overrule the majority. In accordance with the Government of India Act, 1919, and rules thereunder, the Indian Legislature consists of the Governor-General and two Chambers, viz., the Council of State and the Logislative Assembly (see pp 655, 657 as to their constitution). Except as otherwise provided by or under the Act, a Bill is not deemed to have been passed unless agreed to by both Chambers The Act confers powers on the Governor-General of securing essential legislation in emergencies, subject to disallowance by His Majesty in Council, of returning Bills for His Majesty in Council, or recurring some series in consideration, and of vetoing proposed legislation affecting the safety or tranquility of British India. The Indian Budget is of British India The Indian Budget is submitted to both Chambers, and is voted on by the Legislative Assembly except in regard to certain specified heads, but the Governor-General in Council can act, notwithstanding a refusal or reduction of grants, where essential to the discharge of his responsibilities, and he may authorise expenditure necessary for the safety and tranquillity of British India or any part thereof. Differences of opinion between the two Chambers may be referred for decision by the Governor-General to a joint meeting of members of both Chambers appointed for the Although the Government does not command a majority in the Indian Legislature, it is necessarily given the power to reject adverse votes, since its responsibility is not to the Indian Legislature, but to Parliament.

The seat of the Supreme Government is at Delhi

the summer headquarters being still at Simila.

Business is conducted by 9 Departments—
Finance, Foreign and Political; Home; Legislative; Commerce; Industries and Labour, Educa-tion, Health and Lands; Army; and Railway, Each Department is in the charge of a Secretary to Government (the Foreign and Political Department has both a Foreign and a Political Secretary), and is under the care of a member of the Viceroy's Executive Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his The Governor-General himself superintends the Foreign and Political Department. The Finance Department deal, with public accounts, loans, taxation, oplum, currency, banking, mints, &c. The Foreign and Political Department conducts relations with external politics, relations with Foreign States, frontier tribes, relations with Indian States and Fendatories within the limits of India, and, through its Political Residents and Agents in the various Indian States, supervises their administration and regulates their relations with the paramount Power. The Political Residents in the Persian Gulf and Muscat look after the commercial and political interests of India in those quarters. The Home Department deals in those quarters. The Home Department ueans with the internal politics, civil service, judicial affairs, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connexion with the Legislative Department The department of Commerce deals with trade and shipping, ports, &c. The department of Industries and Labour deals with industries, stores, labour, public works, post-office, telegraphs, civil aviation, communications, irrigation, factories, &c. The Army is under the Army Department, of which the Commander in-Chief has charge in Council. The Education, Health and Lands Department has the control of education, The Army is under the Army Departlocal government, sanitation, land revenue and surveys, agriculture, forests, foodstuffs, &c. agriculture, famine, meteorology, oodstuffs, &c. Bailway administration is entrusted to a Radway Department, which is in the charge of the Commerce Member of

British India is divided into 15 Local Governments and Administrations, viz.:—Under Governments and Administrations, viz.:—Under Governmers, Madras, Bombay, and Beugal, still termed Presidencies, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam, and Burma; under Chief Commissioners, who are under the immediate authority of the Governor-General in Council, the North-West Frontier Province, British Baluchistan, Delhi, Ajmer-Meiwara, Coorg, and the Andaman and Micobar Islands.

The Governors of Madras, Bombay and Bengal are permitted to communicate direct with the

Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination to a Commissioner, who corresponds direct with the Provincial Government,

RS 2.100

he has control in every department of administration, and is the responsible head of his and Oudh, the Punjab and Burma, and a Chief jurisdiction. There are 273 Districts in British Court in Oudh. Appeals may be carned to the Eng-

tration, and is the responsible head of his jurnaliction. There are 273 Districts in British India.

There are 273 Districts in British India.

There are separate High Courts for both civil and Court in Oudh. Appeals may be carried to the English Privy Council The Central Provinces, Rerar, Coorg, Sind, and the North-West Fronter Procriminal cases in Madras, Bombay, Bengal, Bihar vince have each a Judicial Commissioner's Court.

WHITAKER'S AL	MANACK, 1932,

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

rules made thereunder, the local governments are given a large measure of independence of The Act distinthe Supreme Government. guishes the functions of local governments and local legislatures of the Provinces from the functions of the Governor-General in Council and the Indian Legislature The Supreme Government is given authority over certain subjects, classified as "Central," such as defence, political relations, railways, tariffs, &c. Other administrative heads, classified as "Provincial" administrative heads, classified as "Provincial"—viz., local self-government, public health, education, public works, water supply, land revenue administration, famine relief, agriculture, excise, administration of justice, &c, are wholly or partly handed over to Provincial Governments with responsibility. subject to certain limitations, within then own areas, for administering them. In the nine major or "Governors" Provinces—i e, Madras, Bengal, Bombay, the United Provinces, Bihar and Orissa, the Central Provinces, the Punjah, Assam and Burna—provincial subjects are fur-ther divided into "reserved" and "transferred subjects," the administration of, and responfor, which rests with the Governor sibility and his Executive Council and with the Governor and Ministers respectively Ministers are chosen from among the elected members of the

* The areas and populations of the separate provinces are for British territory only. The population figures are according to the Census of 1931

Under the Government of India Act, 1919, and the made thereunder, the local governments for given a large measure of independence of the Supreme Government. The Act distinuishes the functions of local governments and all legislatures of the Provinces from the life the considers then policy inconsistent with metaons of the Governor-General in Council of the inchain Legislature of the responsibilities. The Act legislature of this responsibilities.

The Act legislates for a transition from a bureaucratic to a self-government system and for the gradual transfer of more subjects to the Ministers. Matters of departmental or minor importance are dealt with, as a rule, by the Governor, his Council, and the Ministers sitting in conclave, but the decision on reserved subjects rests with the Governor in Council, and that on transferred subjects with the Ministers, subject to the Governor's intervention and control

Legislative Councils have an elected majority, and normally a life of three years, but may be sooner dissolved by the Governor The previous sanction of the Governor General in Council is required to the introduction of certain classes of Provincial Bills. The Governor has powers of veto in regard to proposed legislation affecting the safety or tanquillity of his Province or any part of it, or of another Province, and can secure legislation essential to the discharge of his responsibilities for reserved subjects. Such Bills must be sent to the Governor-General for the signification of this Majosty's pleasure, but in emergencies the Governor-General may ascent to them, subject to disablewance by His Majosty in Council. The

Governor has powers of assenting to, of withhold-Governor has powers or assenting to, or withholding assent to, or of returning for reconsideration, other Bills, but must in certain circumstances send them for consideration to the Governor-Gueral, who may reserve them for His Majesty's pleasure

Provincial Budgets are voted on by the Legis-

lative Councils, but the Governor has power to act, in respect of a demand for reserved subjects, notwithstanding a refusal or a reduction of grants, if the demand is essential to the discharge of his responsibilities for the subject, and in cases of emergency he can authorise such expenditure as may be necessary for the safety or tranquillity of his Province. Certain heads of expenditure do not require an annual vote, a deadlock is thus avoided in case of irresponsible action by the Legislative Council

in the matter of supply

Of the members nonmated to the Indian Logislature and Provincial Legislative Councils some represent certain communities and interests. Males over 21 (18 in the case of Burma) years of age possessing certain qualifications, (residence within the constituency and the possession of certain property qualifications, the payment of land revenue, rent, local taxes, income tax or municipal rates) are eligible for the franchise Women are not qualified for registration, but the disqualification may be removed in certain cucumstances in any Province, or m all. The franchise is low, and gives the vote to small cultivators and some wage earners The electorate of the fourth general election comprises over 8,744,802 persons, of which nearly 308,000 are women.

(1) MADRAS (area, 142,260 sq miles; pop 46,748,644) was not only the oldest, but the most important of the three original Presidences before Clive's conquest of Bengal, though it was small in extent until the annexation of the Cerantic in x801. With a coast-line of 1,730 miles the province has no good natural harbour, but an artificial harbour has been constructed at Madras at great expense The province is not naturally fertile, though irrigation systems in the river deltas have enormously increased the profit to the State Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c , are cultivated. Manganese ore is mined and exported Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west About 89 per cent. of the people are Hindus. About 39 per cent. of the people are Hundar There are r. 1770, 38 native Christians, mainly Roman Catholics Many natives of the Presidency emigrate to Bulma and Ceylon, some only temporarily. The languages principally spoken are Tanul, Telugu and Malayalam Madura (182,007) and Trichnopoly (141,640) famous for their Hunda temples, are the chief cities after the capital

(2) BOMBAY—The Island of BoMBAY was part of the downy of the Infanta of Pottugal (165a), and was made over by Charles II, to the East India Company in 1658. The greater part of the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State—Sind was conquered in 1843. The province (including Sind, but not Aden and Perim, which are also attached to it) contams 122,541 square miles (about equal in size to the British Isles), with a population of sz. 209, 268.
Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Fresidency) is in some respects separate. About 76 per cent of the people of the Presidency are Hindus, and so per cent. Muhammadans. The Parsis (89,543), who are very promuent in trade, are mainly found in Bombay. Marathi, Gujarati, and Musater Hindus. Sindhi, Kanarese and Western Hindi, are the prin-Gor., H.E the Rt Hon Sir George F Stanley, cipal languages. Millet and other food-grains Rs 10,000 and oil seeds are cultivated. Cotton is largely and oil seeds are cumpation, produced for export and for manufacture in the constantly extending outfor mills of Bombay and Ahmedabad. The chief radvas Milit See, Capt I. These figures include the Shan States and Chin These figures include the Shan States and Chin Hills. Many immigrants come from Bengal, Madias, and China. Temsserim and Arakan were annexed after the first Burmese war in 1826, Pegu after the second war in 1825, and Upper Burma and the Shan States after the third war in 1885. The Shan States form a minor administration distinct from that of Burma though under the same Executive Government and not subject to the jurisdiction of the Burma Legislature. The province is thinly peopled, but, owing to remarkable prosperity, the population has increased in per cent in 120 vers. The inhabitants belong to per cent in xo years The inhabitants belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions Burmese and Shangale are the chief languages Buddhism, now almost confined to Burma, so far as the Indian Empire is concerned, is the religion of 85 per cent of the people. The Burmese are much better educated than the natives of India prop.r, education being con-ducted by Buddhist monks. The delta country of Lower Burna is flat but above Prome there is upland, hilly country—Rice, the main product of the delta region, is largely milled at Rangoon and exported The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fauly rich in minerals, especially petroleum, rubies, jadestone, and wolfram. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myitnge, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are There are considerable exports by land to Western China The Burma Railways have reached Myitkyina, on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin.

executive and judicial authority.

Chief Com., Lt. Col. R. J. C. Bulke ... Rs.4,000 (13) BRITISH BALUCHISTAN (area, 54,285 smiles; pop 463,508) was constituted a separate administration in 1888, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the native State-of Baluchistan up to the Persian frontier. The districts it comprises (Sibi, Quetta, Pishin, Thal-Chotlah, Nushki, Zhob, Chagai, Nasu abad and the Bolan) were acquired partly from Afghanistan by the treaty of Gundanuk (1899), partly from the Khan of Kalat by minangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. A large part of the people lead a pastoral, nonnad life. In religion they are Sunni Muhammadans, and Pashto is the chief language. The Afghan-Baluch frontier was demarcated in 1895—7. To Chaman, on this frontier, a railway runs rid Quetta and is continued to Minjawa. The Khan of Kalat, the head of a loose confederacy, receives about £79,000 per anium for quit-rents, subsidy, &c. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Sec., P. Wks. Dept, Brigadier W H Evans,

1911, to move the capital of India and its seat of Government from Calcutta to Delhi

Aden and Perum—Prom ofd thin the poninsula of Aden, situated on the southern coast of Arabia and lying on the Red Sea trademonte between Europe and the East, has been important trade centre. Its tade decayed after the Portuguese discovery of the Cape route, but with the opening of the Sucz Canal it regained more than its old importance. It was occupied by the British in 1839. It is mow a great conling-station and port of call, and an emporium for the trade of the adjacent African and Arabian coasts. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling-station at the southern entiance to the Red Sea, occupied in 1857—form part of the Bombay Presidency, and have an area of 80 square interest and a pooniation of 50,809. Aden is a free port. The chief industries are salt and cigarette manufacture. The traffic in arms and ammunition is subject to special regulations. The total scaborne trade in 1929-30 was £10,773,000. In 1929-30, 1,712 vessels called at Aden, and 556 at Perim. The British Government has treaty engagements with, and subsidies, the neighbouring Arab titles, both inland and along the coast (Hadramaut), from the Straits of Bab-el-Mandeb to Muscat territory at

Aden: Political Resident, Lt.-Col. B. R. Reilly, CIR, O.B. K. (activa) — per members 18.3,500 The Kuria Muria Islands, to the S of Oman, have been in British possession since 1854. In 1834 the East India Company occupied Solicita (atea, 1,400 80, miles), 150 miles from Cape Guardaful, which has a pastoral Mubammadan population roughly estimated at 5,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy, and is pledged not to cede the island to any foreign Power.

INDIAN APPOINTMENTS.

THE higher civil administration of British India is recruited from four sources—x Open competitive examination in England and India a The India's Army. 3. The patronage of the Becretary of State. 4 The patronage of the Local Governments.

The Civil Service of India.—The annual examination ordinarily commences in Jondon Hey pass then product on a complete with July-August Candidates must be over zz and under z on Aug. z in the year of examination of the Cinversities or Colleges approved by the Application for permission to compete must and comply with all the rules laid down for

be made on or before June 1, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. 1. Examination fee, £8. Selected candidates are on probation in England for one or two years, and receive an allowance of £30 of of European domicile, or £350 if of Indian domicile, if they pass their probation at one of the Universities or Colleges approved by the Secretary of State, conduct themselves well, and comply with all the rules laid down for

their guidance A final examination is held in overseas pay of the same amount, subject to Indian law, language, &c. A first-class passage efficiency bars, with prospects of promotion to Indian law, language, &c. A first-class passage to India will be engaged for selected candidates. or to execute the usual covenant and to prois not extensive. Appointments of Chaplanns
ceed to India, all allowances received must of the Church of England and the Church
be refunded. The salary of a covenanted civil of Scotland to the Indian Ecclesiastical estabservant commences usually at Rs. 7, soo a year.
The Regulations for commentative examinations are normally made on the salary of the salary of the commentative examination. he held in India can be obtained from the India Office, London.

The Indian Army.-Copies of a pamphlet giving full information regarding conditions of service may be obtained, on application, from the Military Department of the India Office The following is a summary of the principal points. Candidates for commissions in the Indian Army are required to pass the Army Entrance Examination held by the Civil Service Commissioners Candidates must be between rommissioners Candidates must be between 18 and 19 years of age (in the case of Indian candidates the age limits are 18 and 20 years) Of the cadetships for the Indian Army offered, some are allotted to King's India Cadets nominated by the King's India Cadets nominated by the Secretary of State for India, the remainder being offered to candidates in the order of their passing the entrance examination. A few direct appointments to the Unattached List for the Indian Army are made by the War Office from candidates nominated by the principal Universities in the United Kingdom. A few direct appointments are also offered to officers of the Territorial Army and Supplementary Reserve between the ages of zz and zz who undertake the final examination of the Royal Military College, Sandhurst, under arrangements made by the War Office At the end of the period of training at Sandhurst, cadets recommended for commissions are gazetted to the Unattached List for the Indian Army. On appointment to an Indian regiment, an officer s mutal pay is at the present moment Rs 480 (£38) per month. Regulations and examination papers can be obtained from Ils Majesty's Stationery Office, Imperial House, Kingsway, W.C.

Indian Police Force (Higher Grade) .- A competitive examination is usually held in London and other centres in June of each year in conjunction with the Army and Air Force Examination A fee of £4 is required from candidates examined in London, and a fee of £5 from those examined in other centres Save as provided in the regulations a candidate must be a European British subject Indian and Burmese candidates are eligible if they have been resident in the United Kingdom for not less than five years. Candidates must be above 19 and under 2x years of age on Aug x; must be unmarried, and if they mairy before reaching India must forfeit their appointments. Applications to connecte at the examination must be made on forms to be obtained from the India Office, Whitehall, London Successful candidates are required to undergo a strict medical examination, are examined as to their ability to ride. Fice passage to India is granted to proba-tioners. Their initial pay is Rs 350 per month, plus an overseas pay of Rs. roo per month in the case of probationers with non-Indian domicile. The pay proceeds by annual mere-ments to Rs 700, plus overseas pay of £30 a month, and thence to Rs. 1,350 per month, with

higher posts

The patronage of the Secretary of State for India from amongst candidates nominated by the Indian Chaplameres Board of the Church of England and the General Assembly's Committee on Indian Churches respectively. Church of England candidates must be between 27 and 34 years of age, and Church of Scotland candidates must be under 34 years of age. On appointment chaplains receive a salary of Rs. 600 per month, using by annual increments to Rs. 1,050 per month, plus

oversens pay of £30 a month.

Indian Railway Service of Engineers.—The Secretary of State in Council from time to time makes a number of appointments of Asst Executive Engineers on Indian State Railways In making these appointments he acts with the advice of a Selection Committee Application forms can be obtained from the Secretary, Services and General Dept., India Office, Whitehall, London. Every candidate must have attained the age of zz, and not attained the age of z5 on Jan. r of the year in which the examination is held. Candidates must produce evidence that they have obtained one of the University degrees or passed one of the exammations specified in the Regulations, and must have had at least one full year's practical experience of civil engineering. Those whose qualifying diploma has been obtained without a college course must have had a full three years of such practical experience. Every European candidate must be a British subject of non-Asiatic domicile. All selected candidates are on probation in the first instance on an initial pay (including overseas pay) of Rs 525 a month and are required to execute agreements for three years, at the end of which period, if they have given satisfaction, their services are tetained. The pay rises by inclements to Rs 1,025 in the 9th year and to Rs 1,675 in the 24th year of service, with possibilities of promotion to higher posts. From time to time a number of appointments of Asst Executive Engineers in the Public Works Dept. in India are made under regulations, which are generally the same as for the Indian State Railways

Indian Forest Service -- In making appointments, the Secretary of State for India in Council acts with the advice of a Selection Committee Applications for appointment must be made on a printed form to be obtained from the India Office, Whitehall, London, S.W. r. The normal age huits are over zo and under z4 on the rat May of the year of candidature Candidates must be British subjects and must not marry before reaching India. Any breach of this condi-tion will entail forfeiture of appointment. Vacancies are few in number, and do not occur

every year

Further information regarding these and other Indian appointments can be obtained on application, from the Services and General Department, India Office, Whitehall, London, S.W.z. Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations and other Statutory Rules, which

THE FINANCES OF INDIA (CENTRAL GOVERNMENT AND PROVINCIAL GOVERNMENTS) FOR THE YEAR ENDED MARCH 31, 1930.

(In lakhs of runees)*

SEPARATION OF CENTRAL AND PROVINCIAL FINANCES

The Government of India Act, 1919, was designed *onter alua* to secure a greater measure of independence for Provincial Governments, and to this end provision was made, in the Act and in Rules subsequently published under authority of the Act, for the delimitation of the functions of Government as between the Government of India and the chief Provincial Governments, and for the definite assignments to each of these Provincial Governments of specific revenues of their own Effect has been given to these measures of devolution in the nine "Governor's Provinces," viz.: Bengal, Madras, Bombay, the United Provinces, the Punjab, Bihar and Orissa, the Central Provinces, Assam and Burma and in the Province of Coorg As regards these provinces the functions of Government have been classified as either "central subjects" or "provincial subjects." A general authority to control all matters coming under the latter head, subject to certain expressed provisos, is devolved upon the Local Governments concerned.

The sources of revenue available to Local Governments for the purpose of defraying their administrative charges consist, in the main, of the receipts from those provincial subjects which are revenue-producing, the principal heads being Land Revenue, Irigation, Stamp Dutes and Excise In addition, a local Government is given a small share in any expansion of revenue) that may be due to an increase of the total assessed incomes within the Province over that of xgo-xx.

When the division of the sources of revenue was made between the Central and Provincial Governments, it was realized that the Central Government would be left insufficiently provided It was therefore arranged that an annual contribution should be made by eight of the local Governments to the Central Government. The annual contributions fixed at the outset aggregated 983 lakks of rupees They were not, except in case of emergency and with the sanction of the Secretary of State, to be subject to merease, and should reduction of the aggregate be found possible, reductions were to be made in fixed proportions from the quotas of the has involved a progressive reduction of the provincial contributions with a view to their The Budget for 1928-29 proultimate cessation vided for the remission of those portions of the contributions which had not been permanently remitted at the close of the previous year.

The revised financial arrangements outlined above came into force from April 1, 1921, as from that date all "provincial" revenue and expenditure ceased to be included in the estimates and accounts of the Central Government. In the case of Coorg the separation was made on April 1, 1924.

various railways taken over on the transfer of the lines, and the capital value of liabilities undergoing redemption by way of terminable annuities. The interest-bearing obligations and certain interest-bearing assets of the Government of India amounted to Rs. 643 crores (£483 million) in India and £387 8 million in England. The excess of interest-bearing obligations over erores (£145 million) Apart from Rs. 194 erores (£145 million) and securities held on Lieasury Account, the Central Government held on March 31, 1930, £40 million in the Gold Standard Reserve.

LAND REVENUE -This is the oldest and the most important source of revenue The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal and Bihar and Orissa, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed. elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years) The nature of the settlements 20 or 30 years) The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Fronter Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (zamindari), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Smd, Assam, and most of Madras) the rangatware tenure prevails, and each raight, or peasant proprietor, holds duect from the State In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental pad to the landlord by the cultivating tenant, while in temporarily settled raiyatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent Private improvements are exempt from assessment. The gross land revenue paid to the State (Central and Provincial Governments) in 1929-30 amounted to Rs. 3,347 lakhs (£25,103,000).

THE OPIUM REVENUE—Poppy may now be grown only in parts of the United Provinces and in the Central Indian (Malwa) States Except in these States the manufacture is a Government monopoly. Bengal opium is either sold direct to the Governments of Borneo, Netherlands Indies, Hong Kong, Straits Settlements, &c. or issued to the Excise Department for local consumption In addition a substantial quantity is supplied to the Medical Department for medical purposes, and by export to the United Kingdom for sale to chemists The gross revenue from Bengal opium, including the value of opium sold by the Excess Department for consumption in India, was £3.28,000 in 1929-30. The expenses of production, &c, were £365,00. Formerly, most of the optim exported from India was consumed in China; but the Government of the fixther five Chinases. India, in furtherance of the efforts of the Chinese Government to suppress the growth and consumption of opium in China, decided in 1907 to reduce progressively the amount of Indian opium exported to China, and as from March 31, 1917, export of Indian opium to China is prohibited. In 1926 the Government of India announced its intention to restrict the export of opium except for medicinal purposes

EXCI^E —Licence fees and duties are levied on

the manufacture and sale of intoxicating liquors,

opium, and other drugs. The revenue amounted to Rs. 2,041 lakhs (£15,309,000) gross in 1929-30 (Central and Provincial Governments).

CUSTOMS. - The net receipts amounted Rs. 5, ra8 lakis (£38,458,000) in r929-20. (For tariff see p 671) The export duty on rice yielded rr7 lakis (£37,000). The export duty on jute produced 464 lakis (£3,478,000) The duty on motor spirit and kerosene amounted to 374 lakhs (£2,808.000). The protective special duties on iron, steel, &c, yielded 310 lakhs

(£2,326,000)

Super-tax is leviable in addition to ordinary income tax on incomes of Hindu undivided families at lates ranging from r anna 3 pies to 6 annas 3 pies in the rupee on incomes over Rs. 75,000, and on the taxable incomes of companies above Rs 50,000 at a flat rate of rama in the rupee. In the case of individuals, unregistered firms, and other associations of individuals not being a registered firm or a company, the rate ranges from 9 pres to 6 annas 3 pies on incomes in excess of Rs. 30,000 Rs 1,706 lakhs (£12,798,000) were received from taxes on income in 1929-30.†

STAMPS.—Stamps yielded 1,412 lakhs gross (£10,593,000) in 1929-30. About two-thirds of the revenue is from court fees and one-third from commercial stamps

SALT .- The salt duty was reduced from Rs 21/2 SAIT.—The sait duty was reduced from Rs 2½ to Rs. 2 a maund (82lb) in 1903, to Rs 1½ in 1905, and to R r in 1907. It was increased to Rs. 1½ on Maich r, 1916, to Rs 21, from March r, 1923, and reduced to Rs. 1½ from Maich r, 1924. Rs 676 lakh. (£5.073,500) were received from salt in 1929—30.†

Forests -About 107,000 square miles of forests are reserved and scientifically worked by the State, while about 123,000 square miles besides are under State control The revenue from are under State control The revenue from forests amounted to Rs 613 lakhs (£4,594,000) in 1929-30. A third of the revenue comes from Burina

POSTS AND TELEGRAPHS -The Post Office POSTS AND TELEGRAPHS—The Post Office in rosp-30 conveyed 1,329 million of letters, post-cards, newspapers, &c, and issued over 40 million of money orders — Inland letter rates are the lowest in the world. The length of telegraph wire, including cable, in India on March 31, 1030. wire, including cable, in India on March 31, 1930. was 553,400 miles, and the number of paid messages sent in 1939-30 was 19½ million. The capital outlay amounted to Its. 1,455 lakhs (£10,922,000) at the end of 1939-30. The Indian Postal and Telegraph services were amalgamated on April 1, 1914. The combined services showed for the year a loss of 62 lakhs (£468,300).†

o 12 pies = 1 anna, 16 annas = 1 rupee, 134 rupees = £1 (statutory rate) † See p 653 as to the proposed increase of duties and

RAILWAYK.— Nearly all the railways in India Railway Hoard, though many are leased to and worked by companies. The mileage open for traffic on Maich 31, 1930, was 41,724 Of the mileage open about 50 per cent was on the standard gauge (5½ ft.), and about 42 per cent on the metre gauge. On March 31, 1930, the total capital at charge was Rs 85, cores (£62,560,000). The net earnings of the railways in 1930–30 amounted to 4,059 lakhs (£30,446,000), showing a percentage of 47 on total capital at charge. The number of passengers "originating" was 634 million long. Rates are very low, third-class passengers travelling on the average about four miles for a penny "The net gain to the Central Government from "Budget Lines" administered from funds under its direct control was 4 or crores in 1939-30. To meet the contribution (6 x crores) payable to general revenues, 2-08 crores were withdrawn from the Reserve Finid. The total capital expenditure on State and other railways in 1939-30

IRRIGATION.—The total capital outlay on State irrigation works up to Maich 21, 1930, was £97,701,000, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State, after payment of interest charges, of about £1,854,000. The area irrigated by Government migation works, excluding the Indian States, in 1928-29 amounted to 30 7 million acres, while the annual value of the crops raised amounted to over 11/5 times the total capital expended on the works. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES — The net expenditure in England, chargeable to Revenue, amounted in 293-30 to £25,767,000. The main items were — Interest on Railway Debt and Amuticas, £8,052,000, Interest on Ordinary Debt, £4,862,000 Interest assumed in respect of British 5 per cent. Was Loan, £836,000, Stores, £5,656,000, of which £2,469,000 was for Mainie and Military Stores; payments for British forces, troop service, &c., £2,605,000, Army non-effective charges, £3,597,000; Civil annuntes, civil and inilitary, £2,279,000; Fun lough payments, civil and inilitary, £2,279,000; home administration (£412,500 less £117,500 contributed by HM Treasury), £304,640 in connection with new offices. Aden contribution, £247,000. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for stelling

CURRENCY—The principal coin in use is the silver rupee, containing x55 grains of fine silver and x5 grains of allow, and weighing in all x80 grains to y 1 p to x893 the Indian Mints were open by law for the unrestricted comage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from x87x to x893, legislation in the latter year closed the mints to the public, with a view to eventually fiving the evchange. For a time the rupee continued to fall, but subsequently trose, and between x898 and x9x6, was practically stable at xx. 4d. The Act of x809 made the linitish sovereign legal tender in India at the ratio of x5 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount, but the ratio was

altered to to rupees in xgao. In xgo7 it was decided that half the profit on silver collage should be applied to capital expenditure on railways; the other half of the profit, and the whole of the interest, being added to the Gold Standard Reserve. In June, xgxz, it was decided that no portion of the profit was to be used for railway purposes until the total sterling assets of the Gold Standard Reserve amounted to £35,000,000. From April x, xgxz, the interest on investments in the Gold Standard Reserve, when that Reserve reaches £40,000,000, is appropriated in reduction of the rupee securities created for the special purpose of the Currency Reserve. The total receipts from profit on coinage, interest and discount, and profit by exchange up to March 3x, xg3x, amounted to £50,071.876 Of this sum £1,123.655 has been used for capital expenditure on railways, £,886,2x7 has been transferred to the Paper Currency Reserve in reduction of created 1 upee securities and £12,444,795 has been transferred to Revenue, £442 712 to the Revenue Equalisation Fund (of which £33,748 has since been transferred to the Gold Standard Reserve On March 31, 1931, the unvestments of this fund in sterling securities amounted to £31,599,000 (estimated value), while £1.085 was held in cash in England, and £2.125,000 deposited in gold at the Raik of England and £6,247,200 held in gold in India. India has a paper currency. The 1, 22-5, 510, 50, and 100 imper ourser or the received of the Royal Mint was established at Bombay 1 the minting of gold come.

ARMY -The sanctioned strength of the Army in India is . British troops and officers, 68,000; Indian troops and officers, 155,300; Army in India Reserve of Officers, 1,600, Indian Army Reserve, 40,000, Auxilary Force, 36,000; Indian State Forces, 44,700; and Indian Territorial Force, 19,000. For police duties and frontier service the regular military is supplemented by frontier militia and local levies. During the period (1902-9) when Loid Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On June 1, 1907, there was a redistribution of the Army of India. The net military expenditure (including marine) has risen from about £20,0000 in 1912-13 to about 5,510 lakhs (£41,325,000) in 1922-30 The estimated net expenditure for 1931-22 is 4,740 lakhs (£35,550,000) Juning the Great War of 1914-18 the Hoyenment of India recentled on 2014-18 the Government of Indiarecruited on a voluntary basis over 800,000 combatants and more than 400,000 non-combatants, giving a grand total of about x 3 million men. x,2x5,000 officers and men were sent on service overseas from India . the total Indian casualties were 101,000. In 1917 the bar hitherto precluding the admission of Indians to King's Commissions was removed, the pay and pensions of the Indian soldiery were improved. India has an Auxiliary Force on a volunteer basis. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death.

The ROYAL INDIAN MARINE consists of so aca-going vessels, and numerous smaller steamers and launches.

Director R.I.M., Bombay, Rear-Admiral H. T Walwyn, C B., D.S.O , R.N.Rs. 2,800

In 1926 it was decided that the Royal Indian Marine shall be abolished, and that the vessels shall be transferred to the Royal Indian Navy. which will be constructed as a combatant force to enable India to enter upon the final stage of her development, and ultimately to undertake her own naval defence The fleet will consist, in its first stage of development, of four sloops, two patrol-craft vessels, four trawlers and two survey ships, together with one depôt ship. Indians will be eligible for commissioned rank.

EDUCATION —Elementary education is based, so far as possible, on an adaptation of indigenous institutions and traditions. Higher education is an imported product. It is popular, and has undoubtedly been attended with beneficial results. As is natural with an imported product, its development is marked by some crudities, and its influence has to some extent been unsettling It has appealed to the natural intellectuality of the people, and has succeeded only partially in attinulating practical application. There are in stimulating practical application. In simulating practical application. There are a full inversities, viz., those of Calcutta, Madras, Bombay, Allahabad, Benares (Hindu), Patna, Daoca, Aligarh (Muhammadau), Lahore, Hyderabad, Mysore, Lucknow, Rangoon, Nagpur and Delhi. In State institutions education is secular. The institutions in 1928-29 numbered 258,000, and the scholars 12,166,000, including 1,386,000 females. Of the institutions, about 50 per cent are maintained by the State or aided by rants, the rest being private and unaided. Of the total expenditure on education in 1928-29, (£20,305,000), £4.335,000 came from fees, and £22,842,000 from flowermment revenues or local and municipal funds. The census of 1921 showed that only 239 males and ax females per thousand are literate, in the sense of being able to write a letter and read the reply thereto.

LOCAL SELF-GOVERNMENT, municipal

£9,220,200 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c) and £15,622,800 from other sources. Out of 12,722 members of municipal bodies 870 were officials and xx,862 non-official. In almost all districts in British India in almost all districts in British India there are local district boards, partly representative. Nearly 33 per cent. of their total expenditure of about £12,394,700 in 1928-29 was devoted to civil works, 36 per cent. to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS—There are 8,342 officers and 19,108 honorary judges and magistrates exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are Indians. majority of the interior officers are Indians. In 1928, 2,435,232 civil suits were instituted; 2,578,984 persons were tried, and 1,338,432 convicted, in criminal cases, of whom 796 were sentenced to death and 739 executed, 1,938 to transportation, and 180,496 to imprisonment. The strength of the police in 1928 was 14,814. officers and 183,371 men. There were 1,155 prisons, with a daily average of 138,014 prisoners. At the convict settlement of Port Blair (Andamans) there were 6,985 prisoners on March 31, 1929.

VITAL STATISTICS.—The reporting of vital occurrences is still defective. The recorded death rate for British India in the decennium ended upg ranged between 28'm per 1,000 in 1908 and 28'72 in 1913; it was 35'9 per 1,000 in 1908 as 5'90 in 1928. There were over 12 million deaths from influenza during 1918-19. Evers of various kinds are by far the commonest cause of death, cholers, dysentery and distributes a similar and distribute a similar and distribute a similar and distribute a similar and distribute a similar and distribute and distribute a similar and distribute a The ratio of births per 1,000 of the population was 36.79 in 1928. In 4,571 hospitals and dispensarios, maintained mostly from public funds, rural, in its present form, is a product of British under the municipalities at the end of 1928-29 pensarios, maintained mostly from public funds, numbered 776, with a total population 50,119,000 patients were treated in 1928. The of 19 million, and receiving an income of number of persons vaccinated in 1928.

x5.085,000. According to the census of xgax there were xo2,400 lepers.

SURVEYS—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, botaineal and archwological surveys are in operation. The Meteorological Department is of great service in forecasting rainfall.

TRADE OF INDIA—Among the countries constituting the British Empire India comes second to the United Kingdom itself in the volume of its sea-borne trade, which almost equals that of Canada and Australa combined. The ordunary course of Indian trade shows yearly a large net export of merchandise and a net import of treasure. The table (p. 670) exhibits the leading figures for the last five years in thousands of pounds sterling (Ruipees being converted at the rate of 124, to the £).

During the year 1930-31 as compared with 1929-30 the value of the imports (evcluding towenment stones and treasure) decreased by Rs 7.597 lakhs (£56,979,000), or 32 per cent, while the total exports (including 10-exports but excluding treasure and Government stones) fell by Rs 9.233 lakhs (£69,249,800), or ap per cent

The principal commodities of export from India are, in the order named Raw cotton and cotton goods, jute (including gumy bags and cloth); food-grains, especially rice and wheat, tea; and oliseeds. All these showed substantial decreases as compared with the previous year. The principal imports, again in the order named, are manufactured cotton goods, iron and steel, machinery and mill-work, signar, inneral olismotor vehicles. There was a marked falling off during the year under review in all of these and other commodities.

The bulk of the imports consists of manufactured articles, while two-thirds of the exports consist of food, tobacco, and raw materials.

The following statement shows the chief articles of the foreign trade of India in 1930-31 (converted at Its $13^{1/3} = £1$):—

CUSTOMS DUTIES - The general import tariff is so per cent ad valorem. The principal exceptions are as follows:—Cutton twist, yain and thread pay 5 per cent or x½ As per lb., whichever is higher, yarns and taxtile fabrics so per cent. cotton piece goods so per cent if of British manufacture, a5 per cent. if not, plain grey, 1 e., not bleached or dyed in the piece, pay duty at the same rates or 3½ annas per lb. whichever is higher Arms and certain "luxury" at ticles, including gold and silver manufactures, &c., and silk piece goods, pay40 per cent, motor cars 30 per cent., sugar as per cent, plus Rs. s. As. zs per cwt., cigais 90 por cent, cigaiettes Rs. 8 As. 8 per 1, 2000, spirits generally Rs. 30 a gallou, sait R. x As. 8½ a maund (8s lb.), gold and silver plate 40 per cent., kerosene As. 3, and motor spirit 8 As. per gallon, mineral oil 10 per cent. (an exise duty of As. 8 per gallon is levied on motor spirit and an excise duty of As. 2 p. 3 per

gallon on kerosene produced in India), coal As. 8 aton. Some machinery and certain inon, steel and railway materials pay 12½ per cont.: at itheral silk yarn, xo per cent. There are protective duties at special rates on coal tubs, and on iron and steel and certain manufactures thereof. The duty on manufactured tobacco is Rs. 3 per lb., matches Rs. x As. 8 per gross, splints for match-making 4½ As. per lb., veneer for making match boxes 6 As. per lb., beer xa As. per gallon, perfumed spirits Rs. 48 a gallon Gold metallic ores, living animals, raw index, skins, raw cotton and wool, certain agricultural requisites, quinner, tettlic machinery, printing matcrials, and a few other articles are free There are export duties of a As. 3 Pers a maund on rice, Rs. 4½ per bale; Rs. 20 per ton on jute sacking, Rs. 32 per ton on hessians, and 5 per cent. adealoren on raw luckes and sins.*

SHIPPING.—In 1930-31 the number of vessels engaged in the foreign trade which entered and cleared with cargoes at ports in British India was 6.473, with a tomage of 15 \$10,000. Of this tomage, nearly 67 per cent, was under the British flag

PORTS — The chief ports are Bombay, Calcutta, Rangoon, Karachi, and Madias

AGRICULTURE is by far the most important occupation of the people of India. In British territory in 1928-29, 265, 288, 200 acres were sown, or 228, 267,000 acres excluding area sown more than once of the total area sown approximately to per cent was under wheat, 32 per cent under rice, and 36 per cent. under other food-grains and pulses, 7 per cent. under other disects, and 8 per cent under cotton, jute, and other thres. Sugar, tea, and tobacco are other important crops. The total area under irrigation was 49 million acres.

BANKS—In addition to the Imperial Bank of India, which is closely associated with the Government, there are joint-stock banks. European and Indian, and many small native banks. In 1928 there were 28 Indian joint-stock banks. Hi 1928 there were 28 Indian joint-stock banks, whose head offices are located in India, in addition to 18 exchange banks with head offices outside India, and 18 Indian co-operative banks, with capital and reserve of Rs. 5 lakhs and over. The capital of the Imperial Bank of India was Rs 562 lakhs; neserve, Rs. 539 lakhs, deposits, Rs. 7,928 lakhs; and cash balance, Rs. 1,028 lakhs. The corresponding figures for the Indian Joint-stock banks were: capital, Rs. 674 lakhs; cash balance, Rs. 815 lakhs; deposits, Rs 435 lakhs; cash balance, Rs. 816 lakhs. The 18 exchange banks with head offices not located in India had:—capital, £36 million; reserve, £92 million; deposits, £1,259 million ottside India, and Rs. 7,123 lakhs in India; cash balances £237 million outside, and Rs. 866 lakhs in India The 18 Indian co-operative banks had a capital of Rs. 171 lakhs; a reserve of Rs. 46 lakhs, deposits, Rs. 902 lakhs; loans outstanding, Rs. 688 lakhs; and cash balances amounting to Rs. 78 lakhs. The proportion per cent. of cash to liabilities on deposit was —13% in the case of

the Imperial Bank; xx% for exchange banks doing a considerable portion of their business in India; xx% for other exchange banks; and x3 to xx% in the case of Indian joint-stock banks

CO-OPERATIVE CREDIT SOCIETIES—In 1979-30 there were in Butish India and Indian States 1,880 centual, 92,921 agricultural and 10,25 non-agricultural societies, with a total membership of 4,781,904 and a capital of £67,128,000. The Provincial and Central Banks showed a profit of £440,000, and agricultural and non agricultural societies £1,259,000.

MINERALS—The output of coal in India in x928 was 22,543,000 tons. The production has much me reased in recent years. Nine-tenths of the total comes from Bengal and Bihar and Onesa The production of crude petoleum in India (chiefly Burma) has mereased from x9 million gallons in x897 to 306 million in x928. The production of salt is about x,5x5,000 tons. The production of smarganese ore was about 978,500 tons, and of saltpetre 4,500 tons export figures) The yield of gold (nearly all from Mysore) was about 376,100 oz. Monazite and tungsten ore have now taken an important place in the list of minerals of economic value produced in India. The output of the former in x928 was x03 tons, and of the latter 622 tons

MANUFACTURES—In India the ancient village handicrafts stil survive—Cotton-weaving is by far the most important hand industry—There were 7,863 factories in 1928 subject to the Indian Factories Act, employing 1,520,000 persons, including 253,000 women and 50,900 children (22 to 15 years of acc), the percentage of factories maintaining a week of 48 hours or less for men is 27, the corresponding percentage for women is 25, the corresponding percentage for women is 25. The maximum weekly hours for children are 36. There were 252 cotton mills at work in British India and Indian States in 1928-29, the production was 648 million lb. of yain (mostly of low counts) and 446 million lb of woven goods—The 95 jute mills, mostly situated in or near chilotta, contained 1 103,147 spindles and 52,409 looms—There wire, in 1928, 17 woollen and 9 paper mills, 13 breweires, and various other factories.

JOINT STOCK COMPANIES.—In 1928-29 there were 6,330 joint stock companies registered in British India and in the Indian States, with a paid-up capital of Rs 27,931 lakhs (£20,48,000). The companies were classified as follows:—Trading and manufacturing, 2,326, lanking and loan, 1,621; tea and other planting, 604; mining, 327, cotton mills, 294, cotton ginning mills, 199; jute mills, 63; other mills and presses, 77; estate, &c, 115, insurance, 100; railway transport, &c, 220; uavigation, 26; sugar, 35; others, 383

FRONTIER TRADE

A new system of registration of the land frontier trade of India came into force in April, 1925. Only the traffic in selected articles at certain railway stations adjacent to the more important trade routes across the frontier is registered. The principal imports were metals and manufactures of metal, grains and pulses, fruits, provisions and raw silk. The principal exports were cotton goods, metals, provisions, grains, salt and sugar.

[·] See p 653 as to the proposed merease of duties

STATES OF THE RULING PRINCES AND CHIEFS OF INDIA.

THE States in India whose chiefs are in subordinate alliance with, or under the succession of the Plantage committee about subordinate alliance with, or under the suzcrainty of, the King-Emperor, comprise about two-fifths of the area, but only two-ninths of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war. protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force another or to prough states; the miniary force they maintain is strictly limited; no European is allowed to reside at any of their courts with-out special sanction; and in case of misrule the Supreme Government can dethrone the chief or

temporarily suspend him from the exercise of temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Tributes aggregating £541,800 (£183,750 from Mysore) were paid to the Government of India in 1923. Generally speaking, the States are governed by their Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government. of a political officer of the Supreme Government. This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all Indian States, important or insignificant, is that in their territory British Indian law does not run. For them the Indian Legislature or the Provincial

Legislative Councils cannot legislate: and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta), and Berar are still technically Indian States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the Indian States have a combined area of 711,032 square miles, and a population of 71,393.87. They maintain in the aggregate a considerable body of troops of inferior military organisation in addition to their Indian State forces, Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of Indian States served in almost every Indian campaign of the 19th century. Lord Curzon mangurated an Imperial Cadet Corps of Indian princes and nobles States vary greatly in size and importance Hyderabad is nearly as large as Great Britam, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to ensewhere, where manny custom has led to minute sub-division, there are many chiefs of single villages. In these petty estates the nominal chief may have some very limited magnetical powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over an Indian State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any to State. The rulers have not necessarily any religious or tribal connexion with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the Indian States, large and small, number 66z, only about soo are of any real importance. The majority represent the scattered inlitary chiefships which sprang from the ruins of the Moghil Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States who then rose to power. Most of these States are of more recent origin than the British power in India. A unique step was taken in 1910, when a new Indian State was created out of the family domains of the Maharaja of Benares.

The salutes enjoyed by the Indian princes indicate their relative importance. Those with eleven guns or more are addressed as His Higheleven guis or more are addressed as its high-ness. On pages 673-674 are the names of 86 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. Some well-known Indians of title, such as II H. the Aga Khan, GCSI, GCIF, GCV.O, and the Maharajah of Burdwan, GCIF, KCS.L. are

not ruling chiefs
The States of Hyderabad, Mysore, Baroda, Kashmir, Sikkim, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. The remainder,

The ruling dynasty is of Turkoman origin, and is descended from Asaf Jah, who became Viceroy of the Deccan in 1712, and then independent of the Mogul Emperor. Telugu and Marathi are the chief languages. Wheat, rice, and cotton are produced. The Nizam's Guaranand cotton are produced. The Anam's characteristic Railway is the principal line. a. Mysore This State, situated on a plateau in Southern India, was administered by the Indian Government from 1821 to 1881, when it was restored to native rule, under a somewhat strictly framed instrument of transfer. In Dec., 1913, the instrument was replaced by a new Treaty putting the relations between the British Government and the State on a footing more in consonance with the actual position of the Maharaja among the Feudatory Chefs of India. Kanarase and Telugu are the chief languages. There is a Mysore State Railway. Millets, pulses, and rice are the principal crops. Mysora has important goldfields. 3.
Baroda, situated in Western India in Guiarat and Kathiawai and much interlaced with British districts. The reigning Gaekwar was the adopted districts. The reigning Gaekwar was the adopted heir of the ruler deposed in x8p for misgovernment and misconduct. 4. The Himalayan Hill States, west of Nepal, including Kashmir. The miportant frontier State of Kashmir (capital, Srinagar, pop. x4x,735) was granted to Gholab Sing by Lord Hardinge, after the First Punjab War (x846). It complises Jammu, Kashmir, Ladakh. Gligit, and Baltistan. A force stationed at Gligit watches the northern passes and controls the feudatory chiefiships of Hunza and Nagar; while on the ships of Hunza and Nagar; while on the west the subordinate chefship of Chitral is occupied by British troops, depending for their support on the Peshawar border 5. Skkim, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1800, when also the boundaries of Thet were defined by the Sikkim-Thet Convention. 6 The Sikh States, in the Suhind plain, south of the Sutlej. The most important of these is Patiala. 7 Rajputana, compusing the ancient sovereignties lying between Sind and the United Provinces. Rajputana tween Sind and the United Provinces. Rapputana, (pop. 9,84,34) extends some 460 miles from north to south, and is 530 miles in breadth, and is larger than the British Isles. About half of the area is desert. It comprises 20 States of varying sire and importance. Of these 27 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rainntana and about themse other. and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are Jodhynir (Marwar), Udaymir (Mewar), and Jaymir. The (Marrary, Caurpar (Mercary, and Arrars). Raphut dynastics, the most ancient in India, go back before the Mogul Empire, and resemble feudal monarchies. 8. The States of Central India, lying to the north of the Neibudda and to the south and east of Rajputana, although the Governor-tieneral in Council. The remanuder, to the south and east of Rajputana, although or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Baroda, Kashmir, Jaipur, Udaipur, and Gwalior. The Indian States may be thus classified—
z. Hyderabad, pop. 464,287—the fourth city in India. This State is in the centre of the in India. This State is in the centre of the principal Muhammadan States in India.

9. The Malayalim States of Travancore and indian states of Travancore in the aggregate one-third less in the aggregate one-third less in the aggregate one-third less in the aggregate one-third less in the aggregate one-third less in the aggregate one-third less in the aggregate one-third less in the aggregate one-third than those of Rajputana, although the aggregate one-third than those of Rajputana, although the aggregate one-third th Cochin, lying together in S.W. India. These important States, attached to Madras Presidency, represent ancient Hindu dynasties. zo. The three northern Muhammadan States of Khafipur (Sind), Bahawaipur, and Rampur. zr. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. zs. Gujarat, including Kutch and the numerous petty chiefahips of Kathiawar. zz. The Southern Mahratta States. z4. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Suleiman range, a distance of Seo miles. The names of some of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. zs. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota-Nagpur, Orissa, the Central Provinces, and the Japur (Vizagapatan) Agency. 6. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier.

Countries Contiguous to Andia. NEPAL.

Succreign, His Majesty Maharaja Dhiraja Tribhuhana Bir Bikram Jung Bahadur Shah Bahadur Shamsher Jang ; suc. 1911.

Prime Minuter, His Highness Maharaja Sir Bhim Shumshere Jung, Bahadur Rana, U.C.S.I., K O.V.O., Honorary Lleutenaut-General of the British Army, Honorary Colonel of the 4th P.W.O Gukhas, Prime Minister, and Supreme Commander - in - Chief. (Personal salute in British India, 19 guus)

Nepal (arca, about \$4,000 80, nulles; pop. \$500,000) lies between British India and Tibet on the 8. slopes of the Himalayas, and includes Mt. Everest (29,241 ft). Amid the sterile mountains liennany fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces. Its exports to British India are estimated to amount to about \$4,000,000, and its imports to \$5,000,000 a year. The chief trade route is that between Kathmandu and the Bihar and Orissa frontier (77 miles). Nepal exports rice and other grains, hides, oliseeds, \$3t, cattle, jute, large quantities of timber, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over \$1,000,000. The aborigines are Mongolian in type, and their religions are Buddhism and Hinduism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. Their frequent aggressions led to a war with the British in \$24-6. Relations have now long been friendly. The policy of seclusion is, however, consistently fullowed by the Mepal rulers. The real political power rests with the Prime Minister. This office is always held by a member of his family, the ancession being determined by special rules. The army numbers about 45,000. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. During the Great War, and in the subsequent Afghan war, the Nepal Government rendered unstinted and unconditional assistance to the British Government in men, money and material. A new Treaty was concluded in December, 1923, between the British and Nepalese Governments, by which inter alia the internal and external independence of the State was recognized.

BHUTAN.

Blutan (area, alout so, coo sq. miles; pop. alout sgo,coo, mainly Buddhista) also lies on the 8.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance being paid by the Indian Government as compensation. By a treaty in 1920 this allowance was fixed at £6,667, and Bhutan agreed to be guided in its external relations by the advice of the British, who, lowever, will not interfere in its internal affairs. The former dual government of a spiritual chief and a temporal chief came to an end when the Tongas Peulop, the chief councillor and virtual ruler, the late Sir Ugyen Wangchuk, K.O.S.I. G.C.I.E., was chosen hereditary Maharaja in 1907. He has a salute of 12 guns in British territory. The estimated annual revenue is £13,000. Bhutan's total trade with India is estimated at over £65,000 a year. There is no British Resident.

CAPITAL, Punakha.

THE PERSIAN GULF.

For three centuries England has taken the lead in the Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. Vigorous measures have been taken against gunrunning England and India still have the lion's share of the trade, the bulk of which is coducted by Indians, who make Bonibay their entrepot. The Arabian shores are low-lying deserts, the Persian coasts mountainous; at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few.

The ruler of Bahrein (capital, Manama) has been in treaty relations since 1820 with the Government of India, who have a Political Agent at Bahrein. In 1880 he engaged not to make treaties with any other State.

The Sultan of Oman (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent and Consul at his Court.

The independent tribes on the Pirate (Arah) Coast from Ras-el-Kheima to Oded are bound under teaties with the Indian Government (dating from 1820, and confirmed in 1823 by a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Tractal" chiefs The British Political Resident in the Persana duif is the recognised arbiter and adviser of these tubes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or cede territory to, any other Power than the British. The trade of the Arab coast ports alongly consists in exports of pearls to India via

Important caravan routes converge at Koucit, which has an excellent harhour. The Sheikh is under treaty obligations with the Indian Government.

Lingah and Bahrem.

Political Resident, Persian Gulf, Lt.-Col. H. V. Secretary, Capt. J. R. L. BradshawRs. 1,350 Political Agent and Consul, Muscat, Capt. R. G. Do., Koweit, Military Asst. Surgeon A. L. Greenway......(Time scale)

PERSIA (q,v.) borders on Baluchistan and Af-chanistan. The demarcation of the Perso-Baluch ghanistan. frontier, partially carried out in 1872 and 1895, was completed in 1905.

ASIATIC RUSSIA.—A portion of what was once the Russian Empire is conterminous with Persia and Afghanistan. The Trans-Caspian Railway runs, vol Merv, to Samarkand and Andijan, with a branch to Tashkent. The Murchab Valley branch from Merv to Kuskh on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers.

CHINA.—India is in contact with two dependencies of China, Chinese Turkestan and Tibet, and one province, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pannrs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into The boundary between Kashmir and Chinese Turkestan has not been officially defined There is a Bitish consul-general at Kashgar. Trade with India is chiefly carried over the Karakoram Pass (18,500 feet) vid Ladakh, in

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India (boundary imperfectly defined), from Kashmir to Burma, but is separated therefrom by the Himalayas. India imports from Thlet wool, borax, salt, and musk, in exchange for cotton and woollen goods and grain. Trade passes from Bengal (through Sikkim) and from the Punjab and the United Provinces. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung, but as the Tibetans persistently disregarded the Convention, a political mission disregarded the Convention, a political mission was despatched from India, with a military escott. It reached the capital, Lhasa, after shaip fighting, on August 3, 1904. A new Convention was signed (Sept. 7), providing for the erection of boundary pillars between Sikkim and Tibet; for three trade marts, with British and Tibetan agents; for uncestricted traffic by existing routes; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (Auril, 1906) Chima secrepted the Conventions of (April, 1906) China accepted the Conventions of 1800 and 1904, and declared that no foreign the Malay peninsula and adjacent islands, as State should interfere in Tibet, while England within the British sphere of influence.

also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. In Dec., 1905, the ruler of Thet, the Tashi Lama, visited Rudia. The Dalai (or Sacred) Lama, who fied before the British advance on Lhasa, returned to Tibet in Jan., The Chinese had meanwhile strengthened their hold over the administration, despite the opposition of the Lamas, or monks, who resented the loss of their authority. In Feb., 1910, the Dalai Lama again fled to India, pursued by Chinese troops. He was then deposed by the Chinese Emperor. The British Government refused the Dalar Lama's appeal for their intervention, but allowed him to remain at Darilling. He left India in June, 1912, for Lhasa, where sharp fighting occurred between the Chinese and Tibetaus, the former being worsted. In August, xors, the British Minister at Peking presented a Nota to the Chinese Government, urging that China should not actively intervene in internal administration in Tibet. To this the Chinese Government agreed. and representatives of the British, Chinese and Tibetan Governments met in conference at Simla in Oct., 1913, to discuss the relations between the three counties A convention, the terms of which have not been made public, was initialled by the three representatives, but the Chinese Government have so far refused to satify it.

Yunnan is a Chinese province to the N E. of Burma. By Anglo-Chinese agreements of 1894 and 1807 a boundary was fixed between Burma and Yunnan, and arrangements were made regarding trade, extradition, &c. Part of the boundary is still undefined. By an agreement of 1806 Great Britain and France agreed to share equally all privileges or advantages that might be concoded by China in Yunnan. Trade with Yunnan is chiefly by a difficult route from Bhamo, in Upper Burna. Burna inports from Yunnan hides, raw silk, &c., and exports cotton goods, &c. Teng-yueh and Saumao, near the Burma frontier, are trenty "ports." There are British consuls at Teng-yueh and Yunnan-fu.

SIAM (q.v) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, mainly with Chiengmai. Burma imports from Siam teak, cattle, silk goods, &c., and exports cotton goods, &c. The houndary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Saan west of the Menam basin, including

The Dominion of Canada.

Canada was originally discovered by Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of The Dominion of Canada, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America.

The Dominion of Canada occupies the whole of the northern part of the North American Continent (with the exception of Alaska and part of the coast of Labrador), from 49° North latitude to the North Pole, and from the Pacific to the Atlantic Ocean. In Eastern Canada, the southernmost point is Middle Island in Luke Eric, at 41° 41' (approximately the

latitude of Rome, Italy).

Relief.—From a physical point of view Canada may be divided into an eastern division, a western division, the Red River Valley, in long. 97°, forming the separating line, and a northern division. The eastern division comprises two areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Montreal, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountaneous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main. a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 95,000 square miles, contributing to the great river system of the St. Lawrence. The northern division, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, is pre-eminently a region of waterways, and including the great Laure tian plateau. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54°, is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains (Mount Robson, 12,972 feet) and the Selkirk and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The highest mountain peaks in Canada are Mount Logan, 19,850 feet, and Mount St. Elias, 18,00

Climate.—The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The soil is generally fertile and all the products of the temperate zone are cultivated.

GOVERNORS-GENERAL OF CANADA SINCE 1867.

GOVERNMENT.

Canada is a self-governing Dominion within the British Empire, its constitution resting on the British North America Act of 1867, under which the Dominion of Canada came into being on July 1, 1867 (Dominion Day). The Executive power is vested in a Governor-General appointed by the Sovereign and aided by a Privy Council.

Governor-General and Staff.

THE EXECUTIVE.

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council.

British High Commissioner, Sir William Henry
Clark, K.C.S.I., K.C.M.G. (Earuscliffe, Ottawa).

THE LEGISLATURE.

Parliament consists of a Senate and a House of Commons. The Senate consists of 56 members, nominated for life by the Governor-General, distributed between the various provinces thus: a for Ontario, a4 for Quebec, so for Nova Scotia, so for New Brunswick, 4 for Prince Edward Island, 6 for British Columbia, 6 for Manitoba, 6 for Alberta, and 6 for Saskatchewar, each Senator must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the

owner of a property qualification amounting to \$4,000. The Speaker of the Senate is chosen by the Government of the day. The House of Commons is elected every five years at longest, and the Parliament consists of 245 members, elected as follows: & for Ondario, 65 for Quebec, 14 for Nova Scotia, 1x for Neve Brunweck, 27 for Mantoba, 14 for British Columbia, 4 for Prince Edward Island, 16 for Alberta, 2x for Sastatchevan, and x for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, its members are elected upon a very wide suffrage, and at the General Election in Dec. 1921 women exercised the franchise on the same terms as men for the first time in a Federal Election. For electoral purposes each province is divided into districts, returning a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Members of the Upper and Lower Houses receive \$4,000 per Session, with travelling expenses and deductions for non-attendance.

The Houses of Parliament were destroyed by fire on Yeb. 6, 1916, the new buildings being started the same year; the foundation stone was laid by H.E.H. the Duke of Connaught (Gov. Gen.), Sept. 1, 1917, and the corner stone of the main tower by H.E.H. the Prince of Wales, Sept. 1, 1919. The Speaker's Chair in the new House of Commons (a replica of that at Westminster) was presented in 1921 by Siscount Ullswater (expeaker of the House of Commons of the United Kingdon) on behalf of the Empire Parliamentary Association of the Houses of Lords and Commons

Sergeant-at-Arms, Lt -Col. H. J. Coghill.	
(and allowance \$600)	4,520

THE JUDICATURE.

The Judicature.—Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first-manued are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and six puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by separate judges, and its sittings may be held anywhere in Canada.

The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in Groce in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

DEFENCE

The Canadian Militia is composed of the Active Militia and the Reserve, the Active Militia consisting of the Canadian Permanent Force (a small body of all arms) and the units of the Active Militia of the serveral branches of the service which are organized and perform annual training. The Reserve Militia consists of reserve units and of all able-bodied citizens between the agos of 18 and 60, with certain well-defined exceptions. The total catallishment of the Non-Permanent Active Militia (1930) is 9,050 officers and 116,548 other ranks.

Expetitionary Force in the Great War.—The number emisted up to the cessation of hostilities was 595,441, of whom 428,05 were sent overseas. Over 80% of all emistment was voluntary. The total outlay for the War is estimated at \$8,000,000,000.

Royal Canadian Navy.

The Royal Canadian Navy consists (1931) of a Destroyers and 3 Mine-sweepers. The authorized complements are roy officers and 792 men of the Permanent Force. There is also a Naval Reserve of 70 officers and a 20 men and a Naval Volunteer Reserve of 70 officers and 920 men.

Royal Canadian Air Force.

The strength of the Royal Canadian Air Force, permanent service, was on Jan. 1, 1931, 177 officers and 734 airmen.

Royal Canadian Mounted Police.

EDUCATION.

Education is under the control of the Provincial Governments, the cost being met by local taxation, aided by grants from the several Provincial Governments. There are (1930) 31,866 public elementary and secondary school districts (attendance at the former being compulsory except in the Province of Quebec), with s, 100,637 pupils. In addition there were 80.062 pupils in private elementary and secondary schools. Higher education is conducted in 23 universities and rox colleges with an eurolment, in 1930, of 74,183.

In 1930 the live stock included 3,295,000 horses,

8,937,000 cattle, 3,696,000 sheep, 4,000,000 swine, and 60,795,000 poultry.

In dairy produce the Dominion output of creamery butter in 1930 was 187,131,247 lb, valued at \$57,177,98 There was also produced 4 337,000 lb. of dairy buttervalued at \$99,720,000.

84 337,000 lb. of dairy buttervalued at \$50,720,000. The cheese production, home-made and factory, for the same period totalled 129,403,458 lb. valued at \$18,469,395.

Fur Farming.—A comparatively new industry, but one which is assuming appreciable proportions, is that of fur farming. There were \$5,23 fm farms in the Dominion in \$200,4493 of which were tox farms, the remainder being divided between muck, raccoon, marten, skunk, fisher, Karakul sheep, beaver, muskrat, chinchilla rabbit, coyote, hadger and Siberian hare. The total number of animals on the farms at the end of \$200 including animals on the farms at the end of 1929 including estimates of the numbers of muskrats and beaver was \$23,050, valued at \$31,303,025; born in captivity,425,757; sold from faims,35,422,value \$4,474,053, pelts sold, 38,311, value \$2,304,910; the total sale for live animals and pelts being

86 779,863 as compared with \$6,225,446 in 1928.
Fisheries.—The fisheries are an important source of wealth, and include salmon, cod, halibut, whitefish, herrings, mackerel, and lobsters. The total value of the catch marketed in the calendar year 1930 was \$47,804,216, as against \$55,518,521 in 1920 and \$50,259,744 in 1928, the banner year of the fishery harvest. The capital invested in vessels, &c., engaged in catching operations and in fish-caming and curing establishments in 1930 was \$64,005,007, and the number of men employed 79.538. The number of cauning and curing establishments

in operation in 1930 was 713

Lumbering.—The value of production, including (a) primary forest production and (b) the value added by manufacture in sawmills and pulpmills, was \$337,649,078 in 1929, as compared with \$323,644,008 in 1928. The principal items of production in 1929 were sawn lumber \$123,349,886, shingles \$9,423,363, lath \$2,860,779,

and wood pulp £ 129,033.154.

Industrial Statistics.—Industrial establishments of all kinds in rose had a total capital of \$5,083,014,754, the gross value of the products being \$4,063,987,279. These industries employed 692,866 hands, the total pay roll for whom was

\$33,049,848.

Minerals.—Some minerals produced in 1930**
were as follows: Gold, 2,089,766 02. (\$43,199,000);
copper, 301,017,167 lb. (\$38,687,000); lead,
329,033,531 lb. (\$72,192,000); nickel, 103,788,009 lc
\$44,44,000); sliver, 26,727,652 02. (\$70,057,000);
zinc, 259,700 849 lb. (\$9,393,000); cobalt, 694,163 lb.
(\$7,144,007); coal, 14,925,000 short tons
(\$33,000,000); natural gas, 29,566,000 M. cu. ft.
(\$10,550,000); crude petroleum, 1,500,000 bris.
(\$3,100,000); ashestos, 244,000 ctons (\$8,600.000);
gypsum, 1,060,000 tons (\$2,875,000); salt, 283,000 tons (\$3,1575,000).

The total value of the mineral output in 1930 was \$276,865,000

Agriculture and Live Stock.-The total area is \$34,263,300 acres, and in 1939 the area of cleared land was about 15,000,000 acres, of which 10,esc,s94 acres were under field crops. The estimated total value of all field crops in rgag was \$236.651,277. Cheese factories produced 79,816,828 lb. of cheese in 1929 valued at duced 79.816,888 lb. of cheese in 1989 valued at \$24.513,547, and creameries made 59.185,194 lb. of butter valued at \$23,633,174. In 1929 there were 605,505 horses, 2,571,594 cattle, 2,130,395 sheep, 1,681,263 pigs, and 2,045,002 poultry. Free grants of land are obtainable in the great clay belt of Ontario, opened up by the Temiskaming and Northern Ontario railway. Improved farms, orchards and small holdings can be bought on reasonable terms in the older settled parts of the Province. There is a scheme of land settlement, with free land and fluancial assistance for returned soldiers, both fluancial assistance for returned soldiers, both Imperial and (anadian, There is always a demand for farm workers.

Lumbering.—The value of production including primary forest production and the value added by manufacture in pulp-mills and saw-

mills in 1929 was \$111.000,00

Manufactures.-Ontario is the chief manufactuning province of Canada. The total value of its manufactures in 1925 was \$1,527,154,660. There were, in 1925, 262,483 employees, an invested capital of \$1,925,593,482, and an annual wage bill of \$307,304,007. The cluef manufacwage bill of \$307,304,007. The chief manufacturing centres in 1922 were Toronto (\$447,098,824), Hamilton (\$122,303,550), Ottawa (\$21,303,494),
Oshawa (\$47,529,284), London (\$28,203,399), and
Ford (\$42,386,677)

Minerals.—Ontario is the leading mineral

Province in the Dominion, the output in 1929 being \$116,558,912 The principal metals are:
gold, \$33,543,913; silver, \$4,649,375; nickel,
\$37,115,461; and copper, \$14,609,178.

Hydro-Electric Topes.—The Province of On-

tario is well supplied with water power, having available about 7,000,000 h.p. The chief power rivers are the Niagara, the St. Lawrence and the Ottawa. One of the world s largest and most successful electrical undertakings—the largest publicly-owned—is operated by the Hydro-Electric Power Commission of Ontario, which generates and transmits power to more than 600 co-operating municipalities and serves about 7g per cent of the population of the Province. The aggregate peak load exceeds x, 200,000 h.p. The undertaking represents a capital investment

of about £70,000,000 (\$320,000,000).

Principal Cities.—CAPITAL, TORONTO, population 652,000, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity; Hamilton, the "Bir-mingham of Canada" (zs.,coo), Ottawa, the Federal capital (zs.,coo), with a large lumber trade and woodenware manufactories; London (67,000); Brantford (33,000); Kingston (23,000); Peterborough (22,000); Windsor, connected by tunnel heneath Detroit River with Detroit, Mich., U.S.A. (67,000): Fort William (24,000); Kitchener (26,000); Guelph (20,000); St. Catharine's (24,000); Sault Stc. Marie (23,000).

QUEBEC.

Area and Population .- The Province of Quebec contains an area estimated at 594,434 square miles, with a population (1921) of 2,351,799, an increase since the last Census of 355,423. In 1997 the Province was diminished by 121,400 square miles by the award of the Imperial Privy

Council in the controversy between the Dominion of Canada and Newfoundland with regard to

their boundary in the Labrador Peninsula.

Government.—The Government of the Province is vested in a Lieutenant-Governor, the Council of Ministers, a Legislative Council consisting of 24 members appointed for life, and a Legislative Assembly of 90 members elected for five years to represent the 90 electoral districts of the Pro-

Finance.-The actual revenue for the year revenue for the scual revenue for the year pass-as was \$39,976,883 and the actual expendi-ture \$35,964,487. The bonded debt (June 30, 1999) was \$80,334,791 and the net funded debt

\$56,751,141.

Production and Industry.—The gross value of manufactured products in 1928 was \$1,073,162,291 but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 120,000,000 acres, of which sz.000.000 are under licence to cut timber. The wood pulp industry is assuming greater importance every year. Several large mills have recently been built, and during 1928 the production reached s.or8. c66 tons, valued at \$67,457,388. The Province produces more than half of the total output of the Dominion In 1938, 1,628,872 tous of paper were manufactured, valued at \$104,887,657 (mainly newsprint). Unimproved lands may be bought from the Government at 60 cents per acre, and the purchase-money paid in five instalments The area of land subdivided for the purpose of settlement unsold on June 30, x938, was about 8,250,000 acres. In x928 the production of dairy 8,350,000 acres. In 1938 the production of cantindustry products was cheese 45,183,970 lb. (valued at \$9,438,302), and butter 52,536,248 lb. (valued at \$19,975,556). In 1938 there were in the Province 351,205 horses, x,564,346 cattle, 852,757 sheep, 813,309 swine, and 8,350,000 poultry. Education.—The Superintendent of Educa

tion, assisted by a Council composed of a Roman Catholic and a Protestant Committee, each under a deputy head, is invested with the central control of Education. The schools, both Roman Catholic and Protestant, are maintained partly by local taxation and partly by Government grants. There were, in 1928, 8,145 schools with 611,783 scholars, including the high and superior schools and so normal schools supported by the State. There are also Schools of Agriculture, Dairying, Polytechnic, Fine Arts, Rangers, Historic Guides, Blind and Deaf, Nursery, Commercial and Classical Schools, and four Universities—two Protestant (McGill University, Montreal, and Bishop's College, Lennoxville); and two Roman Catholic (Laval University,

and two Roman Cantonic (Lava: Chiversity, Quebec, and Montreal University).

Principal Cities.—CAPITAL, QUEBEC (population, 131,000), historic city visited annually hythousands of tourists, and one of the great seaport towns of Canada; and Montreal (population). lation, 989,835), the commercial metropolis, and the principal centre of the Canadian grain export trade, situate at the confluence of the Ottawa and St. Lawrence Rivers. Ocean-going steamers ascend the St. Lawrence as far as Montreal.

other important cities are Hull (27,087), Sherbrooke (26,300), Trois Rivières (35,000), Verdun (46,477). Population figures from "Municipal Statistics of the Province of Quebec" (1928).

NOVA SCOTIA.

Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of ar,428 square miles (360 miles of which consists of lakes, rivers and inlets of of which consists of lakes, fivers and finites of the sea) with a total population, at the Census of rear, of 53,837, an increase since the last census of 31,499 persons. Estimated population (1989) 550,000

Government.—The Government is administered by a Lieutenant-Governor, aided by an Executive Council and a Legislative Assembly of 38

Chief Justice, Hon. J. A Chisholm \$20,000 Mellish 1,000

Agriculture and Live Stock .- About 8.000.000 acres are fit for tillage, and the soil is of good average fertility. The climate is delightful, the winter being less severe than in most of other parts of the Dominion. In x930 there were about 5,000,000 acres of land occupied, of which about 735,000 acres were under crop, 3,000,000 acres in pasture and partially wooded lands, and about 70,000 acres in gardens and orchards. Fruit is extensively cultivated, and the estimated apple crop for 1930 was 1,200,000 barrels, the principal fruit belt being the Annapolis Valley. The products of the fields and orchards in 1930 were valued at \$20,000,000. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £ zoo to £z, coo, whilst the Government offer uncleared Crown lands at \$ zoo per zoo acres, or \$z per acre for any additional, not to exceed zoo acres in all. Through the Land Settlement Act, the Government gives practical assistance to skilled farmers. There is a Government agricultural college and experimental farm at Truro for men and women, and a well-equipped technical college at Halifax. In 1930 the live stock included 51,530 horses, 285,000 cattle, 289,621 sheep, 43,593 swine, and 1,145,983 poultry.

Manufactures .- In 1929 the gross value of the manufactures was \$55,033,70x. The capital invested was \$xx7,5x6,40x, and r6,568 hands were employed; the principal industrial centres being Area and Population—NOVA SCOTIA is a peninsula between 43° sg'-47° N. lat. and 59° 40′ employed; the principal industrial centres being 66° sg' W. long., and is connected with New Sydney (\$zs.,96s,car) and Halifax (\$zo.,700,999).

Fisheries.—The total value of the fisheries in 1927 was \$9,500,000, and the number of persons employed was about 20,000.

Minerals.—Mine products in 1927 were valued at \$35,980,000; the coal deposts are extensive at extensive manufactures of the state of th

Principal Cities.—Capital, Halifax (population 58,372), one of the terminals of the Canadian National Raliway, with a magnifecent harbour, is one of the principal winter ports of Canada, and the entrepot of a large trade with the West Indies and South America. A shippard for the building of large ocean-going steamers, with a dry dock, is one of the leading industries. Sydiney in Cape Breton has a population of 22,545, and Glace Bay 27,007.

CAPE BRETON ISLAND.

Cape Breton Island, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,975 square miles, with a population of about 130,000, inhabitants. The chief city, Sydney (pop. 22,545), on the eastern coast, has valuable collieries in the neighbourhood and is the sate of the largest steel works in Canada. The Canadan National Railway connects the Island with the mainland by rail ferry.

NEW BRUNSWICK.

Area and Population—NEW BRUNSWICK is situated between 45°—48° N lat. and 53° 47′—59° N long., and comprises an area of 27,955 square miles, with a population in 1921 of 357,956, an increase since the last census of 35,957 persons. It was first colonised by British subjects in 1751, and in 1752 by the inhabitants of New England, who were dispossessed of their property in consequence of their loyalty to the British Crown.

Government.—The Government is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 48 members elected by the people.

Executive.

Speaker, Legislative Assembly, J. Leonard O'Brien.

The Judicature.

Finance—The ordinary receipts for 1927
were \$4,933,029, and the ordinary expenditure
\$4,927,237.

Agriculture and Live Stock.—The total land area is 18,65,000 acres, of which 900,033 acres were under field crops in 1925. The total value of the field crops in 1927 was \$18,443,500. The live stock (1927) included 216,679 cattle, 153,057 sheep, 77,307 pigs, 51,304 horses, and 954,093 poultry Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. The fisheries include salmon, cod, mackerel, herring, and shad; value of the fisheries (1925) \$4,795,589. In 1927 the cheese factories in operation produced \$03,000 lb., and the creameries 1,885,265 lb. of butter.

Manufactures —The gross value of the output manufactured goods in x924 was \$57,455,056, the principal manufacturing centre being \$5. John (\$5.6,525,x52) The chief industrial pursuits arise from the produce of the forests and the fisheries. Natural gas has been found in minimese quantities in Albert County, and the south-eastern section of the Province is remarkably rich in oil shales. Coal is found; also silver, lead, antimony, copper, fron, manganese, and other valuable minerals in considerable quantities.

Principal Cities.—CAPITAL, FREDERIOTON; population (1921), 8,114. St. John (pop 69,093) is one of the principal winter ports of Canada, and is connected by C.P.R and Canadian National Railways with Montreal, Moneton (17,488).

MANITOBA.

Area and Population—Manitoba, originally the Red River Settlement, is situated in about the centre of the continent, hetween 49°—56° N. lat. and 95°—102° W. long., with a total area of 251,822 square miles and a population (1926 Census) of 639,056, an increase since the last census of 25,938.

Government —The Government is administered by a Lieutenant-Governor, assisted by an Executive Council of 8 Ministers, who are members of the Legislative Assembly of 55 members, each in receipt of an annual sessional allowance of \$2,000.

Executive. \$9,0

PRINCE EDWARD ISLAND.

Area and Population.—Trince Edward Island hes in the southern part of the Gulf of St. Lawrence, between 45°-47° N. lat. and 62°-54° 30° W. long. It is about 130 miles in length, and from 4 to 34 miles in breadth; its area is 3,25 square miles (12ther larger than that of the English county of Norfolk), and its population (Consus, 122) 83,615 (47,060 males and 45,650 females in 1231), a decrease from the last census of 5,213 persons. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they selzed it again, however, during the Seven Years' War (1756-1763) and compelled the greater part of the French inhabitants to leave, and from that time it has remained British.

Government.—The Government is vested in a Lient.-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by

PHYSIOGRAPHY.

The Island of Newfoundland is situated between 46° 37'-51° 37' N. latitude and 52° 44'-50° 30' W. longitude, on the north-east side of the Gulf of St. Lawrence, and is separated from the North American Continent by the Straits of Belle Isle. The island is about 317 miles long and 316 miles broad, and is triangular in shape, with Cape Bauld (N.), Cape Race (S.E.), and Cape Ray (S.W.) at the angles. The coast is extremely rugged, and the coastal regions are mountainous, the north and east being cold during winter and early spring owing to the quantities of ice brought down from the Greenland seas. The interior is undulating and is covered with tolts (round hills) interspersed with lakes, rivers, and swamps, but containing many fertile valleys, where the climate is favourable to agriculture, and a great wealth of forests, mainly of spruce, fir, pine, and birch. The climate is salubrious, and the people are a strong, brave, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

GOVERNMENT.

Newfoundland, the oldest English colony, was discovered by John Cabot on June 24, 1497; the first land seen was hauled as Prama Vista—the present Cape Bonavista. The island was afterwards visited (1500) by the Portuguese navigator Gaspar de Cortercal, and soon became the centre of an extensive fishing industry, with settlements of Portuguese, Biscayans, and French. In August, 1523, the island was formally occupied by Sir Humphiey Gilbert, in the name of Queen Elizabeth, and by the Treaty of Utrecht (1713) the whole island was acknowledged to be British. A Governor was first appointed in 1798, and in 1855 "Responsible Government" was accorded to the island.

The executive is entristed to a Governor, appointed by the Crown, aided by an Executive Council, with a Legislature of two houses.

GOVERNOR.

THE MINISTRY (Nov. 17, 1928).

Prime Minister & Minister of Justice, Rt. Hon. Sir Richard A. Squires, P.C., K.C.M.G., K.C.

Colonial Secretary, Hon. Arthur Barnes, B.Sc., Ph.D

Without Portfolio, Hons A. Campbell, Sir W. F. Conker; Sir T. Cook, P. J. Lewis.

Mosdell, M.D.

Not in the Cabinet.

LEGISLATURE.

The Legislative Council consists of not more than as members, appointed for life; the House of Assembly of a members, elected by the people for 4 years, every male British subject aged as, and every female aged as, being entitled to the franchise.

JUDICATURE.

DEFENCE.

Newfoundland contributed xx,qxx men to the fighting forces of the Empire during the War, in addition to 3,000 enlisted in Canadian and other forces.

EDUCATION.

Education is denominational, and is assisted by Government. Primary and Secondary schools were attended in 1926 by 59,088 pupils. The Government grants in 1926 amounted to \$977,590.

At the Census of rorr and roar the following statistics were obtained:—

Roman Catholics	1911 81,177	1921 86,576
Church of England	78,616	84,665
Methodists		74,805
Presbyterians	1,876	x,876
Salvation Army	10,141	13 023
Various	2,767	2,688

FINANCE.

The revenue, expenditure and dobt of Newfoundland are stated as under (\$x at par = 4x. ad or \$4.86 = £x sterling) -

Year.	Revenue	Expenditure	Public Debt
1986-87 1987-88 1988-89 1989-30	\$ 8,932,435 9,465,005 10,025,649 11,579,215	\$ 10,533,408 10,740,000 11,132,822 11,934,313	\$ 72,017,932 85,477,106 87,592,106

Canada	12,992,600	3,968,479
Portugal	15,440	2 157,404
Spain	132,995	2,748,547

The principal imports are flour, tevtiles, coal, hardware, and provisions; the principal exports are codfish, cod and seal oil, pulp and paper, herrings, seal-skins, tinned lobsters, fron pyrites, and other minerals; the total value of the fishery products in 1920-20 was upwards of \$14,953,004.

PRODUCTION AND INDUSTRY.

The inhabitants are chiefly located on the coast-line of the shore and bays, nearly 10,000 being engaged in fishing—for cod in summer and seal fishing in winter and spring. Agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills have been erected. The larger portion of the interior is practically in a state of nature, but the railways have opened up large tracts. A valuable discovery of copper has been made at Little Bay, about soo miles from St. John's.

COMMUNICATIONS.

Rativays.—There were gog miles of railway open in 1936 and 47 miles of private line. The trans-insular line runs to Port-aux-Rasques, wit Exploits River and Bay of Islands, with branch connexions to Placentia, Bonavista, Bay de Verde, Hearts Content, Trepassey, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). Communication between various points on the coast and Sydney, C.B., is maintained by a fleet of xx first-class steamers.

Posts and Telegraphs.—There were \$85 post offices in 1930 (185 of which were also telegraph offices and 75 telegraph offices additional, dealing with 8,500,000 letters and post-cards, 4,000,000 newspapers and hooks, and 688,644 parcels. 740 telephone stations are open, mostly in post offices. There are 4,830 miles of telegraph line and 1,200 miles of postal telephone wire. Postal revenue, \$4,739; Customs duty collected, \$220,540; telegraph revenue, \$240,540; telegraph revenue

Shapping.—On Dec. 31, 1930, the Mercantile Marine of Newfoundland consisted of 2,501 suling vessels of 102,728 tons, and 255 steam and motor vessels of 41,670 tons. In 1930-30 the tonnage of vessels entered and cleared at Newfoundland ports was 3,375,499 tons, of which 1,280,222 tons were British.

TOWNS.

The CAPITAL, ST. JOHN'S (population 1930, 42,143; with suburbs, 58,811), contains two cathedrals, several banks, and numerous public buildings. Other towns are Harbour Grace (3,825), Bonavista (4,028), ('urbonear (3,320), and Twillingate (3,217).

HIGH COMMISSIONER.

High Commissioner in London, D. J. Davies, c.B.E., B Sc. (Acting). Office, 58, Victoria Street, S.W. z.

LABRADOR.

Labrador, a dependency of Newfoundland, forms the most easterly part of the North American continent, and extends from Blanc Sablon, in the Straits of Belle Isle, on the south, to Cape Chidley, at the entrance to Hudson's Straits on the north. The boundary between Quebec and Labrador came up for settlement before the Judicial Committee of the Privy Council in Oct., 1926. By the judgment given in March, 1927, the boundary was defined as a line drawn due N. from the castern boundary of Blanc Sablon as far as 32 N. Lat., and from thence W. along that parallel to the Bomaine River, and thence N. along the east bank of that river and its headwaters to their source, and thence due N. to the creat of the watershed or height of land there, and thence W. and N. along the creat of the watershed or height of land there, and thence W. and N. along the creat of the watershed of the rivers flowing into the Atlantic Ocean intil it reaches Cape Chidley. The territory thus confirmed as under the jurisdiction of Newfoundland has an area estimated at 180,000 square miles. Labrador possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the world is provided by the Grand Falls on the Hamilton River. The inhabitants are mainly Eskimos, engaged in fishing and hunting. There are no towns, but there are Moravian Mission stations at Makkovik, Hopedale, Nain, Okak, Hebron, and Killinek.

The Commonwealth of Australia.

Australia was separated from the other great land surfaces at a remote period, and exhibits therefore some very archaic types of fauna and flora. It may be regarded as the largest island or the smallest continent, being surrounded by the following waters:—North, the Timor and Arafura Seas and Torres Strait; East, Pacific Ocean; South, Bass Strait (which separates Tasmania from the Continent) and Southern Ocean; and West, Indian Ocean. The total area of the Continent is 2,948,366 English square miles, the island of Tasmania having an area of 26,215 square miles, and making a total area for the States and Territories of 2,974,581 square miles. The coast-line of Australia is approximately 12,210 miles, and the geographical position of the Continent is between 10° 41′-39° 8′ South latitude and 113° 9′-153° 30′ East longitude; the greatest length East to West is 4,000 miles, and from North to South 1,971 miles. Its nearest distance to England is about 11,000 miles.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area, the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. whole continent is, roughly speaking, a vast, irregular, and undulating plateau, part of which is below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. The Great Barrier Recf extends parallel with the East coast of Queensland for 1,200 miles, at a distance of about 60 miles from the mainland. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex, and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the strike of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and southeastern Australia, stretching far inland from the coastal range, is a fertile area devoted partly to agriculture, partly to dairying, while the inland districts particularly are admirably adapted to the rearing of sheep. The most extensive mountain system takes its rise near the S.E. point. and includes a number of ranges known by different names in different places, none of them being of any great height. The highest peak, Mount Koscinsko, in New South Wales, reaches an elevation of 7,328 feet. The principal rivers are the Murray, which debouches on the south coast, after receiving the waters of its tributaries the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island: on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Ftzroy, and Burdekin; on the west, the Swan, Murchison, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. Lakes are numerous, but nearly all are salt; the scarcity of the natural water supply has been, however, mitigated by successful borings and by the construction of large dams. The work of conserving the vast quantities of water which run to waste in the wet season is being vigorously prosecuted by a system of locks and weirs on some of the rivers. Minerals comprise gold, silver, copper, zinc, 1ron, and coal in large quantities, antimony, tin, gypsum, magnesite, osmiridium, opal, sapplires, &c., and there are abundant supplies of building stones, clays, &c. The potentialities of the country in regard to its supplies of metals and minerals have not yet been fully tested.

Climate.—The seasons commence about March 21 (Autumn), June 21 (Winter), Sept. 22 (Spring), and Dec. 22 (Summer). The climate is extremely dry, but, except in the tropical coast-land of the north, the continent is everywhere highly beneficial to Europeans, the range of temperature being smaller than that of other countries similarly situated.

GOVERNMENT.

The Government is that of a Federal Commonwealth within the British Empire, the executive power being vested in the Sovereign (through the Governor-General), assisted by a Federal Ministry of ten Ministers of State and such honorary Ministers who may be appointed thereto. The Commonwealth was constituted by an Act of the Imperial Parliament dated July 9, 1900, and was inaugurated Jan. 1, 1901. Under the Constitution the Federal Government has acquired and may acquire certain defined powers as aurrendered by the States, residuary legislative power remaining with the States. Trade and customs passed under Federal control immediately on the establishment of the Commonwealth; posts, telegraphs and telephones, naval and military defence, lighthouses and quarantine on proclaimed dates. The Commonwealth also now controls such matters as old age pensions, patents and copyrights, naturalization, navigation, &c. The right of a State to legislate is not abrogated except in connexion with matters exclusively under Commonwealth control, but where a State law is inconsistent with a law of the Commonwealth the latter prevails to the extent of the inconsistency.

GOVERNOR-GENERAL.

Executive Council.

(Oct. 22, 1929.)

COMMONWEALTH OFFICES IN LONDON, Australia House, Strand, W.C. a.

THE LEGISLATURE.

The Federal Parliament consists of a Senate and a House of Representatives. The Senate contains 36 members, six from each of the Original States, elected for six years by universal suffrage. The House of Representatives, similarly elected for a maximum of three years, contains members proportionate to the population, with a minimum of 5 Representatives for each State. The House of Representatives, 1931, is made up of 28 for New South Wales, 25 for Victoria, 25 from Countries and 25 for New South Wales, 25 for Victoria, 25 from Tasmania and Western Australia, and 25 (entitled to debate but not to vote) from the Northern Territory. Members of the Upper and Lower Houses receive £800 per annum, with travelling expenses.

President of the Senate, Hon. Walter Kingsmill. Speaker, House of Representatives, Hon. Norman John Oswald Makin.

THE JUDICATURE.

There is a Federal High Court with a Chief Justice and 5 Judges, having original and appellate jurisdiction, subordinate to the Judicial Committee of the Privy Council.

DEFENCE.

The Australian fleet consists of the Cruisers Australia, Cauberra, Brushane, Adelaude, 4 sloops, 5 destroyers, scaplane carrier, and several auxilharies. The personnel of the fleet is mainly Australian in character, although still supplemented to some extent by Imperial officers and men. The sea-going forces of the Royal Australian Navy on February 15, 1931, consisted of 360 officers and 3,013 men. There is also a R A N. Bugade composed of members of the Citazen Naval forces.

Army.

From 19xx to 1939 the defence policy was based on the universal compulsory training of a Citizen Army, but from November xst, 1939, the constitution of the forces on a voluntary basis was adopted Under this system men from 18 to 40 years of age may be enlisted in the Militia Forces, and youths from 14 to 17 years in the Senior Cadet Corps. On April 30th, 1931, 31,858 were undergoing training.

Air

The permanent strength of the Australian Air Force in April, 1921, was 204 officers and 758 airmen; and of the Citizen Air Force, 60 officers and 200 airmen. The Air Force and the Civil Aviation expenditure (excluding war services) for the year 1929-39 was £708,956.

PROPRAIL RINANCE

The above particulars do not include the Interest payable on Loans to the States, which amounts are recoverable from the States concerned.

* In addition, the following amounts were spent from leans for War Purpuses and for Works—2003-05, 50,973,563 226; 226-75, 50,428,502: 2003-75, 50,503 24; 2003-75, 50

DEBT.

The total of the Public Debt for Commonwealth Purposes on June 30, 1931, was £383,783,455, including a War Loan from the British Government of £79,724,220, which is subject to a funding arrangement whereby the debt is to be extinguished about 1956 by annual repayments of 6%, of which £1 22.8d. per cent. is for reduction of principal. Adding the indebtedness of the States viz. £767,326,373, the total public debts of Australia amounted (June 30, 1931) to £1,126,034,917 (of which £559,136,013 was redeemable overseas) or £170 178. 10d. Per head of population.

Banking.—For the quarter ended June 3c, 1932, the Australian liabilities of the Banks of Issue throughout the Commonwealth amounted to £328,444,936, and the Australian assets to £428,93,939. On March 21, 1931, there were 5,125,995 depositors in the Savings Banks, the amount of deposits being £192,871,506 (£29 14. 6f.) per head of population)

Labour Statustics.—In 1930 there were 362 Trade Unions, with 845,787 members, of whom 120,000 were women. The estimated total number of employed persons over 20 years of age in 1930 was 1,313,000 males and 311,600 females. In number of unemployed members of trade unions averaged 19'3 per cent. Employers' Associations number 234, with membership of 134,669. Retail Price Index No. for food, groceries and rent (4 and 5 rooms) (6 Capital Cities) 1930 (hase 1933-1937-21,000) 975. Melbourne Wholesale Price Index 1930 (hase 1931-21,000) 1,550. Nominal Weekly Wage Index No., Australia, males (base 1931 = 1,000 = 512, 34), 389 = 961 96. Number of industinal disputes in 1930 was 183. involving 54,222 persons in a loss of 1,511,241 working days and £1,522,342 in wages.

COMMUNICATIONS.

Railways.—Total length of Government (and private) railways open for general traffic at June 30, 1230, private lunes heing included in the totals and shown in parentheses:—

State.	Miles open	
New South Wales Victoria Queensland South Australia Western Australia Tasmania	4,738 6,726 3,939 4,842	(116) (25) (279) (34) (277) (141)
Federal Capital Territory Northern Territory	5 316	=
Total	27,477	872

The gross earnings of all dovernment lines in 1993 30 were £45,778,437, working exponses £37,963,45, and net earnings £7,782,922, being at the rate of 28 3d. per train mile, and representing a return on the total cost £329,500,024, of 236 per cent., as against 243 per cent. in 1988-29. In 1982-30 passenger journeys numbered 353,833,000 and 32,107,000 tons of goods and live stock were carried, the train miles run being £6,775,000. The electrication of the Sydney suburban system is in progress.

Tramways.—There are 64z miles of tramways in Australia, 57z miles of which are of electric,

42 of steam, 26 of cable, and x of horse traction Extensive conversions to electrical traction have been made and more are in progress. The several Governments control 409 miles; municipal anthorities, 185 miles; and the remaining 47 miles are operated by private companies and individuals. The total capital cost of tramways at June 30, 1930

Shipping.—The entrances and clearances of vessels engaged in oversea trade at the various australian ports in zgse-30 were: entered, zsas (s,444,445 tous); cleared, z,539 (s,499,68z tous). Of the vessels entered, z,077 of 3,997,870 tous were under the British flag and 445 of z,446,576 tous under foreign flags.

were under the British flag and 445 of 1,445,576 tons under foreign flags.

The total including local shipping entering the ports of the capital cities during 1993–90 was: Bydney 6,592 vessels of 8,940,535 tons, Melbourne 3,415 (7,030,193). Brisbane 1,151 (3,607,891). Adelaide 2,058 (4,697,886). Fremantie 788 (3,754,409), and Hobart 536 (891,368). At December 31, 1930, there were 2,386 vessels of a total net tounage of 377,384 on the shipping registers of the several States.

Posts and Telegraphs.—In year ended June 30, 1930, there were 8,507 post offices; there were 9,327 telegraph stations, with 150,414 miles of wire, transmitting 15,724,426 telegrams, receiving 718,339 and dispatching 78,08s cablegrams A Beam wireless station, giving a service to and from Great Britam, was opened for traffic in April, 1927. At the end of year 1939-30, 520,169 Telephones were connected with 6,094 telephone exchanges; approximately 420,540,000 "local" and 35,388,725 "trunk line" calls were recorded for the year. 311,622 wireless broadcasting listeners' licences were issued in 1930-

Motor Vehicles.—At June 30, 1930, there were 656,314 motor vehicles registered in the several States. These comprised 466,930 cars, 84,807 motor cycles, and 104,487 commercial vehicles; revenue derived from motor registration fees and motor tax, &c, in 1929,30 was £4,524,898. Motor omnibus services are extensively operating in urban areas.

Cind Aviation.—zzo neroplanes of various types were registered with the Department of Civil Aviation at June 20, 1920 During the year 128,916 flights of a total duration of 42,963 hours were effected: 3,243,297 miles were flown, and 704,216 passengers carried. On the subsidized aerial mail routes 29,25 lbs. of mail were carried; Western Australia, 25,649 lbs.; Queensland, 2,735 lbs.; and 821 lbs. on Adelaide (S.A.) and Cootamundra (N.S.W.) and branch services. Three subsidized companies are now operating machines over approved routes (approximately 5,900 air miles), while several unsubsidized companies have commenced commercial services over additional routes totalling 2,250 miles.

CAPITAL.—CANBERRA, in the Federal Capital Territory, transferred to the Commonwealth by N.S.W. On Jan. z, 1921, has been laid out as the capital of the Commonwealth. At the latest available date the population of the Federal Capital Territory amounted to 8,459, of which 7,390 were living in Canherra.

THE NORTHERN TERRITORY.

The Northern Territory has a total area of 523,620 square miles, and lies between 123°-128° East longitude as far as 26° South latitude. The administration was taken over by the Commonwealth on January 1, 1911, from the government of the State of South Australia, and the divisions into territories, known respectively as North Australia and Central Australia, were abolished in 1931—a reversion to the position as it existed prior to such divisions on February 1, 1927. The headquarters of the Administrator are at Darwin neaquarters of the Administrator are at Darwin in the far north, a Deputy Administrator being stationed at Alice Springs in the south, to exercise all the powers and functions of the Administrator in that portion of the Territory situated south of ze^{α} S. int., except the power to fix the commencement of Ordinances, and to make regulations under Ordinances in force in the Northern Territory. As the administrativa Northern Territory. As the administrative system obtaining from February x, 2027, to June 22, 1931, has thus been continued, the residents of that part of the Territory south of 20 S. lat are no less favourably placed than hitherto. The population of the Northern Territory as at June 20, 1921, was 4,193 (exclusive of full-blooded aboriginals). Northern Territory. As the administrative

Agricultural development is increasing both in the number of individual landholders and the acreage under crop. The success of peanut growing during the last two years is mainly responsible for the improvement, and it is responsible for the improvement, and it is believed to presage a definite era of agricultural progress in the Territory. This applies to the land situated north of so S. lat. Agriculture is initial studied north of 20° 8. Int. Agricultural practically negligible in that part south of 20° 8. lat. Agricultural leases are granted in perpetuity at nominal rentals, which are subject to re-appraisement every 21 years. They may be converted to freehold at any time after commencement of lease, subject to easy and liberal conditions. Most tropical products can be grown, and the potentialities for pig raising and bacon curring are excellent. The staple industry is pastoral; cattle rating north of so S lat, and cattle, horse, and sheep raising south of so.

S. lat. Until railways are constructed, however, little, if any, improvement is expected in the pastoral industry in that part north of so S. lat. owing to the distance between the eastern and southern Australian markets. The position south of 20°S, lat. is more hopeful, as a result of the extension of the railway from the Adelaide (South Australia) market to Alice Springs. The whole of the Territory is capable, under proper conditions, of carrying successfully and profit-ably a great expansion of the beef cattle industry. There are vast areas of magnificent country which could be so utilised. From the Queensland border to the Western Australian border, a distance of over 600 miles, there are many thousands of square miles of country splendidly grassed and growing edible shrubs. The chief rivers are Victorial Victorial Country Statement of the Country Statement toria, Adelaide, Daly, Roper, Liverpool, Goyder, McArthur, and the Robinson. The first five are navigable, from 40 to 100 miles from their en-trance, for boats drawing 4 feet. Pearl fishing is carried on round the coast, the shell being of good quality. There are considerable mineral resources, gold, silver, lead, tin and mice being indicated, and when communications are opened up the industry will become important. The only railway is from Darwin to Birdum

site 80 feet above high-water mark, overlooking Port Darwin. Alice Springs, Central Australia, is situated in the MacDonnell Ranges, and boasts a splendid climate.

Administrator of Northern Territory, Col.

770

Deputy Administrator of Central Australia, V. G. Carrington.....

PAPUA.

The Territory of Papua, which was placed under the authority of the Commonwealth of Australia in 1906, comprises a part of the New Guines mainland situated between the meridians of 141° and 130° 30° E. longitude, and between the 5th and 131° parallels of South lattude; also the Trobriand Group of islands, Woodlark, the d'Entrecasteaux Group, the Louisiades, the Conflict Group and the Langulan Group. The total area of Papua is 90,540 sq. miles, of which 87,786 are on the mainland. There is an Executive Council of nine members who, with five non-official members, form the Legislative Counnon-omeial members, form the Legislative council. The white population in 1931 was 1,728. The official estimate of the native population is 275,000. On Dec. 31, 1930, 38,902 acres were under crops (47,837 coco-nuts, 9,075 rubber, 750 alsal hemp and 348 coffee). Owing to heavy rainfall Papua is well watered in most parts and possesses in the last transcription. a large number of streams. The best known rivers are the Fig (550 miles) and the Purari. The climate is favourable to the cultivation of tropical products.

NORFOLK ISLAND.

This island is about 930 miles from Sydney and 400 miles from New Zealand. It is about five miles in length by three in breadth, and was discovered by Capt. Cook in 1774. Its area is 8,588 acres and circumference so miles. The climate is mild, with a mean temperature of 68° and an annual rainfall of 55 inches The descendants of the mutineers of the Bounty were brought here from Pitcairn Island in 1846. The population in July, 1931, was approximately 1,000. Administrator, Col. A. J. Bennett, C M.G. D.S.O, VD

Premdent Executive Council, E C. Robinson.

States of the Commonwealth.

I .- NEW SOUTH WALES.

The State of New South Wales is situated almost entirely between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,372 square miles (inclusive of 940 square miles of Federal Territory)—1.c., more than five times that of England and Wales, and over three times the size of Great Britain and Northern Ireland.

POPULATION.—The estimated population at 31st March, 1931, was Males, 1,23,158 Total, 2,596,086 Total, 2,596,086

Religions.

All religions are free. There is no State Church About three-fourths of the people are Protestants, the members of the Church of England in New South Wales, according to the Census of 1921, number 1,027,420, Roman Catholic 503,815, Presbyterian 219,932, Methodist 181,977, Congregational (Independent) 22,325, Employer, Salvation Army 9,490, and Hebrew 10.150.

PHYSIOGRAPHY.

The Eastern or coastal district is traversed by The Eastern or coastal district is traversed by the Great Dividing Range, the various portions of the Range in N.S.W. being (from N. to S.) Macpherson, New England, Liverpool, Main of Blue Mountain, Cullarin, Gourock, Monaro and Municong Ranges—the highest points being Mount Koscausko, 7,328 feet, and Townsend, 7,366 feet. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Belinger, Namlucca, Macleay, Hastings, Camiden linger, Nambucca, Macleay, Hastings, Camden Haven, Manning, Wollomba, Hunter, Hawkesbury, George, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy Rivers. The western por-

tion of the country is not so well watered, but immense reservoirs are being constructed for immense reservoirs are being constructed to irrigation purposes, and there are many artesian bores. The Barling, x,609 miles, and the Murray, which has a total length of x,609 miles, 1,303 miles forming part of the boundary between the States of New South Wales and Victoria.

the States or New South Wates and Victoria. Other inland livers are: Lachlan, Bogan, Macquaire, Castlereagh, Namoi and Gwydir.

Chinate.—New South Wates is situated entirely in the Temperate Zone. The climate is dry and very healthy. At the capital (Sydney) the average mean shade temperature is 63 22. the average mean snade temperature is 63's". The mean temperature in the shade for the north coast is 66' to 70', south coast 56' to 63', northern tableland 57' to 60', southern tableland 46' to 58'; north-western slopes, the mean annual temperature ranges from 6s' to 65'; in the Central-western slopes 58' to 64', south-western slopes 60' to 63', and in the Western Plains and Rivenina Division from 63' to 69'. The Seasons are as follows: Spring during September, October and November: Summer during September, and November; Summer during December, January, and February; Autumn during March, April, and May; Winter during June, July, and August.

COVERNMENT

New South Wales was first colonised as a British possession in 1788, and after progressive settlement a partly elective legislature was established in 1843 in 1855 "Responsible Government" was granted, the present Constitution being founded on the Consolidating Act of 1902. The executive authority is vested in a Governor (appointed by the King), assisted by a Council of Ministers.

GOVERNOR.

Governor of New South Wales, His Ex-cellency Air Vice-Marshal Sir Philip Woolcott (tame, G.B K., K C.B., D S o .

Strand, W.C. a (and allowance, £800) £1,850
Scoretary and Commercial Officer, J. W.
Forguson, I.S.O., J.P. (and allowance,

LICO).... THE LEGISLATURE.

Parliament consists of two Houses, the Legislative Council and the Legislative Assembly. Members of the Legislative Council (36 in August, 1931) are appointed by the Crown for life. Members are not entitled to remuneration, but travel free on the State railways and transways. The Legislative Assembly consists of 90 members. Each member of the Legislative Assembly receives £743 192. per annum, and members travel free over the Government railways and transways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. The Women's Legal Status Act, 1918, removed disqualification regarding the election of women to be members of the Legislative Assembly. Natural-born or naturalized persons at years of age, who have resided 6 months in the Commonwealth, 3 months in the State and one month in the electoral district, are entitled to the franchise. At the State General Election in October, 1930, there were 719,999 male and 720,649 female electors, making a total of these 1,356,443, or 94'94 per cent, voted.

THE JUDICATURE.

The judicial system includes a Supreme Court (with a Chief Justice and eight Puisne Judges), Land and Valuation Court, Industrial Commission, District Courts, Workers' Compensation Commission, Courts of Quarter Sessions, Petty Sessions and Children's Courts and Fair Rents Courts. Trial by jury has been in force since 1884.

District Courts.

His Honour Judge White, His Honour Judge Armstroug, His Honour Judge Mocatta, His Honour Judge Edwards, His Honour Judge Coyle, His Honour Judge Thomson and His Honour Judge Sheridan Curlewis, His Honour Judge Sheridan

(The several District Court Judges are also Chairmen of the Courts of Quarter Sessions and Judges of the Court of Review within their respective districts, and Judges of the Court of Marine Dentire.)

EDUCATION.

tof the ages of 7 and 14 years. It is non-sectarian and free at all State schools. The total enrolment in 1930 in 3,217 State schools was 360,645, and the average daily attendance 324,052. In addition to the State schools there were in 1930, 748 private colleges and schools, with 1930

Banking, &c -There were (June 30, 1931) 16 hanks, with total assets within New South Wales £x6c, x23,887, including advances, &c, and Government securities £x36,343,383; coin, Government securities £136,343,383; coin, bullion, Australian Government Notes, and cash bullion, Australian Government Notes, and cash with Commonwealth Bank. £26.830,402; and liabilities, £130,993,404, including deposits, £123,335,995. The savings bank deposits on March 21, 1921, amounted to £70,773,367 in 1,400,216 accounts; there were in addition Inoperative (under, £x), Special Thrift, and School Savings Bank accounts, which numbered 461,800, the total amount at credit benny £277,984, included in total amount of deposits above. The amount assured in New South Wales in Life Assurance Societies in 2002 was

registered societies in existence at June 30, 1930. During the year ending on that date the sales of cs rural societies amounted to £14,769,572, and the sales of 47 trading societies amounted to £3,553,038. Building Societies advanced

to £3,553,038. Building Societies advanced £7,47,376 to members Shipping.—Excluding coastal trade, 2,623 vessels entered ports of N.S.W. during the year ended June 30, 1939. For the year ended June 30, 1931, the shipping entries at Sydney, including state coastal, were 5,682 vessels of 8,465,828 net tomage. The dock accommodation at Sydney includes four large graving docks, five floating docks, and seven patent slips. At Newcastle there are five patent slips.

Motor Vehicles —At June 20, 1930, there were 154,096 registrations of motor-cars in force, and 68,07 of other motor vehicles —Kattecups.—The railways and tramways of New

South Wales, with the exception of a few short lines, representing about 113 miles, are controlled nines, representing about 123 miles, are controlled by the State. At June 30, 1930, the mileage of the State railways open for traffic was 5.974, the capital cost amounted to £126,328,325, and the net earnings for the year 1920 to £2,864,269. There were also are miles of State tramways, the capital cost being £11,764,974, and the net earnings £277,906.

Roads and Bridges.—A Main Roads Board, of

two engineers with special knowledge of road construction and a president, was constituted in 1924. Municipal councils are assisted in the construction and maintenance of the main highways with the object of developing vacant lands, feeding the railways, and giving primary

producers access to markets and providing better facilities for motor traffic. There are better facilities for motor traffic. There June 30, 1937, bridges over so ft. span numbered 4,972, the total length being 404,282 feet. The total expenditure other than on Sydney Harbour Bridge, in 1929-30 was £4,939,199 (including loan moneys expended by Main Roads Board). The construction of an arch bridge over Sydney Harbour is in course of erection, and will be completed early in 1932. This bridge will carry a ruadway 57 t. wide, two footways each 10 ft wide, and four lines of railway. At mean high water there will be a headway of 172½ feet. At June 30, 1930, the Government expenditure in connection with the bridge amounted to £6,453,943. Of this sum £x,2x3,361 had been expended on resumptions and £1,233,365 on

approaches.

Posts, Telegraphs and Telephones — The postal, telegraphic, and telephonic services are administrated to the control of the cont tered by the Commonwealth Government. At June 30, 1930, there were \$,676 post offices in New South Wales The postal matter carried New South water The postal matter carried during 1936-27 (the latest year for which the information is available) included 352.038,712 letters and postcards, 81,305,900 newspapers, 66,164,500 books, packets and parcels. During the year ended June 30, 1930, 6842.976 telegrams and cablegrams were transmitted, exclusions. sive of telegrams from other States of the Commonwealth of Australia. The telephone line connections numbered 150,606.

The oversea imports into New South Wales during 1930-31 were valued at £26,288,111, and the oversea exports were £31,376,904.

PRODUCTION AND INDUSTRY.

Agriculture is one of the principal industries of New South Wales; 5,499,408 acres, excluding 1,538 acres double-cropped, were under cultivation during the year ended June 30, 1930, producing 34,407,000 bushels of wheat, 3,035,850 bushels of maize, 2,528,610 bushels of oats, besides other kinds of grain, with 23,907 tons besides other kinds of grain, with 23,907 tons of potatices, 686,662 tons of hay, and 1,924 cwt, of dried leaf tonacco. Sugar-came to the extent of 174,110 tons was crushed; and 1,923,700 gallons of wine, 117,120 cases of bananas, and 28,403 dozen of pineapples obtained; almost every kind of fruit and vegetable is grown. The estimated total area under wheat in the year 1930-31 was 5,664,600 acres, of which 5,123,100 acres were harvested for grain, and 519,900 acres for hay, and 21,600 acres were fed off. The estimated production of wheat was 65,8xx,000 bushels of grain and 670,750 tons of hay.

Land Alienation .- The total extent of land alienated and in process of alienation on June 30, 1930, was 67,500,393 acres, while the area of land held under lease, &c., was 113,726,396 acres, and the balance, 16,800,812 acres, consisted of reserve and other lands neither alienated nor leased; the total area of the State, exclusive of Federal Capital area (Canberra), being 198,036,500

Live Stock .- The country is admirably adapted for sheep-farming, and several breeds of sheep are depastured, including the celebrated merino. which was introduced in 1797. On June 30, 1930, there were 534,945 horses, 1,039,949 dary ows, 1,646,183 other cattle, total cattle s,686,128; 48,720,000 sheep, 323,499 swine, 16,651 goats, and 534 camels. A pieliminary estimate of the

The figures relating to receive and expenditure for the years 1993, 1993 and 1993 are not comparable with previous years, the Metropolitan Water Board heing ex-cluded from Comolidated Revenue from April 2, 1993, other Budness Undertakings from July 2, 1995,

number of sheep at December 21, 1930, is 49,870,000. In 1929-30, 459,970,000 lb. (stated as in the grease) of wool were produced, 105,002,381 lb. butter, 6,345,785 lb. cheese, and 21,564,728 lb. bacon and ham. The production of wool in rago-3r, according to a preliminary estimate, was 430,000,000 lb. During reag-30 there were ra6,271 persons permanently engaged in rural in-

120,371 persons permanently engaged in rural industries, 126,423 being males, and 9,848 females. Values of Rural Industries.—The agricultural production was valued in 1929-30 at £15,438,000, dairying and farm-yard produce at £16,796,000, and pastoral production at £28,511,000, a total

of £38,745,000.

Forests, Fisheries and Trapping.—The value of these industries in 1929-30 was £4,131,000,

and 6,303 persons were engaged.

Mining Industry.—The goldfields were opened
in 1851. The principal minerals are coal, copper,
silver, lead, zinc, tin, iron, opal and platinum. silver. lead, zinc, tin, iron, opal and plathium. The total value of muerals won during 1930 was £9.783,505, exclusive of Portland cement £926,792, lime £52,855, and coke £589,343, coal accounting for £55,193,032, silver, silver lead and ore £2,088,790, and gold £33,065. The mining plant and machinery was £7,608,630. The mining industry gave employment to as one persons during the wear. ment to a5,000 persons during the year.

Factories.—In 1929-30 there were 8,208 factories; the employees numbered 157,690, of whom 125,769 were males and 41,921 females, the amount of £34,875,905 being paid in salaries and wages. Male workers, exclusive of working proprietors, received on an average an amount proprietors, received on an average an amount of £252 v34. od. during the year and females £212 v65. 7d. The capital value of land, buildings and fixtures amounted to £53,725,329, and of plant and machinery £53,515,368. The full capacity of the machinery was 1,304,954 h p., including steam, 868,556 h.p.; gas, 13,400 h.p.; oli, 27,927 h.p. The power actually used was, on the average *28.56 h.p. The white of output was ay,327 h.p. Ine power accutally used was, on the average, 78a,526 h.p. The value of output was £167,a20,618, materials used, £94,364,628, and fuel consumed (including motive power rented), £6,038,350; the production, i.e., value added to raw materials, was £66,847,670. There are large from and steel works at Newcastle, Lithgow and Port Kembla.

The total value of the production of the primary industries in 1929-30 was £70,375,000, making, with factory production, a total for all findustries (as far as it is recorded) of £137,223,000, which is equal to £55 78. 7d per head of population.

LOCAL GOVERNMENT.

For purposes of Local Government, with the exception of an area of 125,950 sq miles in the sparsely-populated western division, the State is divided into x8x municipalities and x38 is divided into ter indictipatives and 3s shires, governed by councils which are elected triennially. The councils are empowered to levy rates on the value of land, to float loans, to acquire land and works, to constinct and maintain streets, jettles, wharfs, &c., to make regulations regarding cattle slaughtering, main-

regulations regarding cattle slaughtering, maintenance of public places, traffic, street and road lighting, public health and safety, management of parks, &c.

The basis of rating is mainly on the unimproved capital value of land, which in 1999 was £211,354,336 in municipalities, including makes and 907,3 the otty of Nydney, and £166,657,924 in shires.

The total income of the municipal hodies was

£14,821,211, and the expenditure on works and services, &c., £14,794,988.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of x88 miles: the depth of water at the Heads is not less than so feet, and at the wharves from so to so feet. There are extensive plants for loading ships, and for storing and loading grain in bulk; also for replenishing coal and oil bunkers. For 13 miles Sydney Harbour extends inland, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The principal wharves are situated in close The principal wharves are situated in close proximity to the business centre of the city. The total area of water in the port is 14,884 acres, or about 28 square miles, of which 3,000 acres have a depth of from 35 feet to 16 feet; the rise and fall of the tide is from three to six feet. The city extends four miles north and south by three miles east and west, and contains a population of reason. contains a population of rog,500 (Dec , 1930); on, including suburbs, a population of 1,333,56a.* In addition to the Government buildings, there are the University and Colleges, National Art Gallery, museums, botanic gaidens, zoological gardens, free public libraries, observa-tory, conservatorium of music, two cathedrals, numerous churches and some large public hospitals. The parks within the metropolitan area are 82,272 acres in extent, and include the National Park which measures 33,800 acres, Kuring-gai Chase 35,300 acres, Kurnell 248 acres. Centennial Park 474 acres, and Parramatta Park #52 acres. Other towns are Newcastle (with suburbs), 104,170; Broken Hill, 22,990, Lithgow, 15,300; Maitland, E.& W., 11,810; Goulburn, 12,560; Katoomba, 10,020; Bathurst, 9,690; Lisra,500; Ratonina, ro,620; Batinitat, 9,690; Inspirence, ro,720; Albury, 9,320; Cessnock, 73,630, Wagga Wagga, 8,920. Liverpool, 6,240; Rairfield, 7,840; Grafton and South Grafton, 6,920; Wollongong, ro,730, Orange, 8,550. Tanworth, 7,690; Armidale, 7,090; Dubbo, 6,280; Glen Innes, 4,680; Forbes, 5,720.

DEPENDENCY OF NEW SOUTH WALES.

LORD HOWE ISLAND (436 miles north-east of Sydney). Lat 31° 33′ 4″ S., Long. 159′ 4′ 26″ E. Area, 3,220 acres. Pop. Dec. 1596, 117. The island is of volcanic origin and Mount Gower reaches an altitude of 2,840 feet. The affairs of the Island and the control of the Kentia palm seed industry are vested in a Board of Control Office, Chief Secretary's Department, Sydney.

II -VICTORIA.

The State of Victoria comprises the southeast corner of Australia, at that part where its east corner of Austrains, at that part where is territory projects farthest into the southern latitudes; it lies between the 34th and 35th parallels of South latitude, and the 141st and 150th meridians of East longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles, the entire

area being 87,884 square niles.

Population.—On March 31, 1931, the estimated population numbered 1,795,822 (888,233)

males and 907,389 females).

^{*} The population of Sydney and suburbs at March 31.

Increase of the People.			
Year.	Births.	Deaths.	Marriages
1926	35,362	z6,335	13,405
1927	35,074	16,773	13,608
1928	34,498	17,708	13,186
1989	33,604	16,717	12.935
1930	33,127	15,959	11,641

Vital Statistics.—Annual rate per 1,000 of population in 1930:—Births, 18:26. Deaths, 8 94; Marriages, 6'52. Deaths under 1 year per 1,000 births, 46 52. Religion.

There has been no State and to religion since 1875. Members of the Church of England in regar (last census) numbered for,809, "Protest-nts" z8,636, Preshyterians z57,072, Methodists 23,829, Baptists z2,305, (Thuch of Thrist z2,250, Independents z5,893, and Roman Catholics 322,565.

PHYSIOGRAPHY. The Australian Alps and the Great Dividing Range pass through the centre of the State, and divide it into a northern and southern watershed, the latter sloping down to the ocean and containing, especially in the south-east, well-wooded valleys. The Murray River forms the northern boundary of the State, and has many Victorian tributaries. The capital stands upon the Yarra-Yarra, which rises in the southern slopes of the Dividing Range.

Chinate.-The mean temperature over a period cumate.—The mean temperature over a period of \$5\) ears, ended in \$100.00 to \$5\) ears, ended in \$100.00 to the average four days during the year) above xoo' in the shade, and falling (on the average for about two nights in the year) below 32° F. The average number of days on which rain fell was 128, and the average yearly rainfall was 25.49 inches.

GOVERNMENT.

Victoria was originally known as the Port Phillip District of New South Wales, and was erected into a separate colony in 1823, with a partially elective legislature. In 1825 Responsible Government was conferred The executive authority is vested in a Governor, appointed by the Crown, aided by an Executive Council of za members

gency Act, at valuate states, from an per cent, on salaries of £728 to 27 per cent where the salary exceeds £3,000.

EDUCATION.

Primary Education is compulsory, secular and Frinary Execution is compulsory, secular and free between the ages of 6 and 14, there being 258.872 children on the legisters in 1929, the average attendance being about 69 per cent. Secondary Education is principally under private control, 75.886 pupils being in attendance at the control, 75.886 pupils being in attendance at the growth of the secondary Education in 1929. There is a State-added University at Melbourne, with four affiliated colleges (Trinity, Ormond, Queen's, and Newman)

FINANCE. The revenue and expenditure and State Debt

ior nae ž	or nve years are given as follows :-			
1 ear	Revenue	Expenditure.	Debt	
1925-26 1926-27 1927-28 1928-29	£, 25,269,756 27,128,700 27,357,917 28,156,034 27,223,842	£, a5,559,583 a7,744,903 a7,521,370 a8,104,947 a8,406,718	140 264,989 149,546,966 158,183,470 159,553,653	

Banking, de.—There were (June 30, 1931) 25 banks (including Commonwealth Bank) with total assets £123,670,079, within the State, displicites £126,672,295. The savings bank deposits (including amounts deposited in the Commonwealth Savings Eank) at June 30, 1931, amounted to £63,243,527.

PRODUCTION AND INDUSTRY.

Agriculture.—Of the 8,65r,930 acres under cultivation in 1939-30, 3,566,135 were wheat crops and 650,334 oats, and 865,015 acres were cut for lay. In 1930-30, 1355,575 gallons of whee were produced. The estimated value of production in 1939-30 was (including manufacturing values)

290,593,185.

Live Nuck.—There were in 1930, 619,426 milch cows, producing 90,639,652 lb. of butter and 6,953,949 lb. of cheese; and 715,826 other cattle, 17,427,203 slicep, 25,978 pigs, and 393,055 horses.

Minierals.—The gold production in Victoria has declined very considerably, the amount produced in 1930 being 24,129 oz. (£102,456)
Other minerals raised consisted principally of coal (black and brown), ksolin, tin and gypsum.

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, condensed milk and weekly as the condensed milk and weekly as the condensed milk and

Trade and Industry.—Wool, wheat, flour, butter, live stock, fruits, condensed milk and poultry are the stuple productions of the State; and the manufactures (8,195 factories, &c., employing 152,009 hands in 1929-30) are mainly for home consumption. The chief exports oversea are: wool, butter, wheat, flour, skins and hides, tallow, milk and cream, preserved and frozen meats and fruit diriod and fresh. The principal oversea imports of the State are iron and steel, inachines and machinery, metals and metal manufactures, silks, volvets, &c., apparel and attic, lags and sacks, tea, cottons and linens, woollens, timber, petroleum spirit and paper.

CITIES AND TOWNS.

MELBOURNE, the capital city, which is an episcopal see, was originally laid out in the year 1837 with wisdom and foresight; its wide streets, park lands, public gardens, university, public library, nuiseum and large churches are the principle features of the city. Melbourne and anhurls cover an area of 185,742 acres and contained (December 31, 1930) a population of 1,028,500. Other cities are Ballarat, 45,050; (feelong, 43,400; Bendigo, 33,650, Warrnambool, 8,100. The chief towns are Castlemaine, 7,170; Wonthaggi, 7,000; Mildurs, 6,000; Hamilton, 5,300; Ararat, 5,300, and Shepparton, 5,500. Transmission of mails, approximate, 30 days.

Transmission of mails, approximate, 30 days.

Melbourne, distant from London zz,z67 miles;
transit, 30 to 35 days.

III,-SOUTH AUSTRALIA.

The State of South Australia is situated between $s6^{\circ}$ and 37° S. lat. and $zs9^{\circ}$ and $z4z^{\circ}$ E. long., the total area being 380,070 sq. miles.

POPULATION -- In 1931 the population numbered 582,928 (300,828 males and 282,700 females).

Increase of the People.

Year.	Births.	Deaths.	Marriages
rgað	11,483	4,877	4,503
1927	11,498	5,128	4,501
1928	11,408	5,147	4,146
1930	20,665	5,039	3,719
	9,984	4.851	3,318

Birth rate 17'19, death rate 8'35, marriage rate 5'70 per 1,000 of population. Infantile mor-

tality, 48 a8 per x,coe births, being one of the lowest rates in the world.

Religions.

Religion is free and receives no State aid. At the Census, 1921, the persons belonging to the principal religious denominations were as follows:—Church of England, 165,968; Methodists, 122,624; Congregationalists, 15,289; Baptists, 23,033; Lutherans, 24,666; Roman Catholics, 64,054; Presbyteriaus, 22,699; and Churches of Christ, 15,039.

PHYSIOGRAPHY.

The eastern portion of the State is divided longitudinally by the Flinders Range, which extends from the eastern side of the Gulf of St. Vincent to the Lakes Torrens and Eyre. The north-western portion is partly desert which can never be brought into cultivation. The northern portion of the State, between Lake Eyre and 26° South lattude, is also unpromising in comparison with the fertile land that surrounds the hill country of the ears. Except for the Murray, which flows for some ago miles through the south-eastern corner into the Southern Ocean, there are no rivers of importance in South Australia.

Allstram.

Climate.—The mean annual temperature at Adelaide is 63%, the winter temperature (July-August) averaging 53%, and the summer (November-March) 71°. During the summer mouths the maximum temperature at times exceeds xee%, but owing to the purity and dryness of the atmosphere the inconvenience is comparatively slight. The average annual rainfall at Adelaile, derived from 62 years' record, is 22 of inches. This total is rather ingher than the approximate average annual rainfall over the whole of the agricultural areas extending from Melrose to Cape Northumberland. In the Mount Lotty Ranges the mean yearly rainfall in places exceeds 40 inches, while on the Adelaide plains the precipitation has fallen as low as 16 inches.

GOVERNMENT.

South Australia was proclaimed a British Province in 1836, and in 1832 a partially elective legislature was established. The present Constitution rests upon a Law of Oct. 24, 1836, the executive authority being vested in a Governon appointed by the Crown, aided by a Council of 6 Ministers, and the Lieutemant-Governor.

GOVERNOR.

THE MINISTRY (Oct. 30, 1930).

(£6,200 is allotted as salaries to Ministers, less
20 per cent. for 12 months.)

Premier and Treasurer, and Minister of Education, Hon. Lionel Laughton Hill. Attorney-General and Minister of Railways, Hon. William Joseph Denny, M.O. Chief Secretary and Minister of Agriculture and

hief Secretary and Minister of Agriculture and Commissioner of Forest Lands, Hon. Stanley R. Whitford.

Commissioner of Crown Lands and Minister of Mines and Marine, Hon. Robert Stanley Richards. Commissioner of Public Works and Minister of Industry, Labour and Employment, Hon John McInnes.

Minister of Local Government, Immigration, Repatriation and Irrigation, Hon James Jelley.

AGENT-GENERAL IN LONDON. Agent-General in London, Hon. Sir H. N.

Barwell, K.C M.G., Australia House, Secretary and Trade Commissioner, ...£1,600

THE LEGISLATURE. Parliament consists of a Legislative Council of so members elected for 6 years, one-half retiring every 3 years , and a House of Assembly of 46 years. Election is by ballot, with universal adult suffrage for the House of Assembly for all British members, elected for a maximum duration of subjects, male and female, there is a small property qualification for electors to the Legislative Council, who numbered 132,291 in 1930, those

for the Assembly numbering 33,90.

Prendent of the Legislative Council, Hon.
Sir J. I. Stirling, K. C. N. G.

Speaker of the House of Assembly, Hon. £680 E J. Shepherd

THE JUDICATURE.

Law and Justice -The Supreme Court is presided over by the Chief Justice and four Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, stipendiary magnitudes and the usual Police Courts. The Supreme Court convictions for 1930 totalled to 304, which is at the late of 1 m every 1,900 of the population Chief Justice and Judge of 1 cc-Admiralty,

Hon Sir G. J. R. Muriay, K.C.M G., B.A.,

EDUCATION. Public Education (Primary, Secondary and Technical) is provided by the State, and controlled by a responsible Minister; it is secular, cronicularly, and free; there are 1,073 state schools, with 3,279 teachers and 93,669 scholars; the expenditure in 1930 was £974,951, including grants to University, Libraries, &c. The Government grants Exhibitions and Scholarships, carrying the holders to higher schools and the University. Private schools number 189, with 948 teachers and 15,599 scholars. There is an endowed University at Adelaide, founded in 1874, with 994 undergraduates, and 1,521 other students; all classes are open to women. A State School of Mines and Industries has also been established, and there are technical schools at 9 country centres and also special trade schools for apprentices. The public library, museum, art gallery and local institutes are supported or assisted by the State.

STATE FINANCE.

Year	Revenue	Expenditure	Debt.
1927 1928 1929 1930 1931	£ 10,784,898 11,346,903 10,840,914 9,847,201 10,725,811	£ 11,834,947 11,621,834 11,771,772 11,473,023 12,539,668	£, 84,908,267 90,6x2,402 92,653,53x 93,4x9,1x8 29,527,447

Government Bank and the State Bank of Government Bank and the State Bank of South Australia, with about 445 branches and agencies, and £42,000,000 paid-up capital, having a total liability of £24,851,760 and assets £30,706,573 in June quarter, 7931. The savings banks on June 30, 1932, lad 568,059 accounts open with £21,242,059 to their credit. Over 90 per cent. of the population have Savings Bank accounts.

PRODUCTION AND INDUSTRY.

Agriculture .- Of the total area about one-half is farmed or grazed, and 7,400,000 acres cultivated is farmed or grazed, and p,400,000 acres cultivated — under wheat 4,120,000 acres, hay 602,000, oats 28,000, batley 25,000, or chards and vineyards 82,000, with 2,483,000 acres lying fallow. Wheat produced 43,870,000, bushels Oranges, lemons, apples, apricots, peaches, and all stone fruits and olives are successfully grown, and thur drying is profitable. There were 52,000 acres of vines, with a production of 9,200,000 gallons of wines, with a production of 9,200,000 gallons of wines are one of our ranks and ser good to the wine, 152,000 cwt of currants, and 157,000 cwt of Considerable quantities of fruits (fresh and dried) and also wine are annually sent to oversea countries, principally the United Kingdom and the other Australian States Brandy and other spirits are also produced. The land is also very suitable for the growing of all kinds of root crops and vegetables.

Live Stock (Dec. 31, 1930).—There were 5,980,959 sheep, cattle 218,985, horses 183,529, prgs 82,991. Wool production, 63,478,524 lb

Muerals.-Copper and gold, silver, lead, manganese, bismuth, iron, gypsum, salt, phosphate rock, coal, &c. are found, the total mineral rock, coal, &c. are found, the total mineral output being valued at £1,288,238 (1930) Over £32.095,000 of copper have been produced since the foundation of the State.

Manufactures -In 1930 there were 1,814 factories, employing 33,150 hands, the gross value of the output being £30,312,784, and the wages paid £6,964,963. Plant, machinery, land, and buildings were valued at £19,223,713.

Value of Production, 1939-33.—(1018, total value, £12,957,903, average per head. £22, manufactures, £12,627,552, pastoral, £2,969,397; minerale, £13,30,805; dairynig, £1,350,572; poultry, fisherles and game, forestry, &c., £2,229,790. Total value of production, £31,085,919, average £54 per head.

Trade and Commerce Oversea, 1929-30 -The Trade and Commerce Oversea, 1929-30—The total value of the Imports was £9,367,337 (U.K. £3,97,236, 07 42 per cent., other British countries £1,283,641, or 14 per cent.; foreign countries £4,266,40, or 44 per cent.) The total value of the Exports was £15,009,496 (U.K. £8,742,833, or 58 per cent.; other British countries £1,466,44, or 10 per cent.; foreign countries £1,480,521, or 32 per cent.). In 1930-31 the imports were £3,915,356 and exports £70,061,590, consisting of breadstuffs £3,390,557; pastoral and dairying products £1,991,342; fruits and wine £1,056,590, minerals £2,860,734; and miscellaneous £753,367.

and wine £1,05,550, inherate £2,000,734, and miscellaneous £753,367.

Transport, dc.—There are 3,8sr miles of railway in South Australia, 126 miles of electric tramways, 46,000 miles of roads and several good harbours. The Elver Murray is used for contraction of the several good harbours. 1937 10.784.898 12.834.947 84.908.267 12.621.834.947 84.908.267 12.621.834.903 12.834.947 89.623.403 12.834.947 89.623.403 12.835.831 12.835.668 12.835.831 12.835.668 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.668 12.835.831 12.835.63 zo,coo,coo newspapers, z8,coo,coo packets and

1989 18,487 8,308 6,169	
1930 18,939 7,455 6,199)

Religion.

Since 1861 no State aid has been afforded to Since 1801 to State aid has been anorted to religion At the Census of 1921 there were 200,786 Church of England, 272,662 Roman Catholics, 91,502 Presbyterians, 77,565 Methodists, 17,892 Lutherans, 14,225 Baptists, and 44,122 other Christians, with 4,267 Muhammadans and Pagans, besides "Indefinite," "No religion," &c.

PHYSIOGRAPHY.

The Great Dividing Range on the eastern coast of the continent produces a similar formation to that of New South Wales, the castern side having a narrow slope to the coast and the western a long and gradual slope to the central plains, where the Kirby's Range divides the land into a northern and southern watershed. The Brisbane, Burnett, Fitzroy, and Burdekin rise in the eastern ranges and flow into the Pacific, the Flinders, Mitchell, and Leichhardt in the Gulf of Carpentaria, and the Barcoo and Warrego lise in the central ranges and flow southwards.

Climate.—At Brisbane the mean temperature for 1930 was 68'7", the maximum and minimum shade temperatures being 95 " and 40 7"; mean barometer, 30'93. The coastal regions are warm and mose, the plateaus dry and temperate, whilst in the very far west the rainfall is scanty. The rainfall during 1930 was 41 and inches, and there were 14s wet days.

GOVERNMENT.

Queensland was constituted a separate colony with Responsible Government in 1850, having previously formed part of New South Wales. The executive authority is vested in a Governor (appointed by the Crown), aided by an Executive Council of to members.

THE LEGISLATURE

Parliament consists of a Legislative Assembly of a members, elected by universal adult suffrage Speaker, Hon. Charles Taylor £1,000 Chan man of Committees, T. R. Roberts 700 Clerk, C. A Bernays 780

THE JUDICATURE.

There is a Supreme Court, with a Chief Justice and six Puisue Judges, an Industrial Court, with a President and another Judge, and Inferior Courts at all the principal towns, presided over by Police Magistrates.

EDUCATION.

Primary Education is compulsory, secular and free. In 1930 there were 1,726 State schools, including 195 Provisional and 13 High schools in operation, with 4,410 teachers and an average daily attendance of 115,326 children; and in 1929, 193 private and 10 grammar schools, with 1,366 teachers and an average attendance of 27,308. A State-aided University was established during 1910.

FINANCE.

Revenue, Expenditure, and Debt of Queensland for five years ended June 30 :-

Year.	Revenue.	Expenditure.	Debt (Gross)
1927 1928 1929 1930	£ 16,147,787 16,718,070 16,736,188 15,997,870 15,078,658	£ 16,490,954 16,707,564 16,902,145 16,721,055 15,914,696	£ 106,479,916 111,733,969 112,862,049 112,706,190

Banking - Assets of Joint Stock Banks at June 30, 1930, £43,002,732, liabilities £37,754,740
The deposits at the same date amounted to £37,044,038. The Commonwealth Bank of Australia also has a branch in Queensland with assets June 30, 1930, £7,718,195, and habilities £9,177,163 Depositors balances in Queensland £9,177,163 Depositors balances in Queensland branch of the Commonwealth Savings Bank £23,90x,136, averaged £47 148. od. to each of the 50x,074 depositors.

PRODUCTION AND INDUSTRY.

Agriculture and Live Stock .- Of the total area of 459, 250,000 acres the Government have parted with the fee simple of 18,642,703, and 88,592 acres have been granted without payment; under a system of deferred payment, 6,860,669 acres more are in process of alienation, and an additional area including preferential pastoral leases of aco,716,950 acres leased out for sheep and cattle runs, 75,961,276 acres for grazing farms and homesteads, 21,168,520 acres are held under occupation licence, 256, 593 acres under goldunderoccupation neence, 250,593 acres under gold-mining and mineral lease, 635,437 for special purposes, 3,901,251 acres perpetual lease selec-tions, scrub selections 12,248 acres, 12,342 acres held as auction perpetual leases, pinchly pear leases 12,636,440 acres, reserves and roads 0,856,574 acres, leaving 67,282,507 unoccupied Wheat, oats, and barley flourish on the Darling Downs while large areas are devoted to mure Downs, while large areas are devoted to maize, powns, while large areas are devoted to make, which yields an average crop of about a6 5s bushels per acre. Both English and sweet potatoes are cultivated, as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, coconuts, mangoes, plums, and various English fruits. India-rubber and sisal hemp plantations have also been recently started. In the year 1930, 516,783 tons of sugar were produced. The live stock in January 1931 included 5,463,724 cattle, 22,542,043 sheep, 481,615 horses, and 217,528 pigs. Wool, meat, sugar and butter are the principal products.

Climate.—The Bureau of Seasonal Forecasting of the Council of Agriculture, Turbot Street, Brisbane, makes researches into the climatic sequences of Queensland and issues forecasts, the beneficial nature of the work being much appreciated by farmers and graziers in Queens-land and the adjoining States.

Forestry.—There are about 24,000,000 acres of commercial timberland in Queensland, of which there have been reserved for forestry purposes 5,330,980 acres. In 1929 30 the wealth produced by the timber industry of Queensland was between ny an emberindustry of queensiand was netwern three and four million pounds, and there were 3.85; hands employed in the sawmills and plywood mills. At June 30, 1930, the total area of reforestation plantations was 4,527 acres, and in addition 54,230 acres had been treated for pendents, and 5,332 Baptists.

natural regeneration by the State Forest Service, which employs 298 persons, and is engaged actively in timber farming and wood-trading operations. An area of 160,611 acres has been reserved for National Parks.

Minerals:—The total mineral output in 1930 was £ 1,263,236. There are rich deposits of gold, copper, tin, lead, silver, antimony, limestone, ironstone, and wolfram, while coal is found in several districts. The gold output in 1930 was valued at £33,324; silver, £5,527; copper, £174,075; tin, £49,708; coal, £952,856, wolfram, £1,491; molybdenite,£398; lead, £4,169; opals and gems, £5,748; arsenic, nii, cobalt, £972; zinc, nii; floorspar, £1,439.

Commerce.—The chief articles of export oversea,

Londrece.—Inecemia raticies of export oversex, the produce of the State, in 1999-30 were Wool, £6,914,819, meat, including extract, and bacon, hams, and pork, £2,646,013; hides, £341,904; skins, sheep, £171,406; skins, other, £455,992; tallow, £28,629; butter, cheese, and milk, £2,980,461 , sugar, £2,194,245.

CAPITAL, Brisbane, with an area of 385 square miles. Population Census, April 4, 1921, 210,038. Estimated Dec. 37, 1930, 373,252 The status Estimated Dec. 31, 1930, 373,251. The status of the chief magistrate of Brisbane was talsed to that of Lord Mayor in 1930.

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the ports of considerable size extend along the const.—Brisbane, Ruckhampton (30,000), Maryborough (12,000), Townsville (31,800), Poit Douglas, Mackay (9,230), Thursday Island (1,200), Cooktown, Canns (9,750), Rowen (3,080), and Bundaberg (11,250), Gladstone (2,525). Religion.

PHYSIOGRAPHY.

The surface of the country is generally hilly and timbered, with mountains from z.500 open plans. There are numerous streams, the Derwent and the Tamar being the largest. The climate is fine and salubrious, and well suited to European constitutions; the hot winds of Australia do not reach the island. At Hobart Attended to be competed the mean annual temperature for Dec., Jan , and Feb. being 61 st, and Aug. 46 9 The western side of the island is very wet, the eastern side having a rainfall similar to that of eastern England; the average rainfall varies from so inches to soo inches in different

GOVERNMENT

The island was first settled by the British in 1863 as an appendage to New South Wales, from which it was separated in 1825. In 1851 a partly elective legislature was inaugurated, and in 1856 Responsible Government was added. In 1901 Tasmania became a State of the Australian Commonwealth, q n. The State executive authority is vested in a Governo (appointed by the Crown), aided by an Executive Council of responsible Ministers.

GOVERNOR.

Actg Governor of Tannania, Hon. Sir Herbert Nicholls, K.C.M.G., Chief

EXECUTIVE COUNCIL (June 15, 1928) Premier, Treasurer, and Minister Controlling Hydro-Electric Department and Minister for Forestry, Hon J.C. McPhee Chief Secretari and Minister of Rand-ways and Mines, Hon. C. E. W. James Lands, Public Works and Agriculture, Hon Sn Walter H Lee, K C.M G Attorney-General and Education, Hon H S. Paker ...

AGENT-GENERAL IN LONDON. Agent-General in London, (vacant) Addices, Australia House, Strand, W.C.2. Acting Agent-Gen a Official Secretary, 11 W. Ely, 180.

THE LEGISLATURE.

Parliament consists of two Houses, a Legislatire Council of 18 members, elected for six years ; and a House of Assembly of 30 members, elected by proportional representation for three years, the electors for the latter being all adult Tasmamans who have resided continuously in the State for 6 months, the electorate for the Council is smaller, having a property or educa-tional qualification for both sexes.

President of the Legislative Council, Hou

Clerk of the House, Henry McPherson

THE JUDICATURE.

There are justices of the peace and courts of petty, general and quarter sessions, and a Supreme Court with a Chief Justice and two Puisne Judges.

Chief Justice, Hon Sir H. Nicholls, Clarkeach

£900 730 775 EDUCATION.

Primary education is compulsory, secular, and free, there being 499 State schools in 1229, with 38,080 children on the registers. Secondary education is also provided by the State (5 high schools with 1,619 scholars), and by private endowment. There is a University at Hobart, and technical schools at Hobart, Launceston, Queenstown and Zeehan.

FINANCE

•	Year	Revenue	Expenditure	Debt
	1926-27	£3,040,220	£=,855,077	£24,303,068
	1927-28	2,962,687	=,867,605	24,872,785
	1928-29	2,766,434	=,855,977	23,324,630
	1929-30	2,956,272	=,981,992	22,921,211
	1930-31	2,609,290	=,854,394	23,389,079

Banking.—Dec 31, 1930, the banks of issue had total deposits £7,243,890; the savings bank deposits were £5,738,437.

PRODUCTION AND INDUSTRY.

Agriculture and Lire Stock -Of the total area of 16,778,000 acres there were, in 1929-30, 255,327 acres under crops The principal crops are applies, potatoes, oats, and hay, followed by wheat, peas, green for age, fruit and hops. The live stock included ard 643 cattle, a.ogr, 113 sheep, 52,890 pigs, and 24,336 horses The wool production was 14,100,000 lb The butter produced

amounted to 8,488,532 lb.

Rectrical Kneygy—The Hydro-Electric
Department of Tasinania has completed an
important waterpower development at the Great Lake, in the centre of the State, the capacity of the justallation being 81,000 h p. The advantage of cheap power is steadily attracting new manufacturing industries

Forestry —Timber reserves total 950,538 acres. Area held under lease or forest permits for sawmilling, logging, &c., 266, 257 acres. The amount of tumber milled for 1232-20 was \$6,037,967 super feet, evelusive of piles, poles, fencing, and for practically all sleepers. The utilisation of forest waste for the production of wood-pulp has, after long investigation, been brought within the scope of business operations. An experimental plant is now in operation with every prospect of large-scale production to follow

Minerals —The chief minerals produced are copper, tin, silver, lead, coal, the value of all minerals produced in 1930 being £7,043,268.

Manufactures —The chief factories for export are metallurgical, fruit preserving, woollen mills, standard confectioners, the value of metallurgical confectioners.

cement, and confectionery; the value of production in 122-30 was £3,562,225, the capital invested in the 845 establishments being £9,944,000 in 1929-30.

TOWNS

CAPITAL, Hobart. Population (1931), 58, 200. Other towns are Launceston (pop. 31,040), Devonport, Ulverstone, Burnic, and Queenstown. Transmission of mails, approximate, 3r days.

VI.-WESTERN AUSTRALIA.

Includes all that portion of the continent west £1,800 of rago E. long., the most westerly point being in rago ga' E. long, and from rao 30' 8' S. lat.

1,500 Its extreme length is 1,500 miles, and 1,000 miles from east to west, and its total area 975,920 square miles.

POPULATION .- At the Census of April 4, 1921, the population was 332,732 (177,278 males, 155,454 females); in 1930 the total was estimated at 480,606 (226,713 males, 193,893 females).

Natural Increase of the People.

Year	Births	Deaths	Marriages
1926	8,3ox	3,350	2,844
1927	8,48x	3.393	3,107
1928	8,704	3,640	3,309
1989	9,051	3.930	3,367
x930	9,200	3.774	3,205

Religions.

There is no State aid to religious At the Census of 1921 there were 153,285 persons belonging to the Church of England, 64,488 Roman Catholics, 30,116 Methodists, and 28,377 Presby terians.

Physical Features - Large at cas State, for some hundreds of miles inland, are hilly and even mountainous, although the altitude, so far as ascentained, rises nowhere above that of Mount Bruce (4,024 ft) in the north-west division or that of Bluff Knoll (3,640 ft.) in the Stirling Range in the south-west. The coastal regions of the west and of the north are undulating, with an interior slope to the unsettled central portion of Australia. Darling and Hamersley ranges of the west have a western slope to the Indian Ocean, into which flow manystreams, notably the Swan, Murchson, Gascoyne, Ashburton, Fortescue, and De Grey In the north the Fitzroy flows from the Leopold and Ord into the Indian Ocean, and the Drysdale and Ord into the Timor Sea. The greater portion of the far interior may be described as a great tableland, with an altitude of from 1,000 to 2,000 ft. above sea-level, the surface of which consists in parts of sand-dunes, varied by wide stretches of clayey soils The climaters one of the most temperate in the world. The total rainfall at Porth during 1930 was 39 80 inches, the average for the past 55 years being 34.70 Of the area of Western Australia, which is equal to more than half that of European Russia, probably about two-thirds is suitable for pastoral purposes, immense tracts having already been proved eminently so.

GOVERNMENT.

Western Australia was first settled by the British in 1820, and in 1870 it was granted a partially elective legislature. In 1890 responsible government was granted, and the Administration government was granted, and the Administration vested in a Governor, a Legislative Council, and a Legislative Assembly. The present constitution rests upon an Amending Act of 1899, further amended by the Constitution Acta Amendment Act, 1911; the Executive is vosted in a Governor appointed by the Crown and aided by a Council of responsible Ministers.

GOVERNOR.

Governor of Western Australia, (vacant). Private Sec., Maj. B. Kerr-Pearse, C.M.G., M.V.O. His Excellency John Alfred Administrator,

Northmore (June, 1931.)

710 Australia-Western Australia, Motor Vehicles Production.

Banking.—There were, including the Commonwealth Bank of Australia, no cheque-paying banks, formerly banks of issue, in the State on June 30, 1931, with total assets \$55,505,800 and liabilities \$14,552,452 than the State Savings Bank at June 30, 1932, was \$7,900,300; in the School Savings Bank, \$35,700; and in the Commonwealth Savings Bank the amount due to depositors in Western Australia on March 31, 1931, was \$5,700,000.

PRODUCTION AND INDUSTRY.

Crops and Live Stock.—Of the total area (624,258,800 acres) 4,794,900 acres were under crops in 1930-31, wheat for grain accounting for 3,958,313 acres. In 1930 the live stock included 811,844 cattle, 9,874,970 sheep, 100,664 pigs, 19,007 goats, and 156,973 horses. There were about 5,000 acres of vincyards.

Munufacturing Industries.—There were on June 30, 1930, a total of 1,466 industrial establishments in the State employing either machinery or at least four hands. The total number of persons employed in them was 19,643. The combined output of these establishments for 12 months ended June, 1930, was computed at £16,821,882.

Forestry.—The forests contain some of the very finest hardwoods in the world. Two of these, jarrah (Eucalyptus marginata) and karri (Eucalyptus diversiolor), are largely exported. The quantity of timber cut during the ramonths ended June, 1930, is computed to have been 159,642,788 super feet.

Minerals.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the rasth meridian), as well

as other fields, are being constantly worked, the production of gold being 445,350 ozs. in 1930. The total amount produced in the State from 1886 to June 30, 1932, is 38,529,101 fine ozs. Magnetic iron, lead, copper and tin ores exist in large quantities, as also coal.

Trade.—The principal ports are Fremantle, Albany, Bunbury, Geraldton, and Broome. The opening of the Trans-Australian Railway in Oct. 1927 afforded another means of ingress and egress, both for travellers and merchandise. The imports chiefly consist of machinery, vehicles, manufactured hardware, clothing and textiles, tobacco, cigars and cigarettes, also (mainly from the sister states of the Commonwealth) provisions. Principal exports for the year ended June 30, 1931.—Gold, £5,788,495; Wool, £3,385,38; imiber, £93,596, sandalwood, pearls and shell, hides and skins, £488,192; wheat, £5,288,825, flour, £635,518; and fresh fruit, £303,085.

WORLD MOTOR VEHICLES PRODUCTION, 1929 AND 1980.

THE following table shows the production of motor vehicles in the five principal producing countries in 1929 and 1930; the figures are those published in the United States Commerce Reports, May 55, 1932, with the exception of those relating to the United Kingdom, which have been provided by the Society of Motor Manufacturers and Traders, Limited. The figures relate only to complete vehicles manufactured by companies strictly national in character, and not to the output of assembly plants in various countries.

THE DOMINION OF NEW ZEALAND.

(By the Rt. Hon. G. W. FORBES, P.C., Prime Minister.)

New Zealand has been aptly described as the "Britain of the South Seas" in that, while far remote from the Homeland, the Dominion still retains to a marked degree the national characteristics of the early settlers who, scarcely more than one hundred years ago, came to her shores from various parts of the British Isles. Even at the present time the population of the Dominion is probably more distinctly British than any other part of the Empire, the latest available census figures in this connection showing that approximately 99 per cent. of the population is of British nationality.

New Zealand is primarily an agricultural and pastoral country, her chief exports being in the following order:—butter, frozen meat, wool, cheese and hides. Approximately 85 per cent. of the Domnion's exports are disposed of within the Empire, about 74 per cent. being exported direct to the United Kingdom, while imports to the extent of 68 per cent. of the total are derived from British sources. I venture to suggest that from an imperial point of view no other part of the Empire can show better results than these. New Zealand's total external trade per head, I may mention, is higher than that of any other country in the world.

The importance of the United Kingdom and of the British Empire as a market for the raw materials and foodstuffs which the Dominion can produce is fully realised by the Government and the people of New Zealand, and it is realised also that the prosperity of the United Kingdom depends to a large extent upon the fullest possible extension of inter-Empire trade — It is the earnest desire of the Government and of the people of New Zealand that every facility be given to permit of this development, and as a practical expression of this desire the Dominion grants to British-made goods a very substantial measure of preference by means of differential rates of customs duties.

New Zealand is also noted for its humanitarian legislation, and, in fact, was one of the first countries in the world to introduce a national system of old age pensions. Reference may also be made, in passing, to the Industrial Conciliation and Arbitration Acts, whereby industrial disputes have been reduced to a minimum.

Finally, enjoying an equable climate and a diversity of scenic attractions and natural phenomena unsurpassed in their variety by those of any other country, New Zealand offers unlimited scope to the tourist. In the North Island is found the world-famed thermal region, while in the South Island, in addition to lake and mountain scenery and the famous fiords, what has been justly described as the "finest walk in the world" is accessible to the tourist. In addition, the attractions from the sportsman's point of view, the deep-sea fishing, the angling thrills of the numerous lakes, rivers, and coastal waters, and the opportunities for excellent deer stalking, all combine to make the Dominion's scenic resorts one of its most important natural resources.

Look Torbes

Prime Minister of New Zealand.

PHYSIOGRAPHY.

The Dominion of New Zealand is distant about 1,200 miles south-cast of the mainland of Australia, and consists of three main islands in the South Pacific Ocean, known as the North, South, and Stewart Islands, having a length of 1,100 miles, between 310 22' and 47° 18' South latitude and 162° East longitude -173° West longitude, with several groups

147° 18' South Initiude and 162° East longitude - 173° West longitude, with several groups of smaller islands lying at some distance from the principal group.

Geographical.—The two principal islands of New Zoaland have a total length of 1,040 miles, the total coast-line reaching 4,330 miles. A large portion of the surface is mountainous in character. The principal range is that of the Southern Alps, having its culminating point in Mount Cook (12,349 ft.). The North Island mountains include several active and dormant volcanoes. Mt. Ruapehu (9,175 ft.) and Mt. Ngauruhoe (7,515 ft.) are the most important. Of the numerous glaciers in the South Island, the Tasman (18 miles by 1½) is the largest. The North Island in particular is noted for its hot springs and geysers. For the most part the rivers are too short and rapid for considerable use in payiontion. The more numericant include the Wankato (200 miles in length). Wancesmilly 100 may be suffered to the surface of the surface of the surface of the surface is not and rapid for considerable use in payiontion. The more numerically the Wankato (200 miles in length). Wancesmilly 100 miles in length. navigation. The more important include the Waikato (220 miles in length), Wanganui (140) and Clutha (210). Lakes (Taupo, 238 sq. miles in area; Wakatipu, 112; and Te Anau 132) are abundant; many of them of great beauty.

Meteorological.—Owing chiefly to its great length, New Zealand's climate varies very considerably in its different divisions. In general it is mild with an abundant rainfall. Snow is rarely seen except upon the higher levels. Annual averages:—North Island, mean temperature 57° F., rainfall 47 in. (days with rain 163), sunshine, 2,134 hours; South Island, mean temperature 52° F., rainfall 56 in. (days with rain 145), sunshine, 1,956 hours.

GOVERNMENT.

The west coast of the South Island of New Zealand was discovered by Abel Jansen Tasman, the navigator (voyaging under the direction of the Netherlands' East India Company), on December 13, 1642. The islands were visited in 1769 by Captain Cook, who returned to them in 1773, 1774, and 1777. In 1793 the Government of New South Wales despatched H.M.S. Daedalus to the islands on a diplomatic mission. The first settlement of Europeans was made in 1814, but no colonisation took place until 1825. In 1840 British sovereignty was proclaimed, and on May 3, 1841, New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. On Sept. 26, 1907, the designation was changed to *The Dominion of New Zealand*. The Constitution rests upon the Act of 1852, under which the executive authority is entrusted to a Governor (now Governor-General) appointed by the Crown and aided by an Executive Council, with a Legislature of two houses,

GOVERNOR-GENERAL

Governor-Gen. and Commander-in-Chief of New Zealand, His Excellency The Right Hou. Lord Bledisloe, P.C., G.C.M.G., K. B.K., D.S., apptd. 1990 (Salary £7,500; H.E. has relimquished £1,500)...............................£6,000 Military Secretary, Major Arthur H Bathurst Official Secretary, A. Cecil Day, C M G . Minister of Native Afairs, of Cook Islands, and in Charge of Native Trust, Givernment Life Invariance, State Five and Accident Institution, Friendly Societies and National Frondest Fund Departments, and Member of the Executive Convolution and Native Convolutions. tire Council representing the Native Race, Hon Sir Apırana Ngata, Kt. \$1,053 Minister of Health, of Immigration, and in Charge of Mental Hospitals and Printing and Stationery Departments, Hon. Minister of Education and of Industries and Commerce, Hon. R. Masters, M L.C. 9x,053 Minister of Agriculture and of Mines, Hon. D. Jones \$1,053

[•] Members of the Executive Council travelling within the Dominion on public service are entitled to an allowance not exceeding £2 169 per derm when so engaged, but not during attendance at a season of the General Assembly. A house allowance of £185 is also paid where a Government residence is no provided.

§ Salaries subject to se per cent cut.

THE LEGISLATURE.

Parliament consists of a General Legislative Council appointed by the Governor (prior to 1891) the appointments were for life; since that date for 7 years only), at present consisting of 40 members; and a House of Representatives consisting of 80 members elected for 3 years. Four of the members are Maoris elected by the natives. Women are entitled to vote and to be elected Members of the House of Representatives (Women's Parliamentary Rights Act, 1919) Members of the Upper House receive £283 100 per annum, and of the Lower House £405 per cannum, in each case with travelling expenses and deductions for non-attendance.

THE JUDICATURE.

The judicial system comprises a Supreme Court and Court of Appeal; also Magnetrates' Courts, having both civil and oriminal jurisdiction. Chaf Justice, Hon. Si Michael Myers,

A.C.M.G. Hons. Sir A. L. Herdman, J. R. Iked, O.B. F. A. S. Adams, W. C. MacGiegor, H. H. Ostler, A. W. Blair,

MacGrogor, H. H. Ostler, A. W. Blair, D. S. Smith, R. Kennedy. each Judge, Court of Arbitration, Hon. F. V. Frazer

In 1930, 63, 120 civil cases were tried in Magnitrates Courts, while summary convictions in criminal cases were 47,247 In 1930 convictions (or sentences) in Supreme Courts were 1,524. Civil cases to number of 456 were tried, and 659 judgments were recorded for a total amount of £260,870

POLICE.

On March 3x, 193x, the strength of the Police Force was 1,15x of all ranks equivalent to x for every 1,292 of the population. Average cost of polic 1,202 protection per inhabitant was, in 1930-3x, 6s. o¹/₂d.

LOCAL GOVERNMENT.

For purposes of local government the Dominion is divided into counties and ridings, with incorporated boroughs, under elected county and municipal councils, town, road, electric power, and harbour boards.

For cities or boroughs, any adult of either sex resident in the town may register as an elector. Non-resident ratepayers may also exercise the franchise.

For counties, adult ratepayers of either sex may register as electors, and may have one, two, or three votes according to the value of their property.

PASSPORTS.

With certain exceptions, no person over 15 years is permitted to laud unless in possession of a passport issued by a competent British authority.

DEFENCE.

Army.

The New Zealand Defence Forces consist of the Permanent Force, the Territonal Force and the Senior Cadets.

Units of the N.Z. Permanent Forces are the New Zealand Staff Corps, the New Zealand Permanent Staff, the Royal New Zealand Artillery, the New Zealand Permanent Air Force, the New Zealand Army Ordnance Corps, the New Zealand Army Ordnance Corps, the New Zealand Army Medical Corps. The compulsory territorial system (including Senior Caleta) is at present in abeyance, for reasons of economy. It has been replaced by a volunteer system on a reduced scale. Recruitment for volunteer units is at present in process.

Navy.

In 1900 New Zealand presented the battle-cruiser New Zealand to the Imperial Government. The Naval Defence Act, 1913, provides for the establishment of a New Zealand Naval Force by voluntary enlistment for a proscribed period (fixed at 12 years on until age 30), members on discharge to be disficient to the New Zealand Royal Naval Reserve for such period as may be prescribed for service only in time of war: the ships and personnel forming the Force to pass under the control and to be at the disposition of the Imperial Government in time of war. A Naval Board controls all matters relating to the Naval Forces, and is vested with the executive command of the Naval Forces. By Order-In-Council of the soth June, 1921, it was provided that the ships and personnel shall be described respectively as forming and belonging to "The New Zealand Division of the Royal Navy." Expenditure on naval defence 1930-31, 1632,340. The New Zealand Division comprises the cruisers Immede and Duncdun, the depth ship Philomel, the trawler Wakakura, and oil-tanker Nucula.

Two sloops, Veronica and Laburnum, are maintained by the British Government for duties in the South Pacific within the limits of the New Zealand station.

*FINANCE.

Year	Revenue.	Expenditure	Gross Debt.
1927	£24,942,107	£24,355,965	£245,850,889
1928	25,123,980	24,944,905	251,396,252

1930	25,349,861	25,200,882	267,383,343
1931	23,068,931	24,708,042	276,033 358

Financial year ends March 31; railway revenue and expuditure are excluded throughout, and P et and telegraph revenue and expenditure in 1989, 950 and 1931

Bankuig.—At the end of 1929 there were six banks of issue doing business, two of which were New Zealand banks. Total assets (average of four quarters of year), £69,748,071; liabilities, £63,984,419; value of notes in circulation, £6,855,717.

Post-office and private savings banks had, at the close of the year 1930-31, 1,081,510 depositors, having £57,355,133 to their credit.

EDUCATION.

The State system of education is free, secular, The State system of education is free, secular, and compulsory. There were (December, 1930) 2,503 public primary schools, with 6,433 adult teachers and sao,813 scholars; there are also 306 registered private primary schools, with 36,452 scholars, and, in addition, 138 village schools for the Maoris with 7,070 scholars. The higher education of boys and girls in the cities and large towns is carried on in 46 endowed colleges and granumar schools, in az technical high and technical day schools. In addition there are 81 technical day schools. In addition there are 8s secondary depts. of district high schools, and a junior high schools, 48 private secondary schools, and ra secondary schools for Maoris. The University of New Zealand consists of Auckland University College, Victoria University College, Canterbury University College, and the University of Otago, the four colleges having 4,8or students in 1930, and has power to confer degrees. technical day schools. In addition there are 8x

PRODUCTION AND INDUSTRY.

Agriculture and Forestry -The total area of the Dominion (excluding annexed islands) is the Dominion (excluding annoved islands) is 65,300,25a acres, and, apart from boroughs and holdings under r acre, 43,368,653 acres of this were in occupation in 1930, this acreage representing 85,167 holdings. New Zealand is a pastoral rather than an agricultural country, but the quantity of wheat and oats grown is sufficient for the Dominion's requirements. The area under wheat in 1930-30 areas acres giving a vield of 1930-256. requirements. The area under wheat in 1929-20 was 235,942 acres, giving a yield of 7,239,556 bushels. An area of 67,722 acres of oats was threshed, the yield totalling 3,022,288 bushels; while 190,072 acres were converted to chaff, hay, or ensilage. Other acreages in 1929-30 were: barley, 18,621; peas, 9,855; rye-grass, 20,055; and potatoes, 23,214. An area of 485,773 acres was sown in turnips and mangolds. Amongst the forest productions are the Kauri pine (found contest) at the northern extremity of the islands) only at the northern extremity of the islands), much valued for shipbuilding and for its resm (Kauri gum) New Zealand flax is used for the manufacture of topes and twine.

Live Stock —The cattle in 1930 numbered 3,765,668; sheep, 30,841,287; pigs, 487,793; and horses, 297,195. Sheep in 1932 numbered 39,792,506. The pastures of the South Island produce the celebrated sheep of the Canterbury

Manufactures .- Statistics of factory production show (1929-30) 5,277 factories in operation, employing 85,797 hands. Value of output for year, £93,464,526.

Minerals.-Coal-mining is one of the largest industries, the output in 1929 being 2,535,864 tons, the approximate total output to the end or 1939 being 71,299,000 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of ironsand, occurs in great abundance

in Taranaki, and in the form of brown homatite at Onakaka and Parapara, near Nelson.

COMMUNICATIONS Railways — In March, 1931, there were 3,328 miles of Government railway lines in working order, and more under construction; and 127 miles of private lines, together with an excellent system of road service cans. The number of passengers carried on Government lines in 1930-32, including season-ticket holders, was 22,813,708, and in addition 3,187,554 on railway road motor services, while goods carried amounted to 6,563,073 tons. Operating revenue and expenditure were £6,782,388 and £6,406,144 respectively.

Shipping.—During 1930 the vessels entered inwards numbered 592 (tonnage, 2,267,074), and those entered outwards 607 (tonnage, 2,357,166), exclusive of coasting vessels.

Posts and Telegraphs.—The annual postal ofrculation was (1930), 322,732,067 letters and post-cards, 47,647,098 newspapers, 165,180,054 books and packets, and 6.447,194 parcels, and the work is effected by 1.773 post-offices. There are 1.588 miles of telegraph line, with 63.65 miles of wire. The telephone service is highly efficient and universal in all centres. Telegrams transmitted during year, 17,222,462.

SKWAL

CAPITAL, WELLINGTON, in the North Island. The estimated population of the Urban Areas, at April 30, 1931, was as follows:—Wellington, 143,000; Auckland, 17,000; Christchurch, 187,300; Dunedin, 86,500; Wanganui, 37,830; Invercargill, 24,000; Palmerston North, 28,800; nnvercargin, 24,000; Palmerston North, 23,800; Napier, 29,300; Timaru, 18,330; New Plymouth, 18,200; Hastings, 16,750; Gisborne, 16,250; Nelson, 23,500; Masterton, 8,600; Oamaru, 7,600; Whangaiel, 7,600, Greymouth, 6,280; Ashburton, 5,380; Blenheim, 5,330; Rotorua, 5,370.

THE ISLANDS OF NEW ZEALAND.

The following islands form part of the Dominion proper:—North Island and adjacent islets, South Island and adjacent islets Stewart Island and adjacent islets, and Chatham Islands, between 43° 30° 8. lat and 175° 40° 177° 15′ W. long. Chatham Islands have a population of 6so, half of whom are Maoris and half-castes. They support large flocks of sheep and some cattle.

The following are included in the geographical boundaries of New Zealand as proclaimed in 1847:—The Three Kings (discovered by Tasman 1847:—The Three Kings (illscovered by Tasman on the Feast of the Epiphany), m 34° 9′ 8. lat and 279° 8′ 8″ E long. (unininalited). Auckland Islands, about 290 miles south of Bluff Harbour, in 50° 32′ 8. lat. and 266° 12′ E long. The islands contain several good harbours, but are uninhabited. Campbell Island (uninhabited). Antipodes Group (49° 41′ 25″ 8. lat. and 178° 42′ E. long.) uninhabited, and Bounty Islands (47° 43′ 8. lat., 179° 0′ 30″ E. long.) uninhabited.

The following islands have been annexed to New Zealand :-

The Kernadec Group, between 29° 10' to 32° 20' S. lat, and 277° 48' to 279° W. long, includes Bunday, Macaulay, Curtis Islands, and L'Espérance, and some islets. The group is uninhabited.

Cook Islands, included in the boundaries of New Zealand since June, 1907, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atin, Mauke, Mitiaro, Manuae and Te Au-o-tu), Takutea, Palmerston, Penriyn (or Tongareva), Manahiki, Rakalauga, Pukapuka (or Danger), Mine (or Savage), Suwarrow, and Nassau. The population at the Census of 1905 numbers 2800. all excent 212 being Natives. The chief Cook Islands, included in the boundaries of 13,877, all except 313 being Natives. The chief products are bananas, oranges, and other tropical produces are unitates, oranges, and other tropical fruits, copra, coffee, pearl-shell, and hats (Niue). The trade is chiefly with New Zealand and the United States of America. The exports (1930) were valued at £125,315, and the imports at £223,098. Rarotonga is the chief island, with a native population of 3,732, and a population other than native of 205. The government is administered locally under the direction of New Zealand. The Island Council of the Cook Islands is under the direction of the Resident Islands is under the direction of the Resident Administrator, W. A. Newman (address, Commissioner at Rarotonga. The five Arikis of Nauru, Central Pacific).

Rarotongs are of equal rank and are all members of the Council. Raiotongs is a place of call for the mail steamers between Sydney, N.S.W., and Wellington, N.Z., and San Francisco, U.S.A.

Resident Commissioner, Rarotonga, H. F.

Ross Dependency—By Imperial Order in Council of July 30, 1983, the coasts of the Ross Sea, with adjacent island and territories, were proclaimed a British Settlement under the control of the Governor-General of New Zealand.

Tokelau or Union Islands.—A group of atolls (population 999), transferred from Gilbert and Ellis Islands Colony in 1926, and now administered on behalf of New Zealand by Administrator of Western Samos

The Mandated Territories are :-

Western Samoa, consisting of the islands of Savai', Manono, Apolima, Upolu, Fanuatapu, Namua, Nuutele and Nuulua (the remaining islands of the Samoan group belonging to the U.S.), have a total area of 1,135 square miles and a population at the Census of 1936 of 40,239. 36,880 were Samoans, 1,079 Chinese and Melanesians, and 2,270 half-castes and Europeans. The largest islands are Savat's (703 square nules) and Upolu (430 square miles). Upolu contains the largest islands are Scient 1703 square miles, and Upolu (Ago square miles). Dolu contains the harbours of Apia and Saluafata, of which the former is the capital. In 1889, a very heavy sea set up by a cyclone wrecked three U.S. A. war-ships and the Eber and Adler of the German Navy. H.M.S. Callupe, of the British Navy, effecting its escape. The disaster is recorded in "A Footnote escape. The disaster is recorded in "A Footnote to History," by R. L. Stevenson, whose home was at Vailima (near Apia). The natives of the islands are Christians of different denominations, including a few adherents of the Latter Day Saints (Mornons). Coco-nuts (copra), cocoa, hannas and rubber are the chief products of the islands. The exports were valued in 1930 at £284,515 (copra £166,221), and the imports at Z=75,355.

Administrator, Brigadier-General H. E. Hart, C.B., C.M.G., D S O , V.D.

NAURU ISLAND.

Nauru Island, situated in longitude 166 degrees east, and z6 miles south of the Equator, was proclaimed German territory on Oct. z, 1888, and was administered as part of the (German) Marshall Islands group until its surrender to the Australian Forces in 1914. The island was included in the cession of colonies nade by Germany in 1919, and is now administered by the United Kingdom, the Commonwealth of Australia, and the Dominion of New Zealand under a mandate from the Allied and Associated Powers, 1919, the first and second Administrators having been appointed by agreement by the Australian Government. The island has a population (April z, 1930) of 2,684, of whom 147 are Europeans. There are valuable deposits of phosphates on the island, and in 1929 the exports of phosphates were 3a6,125 tons (valued at £346,052). The value of the imports in 1929 was £101,692.

The Union of South Africa.

AREA AND POPULATION.

Provinces.	Area (English Sq. Miles).	Census of 1921. European. Total		European Population, 1931 (Preliminary)

† Preliminary figures

A law (No. 17 of 1923) amending and consolidating the pre-Union Acts in force in the four Provinces was passed and came into force as from the 1st January, 1924. Under this law registration of all European, Asiatic and Coloured (as distinct from Native) births and deaths was compulsory throughout the Union. Registration of Native births and deaths is compulsory only in urban areas. Only marriages solemnized under the prescribed civil laws are subject to registration.

PHYSIOGRAPHY.

Boundaries.—The provinces of the Union extend from the southernmost point of the African Continent to the course of the Limpopo River, i.e., from 34° 50′ – 22° South latitude, and include all the British territories within those limits, with the exception of Basutoland and the Swaziland and Bechuanialand Protectorates, while provision is made for the future inclusion within the Union of those territories and of the territories of the British South Africa Company.

Relief.—The southernmost province contains many parallel ranges, which rise in steps towards the interior. The south-western peninsula contains the famous Tuble Mountain (3,532 feet), while the Great Zwarte Bergen and Lange Bergen run in parallel lines from west to east of the Cape province. Between these two ranges and the Roggereld and Nieuweveld to the north is the Great Karroo Plateau, which is bounded on the east by the Sneeuwbergen, containing the highest summit in the province (Compassierg, 7,800 feet). In the east are ranges which join the Drakensbergen (11,000 feet) between Natal and the Orange Free State.

The Orange Free State presents a succession of undulating grassy plains with good pasture-land, at a general elevation of some 3,800 feet, with occasional hills or kopies. The Transwal is also mainly an elevated plateau with parallel ridges in the Magalies and Water berg ranges of no great height. The veld or plains of this northermnost province is divisible into the Hooge Veld of the south, the Banker Veld of the centre, and the Bush Veld of the north and east, the first and second forming the grazing and agricultural region of the Transvaal and the last a mimosa-covered waste. The eastern province of Natal has pastoral lowlands and rich agricultural land between the slopes of the Drakeusberg and the coast, the interior rising in terraces as in the southern provinces.

Rivers.—The Orange, with its tributary the Vaal, is the principal river of the south, rising in the Drakensbergen and flowing into the Atlantic between the Protectorate of South West Africa and the Cape of Good Hope. The Limpopo, or Croccolile River, in the north, rises in the Transvaal and flows into the Indian Ocean through Portuguese East Africa. Most of the remaining rivers are furious torrents after rain, with partially dry leds at other seasons.

HISTORICAL SKETCH.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years ocean route to India. Diaz merely doubled the Cape and returned nome. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of Eugland and Holland, as a place of call in going to and from the East Indias. In 1652 the Netherlands' East India Company took possession of the shores of Table Bay, established a fort, and occupied the adjacent lands, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

Natal derives its name from the fact of its discovery on Christmas Day, 1497, by the sciebrated Portuguese navigator, Vasco da Gama. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers, who came with their waggons overland from the Cape Colony and settled in the northern districts, where to this day the Boers preponderate. In the year 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, with representative institutions, and in 1803 acquired responsible government.

The Transvaal was formed as the South African Republic by parties of Dutch Boers from the English colonies who "trekked" into the interior of the continent and wrested the land across the Vaal river from the native chiefs. The discovery of the goldfields within its borders led to the settlement of large numbers of foreigners, and eventually to hostilities with the British Government. A war of nearly three years' duration was fought with great tenacity, and its close was marked by the inclusion of the South African Republic

within the British Empire, "responsible government" being granted almost immediately.

The Orange Free State was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854. Its subsequent

history is identical with that of the Transvaal.

Delville Wood.—The title deeds of Delville Wood, containing the graves of South African troops who fell there during the battles on the Western Front in France in the Great War, are held by the Government of the Union of South Africa, and Delville Wood is part of South Africa.

GOVERNMENT.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. VII., cap. 9), passed by the Parliament of the United Kingdom on September 20, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvanl and the Orange River Colony became united on May 31, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original Provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvani and the Orange Free State respectively.

The Union Government is seised of all State property, and the Railways, Ports, Harbours and Customs are administered by Union Commissioners for the benefit of a Consolidated Revenue Fund. The former debts of the Provinces are administered by and form a first charge upon the funds of the Union. Provision is made in the Act of 1909 for the admission to the Union of Rhodesia, and for the transfer to the Union Government of the administration of protected and other native territories. The Union was inaugurated by H.R.H. the Duke of Connaught, K.G., in 1910.

The Government publishes annually an "Official Year Book of the Union of South Africa," giving full statistics and descriptive information on all matters of public concern. The seat of the Government is Pretoria; the seat of the Legislature is Cape Town.

The Executive is vested in a Governor-General appointed by the Sovereign, and aided by an Executive Council, with a Legislature of two Houses.

Governor-General (Cape Town and Pretoria), The Right Honourable the Earl of

THE LEGISLATURE.

D S.O.

The Senate consists of 40 members For ten years after the establishment of Union eight were nominated by the Governor-General-in-Council and 32 were elected, eight for each Province. The first election was made prior to the establishment of the Umon by the two Houses of each of the Colonial Legislatures sitting as one body, and a vacancy was filled by the choice of the Provincial Council in respect of whose Province a vacancy occurred Since var the Provincial element has been elected, according to the system of proportional representation with the single transferable vote, by the Members of the House of Assembly and of the Provincial Council for each Province sitting together and presided over by the Administrator of such Province. Vacancies amongst elected Senators are filled in the same manner, but only for the period which the Senator in whose place the new Senator is elected would have held his seat. Originally, under Section at of the South Africa Act, nominated Senators held their seats for a period of ten years, but this provision was amended by Act No. 54 of 1926, and nominated Senators are now required to vacate their seats on the dissolution of the Senate or upon a change of Government. Of the eight nominated Senators, four are selected on the ground of their thorough acquaintance, by reason of their official experience or otherwise, with the reasonable wants and wishes of the coloured races.

The House of Assembly consists of 148 elected members, 58 of whom represent the Cape of Good Hope, 17 Natal, 55 Transvaal, and 18 the Orange Free State. Members of both Houses must be British subjects of European descent.

The Fifth Delimitation Commission, appointed Judge President, Hon. R. l'eetham, c.m.o £2,500 on July 19, 1927, has divided the country into Pusse Judges, Hon. A. R. Hathom;

the following constituencies: Cape of Good Hope, 58; Natal, 17; Trifusvaal, 55; Orange Free State, 18.

LOCAL GOVERNMENT.

A Provincial Council in each Province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. All ordinances passed by a Provincial Council are subjected to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as Members of Parliament, but the restriction as to European descent does not apply. Provincial administration is in the case of each Province vested in an Administrator, with an Executive Committee of four members. The Provincial Council in each case consists of the same number of elected members as there are electoral divisions of such Province for the House of Assembly, unless that number is less than as (as in the cases of Natal and the Orange Free State), when the number is as. Each Council exists for a period of three years. Direct taxation is permitted for Provincial purposes, and legislation is authorised on certain specified subjects.

DEFENCE.

The South Africa Defence Act, 1912, became law on June 14, 1912. This Act, as amended by the South Africa Defence Act Amendment Act of 1922, provides for the establishment of Defence Forces comprising:—

1. The South Africa Permanent Force, which

consists of :-

(i) The South African Staff Corps.(ii) The South African Instructional Corps.

(m) The South African Naval Service (iv) The South African Field Artillery

(v) The South African Permanent Garrison Artillery.
(vi) The South African Engineer Corps.

(vii) The South African Air Force. (viii) The South African Service Corps.

(ix) The South African Medical Corps. (x) The South African Ordnance Corps.

(xi) The South African Veterinary ('orps. (xii) The South African Administrative, Pay. and Clerical Corps.

The South African Naval Service includes the officers and men of the South African Division of the Royal Naval Volunteer Reserve engaged for whole-time service.

2. The Coast Garrison Force, which consists

(i) The South African Garrison Artillery.
(ii) The South African Coast Defence Corps.

3 The Citizen Force, which consists of .-

(i) The Active Citizen Force.
(ii) The Citizen Force Reserve.

(iii) The National Reserve.

4. The South African Division of the Royal Naval Volunteer Reserve.

z. Special Reserves.

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to under go a prescribed peace training with the Active (titzen Force spread over a period of four consecutive years. The Act states, however, that only so per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations, under the Citizen Force Reserve, is a marked feature of the Act; citizens between the ages of sr and sg who are not entered for peace training with the Active Citizen Force are to be compelled to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rife.

Provision is made in the Act for the cadet

training of boys between 13 and 17 in urban and other populous areas, where facilities can con-veniently be arranged.

The Union is divided into 6 military districts. To each military district has been allotted various units of different arms, to which the citizens entered for peace training in their acth and sist years are posted. EDUCATION.

In the South Africa Act, Section 85 (iii.), it is provided that "Education, other than higher education, for a period of five years and thereafter, until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils"

Under Act No. 5 of x022, a definition is given of the term "higher education." Section xx of that Act, as amended by Section 14 of Act No.
46 of 1925, reads as follows:—The expression
"higher education" as used in Section 85 of the South Africa Act, 1900, shall include inter a ha-(a) Education provided by universities and university colleges incorporated by law: (b) education provided by the South African education provided by the South African Native College; (c) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science) as the Minister of milling and conestic science) as the annister of Education may declare to be places of higher education; (d) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education; (e) any other education which, with the consent of the provincial administration concerned, the Minister vincial administration concerned, the Minister of Education may declare to be higher education

In terms of clauses (c), (d) and (e) above, the Provinces have been relieved of all vocational education (technical, industrial and agri-cultural), and the Department of Education under the Minister is therefore now concerned with-

I I'niversities and university colleges comprising the following .—
1. University of South Africa, with the

following constituent colleges-Potchefstroom University College, Potchef-

stroom.

Grey University College, Bloemfontein Rhodes University College, Grahamstown, Hugnenot University College, Wellington,

Natal University College, Pietermantzburg University of Capetown. University of Stellenbouch.

University of the Witwatersrand.

University of Pretoria

11. Technical colleges which have been established under Act No. 30 of 1933 at Capetown, Durlan, Johannesburg, Port Elizabeth East London, Pietoria, Pletermaritzburg, and Bloem-

III. Industrial, trade and agricultural schools (State and State-aided) at various centres throughout the Union.

The number of students at universities and university colleges for the year 1930 was 6,990. The State expenditure on higher education as above defined during the financial year 1930-31 Was £857,300

Primary Education and Education other than Higher Education.—The central direction of public education (other than higher education) is exercised by the Provincial Education Depart ment in each of the four Provinces of the Union. Each Department is controlled by a Director or Superintendent of Education. In the Cape In the Cape

Province practically all the schools are Stateaided. In Natal they are partly State schools and partly State-aided. In the Transvall and Orange Free State they are in the main State In all Provinces primary education schools is free

Number of State and State-aided Schools in the Union in 1930. - For European scholars, 4,906; for Non-European scholars, 4,038, total, 8,944. Number of Scholars and Teachers in 1637.—

Private Schools in 1930.—European, 264; Non-

European, 474, total, 738.

Number of Scholars — European, 20,652; Non-

European, 20,800, total, 41,452.

Number of Teachers — European, 1,194; Non-

European, 598, total, 1,792.
In all Provinces Normal Colleges and other

institutions for the training of teachers are maintained by the Education Departments. Superintendent-General of Education, Prof M C Botha, M.A.

Supt. of Education, Natal, F D Hugo, B A.

Director of Education, Transmal, N. M. Hoogenhout, M. A., Ph.D. (Strassburg)

Director of Education, Orange Free State, S. H. Pellissier, B A.

UNION FINANCE.

The ordinary Revenue and Expenditure of the Union (exclusive of subsidies to Provincial Administrations and interest on Railway capital) for the five years ended March 31, 1930, are stated as under -

Year	Revenue	Expenditure.
1925-1926 1926-1927 1927-1928	£ 26,986,778 28,577,003 30,094,004 30,501,650 30,486,458	£ 21 014,444 21,850,419 22,840,768 23,180,076 24,414,770

DEBT. The Funded Debt of the Union at March 31, 1930, was £235,372,357 and the Floating Debt £14,278,840
PROVINCIAL FINANCE

Since their establishment in 1910 the powers and functions of the Provinces have undergone various alterations, and their powers of taxation have been limited from time to time. An Act (No. 46, 1925) to amend the laws regulating the financial relations between the Union and the Session of Parliament, and as from April 2, 1925, the sources of revenue available to the Provinces are

(z) A subsidy from the Union Government based upon the average attendance of pupils receiving education within the Province, and the extent of other educational functions carried on by the Province

(a) Certain scheduled and limited taxes. (3) Certain taxes collected by the Union and assigned to the Provinces without power to

legislate in regard thereto. (4) Special grants of £75,000 each to the two smaller Provinces of Natal and the Orange Free State

The requirements of the Provinces in regard to capital expenditure are supplied by the Union Government by way of loans Special loans repayable in to years have been made by the Central Government to finance the deficits on the Provincial Revenue Funds at March 31,

The ordinary Revenue and Expenditure for six years ended March 31, 1930, were as

Railways.—The first railway in South Africa was commenced in April, 1859, the first sod being turned by the then Governor of the Cape of Good Hope, Sir George Grey This was very shortly followed by Natal, which started the construction of a line running from Durhan. Another two lines finally linked up at Heidelberg in 1855. The Cape line was opened for public traffic to Stellenbosch in 1854 and to Wellington in 1854, while a track to Wynberg was opened to traffic in 1854. Little progress was, however, made in succeeding years, and it became evident that the development of the country could not be left to private enterprise. The existing Cape lines were therefore purchased by the Government on Jan. 1, 1873, and in 1876 Natal followed by acquiring the railways in that colony. Increased working at once took place, and the construction of four lines was pushed inland from Cape Town, Durban, Port Elizabeth, and Rast London. Bloemfontein was reached in 1890, and two years later a line to Germiston linked up with the system already established in the Transvaal.

aystom aircady established in the Transvaal.

The total open nuleage of Governmentowned lines at the end of March, 1930, was
za.873 miles (comprising Cape 5.094, Orange Free
State z.895, Transvaal 3.282, Natal 1.472, and
South-West Africa z.4321, of which zz.677 miles
are 3 ft. 6 in, gauge and 896 miles z ft. gauge.
The capital expenditure on Government rail-

ways up to March 32, 1930, amounted to £143,327,941. The gross camings for the year ending March 32, 1930, were £35,730,549, and the net profit, after payment of interest, £63,491. Working expenditure (excluding depreciation) amounted to £18,988,306, or 72.59 per cent. of the gross revenue, as compared with £18,798,654, or 72.05 per cent. of the gross revenue for the previous year. The Cape to Cairo Radicay, projected by Ceoil Rhodes, had advanced to Buluwayo by 1902, 1,362 miles from Cape Town and 3,500 miles from Cape Town to Port Francqui in the lower Congo, 3,300 miles, all 36" gauge. The Trans-Zambes Radiway, from Dondo (on the Berra-Mashonaland line) to the Zambesi, was opened July 2, 1923, thus placing the Union in direct communication with Nyasaiand.

Posts and Telegraphs.—On March 31, 1931, there were 3.50 post and a.849 telegraph offices open in the Union. During the year 129.21, 305.480,000 articles of mail matter, including 3.537,000 registered articles, addressed to places within and without the Union, were handled An Air Mail service in conjunction with incoming and outgoing European mails operates between Cape Town and Port Elizabeth, with branches to Dun han and Germiston. The number of money orders issued was \$10,266, valued at £2,733,781, while 576,972 orders, value £2,496,420, were paid. 4,370,354 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders were issued, and 3,884,563 postal orders paid the number of the post of telegraph in the number of the control o

Shipping.—In 1930, 5,702 vessels (15,699,478 tons) entered, and 5,692 vessels (15,678,302 tons) cleared at the ports of the Union of South Africa.

RAILWAYS AND HARBOURS BOARD. Chairman, Hon C W. Malan, M.P., Minister of Railways and Harbouns Members, A. Kutt, R. B. Waterston, and D. Hugo

Secretary, P. D. Troskie.

The railways, posts, and harbours of the Union are administered and worked under the control and authority of the Governor-General in Council, exercised through a Minister of State, who is advised by a Board consisting of three Commissioners

The management and working of the railways and harbours are subject to the control of the Minister of Railways and Harbours, carried on by the General Manager, who is governed by such regulations as the Minister may from time to time frame, after consultation with the Board.

South-West Africa. (Sudwes-Afrika)

Administered under Mandate as an integral part of the Union of South Africa.

Administrator, Albertus Johannes Werth.

Secretary, H. P. Smit.
SOUTH-WEST AFRICA lies between S. lat. 17 s₃ and the Orange River, with a narrow strip between 18°-18° 3ο' S. lat. extending from sτ° to π5° E. long., known as the Caprivi Zipfel, and gives access to the Zambesi. The estimated area of the country is 322,394 square miles, and the population (x930) is approximately 275,522, of whom approximately 31,586 are Europeans. The estimated native population (1930) is distributed as follows: Territory proper, 100,603; Ocamboland, 117,000; Kaokofeld, 4,309; Okawango, 14,000; Caprivi Zipfel (eastern portion only) 8,044. Running more or less parallel to the coast, and roughly at a distance of 60 to 100 miles from it, is a broken range of mountains, from which there is a gradual slope to the sea. The country between these mountains and the coast is barren desert except towards the North, and is known as the Namib Towards the East from these mountains the land slopes eastward and forms the western edge of the great Kalahari Plateau. The boundaries are the Kalahari Plateau. Okavango and Kunene Rivers, in the north, and the Orange River, in the south, all perennial streams of considerable volume. On the Orango are the Aughrabies Falls, twice the height of Niagara.

The native races are :- In the South, Hottentots. In the centre, Hereros and Bergdamaras, with the exception of the Rehoboth district, which is occupied by a mixed race known as the Bastards; and in the North, Ovambos To the North and East there are many small bushmen tribes, some pure bushmen, but the remainder a mixture of aboriginal native tribes and bushmen. The Kaokoveld (the North-Western area) is very scantily inhabited by Hottentots and Ovatyimbas; the only Europeans are those allowed for minerals. It is very mountainous, and in many places well supplied with water.

The Administration of the country is exercised by the Governor-General, who has, however, delegated most of his powers to an Adminis-trator appointed by the Union Government. The territory is divided into 17 Districts ruled over by Magistrates as the representatives of the Government The territory of Walvis Bay. which is actually part of the Cape Province of the Union, is administered so far as possible as a portion of South West Africa, and its magnificent harbour will undoubtedly in the future prove of great benefit. The constitution granted under Union Act No 42 of 1925 provides for a Legislative Assembly consisting of 12 elected and 6 nominated members, an Executive Committee of 4 members elected by the Assembly with the Administrator as Chairman. The powers of legislation granted exclude the following matters which are permanently reserved to the Union Government :-

earnings of natives

(b) Mines, minerals, mineral oils and precious stones; or the moneys derivable therefrom or payable to the administration in respect of (d) Mines, mineral oils and precious stones; or the moneys derivable therefrom or for the extension of powers has not yet (October, 1931) been passed by two-thirds majority of the members of licences for prospecting or winning the same or the Assembly as required by the Constitution Act.

as share of the produce thereof or any taxation in connection therewith:

(c) The acquisition, construction, management, regulation, control and working of railways and harbours in the territory; and the organization, discipline and conditions of employment of and the payment of pensions, retiring allowances and financial benefits to persons in the employment of the railways and harl ours administration :

(d) The organization of and discipline and conditions of employment of persons in the public service who are serving in the territory, and the payment of pensions, retiring allowances and financial benefits to such persons :

(c) The constitution and jurisdiction of courts of justice, whether superior or inferior, and the

practice or procedure to be observed therein;
(f) The administration, management and working of the postal, telegraph and telephone services

(g) The establishment or control of any military organization in the territory,

(h) The movements or operations of any unit of the South African Defence Forces within the territory;

(i) The entry of immigrants into the territory or of other persons;

(i) Tariffs of customs and excise duties and the control and management of customs and excise :

(k) Currency and banking and the control of banking institutions.

The following matters are reserved for a period of three years,* after which period the Assembly may by resolution assume control

(a) The establishment or control of any police force in the territory :

(b) Civil aviation:

(c) Primary or secondary education in schools supported or aided from the revenues of the territory;

(d) The establishment, management or control of any land or agricultural bank in the territory; (e) The allotment, sale, lease or disposal of

Government lands in the territory

In regard to finance, the Assembly may not mitiate any ordinance imposing taxation unless recommended to it by the Administrator

The railway system in South-West Africa, now controlled and worked by the South African Railways and Harbours Administration, and connected with Union Lines (10e Aar to Ankop Protectorate border 243 nules), comprises Union Lines 398 miles, 8 W Territor) Lines x,48a miles, and privately owned Lines 74 miles, a total of

1,954 inites.
The Capital of the Protectorate is Windhoek, The Capital of the Protectorate is windnose, which hes practically in the centre of the country at 5,500 ft. above sea-level. (Urban white population, 1926, 3,809.) Other inland towns are Keetmanshoop (Urban white population, 1926, 1,159). Aroah, Bethanie, Gibeon, Gobabis, Groottotein, Karlbib, Okahandja, Omanakathi, 1920. the Union Government:

(a) Native affairs or any matters specially affecting natives, including the imposition of (Urban white population 1926, 66s) and Luderitz taxation upon the persons, land, habitations or Bay (Urban white population, 1926, 1834).

Brobinces of the Union of South Africa.

CAPE OF GOOD HOPE

The Province of the Cape of Good Hope reaches in S. lat. from \$6° to \$4° 50', and in E long. from \$6° ag' to \$0°. The extent of the country is N.E. to S.W. 750 miles, and from N.W. to S.E. Soo miles, with a coast-line of nearly 1,300 miles.

Education .- Local School Administration is conducted by school boards and school committees, the unit of administration being the school district. The Province is divided into xxx school districts, each under the control of a School Board, a portion of the members being elected by the ratepayers and a portion partly nominated by the Provincial Administration and partly by the Local authorities. Education is compulsory for children of European parent-age. The necessary grants are provided from Provincial Council revenues, education up to the

age of 15 being free.

State and Aided Schools, Dec. 21, 1230, 4,766
There are 130,990 European pupils and 11,990
non-European. Total number of teachers 11,692
(6,438 in European schools and 5,552 in non-European schools). Provincial Government expenditure on education, exclusive of Higher Education (for which see Union of S.A.), for

1930-31, £3,413,712.

Hospitals.—The daily average number in all hospitals (1999) was 1,693'98; ordinary revenue £157.176, ordinary expenditure £308,552, £x57.x76, ordinary expenditure Government grants in aid £x36,649.

Harbours and Works.—There are magnificent harbours at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. There are electric tramways in Cape Town, Port Elizabeth, East London, and Kimberley.

Administration.—The Province is administered by an Administrator, appointed to amministrator, appointed for five years by the Governor-General, aided by a Provincial Council of 58 members (elected for three years). There is an Executive Committee of four members in addition to the Administrator, who is Chairman of the Committee.

Local Government.—There are 128 municipalities, each governed by a Mayor or Chairman and Councillors, a certain number of whom are elected annually by the ratepayers. There are 92 Divisional Councils and 86 Village Management Boards and so Local Boards.

Administrator, Hon. J. H. Conradie . . . £3,500 Executive Committee, J. I. Maun: P. J. Du Plessis; A. B. Cunningham; B. Muller.

Superintendent-General of Education, M. C. Botha, M A.

Professional Assistant, W. de V. Malan, Ph.P. Secretary, P. A. Millaid.

Capital, CAPE TOWN. Total population (1986). European (with suburbs), 130,568.

Cape Town is 5,979 miles from Southampton;

transit, 16 days.

NATAL

The Province of Natal comprises an area of 35,384 square miles (including Zululand, 10,427 square miles), with a seaboard of 360 miles. In 1236 the European population was 158,916 (males 81,170, females 77,746).

In 1928 the European births registered numbered 3,514, deaths 1,408, and marriages 1,525. The race question in Natal is complicated by the presence of large numbers of Indian subjects of the Crown, brought over during the latter half of the nmeteenth century to supply the deficiency of local labour.

Education.—There is a University College at Pietermaritzburg, and there are responsively schools (exclusive of 253 farm schools), and 38 beyond primary schools for European children. There are also a technical colleges, r physical culture school, 3 mght continuation classes, r training school for teachers, 82 Asiatic schools, 696 unitive schools, and 22 other coloured schools, which are maintained or aided by Government, and a large number of private schools.

Administration.-The Provincial government is administered by an Administrator aided by a Provincial Council of as members (elected for 3 years). There is an Executive Committee of 4 members.

Administrator, Hon. H. Gordon Watson, I.S.O. Executive Committee, F. C. Hollander; Capt. G. M. Botha; J. Macaulay; T. N. Wadley. Provincial Secretary, A. E. Charter, O.B.E.

PIETERMARITEBURG, the capital and sent of the Provincial Government, is situated about 54 miles inland from Port Natal. Total popula-tion (European and coloured), 36,623 in 1221. The 1226 Census figures for the European population of Pieterman itzburg are 19,748.

In Durban (nopulation, 2921, 152,642; for 1926 European population of Durban was 70,883), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, L.W.O.S.T., the bar being no longer existent, for 1927 being 37 feet.

Natal, 6.800 miles; transit, so days.

ZULULAND.

Ziduland, annexed in 1897, comprises about twothirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-cast by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory formerly Utrecht and Vrijheid districts of the Transvasi) and Swaziland. The Amagutaland Protectorate, created by proclamation of Nov. 22, 1897, was annexed to Zululand on Dec. 27, 1897, and now forms part of the Province. The Northern Districts territory (consisting of the Magisterial Divisions of Vrijheld, Utrecht, Paulpietersburg, and Babanaugo) was annexed to Natal on January 27, 1903.

THE TRANSVAAL

In 1931 the European population numbered

695,963 (males 357,470, females 338,492) The Province of the Transvaal has a total area of xxo,450 square miles, about 20,000 square miles lying within the tropics. The Census of inter syning within the tropics. The census of real showed a population of 2,687,636, of whom 1,159,430 were males and 228,206 females. In 1929 there were 18,227 European births, 6,389 European deaths, and 7,101 European marriages

BERMUDA.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N lat an 164° 51' N. long., comprising an area of about 19 square miles, with an estimated population (1988) of 30.884 (15,536 white and 15,328 coloured) These islands derive their name from Bernudez, a Spaniard, who sighted them in 1527; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant.

The Government is administered by a Governor, who is also Commander-in-Chief of the military forces. He is advised by an Executive Council of 7 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative Hous, of Assembly consisting of 36 members.

a Legislative Council, composed of 9 members appointed by the Crown; and a representative Houss of Assembly consisting of 36 members. The climate is mild and healthy. There are no streams or wells, and the inhabitants are dependent on the rainfall stored and preserved in tanks. Vegetation is prolific, the principal trees being the Bermuda codar (juniper), formerly of great importance for shipbuilding. The islands produce large quantities of ontons potatoes, and green vegetables, which are largely exported, together with cut flowers and lily bulbs, to New York Arrowroot and bananas are also grown, but meat, flour and other articles of consumption are imported from the U.S and Carada. Fish are plentiful round the coasts. The islands are much frequented as a health resort by Americans and Canadians.

BORNEO.

Borneo is a large island in the Eastern Archipelago, extending from lat. 7' 4' No 4' 20' 5. and from long. 108' 50' to 129' 20' E. It is about 850 miles in length and 650 in breadth, and contains an area of 284,000 square miler, divided by the equatorial line into two nearly equal portions. The population is probably about 1,846,000, consisting cheffly of Dyaks, Malays, Kyans, Papus or Negritos, Chineso, Bajaus, Dusuns, Muruts and Bugs (the aboriginal Celébes). The island was discovered by the Portuguese in 1521, and at the present time rather more than two-thirds of the island is included within "Netherlands India". The remainder of the island is under Bittish protection

BRITISH NORTH BORNEO.

The territory of British North Borneo occupies the northern part of the island, with a total area of about 31,000 square miles, and a coast-line of about 900 miles. The population is 270,043, consisting mainly of Muhammadan settlers on the coast, aboughal tribes mland, and a large number of Chinese traders, artisans, and agricultural labouters. The interior is mountainous (Mount Kinabalu, 12,455 feet) and is densely timbered.

Kinaballi, x3,455 feet) and is densely timbered.

The two chief towns are Sandakan, on the north-east coast, and Jesselton, on the west coast. All legislation is passed by the Legislative Connect, which consists of 9 official and sunofficial members, who have the local title of Honourable. The appointment of the Governor is subject to the approval of the Secretary of State. For adm instrative purposes the whole State is divided into 4 Residencies. The laws are based on the Indian codes of criminal and civil procedure, amended and adapted by local ordinances. There is an Iman's Court for Muhammadan law.

The clinef products are tumber, tobacco, rubber, copra, cutch, birds'-nests, salt fish, damer, aspoco-nuts, rattans, and all varieties of jungle and sea produce. The country is suitable for the cultivation of sugar, taploca, coco-nuts, kapok, ground nuts, rubber, pepper, and gambler on a large scale. Gold has been found. Coal of good quality is now being produced at the rate of 3,500 tons per mouth at Schattik, in the south-eastern corner of the territory.

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Bearfort, the centre of the rubber industry, where it

A railway runs from Jesselton, the chief port on the west coast, and down the coast to Beanfort, the centre of the rubber industry, where it turns inland to Melalap, in the later or; there as branch from Beaufort to Weston (so miles). There are several wireless stations. There is a State bank at Sandakan with a branch at Jesselton.

There is an Armed Constabulary numbering 676 all ranks, composed of Indians and Natives under European officers, armed with S.M.L.E. rifles and Lewis guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

Sultan, H.H. Ahmed Tajudin Akhazul Khairi Waddin, suc. Sept., 1924. Joint Regents, Pengiran Bendahara and Pengiran

Pemancha.

A native State on the north-west coast of the island of Borneo. The total area is about 2,500 square miles, the population being 30,162 (April, 1931), of whom 26,997 are Malays and Bornean races. The territory was placed under British protection in 1888, and on Jan. 2, 2006, the Sultan accepted by treaty a British Resident to assist and advise him in the administration.

· Exclusive of land sales

The chief town, Brunel, has a population of nearly za.coc. Native industries include fishing, cloth-weaving, brass foundries, and silversmiths work. The chief imports are rice, cloth, tobacco, sugar, petroleum, and sundries; the exports are chiefly cutch (mangrove extract), rubber, jelutong, and sago.

Brunei is 5 hours by steamer from Labuan, and is distant 758 miles from Singapore (transit 4 days). There are wireless stat Labuan, Temburong, and Belait. There are wireless stations at Bi inei.

BRITISH GUIANA.

which includes the Counties of Demerara, Essequebo, and Berbice, is situated on the northeast coast of South America and has a total area of 89,480 square miles, with a seaboard of more than 300 miles. The population, Dcc 3x. 1930, was estimated at 312,489, of whom 130,075 were East Indian immigrants. The birth-rate was East Indian immigrants. The birth-rate was 33,4, and the death-rate a3 o per roso of the population The colony is bounded on the south by Brazil, on the east by Dutch Gulana, on the west by Venezuela, and on the north and N.E by the Atlantic Ocean The clum te, although hot, is pleasant and healthy. The cultivated portion of the country, amounting to about 155,852 acres (of which 57,244 acres are in sugar-cane and 40,702 in rice), is confined to the sca-coast and to a short distance from the rivers. The coastland is very like the Netherlands, being below the level of the sea, and intersected with canals constructed by its former Dutch owners At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8.740 feet above sea level, and on the Potaro River (a tributary of the Essequebo) are the Kaneteur Fails, with a clear drop of 741 feet and a total fall of Saz feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The meteorological records taken on the coast-lands during a period of 84 years show, as regards temperature, that the climate is a very equable one. The mean temperature is 80 4°, its recorded extremes during this long period ranging between 68° and 92°, but these extreme temperatures are very rarely recorded. the usual extremes during a year being 70° and 80°. In the interior the mean temperature is 89. In the interior the mean temperature is higher—8:6°, its extremes ranging from 66° to rog. The yearly rainfall is, on the contrary, subject to marked variation, its mean on the coast lands being groo inches distributed over coast lands being 9x co inches distributed over ros days of the year, and its range from \$z^* to z_3 *: inches per year. In the interior the average recorded rainfall is \$B^* ginches per year, ranging from 45^* a to 80^* 4 inches per year. The chief product is sugar, which forms z_3 per cent. of the export trade. The leading exports are sugar (\$\mathcal{L}_{2}, z_{10} \mathcal{L}_{20} \mathcal{L}_{20} in 1930), rum, diamonds, gold, timber, balata, bauxite, rice and copra. There are about 9,000 aboriginal Indians; they

8.000

6,760 7,200

BRITISH HONDURAS.

British Honduras, in Central America, lies within 18° 29' 5" to 15° 33' 55" N. latitude and 89° 9' 22" to 88° 20' W. longitude. Its extreme

• During 1930 no loans were issued either locally or by the Crown Agents. Debentures amounting to £102,203 were releemed. Advances made to the colony by the Crown Agents amounted to £322,000 at Dec 21, 2230.

length and breadth are approximately 174 m. and 68 m. respectively; it is bounded on the north and north-west by Yucatan (Mexico), on the west and south by Guatemals, and on the east by the Caribbean Sea. The total area is about 8,598 sq. miles, with a population (Census 1921) of 51,347—25,524 males and 25,283 females. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 50°. The average lies between 75° and 50°, but this is considerably tempered by the prevailing sea-breezes. In September 1931 a distance the season of the control of the contr astrous hurricane devastated the capital of the astrous nurricane devastated the capital of the colony, with a loss of nearly r,coo lives, a Mansion House Fund being raised for the sufferers. The country consists chiefly of primeval forest, with savannahs and so-called ".pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pinetrees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten or twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary.

The staple products are the natural woods of the colony, principally mahogany and logwood. Sugar, rubber and cacao grow readily Fruit, in-cluding bananas, plantains, coco-nuts, pineapples, oranges, and mangoes also grow well, while inhand there are extensive regions of good pasturage.

About 60,000 acres are under cultivation The best description of cacao trees grow wild in the best description of cacao cross grow which has bush. There are &s primary schools in the colony, and 4 schools with secondary departments in Belize. The shipping entered and cleaned at the port of Belize in 1930 was \$55,500 tons. There is a radio-telegraph station at Belize

British Honduras is governed as a Crown blony There is an Executive Council of 3 official and 4 appointed members and a Legislative Council of 5 official and 7 appointed members. The Governor is President of both Councils.

BRITISH WEST INDIES.

The West Indies, so named in 149s by Columbus who believed the islands to form the western limits of India, are a number of islands and islets, some of them mere rocks, attuated between 10° to sy" North and 50° 30' to 85' West. The whole archipelago extends in a curve from the Florida Channel (North America) to within miles of the coast of Venezuela (South America), and is divided into three main groups: America), and is divided into three main groups: L Greater Antilles, which contain the largest islands, Cuba (44,000 sq. miles) and Hispaniola (88,000 sq. miles), being Independent; Janaica and its dependencies, British; and Puerto: Rico, a dependency of the United States II. Barmans, which are entirely British. III. LESSER ANTILLES, which are divided among the United Kingdom, France, Netherlands, the United States and Venezuela. The total area of the archipelago is nearly zoo,000 square miles, of which 2x.000 square miles are Indemiles, of which 72,000 square miles are linde-pendent, 12,300 British, 3,890 United States, 1,350 French, 430 Netherlands, and 90 Venezueland. Trade Enquery Office in London, The West

India Committee, 14, Trinity Square, E.C. 3.

THE BAHAMAS.

The Bahamas (or Lucayos) are an archipelago of the British West Indies, lying between π^0 42' $-\pi^0$ 34' N lat. and $7\pi^0$ 40' -70° 5' W long, and extending from the coast of Florida on the north-west to Haiti on the south-east. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 4.404 square miles, and a population in 1939 of 60,848, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing principal islands are New Providence (contaming the capital, Nassan). Cat Island, Abaco, Giand Bahama, Long Island, Eleuthera, Exuma, Harbeur Island, Inagua, Andros Islands, San Salvador or Watling Island, Rum Cay, Long Cay, Ragged Island and Binninis. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish but at the peace of Versailles were restored to the English. The climate ailles were restored to the English. The climate is salubilous, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1930 being valued at £75,351. Tomatoes are cultivated in large Arts, 35r. Tomatoes are cultivated in large quantities for shipment to the United States. Mahogany, lignum - vitas, mastic, ironwood, ebony, logwood, and satinwood are found throughout the islands. A fibre industry is largely established. The imports are chiefly foodstuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided here. Presenter (vincil of a members a nount.

by an Executive Council of 9 members, a nominated Legislative Council of 9 members and an elective Representative Assembly of 29 members.

aboriginally Xaymaca, or Land of Wood and Water-an island situate in the Caribbean Sea, water—an island studie in the carmbean sea, about 90 miles to the south of Cuba, within 17° 42′—18° 22′ North lat and 70° 11′—78° 23′ W. long It is the largest and most valuable of the British Wost Indian Islands, being 144 miles in length and 90 in extreme breadth, containing an area of 4,450 square miles, and a population, in April, 1921, of 858, x18 (males, 40x,973; females, 456,145); whites, 14,476; coloured, 157,223; blacks, 660,420; East Indians, 18,610; Chinese, 3,696; not specified,

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1500; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to

England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,388 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is inter-sected by good roads. There are see miles of railway open. Telegraph stations and post offices are established in every town and in very many villages; the number of accounts open in the Govt. savings banks was 108,834 (1930). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches a high price. There is an extensive trade in fruits and nuts, chiefly bananas, oranges and occounts, with the U.S.A. and U.K. Maize and Indian corn grow luxuri-

antly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and there are some rare cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the Senior Military Officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all exoficio), of so Nominated Members, and of 14 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop (Census, 1921) 62,707; the next in importance are Spanish Town, pop. 8,694: Montego Bay, 6,580; and Port Antonio, 6,272. Chief exports(1230): bananas, £2,309,741; sugar, £391,806; coffee, £161,621; pimento, £192,508; COCO8, £81,323. 1030-31 1020-30 Public general revenue ... £2,232,869£2,197,572 Expenditure from income. 2,310,502 2,322,613 Public debt 5,237,909 5,117,449 Captain-General and Governor-in-Chief, His Excellency Sir Reginald Edward Comdg. TURKS AND CAICOS ISLANDS.

These West India islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-east of which they are distant about 450 miles. They have an area of about 170 square miles. They have an area or about 170 equal-miles, and a population (1921) of 5,612, of which the principal island, Grand Turk, contains 1,568 Grand Turk is an important cable station. islands are celebrated for producing the finest salt in the world

A Commissioner administers the government of the Dependency, assisted by a Legislative Board This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes, and is also a Court of Appeal.

Codrington family. Wild deer are plentiful and

afford excellent sport, and there is good tarpon and other fishing. Warden, Capt. G. Downing, (and quarters) 5350. Redonda is uninhabited.

(a) Sr. KITTS-NEVIS WITH ANGUILLA.
The islands of St. Kitts, Nevis, and Anguilla
were united in 1882 to form one Presidency, and were united in 1882 to form one Presidency, and taken together they have a population (Dec. 31, 1893) of 25,355 and a total area of about 150 square niles. The climate is decidedly healthy for the tropics, the temperature being from 55° to 88°.

St. Kitts (population Dec. 31, 1895, 17,978), the principal island, is the oldest colony in the West Indies; it is situated in lat. 17° 18° N. and low. 55° 28′ W. and comprises an area of 58.

in the West Indies; it is situated in ist. 17 to in and long. 62° 48° W., and comprises an area of 68 square miles, its greatest length being 38 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the continuous line of green the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central range, which rises to a height of 3,711 feet (Mount Misery). Cotton is also grown to a considerable extent. The capital,

Residence, is a port of registry.

Novie (population ra, 593—probably an overestimate) is separated from St. Kitts by a strait some 3 miles wide and has an area of 50 square miles. Cotton and coco-muts are exported, and cattle and vegetables are raised. Its greatest elevation is 3,556 feet. The chief town, Charlestown, is a port of entry.

Augustia (population 4,794) is about 60 miles N.W. of St Kitts, 16 miles in length, and varies in breadth from z to 3 miles, containing an area of 35 square miles. There are no hills. Salt is the principal product, and small stock are raised.

(3) DOMINICA, the largest island of the colony, and the loftiest of the Lesser Antilles, is situate between xg° ac' xg° 4g' N. lat. and 5c° x3'—5c° 3c' W. long., 95 miles S. of Antigua, and is about 29 miles long and 15 broad, comprising an area of 305 sq. miles, or 195, 300 acres, of which about 70,000 acres are under cultivation. The island is of volcanic under cultivation. The island is of volcanic erigin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the attitude, from 55° to 55°. The cultivation of sugar has been practically replaced by occoa, limes, occo-nuts, vanills, and fruit. The population was estimated at \$2,343 on Day 27 years included in this total are seen on Dec. 37, 1930; included in this total are 400 Caribs, of whom about 100 are of pure blood. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and

from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council consisting of the Adminisrator, who site as President, and 6 official and 6 non-official members, 4 of whom are elected, and a nominated by the Governor. The principal towns are Roseau, on the south-west coast, population 7,04s, and Portsmouth, population 3,060.

(4) MONTSERRAT

is situated in $r6^{\circ}$ 4r' N lat and $6a^{\circ}$ W. long., a6 miles S.W. of Autigua. It is about rr miles as filles S.W. of Autigua. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, with a population (1930) of 12,195. Discovered by Columbus in 2493, it was settled by Irishmen, conquered and held by the French for some time, and finally assigned to Great Britain in 1784. It is justly considered one of the most healthy and beautiful of the Antilles; it contains three active southeres and several by of the Antilies; it contains three active sourneres
and several hot springs, while the sourcry is
charmingly diversified. About two-thirds of the
island are mountainous, the rest well cultivated.
A great part of the island was devastated by
hurricanes in 1924 and 1928. The chief exports
during the year 1930 were cotton-seed meal,
cotton, cotton-seed oil, omons, limes and its
products, sugar, tomatoes and animals of all
kinds. The chief town is Plymouth, with a population (1921) of 1,709. A wireless station was opened in 1925.

TRINIDAD AND TOBAGO.

Trinidad, the most southerly of the West India Islands, lies close to the north coast of the continent of S. America, the nearest point of Venezuela being 7 miles distant. The island is situated between xo 3'-xc0' 5c' N. lat. and 60' 5c' -61' 56' W. long, and is about 5c miles in length by 37 in breadth, with an area of 1.86z square on 15 miles, and a population at the Consus of 192x (including Tobago) of 365,923, estimated at 423 129, on Dec 23, 1920. The island was discovered by Columbus in 1498, was colonised in 1588 by the Spaniards, and capitulated to the 1588 by the Spaniards, and capitulated to the British under Abservoush; in 1797. The chief town and port of entry, Port of Spain (pop. 69,534), is one of the finest towns in the West Indies, with sewerage, electric lighting, tram and telephone services. Other towns of importance are San Fernando (pop. 11,978), about 30 miles south of the capital; Princestown (pop. 5,856), and Arima (pop. 4,711.) A remarkable phenomenon is the asphalt lake, 120 acres in extent, neat the willings of La Bres. from which (1200) 128,055. is the aspirate lake, from which (1930) x18,055 tons of asphalt (£313,397) were exported. The soil of Trinidad is nich and productive, the most important products being sugar, cocoa, molasses, rum, copra, limes, and coco-nuts, and various ruin, copra, limes, and coco-inits, and various kinds of truber and fruits. The chief exports (1330) were petroleum £2,750.595; cocoa £1,353,789; and sugar £7,75,259. On Dec. 31, 2320, there were 14 companies actively engaged in the production of oil, the royalties payable on oil won from Crown L2118 being £77,250 Coal, iron, graphite and gypsum evist in small quantities; and traces of gold have been found in the Northern Range. On Dec. 31, 1321 and 11421. found in the Northern Range. On Dec. 31, 3250, there were #87 Elementary and Intermediate Schools, 43 being Government and #4 Assisted, Thinidad having #851 and Tobago 36, in addition to 7 colleges for higher education, which also receive a grant-in-aid. There are 128 miles of railway open, and the island is in communication with Tobago and the mainland by telegraph and wireless. The Government is vested in a Governor, an Executive Council and a Legislative Council of Executive Council, and a Legislative Council of 28 official and 13 unofficial members, 6 of the latter being nominated by the Crown and 7 elected.

Tobago lies between xr g' and xr xx N. lat. and between 60° 30′ and 60° 50′ W. long., about 75 miles south-east of Grenada, xg miles north-east of Trinidad, and xso miles 8.8. W. of Barbados. The island is so miles long, and from 6 to 7½ broad, and has an area of xx4 square miles, with a population estimated (x300 at \$6.407. It is one of the leasthiest of the West Indies; the temperature varies from 8x² to 88°. There are two towns in the island, viz, Schrborough (pop. x,65x) and Plymouth (pop. 486).

CAPITAL, Port of Spain (pop. 69,534); transit, 12 days to U.S.A.

THE WINDWARD ISLANDS.

The Government of the Windward Islands is made up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. The total area is 508 square miles, with a population (2021) of x6a,254. There is one Governor for the three islands; but there is no Goneral Legislative Council as in the Leeward Islands, and no common tariff or treasury. Each island retains its own institutions, and in the Governor's

absence is governed by an Administrator sub-ordinate to him.

Governor and Commander-in-Chief, Sir Thomas Alexander Vans Best, K.B.E.,

C. M.G. (1930) £3,000 Transit to Grenada from London about 14 days.

GRENADA AND THE GRENADINES.

Grenada is situated between the parallels of za³ 30'-zz⁰ 58' N. lat and 6z⁰ 20'-6z⁰ 35' W. long., and is about az miles in length and za miles in and is about ar miles in length and ra miles in breadth, it is about of miles north of Thindad, 68 miles S.S.W. of St. Vincent, and roo miles S.W. of Barbados. Area, about 85, rao acus, oppulation (including some of the Grenadines), 66,30s (Census of roar). The country is nountainous and very picturesque, and the climate is healthy. Grenada was discovered by Columbus in rags, and named Conception. If was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty

of Versailles in 1783.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee and fruit are grown. The forests are rich in timbers. The imports chiefly comprise dry goods, bread-stuffs, hardware &c. The Legislative Council consists of 16 members, 8 of whom are officials, 3 nominated and 5 elected

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

CAMEROONS.

(Joint France-British Administration.)

The German Protectorate of Kamerun on the The German Protectorate of Ramerun on the west coast of Africa between (British) Nigeria and French Congo (the Spanish Muni River Settlements occupying a small intervening area), was obtained by conquest by Franco-British forces during the War of 1914-18, and at the conclusion of Peace its administration was confided by the Supreme Council of the Allied Powers to Great Britain and France jointly.

Powers to Great Britain and France jointly.
The approximate geographical limits are between son N. lat. and Son AB-rgo E. long., and the area is about \$27,556 square miles, containing a population estimated at \$144,000.; of which total the French sphere is \$33,846 square miles, with \$1,550,000 inhabitants. The coast-line extends from the Rio del Rey to the Muni River. The territory occupies the north-

^{*} Includes Imperial Grants of £6,664 and £8,400.

west corner of the Central African Plateau, by the Dutch. In 1796 the British took possession with Cameroon Peak (13,350 feet) near the of the Dutch settlements on the island, and capital, on the coast, and the Chebchi and annexed them to the Presidency of Madras; Mandara Mountains on the north-west frontier. but six years after, in 1865, Ceylon was formed The Sanaga is a considerable river flowing into the Atlantic opposite Fernando Po; the Sanga and Dscha (or Ngoko) are tributaries of the Congo, and the Logone-Shari flows into Lake Chad. The inhabitants are Bantus and Sudanese, with some Haussas and Fula tribes, of whom the latter are Muhammadans and the remainder pagans. Cocoa cultivation is a highly successful industry of recent origin, and the Protectorate is ruch in forest produce. The exports are rubber, palm oil, paim kernels, cocoa and dried fruits; the imports are chiefly clothing and textile goods, meat, fish and provisions.

In 1920 the whole area was divided into a British Sphere and a French Sphere.

The British Sphere has between Nigeria and French Cameroons. The total area is 34,081 sq ntiles, and the total population is 700,050. It is a narrow stip of land reaching from the Atlantic Ocean to Lake Chad, and lies diagonally between parallels of latitude 4° N. and 12° 30° N. and parallels of longitude 8° 30° and 15° E. The nature of the country varies to a remarkable extent from the coastal mangrove swamps and thick forest belts to the grasslands at heights of 4,000 ft. to 7,000 ft and over, yet another contrast may be seen in the sandy and swampy areas in the region of Dikwa and Lake Chad The highest point is the Cameroon Mountain, which rises to a height of x3,350 ft. It is volcanic, but has not been active since year. The Northern section is administered by the Residents of the adjoining Nigerian Provinces of Adamawa and Bornu; the Southern section by the Nigerian Government as a separate Province, the capital being Buca on the slopes of the Cameroon Mountain. The principal ports are Victoria (in Ambas Bay) and Tiko. Victoria is connected by railway with the capital, and Tiko connected to Victoria by motor road. zzg ships (222,848 tons) arrived in Victoria in 1930 and 102 ships (86,477 tons) entered Tiko, a total of 217 Ships (300,325 tous).

CEYLON.

an island in the Indian Ocean, to the south-east an isand in the indian ocean, to the south-east of the pentinsula of Hindustan, is studied between 5° 55′—9° 50′N lat and 79° 4z′—81° 53′E. long Its area is (with outlying relands) 55,33z square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 20 miles, and its greatest width 140 miles outh, 20 miles, and its greatest width 140 miles. The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. The coolest months are December and January; the hottest are April and May.

The population (Census of 1932) was 5,312,548 (including military and shipping), the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about Ganges, who first settled in the island about tonscribe the Portuguese landed in C. 543. In 1505 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed [Ris 23,45], 9] and Expenditure (Ris 23,551,478).

| Exclusive of Ceylon Government Rankey Revenue but about 150 years later they were dispossessed (Ris 29,650,683) and Expenditure (Ris 2861,319).

annexed them to the Presidency of Madras; but six years after, in 180s, Ceylon was formed into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of paddy and husked gram. The principal exports are tea, rubber, products of the coconut palm, plumbago, cacao, cinnamon, citronella oil, cardamoms, areca nuts, chony, and a little vanilla.

About one-fifth of the island is under cultivation, and the approximate areas in 1930, in acres. were :- Rice, 800,000; other grain, x05,000; tea, 457,000; coconuts, r,r00,000; rubber, 534,000; cinnamon, 26,000; cacao, 34,000; and tobacco, 14,000. The live stock in 1930 included 1,660,000 horned cattle, 57,000 sheep, 181,000 goats, 45,000 pigs, and 1,300 horses. Among the more impigs, and 1,300 norses. Among the more miportant native industries are gold, silver, brass, ivory and tortoiseshell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, tubes, &c.; and for the pearl fishery in the Gulf of Mannar, off the N W. of the island. The manufacture of

There are 951 miles of railway open, 834 being 5 ft. 6 in gauge and 277 miles a ft. 6 in.; and 844 post offices, 445 money order offices, and 261 telegraph offices, with 12,511 miles of telegraph wire.

The government of Ceylon is administered by a Governor, aided by a State Council of *46 members (elected on a territorial basis) with members (elected on a territorial basis) with 8 nominated unofficial members, and 3 Officers of State ('Inef Secretary, Legal Secretary and Financial Secretary). The elected and nominated members are divided into 7 Executive Committees. (a) Home Affairs, (a) Agriculture and Lands, (3) Load Administration, (4) Health, (5) Labour, Industry and Commerce, (6) Education and (7) Communications and Works, each with an elected Chairman who is the Minister for the subject dealt with. The Chief Secretary is in claure of External Affairs. Secretary is in charge of External Affairs, Defence and the Public Services, the Legal Secretary and the Financial Secretary in Charge of Legal and Financial Affairs. The Officers of State and the Ministers form a Board of Ministers which prepares the Estimates of Revenue and Expenditure in consultation with the Financial Secretary.

For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities, Viban District Councils, or local boards, and in the country districts the Ceylonese ictam their village councils and tribunals for matters of minor importance.

Out of the 50 electoral districts the 4 in Jaffina Revenue liketrict remain unrepresented no camilidates offering themselves, as a result of the boycott of the (omstitution.

The MALDIVE ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Muslims. The islands are unnealthy, and the main exports are dried fish, cowrie shells, coco-nut coir, and tortoiseshell

Colombo, distant from London (overland) 5.868 miles; transit, 19 days.

THE CHANNEL ISLANDS.

situated off the north-west coast of France (at distances of from ten to thirty miles), are the only portions of the *Dukedom of Normandy* now belonging to Eugland, to which they have been attached ever since the Couquest. They consist attached ever since the Couquest. They consist of Jorsey (28,717 acres), Guernsey (12,654 acres), and the following dependencies of Guernsey—Alderney (1,952 acres), Brechou (74), Great Sark (1,025), Little Saik (230), Herm (230), Jothou (44), and Lithou (28), a total of 47,083 acres, or 73.4 square miles. The 1931 Census population of Jersey was 50,455, and of Guernsey, &c., 42,666 (Guernsey 40,470, Alderney 1,506, Sark 575, Herm 53, Jethou 2).

The clumate is mild, and the soil exceptionally productive. The land under cultivation in 1936 (1938 acres) acres the principal of the principal of the principal of the principal of the principal of the soil exception of the principal o

was 49,678 vergées (=½ vergées = 1 acre), the principal product of the soil of Jersey being potatoes, tomatoes and wheat, and of Guernsey green crops tolinatees and where, and of distincy green appearance and oats, fruits tomatoes and flowers. The famous Jersey and Guernsey breeds of cows have earned a well-deserved celebuty. The principal officer in each island is the Lieut.-Governor, who omeer in each shind is the held.—Jovernof, who represents the King-Emperor (the Duke of Normandy). Freuch is the official language of the local legislatures, called the States, and of the Royal Court, and is still spoken by the people, but English is now permissible in the Legislative Assembly. The Bailiff, appointed by the Crown, presides over the States and over the Royal Court or judicial body. The islands being all but exempt from imperial taxation they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, the principal town of Guernsey is St. Peter Port, on the east coast.

The trade of the Channel Islands is principal town.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 33° and 35° 41°, and E. long. 32° 30° and 34° 35°. It is about 40 miles distant from the nearest point of Asia Minor; and 60 miles from Latakia, on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, zoo miles long and 66 to 36 broad; from which a narrow penin-sula, 5 or 6 miles wide, tuns out for 40 miles towards the north-east. The area is 3,54 square miles. The population at the census of 193x Musa 347,959, of whom about 18 per cent were Muhammadans, and the remainder mostly members of the autocephalous Church of Cyprus, which is a branch of the Othlodox Eastern Church The principal productions are gram of various kinds, sesame, linseed, flax, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, grapes, oranges, pomegranates, ashestos, anisced, sponces, sumac leaves, terra umbra gypsum, salt, pyrites, and chrome term annot expans, sate protest and carron for ross the wine export was 1,372,728 gals, and that of spirits 10,183 gals, the wine going to Egypt, the UK, Syria, the Dodecanese, and Malta, and spirits to Egypt, Syria and Castellorizo. The climate varies in different localities In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various saintary measures, the death-rate of the whole island is nearly

as low as that of any European country
Cyprus was formally annexed to the Riftish
granted a political franchise, every man paying
direct taxes having a vote. The government is administered by a Governor, assisted by a Legislative Council composed of 24 members, 9 being official and 15 elected. The island is divided into three electoral districts each returning one Muhammadan member, and 12 electoral districts each returning one non-Muhammadan

For administrative purposes the island is divided into six districts, in each of which the executive government is represented by a commissioner. For judicial purposes it is divided into three judicial districts. The law courts nuo enree junciai districts. The law courts were reconstituted in 1927, and there are now a supreme court, 3 divisional courts, 3 assize courts, 3 district courts, and also magisterial and assistant district judges ("hristian and Moslem) taken nart. There are also a Musculpus administration of the courts of t take part. There are also 3 Mussulman religious

tribunals, styled Sheri Courts, and a Sheri Tribunal of Appeal

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 33,509 in 393; the other principal towns are Larnaca (population xx,87s), Lunassol (x5,349), Famagusta (8,979), Kyrenia (2,137), Paphos (4,517), and Morphou (4,335).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and was extended to Morphou, 25 miles, in 1907, and to Evrykhou, 15 miles, in 1915. There is a regular service of steamers between Cyprus and Egypt, Syria, Cilicia, Palestine, Smyrna, Constantinoule Greece France and Italy

FALKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between 51° 15'-53° 8. lat. Exclusive of Grant-in-and (£92,800), † exclusive of share of Cyprus of the Turkish Debt charge (£92,800).

and 57° 40'—6a° W. long. They consist of East Falkland (area 2,50° sq. miles). West Falkland (a,058 sq. miles), and upwards of zoo small islands (islets, rocks, and sandbanks), comprising in the oggregate, 46:58 sq. miles, and a population in rear of 2,004. Mount Adam, the loftlest peak in the colony, rises 2,32 foot above the level of the sea. The Falklands were discovered by Davis in rgs, and visited by Hawkins in 1994. A settlement was made by France in 1964; this was subsequently handed over to Spain, but the latter country recognised Great Britam's title to a part at least of the group in 1771. In 1880 the Argentine Republic established a settlement, which was destroyed by the Americans in 1831. In 1833 was destroyed by the Americans in 1931. In 1932, the islands were again taken possession of by the British for the protection of the seal-fisheries, and colonisted, being the most southerly organised colony of the British Empire On Dec. 8, 1924, a British squadron under Adm. Sir Doveton Sturdee defeated a German squadron (von Spee) off the Falkland Islands A memorial erected in the harbour of Port Stanley in commemoration of this victory was unveiled on Feb. 26, 1927. The climate is cold, the thermometer ranging in winter from 20° to 50°, and in summer from 40° to 65° Fahrenhelt. The islands are chiefly log-land, and have proved suitable. for sheep, 606,88a being carried in 1930; the output of wool is about four million lb annually The population is mainly British, and is principally engaged in sheep-farming. The chief pany engagen in sneep-narming. The chief exports are wool, tallow, hides and sheepskins; seal oil is also produced and exported. The only important settlement is Port Stanley, at the head of Port William, on the coast of Rast Falkland.

The government of the Falkland Islands is vested in a Governor, anded by an Executive Council of 3 official and x unofficial members, and a Legislative Council, of 4 official and x unofficial members.

CHIEF TOWN, Port Stanley. Population (1931).

Dependencies of the Falkland Islands.

The total area of land and sea included in the dependencies of the Falklands is over 3.000,000 square miles. South Georgie, an island Soo miles east-south-east of the Falkland Group, with an area of x,000 square miles, is the only part of the dependencies which is permanently habitable, there being a Resident Magistrate and other officials, and a permanent population (engaged in the whalling industry) at Grytviken Harbour. In the South Shellands, Deception Island contains a harbour at Port Foster, ice-free for about five months in the year, with a land

· Colony only

station which arrives and departs with the whaling fleet. The South Orkneys also have a seasonal land station, and the Argentine Government have, with the permission of H.M. Government, established a meteorological station, in connexion with a discovery that a cold winter in the Weddell Sea is a precursor of drought in the maize and cereal area of Argentina 3½ years later. The other dependencies, of which the principal units are the South Sandwich Islands, and a part of the Antarctic, or South Polar, continent known as Graham's Land, are even more inhospitable than those already named, being nearly covered with snow and ice and almost completely destitute of plant life. In spite, however, of the climatic and other disadvantages, the revenue derived from all the dependencies in 1930 amounted to £84,547. The local expenditure was £21,597, the surplus (after meeting administrative expenses at Port Stanley) being devoted to local research and development. The trade is considerable, the exports being valued at f = 7,76,775, and the imports at f = 4,99,829 in 1930. The whaling industry carried out from these dependencies is greater than that of the rest of the world combined Fifteen combanes (2 British +2 combined Fifteer companies (3 British, xa Norwegian) (aught 10,725 whales in the 1292-30 season, the landed value of the oil being £3,166,450.
In 1928 a claim was made by Norway to

Thomson and Boutet Islands in the Antai ctic and by Argentina to the South Orkneys; these claims were not admitted by the British Government, but Bouvet Island was ceded to Norway in

November, 1928, as an act of grace.

Port Stauley is distant about 8,130 miles; transit, 26 days from Liverpool Telegrams by cable and wireless telegraphy rid Monte Video and rid Bergen

FEDERATED MALAY STATES (See MALAYA).

FIJI.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about x, zoo inlies north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between x5° 45′-2x° x0′ S. lat. and x5° E-x78° W. long The gross area of the group is about 7,083 square miles. The islands are of volcame origin, with lofty mountains, and well wooded The principal are Vit Levu (Great Fiji) and Vanua Levu (Great Land) The chimate is equable and remarkably healthy for climate is equable and remarkably healthy for climate is equable and remarkably healthy for Europeans; the average temperature in the shade in the cool season is 7z°, rising to 8z° in the hot season, extremes hing between 6o° and 9z°. Vegetation is remarkably luxuriant, the chief products being bread-fruit, bananas, plantains, pea-nuts, yams, and dalo (taro), coco-nuts, sugar-cane, rice, maze, and cotton. The pincipal exports are sugar, copra-hannas. The principal exports are sugar, copra, bananas, trocas shell, molasses, malze, fresh fruit and vegetables, and beche-de-mer. The Governor is trocas shell, moiasses, maize, fresh fruit and vegetables, and beche-de-mer. The Governor is appointed by the Crown, and is assisted by an Executive Council consisting of 7 members. Laws are passed by a Legislative Council (of which the Governor is president) containing 13 nominated members, 6 European elected members, 3 native members, and 3 Indian elected members. Native administration is carried on through the

GAMBIA.

The West African river Gambia, which is navigable for some 200 miles from its mouth, was discovered by the Portuguese in 1447, and in 1583, they ear of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1628 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and, in honour of the new King, was named Fort James, but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1763 that the river was recognised, by the Treaty of Versailles, as British. The Colony had no regular political institutions until 1807, when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in

Mary, British Kombo, Albreda, the Ceded Mile, MacCarthy Island, and various other islands and territories on the banks of the river total area is estimated at 4,328 sq. miles. The population of the Island of St. Mary, at the Census of April 24, 1221, was 9,227, and that of the Protectorate 201,303. The climate is unhealthy during the rainy season, viz, from June to October; but during the rest of the year it is less unhealthy. The chief export is ground nuts, which form ninety-five per cent, of the total exports; they are sent chiefly to Marseilles, whore the oil is extracted and used for the same purpose as olive oil. Palm kernels, hides, and calabashes are also exported; and rice, cotton, malze, and a kind of millet called kous are produced in the countries bordering the Gambia, but not in sufficient quantities to meet local requirements. The chief imports are cotton goods, kola nuts, rice, soap, spirits, hardware, sugar, wine, and tobacco. A Company of the WAFF. (4 officers and zeo non-commissioned officers and men) is stationed in the Colony, and there is an armed police force in the settlement (numbering ros men), which performs both civil and military duties. There performs both civil and military duties are 4 Government wireless stations. The Government, which is that of a Crown Colony, is vested in a Governor, assisted by an Executive Council consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and a unofficial members, nominated

opposite coast of Africa. Gibraltar was captured opposite coast of Africa. Gibraitar was captured in 1704, during the war of the Spanish Succession, by a combined Dutch and English force, under Sir George Rooke, and ceded by the Treaty of Utrecht, 1713. Since that time it has remained continuously in possession of the British. Of the many attempts to retake it, the most celebrated the property december of the British of the continuously in the second state of the British of the many attempts to retake it, the most celebrated the property december of the British of the many attempts and the second state of the British of the many attempts and the second state of the British of was the great siege in 1779-83, when General Elliot, afterwards Lord Heathpeld, held it for 3 years and 7 months against a combined French and Spanish force. The town stands at the foot of the promontory on the N.W. side. Gibraltar is a free port, and enjoys the advantages of an extensive shipping trade, and is becoming a popular tourist centre. During the year 1930 4,000 vessels (including 6s tourist steamers) entered, with a total tonnage of 7,257,828. The chief sources of revenue are the port dues, the rent of the Crown estate in the town, and duties on wine, spirits, tobacco, beer, motor spirit and perfumery. There is an enclosed Admiralty harbour with an area of about 440 acres, containing three graving docks. The estimated civilian The Governor is in command of the garrison,

and is aided in the administration by an Evecutive Council of 7 members, there is no Legisla-

tive Council.

GOLD COAST.

The Gold Coast comprises a portion of the coast of the Gulf of Guinea from about 3° 7' W. to z° z4' E. of Greenwich. It is divided into three ready E. or Greenwich. It is divided into three parts:—Gold Coast Colony, 3,937 sq. miles; Ashanti, 24,379 sq. miles; and the Northern Territories, 30,486 sq. miles—a total area of 78,80s sq. miles. It extends along the coast line about 334 miles and inland to an average distance of 440 miles, or to the xro of N. latitude. It is bounded on the west and north by the Krouch colonies of the Lyoyr Cocet and Remoth It is bounded on the west and north by the French colonies of the Ivory Coast and French Sudau, and on the east by Togoland. The population (April 1931) was: Gold Coast Colony, 1.545,140. Abdanti, 583,866; Northern Terratories, 727,283; total, 2.845,289, excluding 3.23 Non-Africans. The natives are almost all Pagans, but there are many Muhammadans, and the number of Christians is steadily increasing. The trade in rece was principally with the

The trade in 1930 was principally with the United Kingdom (44 per cent.), U.S. (14), Germany (16), Netherlands (10) and France (3 per cent.), Gold is found in considerable quantities, and diamonds were discovered in 1919; there are also large deposits of high-grade manganese. The principal product is cocoa, more than half the world's supply being produced in the Colony. The principal exports in 1930 were: cocos, £6,970,38; gold and gold dust, £1,055,634; manganese £477,490; and diamonds, £658,994. The chief imports are apparel, building materials, cotton goods, provisions, kerosene, hardware, motor spirit, motor cars and motor forries, beer, ale, stout and poter, sugar and tobacco. The climate, generally, is hot and moist, but as becoming annually less unhealthy by the ald of medical science and samtation. The Government assists the missionaries in educational matters and has established many schools of its own, and a college and school at Achimota, 6 miles from Accra, have been built and opened. Great efforts are being made to improve the santary condition of the coast towns. Acera, Kuması, Sekondı (including Takoradi), Kofordina, Winneba and Tamale are lighted by electricity, and there are pipe-borne water supplies at Acers, Sekondi (including Takoradi), Cape Coast and Winneba; similar supplies are being installed for Kumasi and Tamale, 4.411 miles of telegraph land wire and 7,36 miles of telephone trunks have been established. Exchanges have been opened in the principal towns and are served by 2,840 miles of underground and overhead line wire. There is a wireless station at Tokoradi. A Government railway runs from Sckondi through Tarkwa, the centre of the gold-mining industry, to Kumasi and thence to Acera (362 miles), with bianches (590 miles in all). In 1928 a harbour was opened at Takoradi

The seat of government is Accra (population 59,895) Coast The other principal towns are: Cape Social (17,685), Ada (4,450), Elinina (4,797), Sekondi (16,742), Tarkwa (3,321), Keta (6,322), Avim (4,533), Kumasi (36,200), Saltpoud (6,366), Kofordua (19,634) and Winnebah (10,990). The government of the Colony is administered by a Governor, aided by a nominated Executive Council.

There is a Legislative Council of 15 official and 14 unofficial members, for the Colony, excluding Ashanti and the Northern Territories.

ASHANTI	
	f o. et I
Ashanti was placed under British property on Aug. 27, 1806. Under Orders in Co	ovection mucil of

Askantt was placed under Britain protection on Aug. 27, 1896. Under Orders in Council of Sept. 26, 1903, the country was definitely annexed by Great Britain, the Governor of the Gold Coast Colony being appointed Governor of the Askantt, though only some of the laws and ordinances of the Gold Coast Colony apply to the and bounded on the N. by the Shum Chun River, and bounded on the N. by the Shum Chun River.

annexed territory. The area is 24,379 square miles, with a population (census of 232) of 583,866 (Europeans 447). Kunnasi, the chief town, has about 56,000 inhabitants. In 1930 there were 1,307 children in the Government of the chief was a supplemental to the children of the chief was a supplemental to the children of the children in the chief was a supplemental to the children and the children in the children schools, and 3,928 in the mission schools; 54 students were in residence (1930-31) at the Agricultural and Forestry Training centre. Agricultural and Foresty Training contre-Police force (1930-31) 469; prosecutions (1980-30) 4,202, but there is little serious crime. There are 2,193 miles of motor roads. Agriculture is extending; large areas are under cacao, and coffee and cola are also cultivated. Local recepts (1930-31) 465,128 (exclusive of royal-ties); local expenditure (exclusing railway, costs and telegraphs) C-8. posts and telegraphs) £364,000. In 1393-31 the export of cacao was 66,721 tons, and the gold output £675,513 (129,019 oz.). In the western parts of the colony are rich forests of mishogany. cedar, &c., and trees yielding fruits, oil, rubber and gum copa!. Practically the whole of Ashauti is now connected by motor road with Kumasi and with the main trade notes to the north. The country is well watered, and with proper restraint it could contain inexhaustible supplies of valuable forest products. On the eastern side the forests are sparser, though timber and oil trees are common and game fairly plentiful; the products there are chiefly maize, yams, cocoyams, bananas, ground-nuts, and cacao, the plantations of which are rapidly extending. Chief Commissioner, H. S. Newlands £ 2,600 Deputy Chief Commissioner, E. A.T. Taylor 1,350 Promineral Commissioners :

NORTHERN TERRITORIES. In 1901 the Northern Territories lying to the north of the parallel of 8° N. lat., bounded on the west and north by the French possessions and on the east by Togoland, were placed under on the case by logonald, were placed under British protection. They are administered, under the Governor, by a Chief Commissioner with his headquarters at Tamale. By the census taken in 1931 the population was 717,365. The Muhammadans have substantial mosques; there is a Roman Catholic mission Government schools have be u established at Tamale, Gambaga, Salaga, and Wa. There are 3,020 miles of good permanent roads. The Northern Territories are capable of producing various agricultural crops (cereals, shea-butter, ground-nuts, indigo, tobacco), and are said to contain wide auriferous ai eas.

Chief Commissioner, Maj F.W.F. Jackson, C.M G., D.S O£1,600 Provincial Commissioners -

Southern Province (Tamale) A. C.

Accra is distant from Liverpool, 3,920 miles; transit, 14 to 30 days.

HONG KONG.

Hong Kong is an island about xx miles long and from a to 5 miles broad, with a total area of 3 square miles; it lies close to the mainland, bein separated at one point by a narrow strait (Lyee moon) not more than a quarter-mile wide, and was first occupied by Great Britain in January 1841, and was formally ceded by the Treaty of Nankin in 1842; British Koviloon was subsequently acquired by the Peking Convention of 1860; and the New Territories, being a peninsula in the southern part of the Kwangtung province by a lease signed June 9, 1898. The whole colony comprises an area of about 392 square miles with a population (Census, 1931) of 840,473 The non-Chinese residents, excluding naval and

military, numbered 19,369.

The capital the colony is Victoria, which lie along the nort can shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some square miles. With the exception of liquor tobacco and motor spirit the port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes o repair. There is a considerable ship repairing and construction industry. Shipping entered (1939) 23,593,090 tons; (1930) 21,095,306 tons. A rallway, of which 22/4 miles belong to the Government, runs from Kowloon to Canton the length north of the Shum Chun River (which is the houndary of the British territory) is controlled by the Chinese Government. Good road connect the principal districts with the railway

The island is broken in shape and mountainous the highest point being Victoria Peak, which is about 1.850 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The New Territories contain peaks from 1,800 to 3,000 feet. The hot season lasts from May to October. During the winter from May to October. During the winter months, from November to March, the climate months, from November to March, the climate is cooler, drier, and more uniquorating. The average daily maximum temperature ranges from 37° in July to 63° in February, and the average daily minimum temperature from 76° in July to 55° in February. The average annual rainfall is 36 in , of which no less than 75 per cent, falls between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly camphor, coal, cottons,

kinds of produce, chiefly camphor, coal, cottons, flour, gunnics, hides, in on and steel goods, leather matches, oils, rice, silks, sugar, tea and tin.

Much encouragement is given by the Government to education in the colony. In 1930 there were 1,048 schools subject to Government supervision, attended by 61,932 pupils. The University (opened in 1932) includes faculties of medicine, engineering, and arts.

Hong Kong is a Crown colony, and its government is administered by a Governor, aded by an

ment is administered by a Governor, aided by an Executive Council of 9 members, together with a Legislative Council of 18 members, including himself, a representative from the Chamber of Commerce, and a representative of the Justices of the Peace. There is also a Sanitary Board, partly elected, which controls certain sanitary measures.

THE ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. 54° 3′ -54° 25′ N. and long. 4° 28′ -4° 47′ W., nearly equidistant from England, Scotland, and Ireland. The total land area is 145,325 acres (227 SQ. miles), with a population (1931) of 49,338 (22,489 males, 26,849 females). In 1290 the births numbered 667 and the deaths 727. The cultivated area (1931) was 79,001 acres, and the live stock included 3,417 horses, 19,477 cattle, 91,153 sheep, and
4,172 pigs. In the 9th century a body of
malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western isles, and Man For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander 111 defeated the famous Haco, at the buttle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV seized on the Isle of Man, and in 1406 bestowed it on the Stanley family. In 1827 the Crown purchased it for the sum of £417,244

The land is 11ch in minerals, lead, iron, blende and slate, and exports large quantities of agricultural produce. Forty-seven miles of railway have been constructed, and about as miles of electric

tram road

Man is governed by a separate Legislature, called the Tynwald, consisting of two branches—the Governor and Council and the House of Keys. The Council consists of the Governor, the Bishop of Sodor and Man, the two Deemsters, the Attorney-General, a members appointed by the Governor, and 4 members appointed by the House of Keys. The House of Keys (possibly from the Scandinavian keine = chosen) is one of the most ancient legislative assemblies in the world. It consists of 24 members, elected by the male and female owners and occupiers of property, 16 from the six sheadings, 5 from Douglas, and reach from Castletown, Peel and Ramsey. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. and then sent for the Royal Assent. After re-ceiving the Royal Assent, a Bill does not become law unless promulgated within the ensuing twelve months, and on the first "Tynwald I ay" (July 5) following it is an-nounced in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys. An annual the speaker of the House of Reys. An annuar contribution of £10,000 is made to the Imperial Government. In 1921 Tynwald accepted lia bility for the redemption of £250,000 War Stock as a contribution to the Imperial Government towards the cost of the Great War. In roar liability for a further sum of £500,000 of War Stock was accepted in final settlement of all responsibility to the Imperial Government in respect of the cost of the Great War.

JAMAICA. (See BRITISH WEST INDIES.)

KENYA.

Kenya Colony and the Kenya Protectorate are situated in Eastern Equatorial Africa. The eastern boundary has been settled by agreement with Italy, to whom the Province of Jubaland

(35,812 sq. miles) was ceded by treaty in 1225; and on the north by an agreement with Abyssinia in 1208. On the west the Colony adjoins Order in Council in 1926 to include in Kenya an area on the west of Lake Rudolph and north of the River Turkwel, stretching from Mt. Elgon to Mt. Zuha (on the boundary of the Sudan). which was formerly part of the Ugauda Pro-tectoate On the south Kenya adjoins the mandated Tanganyka Territory The population of the Colony is estimated at 3,035,084 (Europeans 16,84z, Indians 39,594, Goans 3,959, Arabs 12,16z, Africans 2,951,196, and others 1,331). The area is 224,960 square miles.

A great pottion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural The Colony is divided for administrative purposes into 9 picvinees, which are subdivided into districts.

The districts most suitable for settlement by Europeans are those of Kyambu, North Nyeri, Lankipa, Nakuru, Naivasha, Kericho, Uashi Gishu, and Trans-Nzom. There is also a considerable region still undeveloped

Kenya Protectorate also includes the Witu

mouth of the river Tana.

The telegraph and telephone systems of Kenya have x2,480 miles of wire Telegraph lines con-nect Mombasa with Lamu and Witu, Mombasa with Gazi and Tanganyika Border along the coast and inland between Mombasa and Entebbe, coast and minator even in sommass and Enterope, the capital of the Uganda Protectorate. There are also extensions to Kahe, Lake Magadi, Machakos, Nyeri, Nanyuki, Meru, Isiolo, Narok, Rumuruti, Kericho, Chemagel, Songhor, Eldama Ravine, Lake Solai, Eldoret, Kitale, Endebess, Kimmi and Moiben. Communication between Mombasa and ships at sea, Italian Somaliland and with Zanzibai (for Government traffic only) is maintained by radio-telegraphy A short-wave wireless station (owned and maintained under licence from Government) is established at Narrobi and provides communication between the Colony and Protectorate and Great Britain. Telephone communication exists in the majority of the settled areas of the Colony. The Kenya and Uganda railways and harbours are Stateowned, the railway, which is metre gauge, has a total route mileage of open lines of x,625 miles, made up as follows—Mam Line (Mombasa—Kampala) 884 miles; Prancipal Lines—Nakuru Junction—Kisumu (x22 miles), Tororo-Soroti (x00 miles), Voi—Kahe Junction (or miles), Kinor and Branch Lines, Rongan—Lake Solai (26), Kisumu—Butere (43), Leseru—Kitale (40), Mbulamiti—Narnasagali (x8), Kampala—Port Bell (6), Giligli—Thomson's Falls (40), Marrobi—Nanyuki (x45) The Konza—Lake Magadi Line or miles) is worked but not owned by Govern owned, the railway, which is metre gauge, has a (at miles) is worked but not owned by Govern ment. In addition, the Administration operates a manne service on lakes Victoria, Kioga and Albert, and on the River Nile, with a route mileage of 3.676 miles.

The principal imports are cotton piece goods and manufactures, textiles and textile manufactures motor cars, parts and accessories, motor spirit, eigarettes, ergars and tobacco, cutlery, hardware, instruments and implements china and glass ware; motor lorries, parts and accessories, industrial machinery, and wearing The principal exports are coffee, raw apparel.

LEEWARD ISLANDS. (See BRITISH WEST INDIKS.) MALAYA.

The whole of the Malay Peniusula, from the southern boundary of Siam to the Strait of Sinsouthern boundary of Siam to the Strait or Singapore, is within the British sphere, the administrative groups being the Straits Settlements, the Federated Malay States, and the Protected States of Johore, Kedah, Kelantan, Trengganu and Perius. The total area is 50,500 Sq. miles (S.S. 1530, F.M.S. 17,430, other 23,040, and the total population of BRITISH MALAYA (1931) was 4,381,342 (as compared with 3,328,634 in 1921).
Of the 1931 total, 2,56,645 were males and 1,785,297 females, the disparity being principally due to the large number of Chinese male immigrants. The total European population at the Census of 1931 was 17,767.

The Settlements forming what is known as the Colony of the Straits Settlements consist of the island of Sugapore (with its dependencies, meluding the Cocos or Keeling Island and Christmas Island), Pensang (including Province Wellesley and the Dindlugs), Mislacca, and Labuan. These Settlements have an entire area of about 1,535 square miles, with an estimated

population (1931) of 1,113,992.
The Government consists of a Governor, assisted by an Executive Council of zz members, and a Legislative Council of 13 official and 13 unofficial members, appointed by the Crown. the unofficial members is are nominated by the Crown and a are selected by the Chambers of Commerce at Singapore and Penang. The law of the colony is the common and statute law of England as it was in 1826, qualified by local ordinances The Supreme Court consists of the Chief Justice and 3 pulsue judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement district courts with limited civil and criminal juris-diction, and the usual police magistrates and coroners' courts. An ordinance passed in 1931 provided for the establishment of a Court of 1,000

Criminal Appeal.

The climate of the colony is almost uniform throughout the year, and foliage is perennial.

There is railway communication from Singapore, across the Straits of Johore, to Bangkok, vid Penaug (West Coast) or Kelantan (East Coast.

The principal imports in 1930 were areca nuts oigarettes, coal, copra, cotton piece-goods, fish (dried and salted), machinery, milk (condensed and sterilized), rubber, pepper, petroleum, lubricating oil, rattans, rice, sago, sarongs, sugar and tin ore. The principal exports in 1930 were areas nuts, petroleum, indricating oil, copra, cotton prece-goods, eigarettes, fish (dried and salted) milk (condensed and sterilized), pepper, preserved pineapples, rice, rattaus, rubber, sago,

sarongs, sugar and tin.

SINGAPORE is an island situated off the southern
extremity of the Malay Peninsula, from which
extremity of the Malay Peninsula, from which it is separated by a narrow strait about three- quarters of a mile in width; its length is about
quarters of a mile in width; its length is about
27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 225 square
miles, and a population (xexx) of \$47.8ex. It
was first occurried in 1810, and formally ceded
to the British Government by the Sultan of Johore in 1824. The seat of government for all
the settlements is the town of Singapore,
situated on the south side of the island in lat.

r° 17' N. and long. 103° 50' E., with 445,778 inhabitants in 1931. The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year.

The number of merchant vessels entered and cleared in 1930, exclusive of native craft, was 18.242, with a tonnage of 31,829,102. The total for the whole colony was 27,889, with a tonnage of 46,588,856. The total native craft entered and 49,588,89. The total native craft entered and cleared at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 53,608 (tonnage, 1,942,704). The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the vessels trading between Europe or India and the Far East. Australia, and Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Govern-ment in 1905 at a cost (fixed by arbitration) of \$39,000,000 (£3,300,000). The King's Dock (opened in 1913) is the largest east of Suez, being 879 feet long, 100 feet wide, and 34 feet deep; its cost was \$3,500,000. Singapore is a free port; no duties are levied, but excise is collected upon the release for consumption of opium, tobacco, spirits, wines, malt liquors, and petroleum.

Labuan is an island of the Malayan Archi-pelago, situated about 6 miles off the north-west coast of Borneo, in go x6' N. lat. and x55" x5" Coast of Forneo, in 5 w N. ist. and 135 % L long. Its area is about 18 square miles and its population is 7.538 (1931). It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time unimabited and was incorporated in the three dimensioned and was morporated in the Straits Settlement in 1922. The island has a good halbour. The principal export is sago. Victoria Harbour. in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Ex-tension Telegraph Company on the island.

Resident, C. P. Smith, M. C. S.

The Cocos-Keeling Islands are a group of about 200 small islands about 700 miles southwest of Sumatra, and form part of the Settlement of Sungapore. The population is 7,248, and the islands export about 800 tons of copra.

There is a station of the Eastern Extension Telegraph Company on Direction Island.

Christmas Island, in the Indian Ocean, 222 miles S. of Java, and 529 miles E. of the Cocos-Keeling Islands, has an area of about 6s square miles and a population of 1,059 (1931). A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company,

The amount exported in 1930 was 119,933 tons

Penang is the northernmost of the Settlements It includes Penang or Prince of Wales's Island (pop. 1931, 198,788). on the eastern side of which is Georgetown, the port and capital, of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (pop. 1931, 160,969), and the territory of Dindings, west of Perak. Penang Island, about 12 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 42' N, long 100° 12' E, and was ceded to the Government of India in 1986 by the Raja of the neighbouring territory, kédah. Area, 121 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporism for all the trade of the northern and more properous parts of Sumatra and the Malay Peninsula. o Including \$19,000,000 from Currency Guarantee Fund. perous parts of Sumatra and the Malay Peninsula.

Province Wellesley is a strip of coast about 45 miles in length with an area of see square miles, ceded by the Raja of Kêdah in 1800, with some land S. of the Krian River acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, spices, tapioca, rubber, and coconut plantations.

The Dinntaions.

The Dinntaions Territory, ceded by the State of Perak in 1874 (area 183 square miles, pop. 1921, 195, 195) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lunut, where a District Officer is stationed, and steamers call regularly at Pangkor and Lunut. The territory comprises a group of islands (of which Pangkor is the largest), and a strip of the mainland on the west coast of the peninsula, cut out of the State of Përak, and measuring altout 2s miles long by about 10 miles measuring about as miles long by about 10 miles in width.

Malacca, the largest of the Settlemeuts, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N. W. of Singapore, comprises an area of about 637 square miles It is one of the oldest European settlements in the East, having been European settlements in the East, having been captured by the Portuguese in *zsr*, and held by them till *z64*, when the Dutch drove them out. In *z95* it was captured by the British, and retained till *z8**, when it was restored to the Dutch; it finally became a British possession. In pursuance of the treaty with the Netherlands, March *z7*, *z8**, being exchanged for the British settlement of Bencoolen in Sumatra. The population in *zar** was *z6**.66** Sumatra. The population in 1931 was 186,694.
SINGAPORE, the capital of the Strauts Settle-

ments, is distant from London 8,700 miles; transit, as days. Penang, so days; and Malacca, a3 days.

(a) THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Pennsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Schingor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a Chief Secretary to Government, with Residents in each State, subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements. The total area of the Fede-Straits settlements. The total area of the Federation is 27,648 square miles, with a population in 1921 of 1,324,890. The principal towns are Kuala Lumpur (Sel.), pop. 80,444; I poh (Pk.), 25,135; Seremban (N.S.), 17,272; Klaing (Pk.), 12,355; Seremban (N.S.), 17,272; Klaing (Sel.), 12,655; and Teluk Anson (Pk.), 10,859. The first three States are on the west coast, and extend from the border of Province Wellesley to that of the high product States (Libora, Palyanova).

that of the independent State of Johore. Paliang is on the east coast. All are governed by their native rulers under the above-mentioned

control

There are x,080 route miles of iailway, practically all of which have been constructed from revenue. This mileage includes the Johore State Railway (zaz miles), which is leased from the Johore Government. The line is of metre gauge throughout, and extends from Singapore (in the South) to Padang Besar (on the Siamese frontier), where

it is connected with the Royal State Railways of Siam, affording direct communication with Bangkok. The journey between Singapore and Penang occupies 23 hours, and that between Prai (Penang) and Bangkok 25 hours (compared with a sea journey of 6 days). The railway runs direct between Singapore Island and the mainland, crossing the Straits of Johore by a causeway. At Gemas there is a branch from the way. At Genius there is a Grandi from the main Singapore-Penang line running northwards through Negri Sembilau, Pahang and Kelantan as far as Tumpat. At Sungei Golok this line is connected with the Royal State Railways of Siam. There are 2,780 miles of metalled roads, 156 miles of unmetalled roads, and 1,850 miles of bridle-paths, while the principal rivers are navigable for small boats

The Federated Malay States contribute largely to the supply of raw materials of the British Empire, and although production of plantation rubber and tin predominates, figures given below show that other products are produced and exported in large quantities. Gold has always been found in small quantities, chiefly in Pahang, and about haif a million tons of coal are annually mined in Selangor and used locally. While with the growth of the rubber industry there has been a tendency to neglect some of the older agricultural products, such as indigo, coffee, sugar, pepper, nutniegs and other spices, it has been proved that large areas in the Federated Malay States are suitable for the cultivation of the oil palm, and 19,000 acres have already been planted and nearly 30,000 acres alienated for this cultivation.

Principal exports from the Federated Malay

Climatic conditions show little variation, and though the days are sometimes oppressive, owing to the high humidity, the nights are generally cool. The mean maximum shade temperature is about 90° F. inland, and rather lower on the coasts, while the mean maximum is about 72° F., inland and a little higher on the coasts. The average and a little higher on the coasts. yearly rainfall varies from 65 inches at the driest places to 165 inches at the wettest. Although there are no clearly defined wet and dry seasons, there are well-marked seasonal variations in the rainfall. At inland stations and along the West Coast the months of January, Reformery, June, July and August having at inland stations considerably less rainfall than the remaining months; along the East coast the middle of the year is usually dry, while from November to March is a period of heavy and persistent rain.

The States are policed by a mixed force of Indians and Malays, officered by Europeans.

Regent, H.H. Tunku Ibrahim, C.M.G., C.V.O. British Adviser, J. W. Hall, M.C.S. (acting)

PERLIS, the most northerly State, is on the yest coast of the Malay Peninsula. The area is west coast of the Malay Peninsula. The area is about 316 sq. miles, and the population is about 45,000, of whom 40,000 are Malays. The capital is Kangar, a few miles up the Perlis River, but

584,085 573,738 Raja, H.H. Tuan Syed Alwi, C.B.E., C.M.G. British Adviser, M. C. Hay.

Kellantan lies between 4° 35′ – 6° 75′ N. and 102° 23′ – 10° 37′ E. on the east coast of the peninsula, with a total length of about 215 miles and a breadth of 60 miles. The total area is 5,723 square miles; population (1932 Census) 362,622. The northern portion is flat and fertile, producing rice, coco-nut and betel-nut and affording pasturage for large quantities of live-stock. Agriculture, fishing, and the production and weaving of slik are the principal industries. The southern and larger the principal industries. The southern and larger portion is in parts mountainous, but a railway is being constructed through the flatter part and good land will thus be made accessible for planting. Tin and gold are found. The capital, Kota Bharu, 6 miles from the mouth of the Kelantan River, has a population of x5,490. Kuala Krai is the headquarters of the Southern Administrative District, and Pasir Putch of the Eastern.

an area of 91% square miles. The colony includes also the adjoining island of Gozo, with an area of a4% square miles; COMINO—the site of the Suttan's disaster in 1889 and several islets. The civil population of the whole group, on April 2013; was 241,681. In religion the Maitese are Roman Catholics. The lower orders are mainly Pruise in rose. The Maitese language which is Roman Cathorics. The lower orders are maning Punic in race. The Maltese language, which is generally spoken by all classes, is of Semitic origin, and is held by some to be derived from the Carthaginian and the Phemician tongues There is a Maltese order of nobility, recognised by the Crown, consisting of so families.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its com-merce was destroyed, and it was used mainly as a base for piratical expeditions. In roop it was again brought under Christian rule, being conagain brought under Christian rule, being con-quered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1230 handed over to the Knights of 8t. John, who made of it a stronghold of Christianity. In 1255 it sustained the famous slege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many mag-nificent works, until they were expelled by nificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814.

of 1814.

The climate, although not tropical, is very hot in summer. The mean temperature for the summer months in 1920 (June, July, August and September) was 817°. In winter the mean temperature was 513°. The islands are highly cultivated. The chief products are corn, orange than the country of the state of the country of the state of the chief products are corn, orange of the state of the chief products are corn, orange of the state of the chief products are corn, orange of the state of the chief products are corn, orange of the state of the state of the chief products are corn, orange of the state of the chief products are corn, orange of the state of the s melons, grapes, forage, cummin seed, onlons, and potatoes; figs and honey are plentiful. The principal occupation of the people is in con-nexion with shipping

Citta Vecchia, the former capital of the island Città veccona, the former capital or the islants, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to 93z, but its suburh, Rabat, has 9,050 inhabitants. Citta Veccha has been entirely cellpaed in importance by the modern capital of Valletta, which was founded in 1566. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockvard, Malta being the headquarters of the Mediterranean Fleet.

Malta possesses a University and Lyceum; 89 elementary and infant schools, 6 central schools, a secondary schools, and 60 night schools; in addition there are garuson schools, a Dockyard school, and 49 private schools of which 15 receive grants-in-aid from the Government. Under the Constitution of 1921 the Legislature

malta, and slout rate from the African coast, about rate for and along the Legislature Assembly.

Malta, an island in the Mediterranean Sea, 58 miles from Sicily and about rate from the African coast, about rate from the African coast, about rate from the Council of the Senate is composed of rate for the Council and a Legislature Assembly. The Senate is composed of rate for the Council and a Legislature Assembly. The Senate is composed of rate for the Council and a Legislature

other 7 being elected by a special electorate.
The Legislative Assembly consists of 32, returned
by 8 electoral districts, each represented by
4 members. The method of voting is that of
Proportional Representation under the system
of the single transferable vote. The Governor is
assisted by two Councils—an Executive Council
consisting of such of the Ministers as he selects
and a Nominated Council consisting of the
Lieutenant-Governor, the Legal Adviser and
three officers chosen from the Navy, Army and
Air Force. The Governor may summon these two
Councils to sit together as the Privy Council of
Malta. When any legislative or administrative act
is done which, in the Governor's opinion, affects a
reserved matter, he may submit the consideration
of it to a Joint Committee consisting of three
members of the Nommated Council appointed
by himself and three members of the Executive
Council appointed by the Head of the Ministry
The Constitution was temporarily suspended by
an Order in Council (June 26, 1930) which em-
powers the Governor to make laws for the peace,
order and good government of Malta.
In 1930 the Port of Valletta was entered by

s,201 vessels (tonnage, 3,561,513)

MAURITIUS.

Manritius is an island lying in the Indian Ocean. 550 miles east of Madaguscur, between 57° 17'-57' 46' E. long, and S. lat. 19' 58'-20' 33', and commising an area of 720 square miles. The 557 46 E. long, and S. act. 19 56 -26 33; and comprising an area of 720 square miles. The permanent population at the Census of 1931 was 393,478, made up of Indians, Europeans (mainly French), and natives of mixed descent.

Mauritius was discovered between the years

, 1507 and 1528 by the Portuguese, but they never formed any settlement on it. The Dutch visited it for hed any settlement on n. The Ducch visites in 1258, and named it Mauritius, in honour of the Stadiholder, Prince Maurice of Nassau. In 1544 they established a small colony on the shore, but in 1750 they abandoned the island, and in 1755 the French took possession of it and changed the name to lie de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved British rule when the ancient name, Mauritius, was restored.

Of the total cultivated area of 171,075 acres, 700 136,875 are under sugar, 20,000 under fibre, and 14,200 under other crops; the necessaries of life have all to be imported from abroad. Rice and grain are obtained from India, flour from Australia and India, oxen from Madagascar, 600 and minor imports from South Africa and else-

where. 70 per cent trade of the island is with Great Britain and British Dominions. Being just within the tropics it has a hot climate, but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is districts, it is not unhealthy subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe; a cyclone lasted from March 5 to 7, 1930, and did considerable damage to sugar plantations and buildings.

There is an excellent harbon and thindings.

There is an excellent harbon on the N.W. coast, on which the capital, Port Louis, stands, and the annual trade of the island passes entirely through Port Louis. The shipping entered and cleared, in 1930, amounted to 1,009,212 tons In. 232 there were 244 miles of railway (220 of 4 ft. 8)/2 m. gauge and 24 of 2 ft 6 in), 59 post-offices, 49 telegraph offices and to telephone offices in the island, with 545 miles of telegraph, m-cluding block telegraph for the railway, and 150 miles of the control of the con miles telephone wires (Government).

The Government is administered by a Governor, added by an Executive Council of four official members, and of such other persons in the service of the Government as the Governor, through instructions of the Secretary of State, may from time to time appoint, and a Legislative Council of 27 members, eight being ex-oficea, nine nominated by the Governor, and xo elected by a moderate franchise Port Louis has two members,

and each of the country districts one
The inhabitants of European descent are
mostly Roman Catholic. Education has two
branches—(1) Suprrior or Secondary Instruction, to which is attached the Government Royal College and the Associated Schools; (2) Primary Instruction, consisting of the Government schools and the grant-in-aid schools. The estimated expenditure on education for 1931-32 is

Rs 1,424,674.

DEPENDENCIES OF MAURITIUS.

(x) RODRIGUES, 350 miles almost due east of Mauritius. Population (Ceusus 1921), 6,584. Area, 40 square miles. Cattle, beans, salt fish, and goats are the principal exports. The island is under the administration of a magistrate from Mauritius, who takes his orders from the Governor of Mauritius.

Magistrate, R. Brouard (acting) Rs. 9,000 to x2,000 (2) OTHER DEPENDENCIES Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to inquire into the condition of the labourers, and settle any disputes which may be referred to them The chief product is coco-nut oil The most important is Diego Gaicia (pop 1921, 445), one of the Chagos Archipelago, which hes on the direct route from the Red Sea to Australia, and possesses a good harbout. The total population of the "Other Dependencies" (1921) is 1,365.

Transit from London to Mauritius, 30 to 35 days.

NIGERIA.

The Colony and Protectorate of Nigeria includes the territories situated on the Bight of Benin, between Dahomey on the west and the Kameruns on the east The Protectorate (Head-quarters, Lagos) is in two main divisions, the Northern Provinces and the Southern Provinces, of which the northern group coincides with the former Protectorate of Northern Nigeria, and the southern group with the former Protectorate of Southern Nigeria. The area of the whole territory (including the mandated area of the Cameroons) is about 372,84x sq miles, and the

population is 18,765,790.

By Order in Council of Nov 1922 (amended 1928) there is a Legislative Council for the Colony and the Southern Provinces of the Protectorate Legislative Council consists of the Governor as President, 27 official members, 3 nominated President, 27 official memoria, 3 manuscondificial members representing the municipal area of Lagos (Dr. C. C. Adeniyi Jones, Eric O Moore, and T. A. Doherty), alcalad member representing Calabar (C. W. z elected member representing Calabar (C Clinton) and x4 nominated unofficial members. The Governor continues to legislate for the Northern Provinces

The chief industry is agriculture, and crops consist of cotton, cocoa, ground-nuts, kola-nuts, maize, guinca-corn, millet, nice, coffee, yams, cassava, and tobacco The export trade relies mainly upon certain staple articles of great value, principally palm oil and kernels, ground nuts, cocoa. cotton lint. and tin The Udi coalfields cocoa, cotton lint, and tin The Uni coalifelds are of great extent and the coal is of excellent quality. A milway is in operation comprising (a) a Western line from Lagos to Kano (704)2 miles), crossing the Niger by bridge at Jebba, with branches from Muna to Baro (III miles), and from Zaria to the Bauchi tin fields (Jos) (133 miles, light railway); and from Zaria to Kaura Namoda (137 miles), and from Ifo to Idogo (27 miles). An extension of the main line beyond Kano was opened as far as haln line beyond kano was opened as har as. Ringum (45 miles) in 1929 and completed and opened to N'Guru (a further 100 miles) in 1930.

(2) an Eastern line (559 miles) from Port Harcount to Kaduna on the Western Railway, crossing the Benne by train ferry at Makurdi with a branch line connecting from Kafanchan 28,000 junction (mile 4581/4) with the tinfields (Jos)

20,250 15,000 24,000 6a½ miles. Centres of trude are Lagos, Abeokuta, Ibadau, Oshogbo, Illorin, Zarra, Kano, Ontsha, Lokoja, Warri, Bonuny, Sapele, Calabar, Opobo, Furcados, and Port Harcourt

roceaos, and for inarcount
The principal imports (1930) were cotton
goods (£3.045,144), provisions, spirits, haidware,
cutlery, cycles, kerosene, tobacco, building
material, soap, motor-cars and lorines, motor
spirit, cement and bags and sacks; the principal
exports were palm kernels (£3.059,166), palm
oil (£3.350,443), tin ore (£1.373,466), cucoa
(£1.756,400), ground intis (£3.755,756), hales and
skins (£\$4,4822) and cotton lint (£63.553). The
total imports from the British Empire were

NYASALAND PROTECTORATE.

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the western shore of Lake Nyasa and the country southwards nearly to the Zambesi. The population of the Protectorate (Dec. 21, 1930) was 1,395,448, including 1,905 Europeans and 1,599 Asiatics, and it has a total land area of 37,890 square miles. The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable, tea, cotton, fibre and rubber are also exported in fair quantities. The principal imports are soft goods provisions, and hardware.

land area of 37,895 square lines. The principal exports are tobacco, cotton, chillies, coffee, ground-nuts, fibre, and tea. The cultivation and export of tobacco is considerable, tea, cotton, fibre and rubber are also exported in fair quantities. The principal imports are soft gos ds, provisions, and hardware. On Lake Nyasa there are three steamers. A railway from Port Herald (the "inland port" of the Protectorate) to Biantyre (xiz miles) is open for traffic. An extension from Port Herald to Chindro (the terminus of the Central Africa Railway) on the Zambesi Railway, from Beira to Munaca (on the southern bank of the Zumbes Rwei) was opened in April, xgaz; the terminus is opposite to Chindro, and the line (xyx inless thus establishes direct railway communication between Bena and Blantyre. A further extension to Lake Nyasa is under construction. Main roads and "carrier" noads are open all over the Protectorate, the total mileage being 3,500. A food from Salisbury to Blantyre via Tete (Portuguese E. Africa) is open for light cars and is irrely used during the dry season.

Mails to and from England are despatched every week ma Cape Town and Beira. Between Berra and Europe the means of communication are the Union-Castle Mail 8.8. Co., Messrs, Rennic's Line van Natal, the British India Steam Navigation Co., and other lines. The Protectorate is connected by telegraph overland with the Cape vid Salisbury. The telegraph lines evtend northwards as far as Tukuyu, in Tanganyika

The chief towns are Blantyie (population about 600 Europeans and 7,000 natives), Limbe (near Blantyre), and Zonba, the headquarters of the

 Government.

Pop., 37 Europeans, chiefty in connexion with Pacific cable station, and 399 Gilbert Islanders in copra industry. The islands were included in the Gilbert and Ellice Colony by an Order in Council of Jan. s7, 1916, and Christmas Island was included in roro. Resident Commissioner, A. F Gumble, C.M.G.

M.A. (and £ 100 allowances) £800 to £1,000 (3) The Tonga or Friendly Islands.—A protectorate over the Tonga Islands Kingdom was proclaimed May 18, 1900. These islands are situated in the Southern Pacific to the E.B.E. of Fiji, and 300 miles therefrom, with an area of 385 square miles, and an estimated population 385 square miles, and an estimated population (1930) of 486 Europeans, 350 half-castes, 38,431 longans, and 350 others—total 39,67x. The limits of the group are between x5 and x3° 30'S and x37'W. Nukualofa, on the Island of Tongatabu, is the seat of government. The present Queen Salote succeeded the late King George Tubou II m x918. Soil generally is fertile; the principal export is copra. Two of the smaller islands disappeared, owing to a tidal ways in lune axes. Vaccoust 25 for few wave, in June, 1919. Revenue 1930-31, £71,572, expenditure, £78,560; imports (1930), £148,360; exports, £169,610. The total shipping entered and cleared in 1930 was 163,623 tous.

Agent and Consul, J. S. Neill, B.A., B.L. £800 to £1,000 (and duty allowance £200) £1,000 (and duty allowance £200)
£1,000 (and duty allowance £200)
£1,000 (McKean, Gardner
Binne, Hugher & Barnet, Hugher
Bidney), between \$2 30' and 40 30' 8 and 171°
and 174' W.

(5) Piteairn Island, situate in lat 25° 3′ 30″ S, long. 230° 8′ 30″ W. Pop. (2027), 193, descendants of the mutmeers of H.M.S. Bounty. Arrowroot is manufactured and exported. Chief Magistrate, Richard Edgar Christian.

(6) The New Hebrides Group, about 500 miles west of Fiji and 250 miles north-east of New Caledonia, is under the administration of British and French officials as provided for by an Anglo-French Convention of 2505 and a protocol of 2514. The p-pulation is estimated at 56,564 (British Nationals 257, Foreigners 30, Asiatics and Protected French Subjects 5,520, Natives, 20,000). Principal products, copra, coffee, cottou, cocoa, maize, wool, annalwood and shell. Josht revenue, 1920, £20,152; expenditure, £28,240. Total imports, 1920, £157,541; total exports, £25,520. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia; there is a two-monthly service with France, vid Fanama. (6) The New Hebrides Group, about 500 miles monthly service with France, vid Panama. British High Commissioner, Sir A. G. M.

British High Communication, our A. G. M. Wilstein, R.C.M.G., O. B.R. French High Commissioner, M. Guyon. British Resident Commissioner, G. A. Joy. (Allowances Leco) Laco to Li,000 French Resident Com., M. Carlotti.

President of Joint Court, Count de Buena

Esperanza, K.C.N.G.
British Judge, P. C. Hubbard (acting).
French Judge, M. Sachon.

(7) There are also a large number of scattered groups and isolated islands.

PALESTINE

PALSETIAES.

Palestine, extending from the Mediterranean on W. to an eastern boundary formed by the W. M. to an eastern boundary formed by the Great from the Keyptian frontier on S. to the French Mandatory Sphere of the Great Lebangon on N. includes in addition. Lebanon on N, includes, in addition, a large area E of the Jordan and S. of the Yarmuk.

Palestine is under British administration since the conquest of the country by the forces of General Alleuby in 1918. The Administration is conducted under a Mandate from the League of Nations which entered officially into force on Sept. 29, 1923. The country consists of a W maritime lowland, the mountain region of Judea (which forms the backhone of the district) and, (which forms the backhone of the district) and, on the E., the depression through which the Jordan wends its way from the Nea of Galilee (Tiberias) to the Dead Sea. The Dead Sea, r., sag feet below the level of the Mediterranean, is 46 miles tong and has an average width of 8½ miles; treceives the waters of the Jordan and of six other rivers, and has no outlet, the surplus being carried off by evaporation. Its unterest indused self-and has a smooth gravity water is intensely salt and has a specific gravity one-sixth greater than water, with 24 per cent. of salt. (The Great Salt Lake of Utah, U.S.A., is so miles long and 30 miles wide, at 4,sas feet above mean sea-level, and contains 25 per cent. of salt.) The area of Palestine W. of the Jordan of salt.) The area of Palestine W. of the Jordan is about 9,000 square miles, with a population (census Oct. 23, 1922), of 757,182, of whom 590,850 are Muhammadans, 73,044 Christians, 83,794 Jews, and 9,474 members of other faiths. The estimated population on July 1, 1929, was \$86,054, not including Beduin, who are about 103,000 in number. The 1929 estimate includes 80,225 Christians, 572,443 Moslems, 154,330 Jews and 9,066 others. Since 1929 about 60,000 immigrants (mostly Jews) have settled in the country; in 1929 the Jewish immigrants came principally from Poland (25 per cent.), Russia (20 per cent.) Rumania (6 per cent.) Russia (20 per cent.) Rumania (6 per cent.) and 571 children) entered Palestine as immigrants; in the same period, 5,072 emigrated from Palestine, the same period, 5,07x emigrated from Palestine, the net increase thus being 2,358.

Palestine is divided into a administrative districts, under District Commissioners, and the districts, under District Commissioners, and the Jerusalem Division under a Deputy District Commissioner. English, Anabic and Hebrew are the official languages of the country. The chief town, Jerusalem, had been in Moslem hands since xx44, and under Turkish rule since xx527, until it surrondered to deneral Allemby on bec. 9, xxx7, to be entered the next day by British troops. The city, which occupies so prominent a place in the affections of the Jewish, Christian and Muhammadan peoples, had a population in Oct. xxxx, of 6a, xx8. The Church of the Holy Sepulchre at Jerusalem is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic churches. The site of Solomon's Temple is occupied by the Dome of the Rock, sometimes erroneously called the Mosque of Omar, which contains a relic of Mahomet and the "Holy Rock," the sacisficial alter of Abraham Rock," the sacrificial altar of Abraham conflict of claims, Jewish and Arab, as to rights at the Wauling Wall of the Haram al-Sharif at Jorusalem has provided opportunities for disorder, and the Government submitted proposals to the Council of the League of Nations for a Asst. Chief Secretary, Mark Attchison Young, C.M.G. to the Council of the League of Nations for a Asst. Chief Secretary, E. Mills, O.B.E.

Commission to define and determine the rights and claims. In Jan., 1930, the Council appointed and claims. In Jan., 1930, the Council appointed a Commission, as requested by the British Government. Bethlehem, the scene of Christ's Nativity, is 5 miles S. of Jerusalem. The Church of the Nativity, at the E end of the present village, is reputed to be the oldest Christian church in existence. King David was also born in Bethlehem. Nazareth, about 25 miles S.W. of the Sea of Galilee, had a population of 7,424 or the Sea or camee, mad a population or 7,424 in x925. Other large towns are Jaffa (47,709), Tel-Aviv (40,000), Gaza (17,480), Acre (6,420), and Halfa (24,634). An archaeological museum, constructed, equipped and endowed at the cost of Mr. John D. Rockefeller, Jr., is in course of erection at Jerusalem.

The railway system of Palestine consists of five sections: Rafa-Haifa, continuing southward to Kautana to join up with the railways of Egypt, passengers and freight being transported across the Suez Canal at Kantara; Haya-Acre-Samakh, continuing beyond Samakh to Damascus in the French mandated territory of Syria;

Jaffa-Ludda-Jerusalem: and Nablus-Afule-Jaffa-Lydda-Jerusalem; and Nablus-Afule-Tulkarem. The main junction of the Government Railways is at Lydda, the general offices being at Haifs. In 1930 the kilometrage operated (excluding 123 kilometres Ma'an-Mudawara section) was 1,124 kilometres, the freight handled amounting to 569,385 tons, and the passengers carried numbering 1,329,475. The gross railway revenue was £P655,143 and the working expenses

£P586,035
The chief ports are Jaffa, Haifa and Acre.
Harbour construction at Haifa was begin in the second of the 1929 and is now in progress. In 1939, 2,663 vessels (1,975,833 tons) engaged in foreign trade entered the parts, and 2,672 (1,999,438 tons) cleared. There are branches of Barclay's Bank, Anglo-Palestine, Banco di Roma, and Imperial Ottoman Bank in the main towns.

Although economic conditions are still primitive, modern methods are making headway, and there are good prospects of development and progress. The country is generally fertile, and progress. The country is generally fertile, and cereals, wine, olives and various fruits are produced, while sheep and goats thrive in the lowlands, and in the mountains in time of drought. In 1938-29 there were asy Government schools with 19,449 pupils, 152 Christian schools with 19,449 pupils, 152 Christian schools with 19,739 pupils. There are also training colleges for teachers, technical, trade and agricultural schools, and a Hebrew University (with faculties of Humanutes and Science), which draws about half its students from Palestine and the remainder from Palestine and the remainder from Palestine and Russia and Russia. mainder from Poland, Russia and Rumania.

TRANSJORDAN.

Emir, H H. Abdullah, G.R.E., K.C.M.G., second son of King Hussein of Hejaz, appointed April,

Transjordan consists of the 4 Districts of Maan, Kerak, Balya, and Aplan, and is under the same mandate as Palestine. It is bounded on the west by Palestine, on the north by Syna, on the east by Iraq, and on the south by Hejaz and Nejd, and has access to the Red Sea at Akaba. No census has yet been taken, but it is estimated that the total population is 300,000, of whom 130,000 are settled, 120,000 semi-nomads, and 230,000 are setted, 122,000 self-monator, and self-monator, and self-monator are not definitely determined. The extense west of the country is fertile, and agricultural and pastoral industries are carried on, but the rest of the country is almost entirely desert The Hejaz Railway runs (with the exception of the first few miles) through Transpordan territory from Deraa to Kalaat el Mudowwara, where it enters Hejaz tentony and continues to Medina. There is a Legislative Council of 6 official and 16 elected members, constituted in

RHODESIA.

The total area of Rhodesia is about 440,000 a.500,000 (1931). The territory is named after Cacil Rhodes, the founder of the British South Africa Company, and extends from Lake Tan-ganyika and the Congo watershed in the north to the Limpopo River in the south.

SOUTHERN RHODESIA.

Southern Rhodesia is that part of the territory named after Cecil Rhodes lying south of the Zambesi River, the political neighbours being Northern Rhodesia and Portuguese East being Northern Rhodesia and Portuguese East Africa on the N.; the Transval and Bechuana-land on the S. and W., and Portuguese East Africa on the E. The total area is 129, 344 square miles, and the population (232) 2, 108, 949 of whom 49,904 are Europeaus. The native popu-lation is 2,055,000, with 4,045 Asatics and other coloured persons, including those of mixed race. The total number of European burths in 1930 was 1,273 (a rate of 24's per 1,000) and of deaths
443 (9 2 per 1,000), the marriages numbering 553
(22'9 per 1,000) Responsible Government was (22') per 1,000) Responsible Government was instituted in Southern Rhodesia on Oct. 1, 1983. The Government is administered by a Governor appointed by the (rown, with an Evecutive responsible to the Legislature, which consists of a Legislative Assembly, but that body may pass a law constituting a Legislative Council, in addition.

The laws in force in the Cape Colony up to June 20, 1891, were adopted for Southern Rhodesin so far as they are applicable. Sub-sequent legislation has been by proclamation of the High Commissioner, by ordinances passed by the Legislative Council, and by Acts of the Legislature. Municipal self-government has been established in Salisbury, Bulawayo, Gwelo, Umtali, and Gatooma.

The main arteries of communication are the Rhodesia and the Mashonaland Railways, the total unleage of which at Sept 30, 1930, was ,638 miles (including 1,348 miles operated within the boundaries of Southern Rhodesia). The former is a continuation of the line from Cape Town to Vryburg, vid Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,36a miles. A line connecting Bulawayo with Salisbury (301 miles) was completed in Oct. 1902. From Salisbury the Mashonaland Railway runs east-wards to Umtah and is continued by the Beira Railway Companies to the port of Beira (Portuguese), a total distance of 374 miles The main northern extension of the railway was constructed from Bulawayo. It taps the Wankie coalfields and crosses the Zambesi at the Victoria Falls (282 miles). Branch lines primarily constructed in the interests of established mines constructed in the interests of established mines are:—Salishury-Sinoia (§3 miles), Mt. Hampden Junction-Slamwa (73 miles), Gwelo-Selukwe (24 miles), Bulawayo-West Nicholson (xo4 miles), Gwelo-Univuma-Victoria (xa3 miles), and Somabula-Shabiani (63 miles). There is also a short branch line, Bulawayo-Matopos. To provide facilities for the transport of passengers and goods in areas in process of development not directly served by existing railways, a system of road motor services has been organised. In Officer Commanding Arab Legion, Lt. Col. F. G. September, 1931, routes covering 1,521 miles Peake, C.B.E. were in operation.

Southern Rhodesia is rich in mineral deposits, Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. The first regular crushing returns began in September, 1898, and the gold produced to December 21, 1930, was of the value of £75,008,148. The output for the year ended December 21, 1930, was valued at £3,316,649. Sliver, copper, coal, diamonds, lead, chrome iron, asbestos, mica, pistinum, corundum, and other minerals have also been produced in considerable quantities. Though the climate is sub-tropical, the average altitude makes it well sub-tropical, the average altitude makes it well suited for European occupation, and it pos-sesses all the essential characteristics and facilities necessary for successful agriculture and cattle raising, and for the cultivation of European fruit trees, cereals, and vegetables, in addition to tobacco, cotton, and the indigenous products of the country. The staple crop is maize, and tobacco, cotton and citrus fruits are largely exported. The total area under cultivation in 1930 was 418,000 acres (maize 217,700, tobacco 20,500, cotton 6,200). The export of citrus fruit in 1930 was 25,000 hoxes. Cattle (a,458,400 on Dec. 31, 1930) thrive well, and the annual shows at Bulawayo and Salisbury are regarded as among the premier shows of beef cattle in South Africa. The exports of cattle in 1930 were 61,300 head. Dairy products sold include butter 1,768,700 lb , milk 1,009,000 gallons, cheese 163,000 lb., and eggs 726,000 dozen. In addition to the main industries of mining and farming there are creameries, cotton ginneries, bacon factories, oil, soap and candle factories. cement and lime works, and many other under-takings. Land is cheap and may be had on favourable terms. Considerable efforts have been made by the Government during recent been made by the Government during recent years to merease the number of new settlers During the years 1925-27 settlers and dependents numbered 947 (396 under Empire settlers scheme, and 545 from High Commissioner's Office, etc.) In addition, a further 1,004 men and youths obtained situations on the land in 1925-27. This scheme is (1031) temporarily in abeyance.

Complete courses of primary and secondary education up to the standard of matriculation of the South African Universities are provided in the Government schools. For European children there are 87 Government and Government-aded schools (r vocational, ra secondary and 74 primary). Children in rural areas, where the population is too scanty for a school, are provided for by Government grants to tutors or governesses. The total number of European children in all types of schools at the end of 1930 was 8,386. There are seven schools for children of mixed race, with 622 pupils, and native education conducted by mission agencies with Government aid is provided in 1,446 schools, with 108,752 pupils. Grants in aid of native education in 1930-31 amounted to £49,511, the total educational (other than native) expenditure being £388,386 in the calendar

year 1930.

SALISBURY, the capital, is situated on the Mashonaland plateau, altitude 4,880 ft (total population, census 1921, 28,800, sucluding 9,712 whites). Bullawah, of the largest town in Matabeleland, altitude 4,460 ft (total population of 31,000, including 21,727 whites) of their centres are limital, Gwelo, Gatooma, Que Que, Wankie, Fort Victoria, Selukwe, and Hartley.

NORTHERN RHODESIA.

Northern Rhodesia lies to the North of the Zambezi, its political neighbours being Tangan-yika and the Belgian Congo on the north, Nyasaland and Portuguese East Africa on the east, Southern Rhodesia and South-West Africa on the south, and Portuguese West Africa on the west, The country computes an area of a87,995 square miles, and with the exception of the Luangwa. Zambezt and Kafue Valleys the altitude in most places exceeds 4,000 feet. The permanent Europlaces exceedes 4,000 lett. The permanent Entry-pean population in May, 1931, was computed at 13,847; the native population was estimated (Dec. 31, 1930) at 1,331,220. Much of the country is suitable for faining, and contains large areas of good anable and grazing land. Over 2,500,000 acres of land are under settlement by white farmers. The chief crop grown is maize. Other rops are tobacco, coffee, wheat, oil feeds, and citius. Stock raising is carried on by many farmers. The native-owned cattle in the territory is estimated at 36s,768. and European-owned 103,201. Copper, zarc, vanadium, lead, gold, mica and coal have been discovered, and scientific prospecting is being carried on over large areas. The copper deposits have attracted much capital. the Roan Antelope mine having commenced output, while others are expected to follow. The copper mines of Northern Rhodesia appear likely to produce a large proportion of the world's supply. Many species of game are to be found, and good sport at a moderate cost is avail-able for the log-game hunter, but the areas now open for hunting are somewhat restricted.

The trunk line of the Rhodesia Railway system traverses Northern Rhodesia from Livingatone to the Belgian Congo borden. The Zambezi, Kafue, Chambesi and other rivers are navigable for a considerable portion of their courses. There are 44 post offices, 28 of which are money order offices. A telegraph line exists alongside the railway line throughout its whole length in the territory; other lines connect Abercorn with the Nyasaland and Tanganyika systems and also Fort Jameson with Nyasaland. The construction of 600 miles of new pole route was completed in 1932. A central wireless station (long and short waves) has been erected at Broken Hill, and large district short-wave stations, all equipped for telegraph and telephone communication, have been installed at Livingstone, Mongu, Abercorn, Fort Jameson and Mpika. The administration of the territory is in the hands of a Governor appointed by the Crown, assisted by an Executive Council of five official members. There is a Legislative Council of 16 members, with a majority of official members. The seat of Government is at Livingstone, near the Victoria Falls, on the Zambezi. The county is divided into 9 Provinces for fiscal and administrative purposes. The most important centres are Livingstone, Broken Hill, Fort Jameson, Lusaka, Mazabuka, Abercorn, Kasama, Fort Rosebery, Ndola and Mongut-Lealut.

ST. HELENA.

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 768 S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,360 from the coast of S.E. of Ascension, 1,140 from the nearest point of the African Continent, 1,360 from the coast of S.E. of Ascension, 1,140 from Southampton, in 13' 55' S. lat. and 5' 42' W. long. It is 10'/2 miles long, 6'/2 broad, and encloses an area of 47 square miles, with a population (Census 1922) of 3,747. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 1,700 feet, interspersed with picturesque ravines. Although within the tropics, the south-east "trades" keep the temperature mild and equationes. St. Helena was discovered by the Portuguese navigator Juan de Nova Castella, on May 21, 1502 (St. Helena's Day), and remained unknown to other European rations until 1588. It remained uninhabited until the Dutch colonised it cave. 1645. The English East India Company seized it in 1672. In 1672 it was retaken by the Dutch in 1672. In 1672 it was retaken by the Dutch in 1672. In 1672 it was retaken from the Dutch and was held by the Company, who had obtained a charter for its possession from the Dutch and was held by the Company, who had obtained a charter for its possession from the Soverment held it as a residence for the Emperor Najoleou, who died there May 5, 1821, when it was ceded by then to the Crown. It was formerly an important station on the route to India, but its prosperity decreased after the cutting of the Suez Canal A phormium (flax fibre) and lace-making industry has been established. St. Jame's Bay, on the north-west of the island, possesses a good anchorage.

of the island, possesses a good anchorage.

Ascension (Resident Magistrate, E. A. Willmott), an isolated island in the South Atlantic (3,472 miles from Plymouth, 766 from St. Heluna, and 90 from Cape Palmas on the African coast), is of volcanic origin, the peak rising to the height of a,820 fect, situated 70 55′ 55″ N. lat. and 14° 25′ 5″ W. long. It is said to have been discovered by a Portuguese maned João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by a prosent name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with an aroa of about 38 square miles, and, being situated in the heart of the S E. tade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabeted till 1872, when the English took possession of it; in 1931 the population was about 150. The island was administered by the complete of St. Helena and was transferred to the Colonial Office. Georgetown, the capital, is situated in a small bay on the N.W. coast. Ascension is visited by the sea-turtle from January to May, which lay their eggs in the sand; the sooty torn, or "wide-awake," use the island as a nesting-place about every eighth month.

The government of St Helena is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

Sarawak is a state on the north-west coast of the island of Borneo, with a seaboard of about 500 miles, an area of about 50,000 square miles, and a population of about 475,000, composed of various races. The territory of the Raja of Sarawak extends from Cape Datu in the south to the Lawas District, where it touches the boundary of British North Borneo. southern boundary is formed by three ranges, the Serang, Kelingkang, and Batang-Lupar mountains; the eastern boundary is a broken range tial oils, soap, and guano Aldabra, one of the

of mountains with peaks rising to zo,oco feet of mountains with pears rising to recome resp.
The principal rivers are the Rejang (navigable for about zee miles), the Baram (navigable for about zee miles), the Baram (navigable for about zee miles), the Baram (navigable for miles) and river (the Saiawak) which is navigable from its mouth to Kuching (az miles). The government consists of a hereditary sovereign and a Supreme Council of 9 (4 Europeans and 5 Malay magistrates), and a General Council of 50, composed of European and Malay officials and native chiefs, meeting every 3 years. The civil service is composed of English officials to the number of rro, appointed by the sovereign. The government of Sarawak was obtained in 1842 government or sarawak was obtained in reas-from the Sultan of Brune by the late Sir James Brooke, who became well known as Rajah Brooke of Sanawak Other concessions have been made in 1867, 1882, 1894, and 1890, when the Limbang River was obtained. The Lawas River was added in 1905 In 1864 Great Britain recognized Sarawak as an independent state, and under an agreement of 1888 the State has been placed under British protection. country produces sago, gutta - percha, india-rubber, becs-wax, illipe nuts, birds'-nests, oil, gold, silver, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper The large petroleum field at Miri and Bakong, in the Baram district, is now a valuable asset; oil exports (x928) 598,389 tons, (x929), 734,454 tons; (x929) 645,200 tons

CHIEF TOWN, Kuching. Population (x9xx), 30,000 Distance from London, 8,700 miles; transit, 25 to 30 days. There are 20 wireless stations, in communication with Singapore. Steamer leaves Singapore for Kuching and Kuching for Singapore every Saturday. Saturday. There is also direct communication with Sibu and Miri.

SEYCHELLES.

The Seychelles Islands, in the Indian Ocean, which number altogether 90, were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1810. By letters patent of Sent. 1992 than 111 By letters patent of Sept 1903 they were d into a separate colony The principal erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Currense, and Ia ligue, and the total area of the islands, with dependencies, is estimated at z56 square miles, of which Mahé occupies 156 square miles, of which Mahle occupios hearly 55 square miles; the most important of the dependences are the Amirantes, Farquhar Isida, Coctuy, Aslove and the Aldabra Group. The population was estimated (Dec. 37, 1939) at 27 558. At the census of 1932 the population of Mahle was 29 426, Prashin 1,1999, La Digue, 1,203, other islands 1,795. Victoria, the capital, on the N.E. side of Mahe, has an excellent harbour, and the lighthouses in the vicinity have been fitted an exist modern automatic helits. Although up with modern automatic lights. Although only 4°S. of the Equator, the islands are healthy, the death-rate in 258 being 16°12 per 2,000. There are 27 Roman Catholic and Church of England primary schools; there are also a secondary schools.

The principal exports are copra, vanilla, coconuts, coconutoil, tortoise-shell, ciunamon, essen-

SIERRA LEONE.	

The peninsula of Sierra Leone, situated on the West Coast of Africa, was ceded to Great Britain in 1787 by the native chiefs for the purpose of being used as an asylum for the many destitute negroes then in England At a somewhat later date the Colony was used as a settlement for Africans from North America and the West Indies, and great numbers of Africans is escuted from slave ships have from time to time been liberated and settled there. The Colony has a coast-line of 210 unles, with an estimated area of 4,000 square miles. In 1921 its population was 85,163, of whom 1,161 were resident Europeans. Of the rest, more than half are the descendants of liberated Africans, while the remainder belong to the neighbouring tribes. A babel of tongues is thus to be heard in the streets of Freetown. In 1856 a Protectorate was declared over the territory adjoining the Colony to the northward and eastward. The extreme depth of the Protectorate from north to south is about aro miles, lying between 7° and 10° N. lat., and axo mines, tying outween 7 and 10° N. 181, and the extreme breathth from east to west is 180 miles, hetween 10° 40′ and 13° ax' of W. long Its estimated area is 27,000 sq. miles, and the population about 1.455,148. For administrative purposes it is divided into 2 Provinces, under provinced (Commissioners assisted by 2 Senters Provincial Commissioners, assisted by Senior District Commissioners, az District Commissioners and ra Assistant District Commissioners. The principal peoples are the Limbas and Korankos in the north, the Temnes in the centre, and the Meudis in the south.

The principal exports are palm kernels, kola nuts, palm oil, and ginger: plassava, hides, and rice are also exported. The value of the palm kernels exported in 1000 ceached £664,591. The chief imports are cotton goods, coal, apparel, hardware, provisions, and tobacco. Frectown, the capital, possesses the fluest and most important harbour in West Africa.

A railway runs inland from Freetown to Pendembu, a distance of 227/2 miles, and a branch line 83 miles in length extends in a north-easterly direction from Banya to Makem. Motor roads are now being opened up in the Colony and Protectorate, in the Colony connecting the various towns and villages with the port, and in the Protectorate as feeder roads to the tailway. There are (1930) 1,922 miles of combined tolegraph and telephone service.

Sierra Leone is a Crown Colony, possessing a Legislative Council partly elected and partly mominated by the Crown, with full power to legislate for the Protectorate as well as for the Colony. The Governor is advised by an Executive Cavallet.

SOMALILAND

(The Somaliland Protectorate)

Somaliland occupies the "North-Eastern Horn" of the African continent, jutting out mot onte Indian Ocean along the south of the Gulf of Aden, and is divided between Great Britain, France and Italy, while the interior subject to Abyssinia. The Brutish Protectorate, declared in 1884, contains about 68,000 sq. miles, its boundaries being defined by treaties with Abyssinia, France and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south. The population, mainly consisting of Somalis, a

SOUTH AFRICAN HIGH COMMISSION.

The Office of High Commissioner in and for Stoth Africa was created by Letters Pattut in 1878 In 1879 a second High Commissioner was appointed, to whom was assigned South-Eastern Africa, including Zululand and Amatongaland; but this arrangement ceased in 1881, when a Special Commissioner for Zulu aftairs was appointed, who was also Governor of Natal (which now includes Zululand and Amatongaland). The High Commissioner for South Africa, who, under the Commission of 1889, was the officer for the time being administering the Government of the Cape, now represents the Crown in all matters occurring in South Africa

beyond the limits of the Union and of Southern and Northern Rhodesia. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechmansland Protectorate and of Swanland. Prior to October 1, 1233, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council 1253. Upon the establishment of responsible government the Order in Council 1253. In the International Council 1253. Upon the establishment of responsible government the Order in Council 1253. In the International Council 1254. The Council 1254 in regard to native administration were reserved to him and the Southern Rhodesia Order in Council, 1254, whereby the Native Reserves were vested in the High Commissioner, was continued in full force and effect. On April 1, 1254, the functions which the High Commissioner had evereised in Northern Rhodesia during the British South Africa Company's administration of that Territory were, with the assumption of the administration by the Crown, transferred to the Governor of Northern Rhodesia.

The Office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated October 6, 1900, vested in Lord Milner, and by a similar Commission, dated March 15, 1905, in Lord Selborne. During the years 1920 the Office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa. This air angement ceased upon the termination of the period of office of Major-General the Earl of Athlone, K G Sir Herbert Stanley, a.C. M.G., was then appointed by His Majesty to be High Commissioner for South Africa, and he holds that office concurrently with the newly created office of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom

BASUTOLAND.

(The Territory of Basutoland.)

Basutoland is an inland Native Territory of South Africa, bounded North and West by Orange Free State, East by Natal, and South by Cape Colony, with an area of xx,7x6 square miles. The Census of xgax showed 425,937 natives and x,603 whites. 1.06 coloured and xx2 Asiatics.

Colony, with an area of x1,720 square mines. In Census of x2x showed 495,937 natives and x,603 whites, x,069 coloured and x72 Asiatics.

The territory is well watered, and enjoys a good climate It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basuto to rear immense herds of cattle, sheep and goats, the mohair produced being of excellent quality. The Mainti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is clevated, broken, and rugged Basutoland has been called "The Switzerland of South Africa" and contains amongst its intural wonders the Maletsunjane Falls (670 feet)

The Territory is governed by a Resident Comnissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The final court of appeal in the Territory is the Resident Commissioner's Court, appeal from which lies

direct to the Privy Council. The revenue is derived from Customs, native tax, income tax on Europeans, post-office, and licences. Telegraph offices have been opened at Butha Buthe, Leribe, omices have been opened at nutria buttle, Levice, Peka, Teyateyaneng, Maseru, Morija, Mateteng, Mohale's Hoek, Quthing and Qacha's Nek. There are 597 native schools, with an average attendance (1930) of 37,150, a large proportion being in the schools of the French Protestant Mission; there are also 9 white schools. The education vote for 1930-31 was £55,405. The chief articles of export are wool and mohair, cattle and hides, the imports being chiefly blankets, groceries and hardware.

BECHUANALAND.

(The Bechnanaland Protectorate.)

The Bechnanaland Protectorate is a country of British South Africa, in the centre of the vast tableland stretching north to the Zambesi.

The Protectorate is bounded on the south and east by the Cape and Transvaal Provinces and east by the Cape and Transvani Provinces of the Union, on the north and north-east by Southern Rhodesia, the Zambesi and Chohe Linyanti) Rivers, and on the west by South-West Africa It is about 500 miles long and 550 miles broad, with a total area of about 575,000 square miles; the Caprioi Ziprie was attached to the Protectorate for administrative by Proclamation (see hit was no attached to the Protectorate for administrative purposes by Proclamation (zpsz), but was retransferred to 8. W. Africa, Sept. z, zgsg. The population at the Census of May, zgzz, was zsz, sgs, of whom z, zqz were Whites, sz Indians, z,ecg Coloured and zso, zgs Natives.

The climate is healthy during part of the year. March, and April, but with ordinary presentions is not seriously definents to health

melons are sown, and when the rainfall is adequate crops are reaped. Cattle thrive, and numbered 455,344 at the Census of sax. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal triles being those of Tahekedi, Regent during the minority of Seretse (Bamangwato), of Molef Pilane (Bakgatia), of Kgarl Sechele (Bakwana), of Bathoen (Bangwaketsi), of Seboko Mokgosi (Bamalete), and of Mathibe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape adequate crops are reaped. Cattle thrive, and

to Rhodesia. There is a telegraph line from Cape Province through from Mafeking, vid Gaberones and Francistown, to Bulawayo and Salisbury. The chiof European centres are Lohatsi, Gaberones, Francistown, and Serowe, whither the late Chief (Khama) and all his people moved in rgor from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Province.

SWAZILAND,

(The Swaziland Protectorate.)

Swaziland (called by the natives Kwa Ngwane) lies between the Drakensberg and Lebombo Mountains in British South Africa. The Transvaal Province forms a boundary on the south, west and north, the eastern boundary being Zululand (Province of Natal) and Portuguese East Africa The total area is 6,705 square Ratt Africa The total area is 6,705 square miles, and the population (2921) 122,952, of whom 2,205 are whites, the remainder being Ama-Swazi Bantus (or Swazis). Estimated Runopean population (1931) s.650. Swaziland is divisible into three longitudinal regions: the mountainous regions of the west, with an approximate altitude exceeding 4,000 feet; the Middle Veld, about 2,000 feet lower; and the Low Veld, bounded on the east by the and the Low Yeld, bounded on the east by the Lebombo Mountains, with an average altitude not exceeding 1,000 feet. The country is well watered and healthy, the annual rainfall averaging 55 inches, the mean temperature being 62° Fahr. (30°-90°). The soil is generally fertile, particularly so in the Low and Middle Veld. The whole of the Territory forms excellent graying for eattle, and cattle-randeling on country is essentially pastoral, although Veld. The whole of the Territory forms excel-Kamer corn, mealies, beans, pumpkins and lent grazing for cattle, and cattle-ranching on

a large scale has been commenced by several companies. There were about 334,000 head of cattle in the Territory at the end of 1930. In the winter season sheep are brought to Swaziland for grazing from the high table-lands of the Eastern Transvasl.

The agrentural products are, maize (the staple product), tobacco, millet, ground-nuts, beans, pumpkins, and sweet potatoes Cotton growing from jassid resistant seed is becoming important. The country possesses considerable mineral wealth including gold, tin, coal, copper and asbestos. During the year ended Dec. 31, 1930, 161 tons of cassiterite tin, valued at £23,414 were exported.

Mhahane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet. There are townships in the districts at Bremersdorp, Hlatikulu, Stegi and Goedgegun. There are schools for Europeans at

various centres

There is a daily South African Railway motor omnibus service between Breyten and Mbahane (89 miles); Bremersdorp and Stegi (43 miles), Piet Retief and Hlatikulu (57 miles), and Goedgegun to Hlutt (33 miles). There are post offices, and telegraph and telephone offices at all the chief centres

STRAITS SETTLEMENTS.

(See MALAYA.)

THE SUDAN

The Sudan extends from the southern boundary of Egypt, 22° N. lat., to the northern boundary of Uganda, 3° 36′ N. lat., and reaches from the French Sahara about 19° 20′ E (at 22° N.) to the north-west boundary of Errica (Italian) in 38° 30′ E (at 18° N.). The greatest length from north to south is approximately and from east to west, 20° miles range miles, and from east to west x, soo miles. The northern boundary is the sand parallel of North latitude; on the east lie the Red Sca. Eritrea and Abyssima, on the south lie the British Protectorate of Uganda and the Belgian Congo; and on the west French Equatorial Africa. The total area is about 1,008,200 sq. miles, with a population of about 5,600,000, partly Negroes, and partly Nubian of mixed Arab-Negro blood, with a small foreign element, including some 3,000 Europeaus. The Arabs and Nubians are all Muhammadans, as are some of the Negroes, but the latter are generally some of the regroes, but the latter are generally pagains. The Gambella enclare (within the boundaries of Abyssinia) is leased from the Abyssinian Government as a trading post. The Ale enters at Nimule, in Mongalia Province, as the Bahr el Jebel, and leaves the Sudan at Wadi Haifs. From the Athara configuration than the Middan and the silver has a superfection of the silver has a superfection. boundaries of Adyssinian is leased from the sensous, where instruction is given in English as Abyssinian Government as a trading post.

Abyssinian Government as a trading post.

The Aule enters at Nimule, in Mongalia secondary school at Khartoum (Gordon College), and a transing college (aloa at Gordon College), and at twanting college (aloa at Gordon College), and technical or trade schools at Khartoum, fluence to the Mediterranean the river has a Omdurnan, and Albara. There are also are course of close on 1,500 miles, and from its elementary veracular schools for girls, and a sources to the confluence its length may be Training College for girls' teachers.

reckoned at s,400 miles, giving a total waterway of 4,000 miles. Between Khartoum and Wadi Halfa occur five of the six Cataracts, the re-maining (first) cataract being in Egypt at

Government.-The Sudan is administered by a Governor-General, aided, since 1910, by a Council nominated from amongst the Officials of the Government. All Ordinances and Laws are made by the Governor-General in Council. No duties may be levied on imports from Egypt, and duties on imports via the Red Sea ports may not exceed those levied in Egypt. The Sudan is divided into 14 provinces (Mudiran) under governors (Mudira) Rach province is subdivided into districts with one (or more) District Commissioners in charge of each Native administrative officials are employed under the District Commissioners (vail Justice is administered by a (Thef Justice and four puisne judges, one of whom is also Registrar-General of Lands. There are also Province and District. Judges who are usually the Governors and District Commissioners of Provinces, but there are also District Judges who are professional lawyers in some of the more important centres. Appeals he from the District Judges to the Province Judges or the High Court, and from the Province Judges and the High Court to the Court of Appeal, which consults of three judges of the High Court The system of the law administered is "justice, equity and good conscience" in all cases in which there is no special enactment There is no general code of civil and commercial law such as is in force in Egypt and many Continental countries. The religious law of Islam is administered by the Mohammedan Law Courts in matters of inheritance, marriage, divorce, and family relations generally amongst the Moslem population. There are District and Province Courts under District and Province Kadis, and a High (Mahkama) Court at Khartoum presided over by the Grand Kadi. Criminal Justice is administered chiefly by the Governors and District Commissioners and Mamours of Provinces and Districts, all of whom are magistrates. The Judges of the High Court and District Judges also have criminal jurisdiction as magistrates. The more serious offences are tried by courts consisting of three magis-trates, and many native notables have been made magnetrates for the purpose of sitting as members of such courts. The decisions of such courts require confirmation by the Governor of the Province or the Governor-General, who exercise powers similar to those of confirming officers in Courts Martial, and to them also appeals lie Courts of Sheiks or Chiefs in all parts of the country have varying powers of limited jurisdiction in accordance with native customs. The Sudan is gairisoned by native troops, forming the Sudan Defence Force. A small garrison of Biltish troops is quartered at Khartoum. The Police are locally enlisted and are under Provincial administration.

Education .- In addition to khalwas and kuttabs (vernacular schools) there are to primary schools, where instruction is given in English as

Production.—The principal grain crop is dura (great millet), which is the staple food of the people in the Sudan, and is also used as cattle and poultry food elsewhere. Egyptian cotton has been successfully established, and increasing quantities are being produced annually. The Gezira Irrigation Scheme at present (1930) enables an area of 630,000 acres to be cultivated between the Blue and White Niles, one-third of which is under cotton. The necessary water is stored by the Sennar Dam on the Blue Nile, about 170 miles south of Khartoum. Cotton cultivation in the irrigated area is a new scheme for the further expansion of salt production on a large scale in this area. Other products include sesame, senna leaves and pods, ground-nuts, dates, hides and skins, and gold.

Trade.—The total value of trade in 1930 amounted to £E11,423,423. The principal export is cotton, the value of which, together with cotton-seed, amounted to £E3,256,625, or 65 7per cent. of the value of the total exports. Gum arable was evported the total evports. (till arable was evported to the value of £E980,1g9. Other exports are sesame, cattle, lindes and skins, dates, ground-inits, dom-nuts, dura, salt, senna, ivory and gold.

Communications.—The railways and steamers

throughout the country are administered by a Government department. During the past few dovernment department. Daring one pass reveals used to the transport has been revolutionised by the opening up of a net-work of motor roads spreading all over the country during the dry season. In 1930 there were 1,935 miles of railways open for traffic. The gauge is 3 ft. 6 m. Since the opening of the eastern rail-way the Red Sea port of Port Sudan receives much of the trade which formerly passed north-A line from Sennar Town, crossing the Sennar Dam, was completed during 1929, and affords an alternative route (498 miles) for produce of the Southern provinces to Haiya Junction, 126 unles W. of Port Sudan There are over 3,000 miles of the various reaches of the river Nile and its tributaries under navigation by a fleet of shallow draught steamers and barges. Three of these routes are only practicable in the flood season, June to September. the southern provinces motor car services are maintained in the dry season (December to March) between Juha and Nairobi (Sco miles), Juba and Kampala (Sco miles) by private companies in Uganda, and by an all-weather route, Juba to Aba (143 miles), operated by the Sudan Government and also by private enterprise. In the interior of the country there are other dry season motor roads. All the principal towns season motor roads. At the principal towns are in direct telegraphic communication with Khartoum, the total mileage of telegraph lines being 5,737 miles in 1938. There are 80 stationary and 126 travelling Post and Telegraph offices, and zo wireless telegraphy offices.

Finance.—The revenue is derived mainly from land tax, animal tax, royalties on gum and ivory, customs and railways, posts, telegraphs

and steamboat services.

CAPITAL, KHARTOUM, at the junction of the White and Blue Niles. The town contains a large mosque for Mohammedans, a cathedral, and the Gordon College, with extensive Government buildings Population 42,240 (poposite Khartoum, on the Blue Nile, is Khartoum North (102,522), and on the White Nile is Ondurman (102,523), the former Mahdist capital.

TANGANYIKA TERRITORY.

TANGANYIKA TERRITORY has a coast-line of about soo miles and an estimated area of 373,500 square miles The Sultan of Zanzibar's rights over the narrow strip of coast territory were acquired by Germany in 1890 for a payment of 4,000,000 marks. The coast-line extends from the mouth marks. The coast-line extends from the mouth of the Umba to the mouth of the Royuma River

of the Umba to the mouth of the Rovuma River.
The native population consists mostly of tribes of mixed Bantu race, and was enumerated for the whole area (April, 1921) at 4,107,000, the coloured population (other than native) being 14,991. In 1930, the native population of Tanganyika Territory was estimated at 4,853,244. The total white population is about 6,870. According to German law every native born after 1905 is free, but a mild seridom was continued under German under Legislation for the aboution of the status of slavery was enacted the abolition of the status of slavery was enacted

on June 9, 1922. Considerable progress continues to be made with native education. In 1930 there were 94 Government schools, with 5,606 children in average attendance, and 3.044 Mission schools with average attendance of 97,745 pupils. The amount allotted to education in 1931-23 Education in 1931-23 Education of European control of the education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of European and Education of Education

parts of the Territory are unassisted. Government publishes a monthly journal printed in Swahili to disseminate news and useful information among the vernacular speaking population.

The total area under forests is about 4,230 square miles, of which 3,896 square miles are included in the Government Forest Reserves, and about 70 square miles are privately owned. Non-native plantations are mainly for the production of sisal fibre and coffee, with small areas under tea and tobacco, minor crops being cotton, maire and coconuts. Native production consists chiefly of coffee, hannas, cotton, ground-nuts, rice, millet, maize, cassava and pulses.

and puises.

In 1930 there were 5.170.162 cattle, 2.263,103
sheep and 3,259,443 goats in the Territory.
The value of minerals produced in 1930 was—diamonds £27,211, gold £47,013, salt £36,750, muca £6,182 and th £652. Companies desning to investigate the mineral resources can obtain information and assistance from the Mines Department, Dai-es-Salaam.

The chief expots are sisal, cotton, coffee, ground-nuts, hides, skins, copra, grain, sinsin, bees-wax, ghee, diamonds and gold; the chief imports being cotton piece goods, iron and steel manufactures, foodstuffs, machinery, building materials, kerosene and motor spirit, sugar, rice, spirits, and cigarettes.

TOGOLAND.

(Joint Franco-British Administration.)

The total area is about 43,040 square miles, with an estimated population of aso,000. The British sphere consists of an area of about 23,040 sq. miles with a population estimated (1931) at

275,925, excluding 43 Non-Africans. The man dated sphere adjoins the eastern frontier of th Gold Coast and is administered as part of it.

TRISTAN DA CUNHA

is the chief of a group of islands of volcani origin lying in lat. 37° 8′ S. and long. x2° 2′ W discovered in x506 by a Portuguese admira (Trasão da Cunha), after whom they are name The population numbers 127, and the inhab-tants are said to be very long-lived. Th principal settlement (Edinburgh) is in the north west of the island. In spite of periods of di-tress the inhabitants refuse to leave the Islan for the Cape of Good Hope, to which they ar attracted by offers of land. Two missionarie Rev. R. A. C. Pooley and Mr. Philip Lindsay were sent out from England in 1927 on a 3-yea mission to the islanders

INACCESSIBLE ISLAND is a lofty mass of roc with sides a miles in length; the island is th resort of penguina and ser-fowl.

THE NIGHTINGALE ISLANDS are three 1

1,350 2.000 1,350 1,650

number, of which the largest is a mile long an 34 m wide, and rises in two peaks, 660 an 1, 105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, ar little more than huge rocks. Numbers of seal and sea-elephants visit these islands

GOUGH ISLAND (or Diego Alvarez), in 40° 20' 8 and 9° 44' W., lies about 250 miles 8 8 E. of Trista da Cunha. The island is about 8 miles long an 4 miles broad, with a total area of 40 squar railes, and has been a British possession sinc site. The island is the resort of penguins an has valuable guano deposits. There is no per manent population.

THE UGANDA PROTECTORATE.

The territories now comprised within thi Protectorate came under British influence in 1,350 1800, and a portion of them was for a time ad ministered by the Imperial British East Afric. Company. In 1894 a British Protectorate wa declared over the kingdom of Uganda and som 1,150 1,350 of the adjoining territories. The present limit are approximately as follows:—On the north the Uganda-Sudan boundary, on the east, line drawn from Mt. Zulia, on the Sudai 1,150 1,150 line drawn from Mt. Zulia, on the Sugai boundary, along the Turkana escarpment ove the top of Mt. Elgon, and along the west boundary of the Colony of Kenya and the easter shores of Lake Victoria; on the south, b Tanganyika Territory (Inte German Eas Africa); and on the west, by the easter boundary of the Relgian Congo. Within thes 1,150 1,150 1,150 1,100 1,050 960 boundary of the Relgian Congo. Within thes boundaries he part of the Victoria Nyanza part of Lake Edward, the whole of Lake George, half of Lake Albert, the whole of Lake Kuoga, the whole of Lake Skuoga, the whole of Lake Skuoga, the whole of Lake Skuoga, the whole of Lake Salisbury and the course of the Nile from its exit from Lake Victoria to Nimule, where the Sudarcommences. Total area, 94,304 square miles including 13,565 square miles of water.

For administrative nurrocess the Protactoriat 900

For administrative purposes, the Protectorat

is divided into 4 Provinces :-

(1) Eastern Province, comprising the district of Busoga, Bugwere, Bugishu, Budana, Tesc Lango, and Karamoja.

(a) Northern Province, comprising the district of Bunyoro, Gulu, Chua, and West Nile.

(3) Western Procuse, comprising the district of Toro, Ankole, and Kigezu.

(4) Buyanda Province (with islands in Lake Victoria) comprising the districts of Mengo, Masaka, Mubende, and Entebbe. Owing to sleeping sickness, the islands of Lake Victoria were entirely depopulated, and the inhabitants (about 20,000) settled on the mainland in fly-free districts; but the work of repopulating these islands was undertaken and completed in 1921 and 1922, and natives and their cattle have been repatriated.

The whole Protectorate is now under direct

administration; but the native kings or chiefs, whose rights are in some cases regulated by treaties, are encouraged to conduct the government of their own subjects. The province of Bwanda is recognised as a native kingdom under a Kabaka (H. H. Sir Daudi Chwa, к с.м с., grand-son of the celebrated Mutesa). He is assisted in the government by three native ministers and a Lukiko, or native Council, and each county and district chief also has his *Lukiko* to assist him in local government and in the administration of justice. In Buganda (and in Bunyoro, Ankole and Toro, also ruled over by paramount chiefs, as well as in most of the other parts of the Protectorate more directly administered), purely native matters are dealt with by the various Lukskos, but in serious cases there is an appeal to British courts. For Europeans and non-natives justice is administered by His Majesty's Courts. The principal British representative is the Governor, who (with the assistance of the Executive and Legislative Councils) makes Ordinances for the administration of justice, the raising of revenue, and other pur-poses There are local British courts of justice, and a High Court with civil and criminal jurisdiction. The Appeal Court consists of the judges of the High Courts of Kenya, Uganda, Ayasaland, Zanzibar, and Tanganyika Territory There is an armed constabulary force, under a British Commissioner of Police and British There is also a battalion of the King's African Rifles stationed in the Protectorate, and a volunteer reserve of Europeans.

The total population of Uganda (December, 1930) is given as 3,513,625, composed as follows: Natives, 3,479,650; Asiatics, 14,002; Europeans, 1,973 At first educational work was entirely in the hands of the various Missionary Societies, who still receive grants towards scholarships, &c , for students and teachers ; their efforts have for some years been supplemented by Government, which has also established a University College for natives at Makerere, Kampala About a,ooo.oo natives speak Bantu languages, the most important of which is Luganda, the language of the Baganda tribe, after whom the Protectorate is named. Swahili is also widely There are a few pygmies living near the Semliki river and the Mufumbiro mountains; the rest of the natives belong to the Nilotic,

Hamitic and Sudanese groups.

	2029	1930
Revenue #		
Poll-tax	588,993	522,972
Customs	439,375	324,763
Expenditure (excl. loans)	1,607,997	2,040,294
Total Exports	4,274,758	2,060,453
Special Imports	2,318,177	1,614,164

The Customs Services are now merged in those of Kenya (q.v.). The export trade is mainly in cotton (£1,555,344 in 1930), coffee, chillies, oil-seeds, rubber, ivory, tin ore and hides and skins

The trade is chiefly with Great Britain, the United States, and India.

Nile steamers ply to Rejaf, which is about 8 days march from Nimule, the Sudan port of the Kenya and Uganda Railway Marine Service on the Albert Nile and Lake Albert. The road between these two places is fit for motors for about five months only in the year. A regular steamer service is maintained by the Kenga and Viganda Radiray Administration on Lake Kioga, between Masindi Port and Namasagali, the tenninus of the Busqa rallway; and on Lake Victoria between Kisumu and Rutchbe and Port Bell and the other Uganda ports The Lake Albert Marine, which has already been men-The Lake tioned, provides a weekly service on the Nile between Butiaba and Nimule, and a fortnightly service on Lake Albert between Butiala and the Belgian port of Kasonyi. The Railway Administration therefore provides a through service from Junia and Kisumu to the Sudan and the Belgian (ongo. The Busoga Railway, from Jinja (on Lake Victoria) to Namasagali, a point on the Nile below the rapids, which was completed in zozz, has recently been merged in the main line of the K. & U. Ry., which now runs from Jinja vid Eldoret to Nakuru, where it joins the old line to the coast. The continuation of this main line to Kampala has now been completed, and a further extension from Tororo Junction to Soroti ma Mhale was opened in 1985. There is a railway from Port Bell to Kampals, 73/2 miles in length. There is a flect of Govern-7% meet in notor vans, and there are aeroplane landing grounds at Entelbe, Tororo and Jinja.

Good all-weather motor-roads connect the principal administrative centres. Hotels exist at Kampala, Jinja, Tororo, Masindi, Fort Portal and Masaka.

The unit of currency is the shilling, and the lower comage is on a cental basis.

In 1920 Executive and Legislative Councils were constituted, and these came into being in Jan., xgax The former consists of 6 sppointed members and the latter includes the former, with the addition of unofficial members, and is presided over by the Governor. The head-quarters of the British administration is at ENTERBE; the chief commercial centres are Kampala (Buganda) and Jinja (Eastern Province).

ZAWZTRAR.

(The Zanzibar Protectorate.)

Sultan, H. H. Seyvid Sir Khalifa bin Harub, K.C.M.G., K.B.K., succeeded Dec. o. 1911.

The Zanzibar dominions became independent in 1856 under the rule of Scyyid Majid, a sou of Seyyid Said, Sultan of Muscat and Zanzibar. Seyyid Said, Sultan of Muscat and Zanzinar. They formerly extended along the manihald as far south as Tunghi Bay and north as Warshelkh; but since the cession of the coast-ime from Ruvima to Vanga, including the island of Mafia, to Germany in 1890, and of the Benadurent of the Sandard and Kismayu coasts to Italy in 1904 and 1924 respectively, they are now confined to the islands of Zanzibar and Pemba, a coastal strip from Vanga to Ras Kiamboni (Dick's Head), the islands of Lamu, Manda, Patta, and Siu. The Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the Kenya Colony and Protectorate (q.r). Zanzibar has been a British Protectorate since November, 1890. On July 1, 1913, the Protectorate was transferred from the Foreign to the Colonial Office.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

As the centre of the Arab power, Zanzibar, from the beginning of the roth century until quite recently, dominated the tade of East Africa. The islands possess practically a monopoly in cloves (the expert of which was valued at Rs 97,55,6co in 1930) and produce

The population of Zanzbar and Temba (Censi of 1931) was 335,428, the area of the former beit 940 square miles, and of the latter 380 square mile Tounage of ocean-going steamers which enter the port in 1930, 2,728,862; and 3,546 dhow (68,969 tons). Zanzibar provides the best wat supply on the East Coast of Africa, and it much in demand for shipping supplies.

THE WORLD'S RUBBER

In a Paper on "The Supplies of Rubber," Dr. George Rac. D sc , said the total area under plantation rubber at the end of 1929 was between 6,600,000 acres and 7,200,000 acres, of which the area under native tubber in Netherlands' India was variously estimated at between 1,100,000 acres and 1,700,000 acres. The remaining 5,500,000 acres consisted of approximately 3,360,000 acres in estates owned by Europeans and Americans; 510,000 acres in Asiatic owned estates over 100 acres, and 1,630,000 acres in native holdings under 100 acres. About 80 per cent. of all the estate rubber trees were tappable, so per cent.
of the native rubber in Malaya and Ceylon was tappable, and probably less than 50 per cent. of the native rubber elsewhere was tappable.

The total exports of rubber from producing

the nationality of producers, was approximatel as follows :-

			Tons	Per Cen
British :- U.K			236,000	27.9

*In 1930 a separate classification was provided for Mexicans who, up to that date, had been counted with the white population. The number of Mexicans reported in 1930 (1,423,533) is included for that year in the figure for 'Other faces," and its inclusion accounts for most of the increase between 1930. It is estimated that the 1930 figure for the white population included 700,541 persons who would have been counted as Mexicans in 1930. It these are deducted from the 1930 total, there is obtained what might be termed an adjusted figure, 94,120,374, which is more closely comparable with the 1930 figure for the white population.

BIRTHS AND DEATHS.

The annual compilation of mortality statistics for that part of the Continental United States known as the "Registration Area" began with the calcudar year 1900. This area at that time included 40'5 per cent. Of the total population, and in 1920 95'7 per cent. The birth registration area was established in 1975; it included at that time 31's per cent. The following table shows the number of births and denths in the respective Registration Areas, with rates per 1,000 of the estimated population, for the calendar years 1970 to 1939.—

IMMIGRATION AND EMIGRATION.

From 1880 to 1931, 37.859,181 allen limitgrants handed in the United States. In the 1862 year onded June 30, 1931, 97.130 limitgrants and 183,540 non-limitgrant alieus were admitted, a total of 280,679. During the same year, 61,882 emigrant and 289,034 non-limitgrant alieus, departed, a total of 290,916. The net decrease for the year was 10,237.

MARRIAGE AND DIVORCE.

The Law of Divorce differs in many of the States, while South Carolina has no Divorce Law. In general, adultery, cruelty, abandonment (descrition), habitual dissipancess, and imprisonment on conviction of felony, are legal causes of divorce.

PHYSIOGRAPHY.

The Republic occupies nearly all that portion of the North American Continent between the Atlantic and Pacific Oceans, in latitude 25°-49° North and longitud 67°-124° 30' West, its northern boundary being Canada and the southern boundary Mexico

Its coast-line has an estimated length of about 5,565 miles on the Atlantic, 2,730 mile on the Pacific, 3,641 miles on the Gulf of Mexico, and 1,050 miles on the Great Lakes The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 1,700 miles to its mouth in the Gulf of Mexico, witl many large affluents, the chief of which are the Yellowstone Platte, Nebraska, Arkansas, Ohio and Red Rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Alabama and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a long river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows :-- Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,877 and to the Gulf of Mexico, 1,683,325 square inites, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion o the country from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land consisting in part of stony and sandy desert and partly of grazing land and forester mountains, and including the Great Salt Lake, which extends to the Rocky Mountains Eastward the country is a vast, gently undulating plain, with a general slope southward: towards the partly marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the country) large forests of valuable timber, as beech, birch, maple, oak, pinc. spruce, clim. ash, walnut and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., stil exist, the remnants of the forests which formerly extended over all the Atlantic slope, bu into which great inroads have been made by the advance of civilisation. The Mississipp valley is eminently fertile. The mineral kingdom produces much ore of iron, copper, lead zinc, and aluminium; the non-metallic minerals include immense quantities of coal anthracite, petroleum, stone, cement, phosphate rock, and salt. Precious metals include gold and silver, raised mainly in Colorado, California, and Alaska (gold), and Colorado Montana, Utah, and Idaho (silver). The highest point is Mount Whitney at 14,496 feel above sea level, and the lowest point of dry land is in Death Valley, 276 feet below see level; these two points are in California, only 86 miles apart. The mean elevation of the 48 States is approximately 2,500 feet.

GOVERNMENT.

The United States of America is a Federal Republic consisting of 48 States and r Federal District (of which 13 are Original States, 7 were admitted without previous organisation as Territories, and 28 were admitted after such organisation), and of 2 organised Territories.

THE CONSTITUTION.—By the Constitution of Sept. 17, 1787 (to which ten amendments were added on Dec. 15, 1791, and eleventh to nineteenth Jan. 8, 1798, Sept. 25, 1804, Dec. 18, 1865, July 28, 1868, March 30, 1870, Feb. 25, 1913, May 31, 1913, Jan. 29, 1919, and Aug. 26, 1920), the government of the United States is entrusted to three separate authorities—the Executive, the Legislative, and the Judicial.

THE EXECUTIVE

THE Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs (they are now elected by popular vote on the first Tuesday after the first Monday in November of the year preceding the year in which the Presidential term expires), a number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed Monday of the January following, and there vote for a President by ballot. The ballots are then sent to Washington, and opened on the second Wednesday of February by the President of Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes er officio President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury. Secretary of War, Attorney-General, Postmaster-General, Secretary of Navy, and Secretary of the Interior, so that the State can never be without a Head or Ruler.

The President must be 35 years of age and a native citizen of the United States. He receives a salary of \$75,000, with a travelling allowance of \$25,000. Executive duties:-

(1) He is Commander-iu-Chief of the Army and of the Navy (and of the Militias when

they are in Federal service), and he commissions all officers therein.

(2) With the consent of the Senate, he appoints the Cabinet officers and all the chief

(and many minor) officials.

(3) He exercises a general supervision over the whole Federal Administration and sees that the Federal Laws are duly carried out. Should disorder arise in any State which the authorities thereof are unable to suppress, the aid of the President may be myoked.

(4) He conducts the Foreign Policy of the Republic, and has power, "by and with the advice and consent of the Senate, to make Treaties, provided two-thirds of the Senators present concur." The Declaration of War rests with Congress.

(5) He makes recommendations of a general nature to Congress, and when laws are passed by Congress he may return them to Congress with a veto. But if a measure so vetoed is again passed by both Houses of Congress by a two-thirds majority in each House, it becomes law, notwithstanding the objections of the President.

THE PRESIDENT.

President of the United States (1929-1933), Herbert Clark Hoover, of California, born at West Branch, Iowa, Aug. 10, 1874, graduated mining engineer, Leland Stanford Jr. University, 1895; Chairman of the American War Relief Committee, London, Eng., 1914-15; Chairman of Commission for Relief in Belgium, 1914-19; U.S. Food Administrator, 1917-19; Secretary of Commerce, 1921-28. Republican.

I. Uwe-President, Charles Curtis, of Kansas (born Jan. 25, 1860), elected Vice-President

Nov. 6, 1928. Republican.

THE CABINET.

(In order of succession to the Presidency, after the Vice-President.)

Secretary of State, Henry Lewis Stimson, of New York, (born 1867), Secretary of War, 1911-13; Special Commissioner to Nicaragua, 1927; Governor-General of the Philippines, 1928-29, appointed March 5, 1929.
 Secretary of the Treasury, Andrew W. Mellon, of Pennsylvania (born 1855), appointed

March 4, 1921; re-appointed March 4, 1925; present appointment, March 5, 1929. Secretary of War, Patrick Jay Hurley, of Oklahoma (born 1883), appointed Dec. 9,

5. Attorney-General, William De Witt Mitchell, of Minnesota (born 1874); Solicitor-

General of U.S.A., 1925-29; appointed March 5, 1929.

Postmaster-General, Walter Folger Brown, of Ohio (born 1869); Assistant-Secretary of Commerce, 1927-29; appointed March 5, 1929.

Secretary of the Navy, Charles Francis Adams, of Massachusetts (born 1866), appointed March 5, 1929. March 5, 1929.

8. Secretary of the Interior, Ray Lyman Wilbur, of California (born 1875); appointed Secretary of Agriculture, Arthur M. Hyde, of Missouri (born 1877); Governor of Missouri, 1921-25; appointed March 5, 1929. [March 5, 1929. Secretary of Commerce, Robert Patterson Lamont, of Illinois (born 1867), appointed

Secretary of Labour, William Nuckles Doak (born 1882), Dec. 9, 1930.

THE LEGISLATURE.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a zeto power, which may be overcome by a two-thirds vote of each House. The Senate is composed of two Senators from The Senate is composed of two Senators from each State, elected by the people thereof for the term of six years, and each Senator has one vote; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present x for six,877. The Senate consists of 95 members. The salary of a Senator is \$x0,000 per annum, with wilessed to events nor null each easily. with mileage at a cents per mile each session.
The House of Representatives consists of 435 representatives besides a delegate from Alaska, a delegate from Hawaii, a resident commis-sioners from the Philippines, and a resident commissioner from Porto Rico. The salary of a Representative is Sic, one per annum, with mileage as for Senators. By the XIXth Amendment sex is no disqualification for the Franchise.

THE SEVENTY-SECOND CONGRESS. (March 4, 1931-March, 3, 1933.)
President of the Senate, Charles Curtis, Kansas \$15,000 Speaker of the House of Representatives, (to be chosen Dec 7, 1931) 15,000

LIBRARY OF CONGRESS.
(National Library),
Capitol Hill, Washington, D.C.

Capitol Hill, Manington, D.C.
The Library of Congress was established in z8co and destroyed by fire in z8zz. In z8zz, purchase of Jefferson collection formed basis for a new collection. Partially destroyed by fire, z8gz, and replenished in z8gz-z. Since that date increased (z) by regular annual appropriations by Congress (were \$2.6 a.m.) (a) by departments. dato increased (x) by regular annual appropriations by Congress (now \$182,500); (a) by deposits under the copylight law; (3) by gifts and exchanges; (4) by the exchanges of the Snithsonian Institution, the library of which was in 1866 (theu 40,000 volumes; now over 550,000 volumes) deposited in the Library of Congress, with the stipulation that future accessions with the stipulation that future accessions should follow it. The collection is the largest in the Western Hemisphere, but statistics of the four largest libraries in the world are not sufficiently uniform to tell their order in respect to numbers. The Library of Congress now contains 4,302,388 volumes (gain in 1930-31, 188,323). The building was first occupied in 1897, and in 1932 it contained about 527,64 square feet (hearly 144 acres) of floor space. 527,674,840tars feetquearry 34,840res) on noor space. The total cost to June 30, 1931, is approximately \$7,869,000. The book stacks, including the new stack built over the south-east and north-east interior courts, contain a little over 162, miles of shelving. The library is maintained by miles of shelving. The library is maintained by Congress, the appropriation for 1931-32 being \$3,388,872. An auditorium for chamber music (the gift of Mrs. F. S. Coolidge) was opened in 1935, and in the same year the Library of Congress Trust Fund Board was created under an Act of Congress. This Board is permitted to accept and administer gifts and bequests of personal property in the interests of the Library of Congress, its collections and its service.

exclusive of World War Pensions.)

The total disbursement in pensions since the War of Independence to June 30, x93x, is \$8.403,978,x04, of which \$7,492,455,764 has been \$8,403,978,194, of which \$7,492,455,764 has been paid on account of the Civil War The cost of maintenance and expenses of administration in the fiscal year ending June 30, 1931, excluding the cost of medical examinations and special field examinations, amounted to \$1,374,344.

World War Pensions.

Disbursements in claims arising out of service in the World War between April 6, 1917, and July 2, 1921, are not included in the above July 2, 1921, are not included in the above totals, as claims of this nature are adjudicated in the U.S. Veterans' Bureau, which has jurisdiction over such matters. (See "Ordinary Expenditures" under "Finance," post.)

By Executive Order of July 21, 1939, the Veterans' Bureau, the Bureau of Pensions, and the National Home for Disabled Volunteer Sol-

the National Home for Disabled Volunteer Soldiers, were consolidated in accordance with the Act of Congress, approved July 3, 1930, by the President. The combined organisation is known as the Veterans' Administration, under the direction of Brigadie-General Frank T. Hines, formerly Director of the Veterans' Bureau, now Administrator of Veterans' Affairs.

HE NAVY OF THE U.S.

THE NAVY OF THE U.S.

On October 1, 1931, the Navy of the United States consisted of the following seagoing vessels. 15 battleships, 8 heavy cruisers, not "over-age"; 2 heavy cruisers, "over-age"; 15 heavy cruisers, "over-age"; 14 light cruisers; 3 aircraft carriers; 78 destroyers, not "over-age"; 14 destroyers "over-age"; 14 light mine layers; 4 mine layers; 7 mine sweepers; 70 submarines, not "over-age"; 13 submarines "over-age"; 25 eagles; 24 submarine chasers; 5 gunboats; 8 river gunboats; 3 converted yachts; 8 destroyer tenders, y submarine tenders; 2 aircraft tenders; 2 repair ships; 4 tenders; a aircraft tenders; 3 repair ships; 5 store ships; 5 collers; a pollers; a annumition ships; 6 cargo ships; a transports; a hospital ships; 34 tugs; 6 submarine rescue vessels; 8 miscellaneous auxiliaries, and 28 unclassified vessels.

On the above-mentioned date there were under construction: 7 heavy cruisers, x aircraft carrier, 3 submarines and x destroyer. In addition to the foregoing new construction, there have been authorized. 8 cruisers; xx destroyers , z Neff submarine ; and z transport, the construction of which has not been begun.

Information as to characteristics, costs, &c. available for publication concerning naval vessels mentioned above, may be found in the Ships' Data Book. EDUCATION.

EDUCATION.

State School Systems, 1927-1928.

In 1927-28 the total number of children in the United States 5 to 17 years of age was 30,827,167, of whom 25,179,656 (12,703,525 boys and 12,476,172 girls) were enrolled in public elementary and secondary schools, and (1927-28) 2,755,913 were enrolled in private elementary and secondary schools, and in private commercial and business schools. The average daily attendance in the public schools was 20,668,353, the average length of school term was 1715 days, and the average number of days attended by each pupil enrolled was 1604 days. In 1027-28, 831,024 teachers (138,193 men and 693,741 women) were employed. The average annual salary of all teachers was \$z,364. The total number of buildings used as school houses was z54,7z6, and the estimated value of all public school property

was \$5,486,938,599.
The total money received for school purposes, The total money received for school purposes, excluding balances on hand, was \$2,324,707,994.

Of this amount, \$36 390,797 was received from permanent school funds and from the rent of school lands, \$308,394,72 from State taxes or State appropriation, \$1,600,316,452 from all other sources, State and local. The total payments, excluding payments of bonds, were \$2, 184,336,538. This amount includes expenditures for sites, This amount includes expenditures for site-buildings, furniture, libraries and apparatus, \$382,996,156; for salaries of superintendents, supervisors, principals and teachers, \$1,207,046,110; and for all other purposes, \$594,294,372.
Compulsory Attendance Laws, 1922.
Every State in the Union has a compulsory

school attendance law. In general, children are obliged to attend school from 7 to 14 years of age, and those from 14 to 16 must attend school or secure employment certificates. The required attendance each year varies from eighty days in two States to the full term in thirty-six States. In all States there are, connected with the local administrative units, officers charged with enforcing the compulsory attendance law, known in the majority of States as the truent or attendance officers.

Universities, Colleges and Professional Schools,

1927-28.

Of the x,076 universities, colleges, and professional schools, 256 are public institutions and 850 under private control or management. The total number of instructors in both private and public institutions was 67,209 (25,263 men and 14,946 women). The public institutions enrolled 347,537 undergraduate and graduate students (220,272 men and 128,265 women). The private institutions enrolled 571,844 undergraduate and graduate students (343,972 men and 129,872 women). In general engineering, 3,042 students were enrolled; in chemical engineering, 4,948; in civil engineering, 12,502; in electrical engineering, 15,782; in mechanical engineering, 120,434; and in mining engineering, 1,545.

The total number of baccalaureate degrees conferred in 1297-28 was 83,056 (45,012 men and total number of instructors in both private and

The total number of baccalaureate degrees conferred in 1929-28 was 83,065 (45,912 men and 37,183 women); altogether 13,834 graduate degrees were conferred (8,976 men and 4,855 women); 1,845 honorary degrees were conferred. The schools of theology enrolled 13,642 students and reported 1,232 graduates; law schools, 42,664 students and 8,652 graduates; schools of medicine, 21,427 students and 4,342 graduates; schools of dentistry, 9,282 students and 2,725 graduates; schools of pharmacy, 11,125 students and 2,465

graduates; and schools of veterinary medicine, 612 students and 138 graduates. Teachers' Colleges and Normal Schools, 1929–30.

In 1939-30, 33x teachers colleges and normal schools reported to the United States Office of Education. These schools are chiefly concerned with the training of elementary teachers. of this number 23 are public institutions, and 58 are private institutions; 140 are teachers colleges, 134 are public, and 6 are private institutions (schools granting a degree after four years' work beyond high school); 66 are State normal schools; as are city normal schools; 47 are county normal schools; and 52 are private normal schools. The total number of instructors in all teachers colleges and normal schools was 14,473. The total number of students enrolled was 279,195 (60,935 men and 218,250 women). Of this total eurolment, 264,257 students are in nor-mal training courses. The number of graduates from the normal training courses was 1,038 men and 42,289 women, making a total of 49,227. x1,073 bachelor's degrees were also conferred, 3,569 on men and 7,464 on women. Practice or model schools are usually operated in connexion with these normal schools, or the public schools are used for this purpose. The total enrolment in these model schools, so far as reported, was 90,601. The total receipts for normal schools (1929-30) were \$69,983,932 The total number of volumes in the libraries was 4,055,076.
Nurse Training Schools, 1928–27.

The number of nurse training schools has increased very rapidly since 1900. At that time 432 schools reported to the Bureau of Education In 1926-27 the number of such schools tion In 1936-27 the number of such schools reporting was 1,797. The number of pupils enrolled in these schools in 1926-27 was 77,768 and the number graduated 18,623. Of the schools reporting, 75 are in hospitals for the insane. The capacity of the hospitals in which all nurse training schools reporting are located, is 359,077 beds, and the average daily number of patients is pouls, and the strange unit runnier to patients a 175,194. In 1955-27 a large majority of schools required a minimum age requirement for admission of only 18 or 19 years. In general hospitals 954 schools required 8 hours of duty daily, 366 schools required a hours of duty, and say schools required to hours of duty. In hospitals for the manne, the number of hours of duty required was usually ze or more. Thirty schools required 12 hours of duty, and none required more than 12 hours.

The remuneration granted the pupils in general hospitals is usually less than \$200. In the first year 46'9 per cent. of the schools pay under first year 46'9 per cent. of the schools pay under \$100, and 47'4 per cent. pay from \$100 to \$109; in the second year 36's per cent. pay from \$100 to \$100 year 100 y second year of the course 63 6 per cent. of the schools pay \$400 or over; in the third year of the course 72.4 per cent. of the schools pay \$400 or more.

More than 85 per cent. of all the nurse training schools in general hospitals offer a three-year course. About to per cent, offer a two-year or two-and-one-half year course. In hospitals for the insane, more than 86 7 per cent. of the

schools offer a three-year course, and the remaining schools offer a two-year course. ing schools offer a two-year course. 32:2 per cent. of the general nurse training schools require one year of high school work for admission, 3: 2 per cent. require two years of high school work for admission, 32 8 per cent. require a full high school course, and 2 3 per cent. require only the completion of the elementary grades for admission.

Of the nurse training schools reporting, 180 are affiliated with colleges or universities. By this co-operation an excellent opportunity is afforded to the training schools to secure for their pupils a high type of instruction in technical and academic subjects.

Public High Schools, 1927-28.

Public High Schools, 1927-28.

In 1927-28. 8,176 public high schools reported to the Bureau The total number of teachers in these secondary schools was 182,637 "(64,931 men and 177,706 women). The total number of pupils enrolled in these schools was 3,324,473 (1,595,656 byes and 7,755,868 girls). The total number of coloured pupils included in the preceding furus is 55 cm. In the first year of the ceding figures is 96, 107. In the first year of the course 1,212,823 pupils were enrolled, in the course 2,212,823 pupils were enrolled, in the send year 96,123,12 pupils, including post-graduate and special pupils. In the 7th and 8th department of the pupils of the pupils of the pupils of the pupils of the pupils of the pupils of the pupils. and 8th elementary grades organised as a part and son connected grades organised as a part of junior high schools, 86a,840 pupils were enrolled. The number of graduates reported was 474.736 (210,916 boys and 263,820 girls).

There were 11,555 regular high schools that reported a four-year curriculum. In these fouryear high schools there are 2,794,254 pupils enrolled (1,050,287 boys and 1,143,667 gulls). In addition, there are 1,402 junion high schools, with 839,388 pupils (418,230 boys and 421,168 girls); 3,429 jumoi-senior high schools, with 741,944 pupils (351,572 boys and 390,373 gills), and 494 sonior high schools, with 379,518 pupils (181,503 boys and 198,015 gills).

Private High Schools and Academies, 1929-30.

The number of pupils in private high schools The number of pupils in private high schools and academies, in general, has increased slowly but steadily. In 1900 the number of students enrolled in these schools was 110,797. In 1920 the number enrolled was 269,249 The number of schools reporting in 1900 was 1,978, and the number reporting in 1930 was 2,760. The total number of instructors in these private high schools in 1920 30 states 2,77 men and 13 426 women). In this group of schools, more than

Includes 7,305 men and 24,634 women teachers in junior high schools

any other, there is a tendency for the schools to be either for boys or girls exclusively, rather than co-educational. Of the schools reporting in 1930, 504 were for boys only, 873 were for girls only. Altogether, 116 of the schools had military drill in 1938, enrolling 16,528 students.

VESSELS ENTERED AND CLEARED AT UNITED STATES PORTS.

The following figures compiled by the U.S. Bureau of Foreign and Domestic Commerce at Washington, show the total tonnage of American and foreign vessels entered and cleared at U.S. ports in the foreign trade, by fiscal years.

Year.	American.	Per Cent	Foreign.	Per Cent.	Year	American	Per Cent	Foreign	Per Cent.
1906 1907 1908 1909 1910 1911 1912 1913 1914 1915 1916 1917	15,193,#33 16,908,434 17,263,189 17,697,062 29,496,233 22,960,665 27,018,368 27,470,703 26,693,736 35,829,742 38,489,763	22 22 22 22 23 25 26 26 26 29 34 37 42	5a,746,676 56,404,100 59,92a,457 59,991,430 62,244,602 65,665,503 69,674,418 74,772,764 79,101,818 66,901,818 68,143,163 64,678,78a 5a,980,156	78 78 78 78 78 77 75 74 74 72 66 63 58	1919 1920 1921 1922 1923 1924 1925 1926 1927 1938 1939 1930	41,020,746 55,230,879 67,946,336 59,756,486 61,293,398 58,315,580 57,733,000 53,774,000 58,264,019 59,210,640 65,565,560 64,233,112 59,007,223	44 51 49 48 46 43 42 38 37 39 39 39	51,845,602 53,253,160 70,124,833 63,159,852 72,195,133 77,285,020 81,135,020 85,922,000 101,257,442 23,312,098 100,447,527 100,679,327 96,519,327	56 49 51 58 54 57 58 60 63 61 61 62 62

The lowest American percentage was 19 in 1880, 1881 and 1882, the highest was 91 in 1885.

PRODUCTION AND INDUSTRY.

Agriculture.—The total land surface, excluding Island possessions and Alaska, is 1,903,216,640* Island possessions and Alaska, is 1,903,210,640-acres, of which in 1925 264,219,352 were farms (200,027,400 acres improved). The total number of farms in 1928 was 6,371,640, of which 2,326,125 are between 100 and 500 acres, 1,421,095 between 50 and 100 acres, and 1,450,643 between 20 and 50 acres. The gross value of farm products of the United States in 1928 was \$15,881,705,000, as compared with \$16,050,352,000 in 1927. Crops in 1928 were valued at \$9,726,822,000, live-stock products (including animals sold or slaughtered) at \$6,154,884,000

The gross value of the principal crops was as under in 1918 and 1929:--

-	Gross Value		
Crop.	1926	1989.	
Corn (Maize)	\$2,384,784,000	\$2,031,041 000	
Wheat	914,985,000	855,034,000	
Oats	597,133,000	53 z,864,00 0	
Barley	205,045,000	167,358,000	
Cotton Lint	1,302,110,000	1,231,373,000	
,, Seed	226,876,000	200,675,000	
Tobacco	277,506,000	285,583,000

Leading Industries (Ranked by Value of Products) in Principal Industrial Cities for 1927.

New York.—Clothing; Printing and publishing; Fur goods; Bread and other bakery products; Slaughtering and meat packing; Millinery; Sugar refining; Electrical machinery, apparatus, and supplies; Manufactured gas, illuminating and heating; Tobacco.

Illuminating and neating; 100acco.
Chicago.—Slaughtering and meat packing;
Printing and publishing; Clothing; Foundry and
machine-shop products; Electrical machiners,
apparatus, and supplies; Steel works and rolling mills; Bread and other bakery products.

Philadelphia.—Textiles; Printing and publishing; Clothing; Sugar refining; Electrical machinery, apparatus, and supplies; Bread and other bakery products; Petroleum refining.

Detroit.—Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Printing and publishing; Brass, bronze, and copen preducts; State by the state of the product of the products; State of the product of the products; State of the products of the products; State of the products of the products; State of the products of the prod per products; Slaughtering and meat packing.

Cleveland —Steel works and rolling mills; Motor vehicles, not including motor-cycles; Motor vehicle bodies and motor vehicle parts; Foundry and machine-shop products; Electrical machinery, apparatus, and supplies; Clothing.

St. Louis.—Motor vehicles, not including motor-cycles; Slaughtering and meat packing; Printing and publishing; Boots and shoes, other than subber; Clothing.

Baltimore -Smelting and refining, copper; Clothing; Sugar refining; Petroleum refining; Slaughtering and meat packing; Tinware: Printing and publishing.

Buffalo. - Flour and other grain-mill products: Motor vehicles, not including motor-cycles; Slaughtering and meat packing

Milwaukee.-Motor vehicle bodies and motor vehicle parts; Motor vehicles, not including motor-cycles; Foundry and machine-shop products : Knit goods : Boots and shoes, other than

rubber; Slaughtering and meat packing; Electrical machinery, apparatus, and supplies. Boston.—Printing and publishing; Clothing; Sugar refining; Confectionery; Boots and shoes, other than rubber; Cutlery and edge tools; Boot and shoe cut stock, not made in boot and shoe factories; Foundry and machine-shop products; Bread and other bakery products.

Los Angeles. — Petroleum refining; Motion pictures, not including projection in theatres; Printing and publishing; Slaughtering and meat packing; Foundry and machine-shop products; Bread and other bakery products; Clothing;

Lumber—planing-mill products.

Pittsburgh.—Steel works and rolling mills Bread and other bakery products; Foundry and machine-shop products; Printing and publishing; Iron and steel (blast furnaces); Slaughter-

ing and meat packing; Canning and preserving.

San Francisco.—Printing and publishing;
Coffee and spice, roasting and grinding; Sugar refining; Tobacco; Canning and preserving; Slaughtering and meat packing.

Motor Vehicle Industry.—The value of the complete passenger cars and business vehicles manufactured in 1927 was \$2,445,470,066; of parts and accessories, \$x,xxx,862,378, and of tyres and tubes \$774,055,051. The number of complete passenger cars produced was 2,826,274 complete passenger cars produced was 2,826,274 and of complete husiness vehicles 321,272, while 64,362,497 tyres and 70,825,455 inner tubes were also manufactured in 1927. The factories gave employment to 363,399 wage earners, who received \$5612,955,651 in wages in 1927. The number of motor vehicles registered in 1928 in the U.S.A. was 24,493,124. The gasoline produced in 1928 amounted to 15,847,686,000 gallons, and that consumed to 12,847,686,000 gallons, and that consumed to 12,847,686,000 gallons, and that consumed to 12,847,686,000 gallons, and that consumed to 12,847,686,000 gallons. sumed to 13,810,044,000 gallons. The taxes levied on motor vehicles by the Federal, State, and Municipal Governments in 1928 amounted to \$807,887,967. The number of motor vehicles \$807,887,967. The number of motor vehicles (including chassis) exported in 1928 was 515,762, not including 66,969, shipped as "parts for assembly.

PUBLIC ROADS.—On Dec. 31, 1930, the total length of public roads was 3,009,056 miles, approximately 693.559 miles of which were surfaced toads. In 1930 the total expenditures for highways were approximately \$1,680,493,095.

highways were approximately \$x,000,493,095.
SHIPPING.—On June 30, 1931, the mercantile marine of the U.S. (vessels of 500 gross tons and over) consisted of 383 sailing vessels of 528,921 gross tons; 1,882 steam and motor vessels of 9,509,536 gross tons, a total of 2,265 vessels of 10,522,457 gross tons. In the year ended June 30, 1931, sailing and steam vessels of 79,584,565 tons entered at the various ports of the U.S.; of this total 29,607,130 tons were American and 49,977,126 tons foreign. The tonnage cleared from the various seaports was 77,042,285, of which 29,400,684 tons were American and 48,542,201 tons foreign.

POSTS AND TELEGRAPHS.—On June 30, x930, there were 49,053 post offices in the U.S. handling x7,887,882,94 "pieces" of mail matter, of which amount 27,533,372,000 were domestic and 354,450,374 foreign. The telegraphs and telephones are not operated by the U.S. Government.

WEIGHTS, MEASURES AND CURRENCY.

The Weights and Measures in common use are shown on page 490. The Metric System of Weights and Measures is permissive, but is little used. The unit of currency is the dollar of 100 cents. The rate of exchange will be found on p. 478.

INDIAN POPULATION.

In 1930 the enumerated and estimated Indian population of the United States, exclusive of Alaska, was 340,54x by blood (Oklahoma containing 122,884, Arizona 47,073, New Mexico 28,213, S. Dakota 23,726, California 19,197, Montana 14,238, North Dakota 10,707, Asahington 12,577, Wisconsin 11,705, and Minnesota 15,767, and the 38 remaining States less than 10,000 each). Total disbursements authorised

for the fiscal year ended June 30, 1932, for Indian Service are \$3,752,400. In addition to this the sum of about \$5,000,000 is to be paid over to the Indians from receipts for oil and other leases, interest on trust funds, &c. The total wealth of U.S. Indians under the nominal control of the Indian Bureau on June 30, 1928, amounted to \$1,716,815,123, of which \$920,106,335 was tribal, and \$796,708,737 individual.

RECLAMATION.

Commissioner, Elwood Mead, Interior Dept. Building, 19th and F. N.W., Washington, D.C. Employees: Washington Office, 55; Field, 1,500 to 3,000. Expenditure per year about \$10,00,000. The Bureau of Reclamation was organised as a

The Bureau of Reclamation was organised as a bureau of the Interior Department, under the Reclamation Act of June 17, 1902. It is engaged in the investigation, construction and operation of irrugation works in 15 arid and semi-arid States of the far West. Twenty-seven projects, comprising about 3,000,000 acres, are under construction or operation, and the major works aid in serving an additional 1,500,000 acres under private canals purchasing stored water from the government reservoirs. The funds for this work have come chiefly from repayments by the water usors, from oil leasing and other mineral operations, and from the sale of public lands. The money expended is returned to the fund by graduated payments of settlers.

The Bureau has built x7,467 miles of canals, ditches and drains (including x65,437 canal structures), involving the excavation of 293,105,859 cubic yards of materials. In concretion with this work there have been contructed 120 storage and diversion dams with an aggregate volume of 28,688,256 cubic yards including the Arrowock Dam (340 feet high), Idaho, on the Boise River, and the Riephant Butte Dam (306 feet high), New Mcxloo, on the Rio Grande. The Bureau has built x3s tunnels, x,45x miles of road, x17 miles of railroad, 4,000 miles of telephone line, 37 power plants, and 3,356 miles of telephone line, 37 power plants, and 3,356 miles of telephone lines. It has manufactured over x2 millon barrels of cement and sand cement. The construction cost to June 20, 2011, was \$866,648,352.

June 30, 1931, was \$206,041,522.

Nearly 650,000 persons are living on the 40,354
farms irrigated by the Bureau, and in the project
towns and cities. Of the 3,000,000 acres above
referred to, 1,504,810 acres were irrigated and
1,550,967 acres were harvested in 1931, producing
crops worth \$65,007,270, or an average of \$41.00
per acre. The 1,364,403 acres of additional lands
using stored water yielded crops worth \$54,654,550

Public land farm units on the several projects are opened for settlement from time to time as canals are extended to make irrigation water available. Under present law, soldiers and sallors of all wars have a preference right of 90 days to enter these farms.

go days to enter these rarms.

Information in regard to farms available for settlement may be obtained by addressing, Commissioner, Bureau of Reclamation Dept. of the Interior, Washington, D.C.

The Bureau issues the "New Reclamation Era,"

The Bureau issues the "New Reclamation Era," an illustrated monthly publication, containing articles of interest to urigation farmers and engineers, and numerous settlement and other booklets. An annual report is also issued, and other publications from time to time, relating to various phases of the work.

An engineering library of about 6.000 manu-

descriptions of the construction and operation of the projects, with numerous photographs and maps, plans, specifications, cost data and results of original experimental investigations, and is available for consultation by those interested. The bureau also maintains a photographic file of about 40,000 negatives of scenes on the projects from the beginning of construction through the period of settlement and development

GOVERNMENT PRINTING OFFICE.

North Capitol and G Streets, Washington, D.C. The Government Printing Office of the United States was established by Congress in x860 and has been in continuous operation since that time. The buildings have a floor space of as acres, and together with the machinery and equipment which they contain, represent an expenditure of approximately \$10,100,000. The annual cost of operation and maintenance is over \$14,000,000. There are over 4,900 persons annually employed in the various divisions of the office at a total yearly compensation of \$10,000,000. In addition to doing all of the printing and binding ordered for Congress, the office executes all the punting and bind-

script and printed volumes on the subject of ing required by the various executive depart-irrigation is maintained in the Washington ments and independent establishments of the office of the Bureau. This library contains U.S. Government. The office has the largest ments and independent establishments of the U.S. Government. The office has the largest battery of type-setting machines in the world, including 174 linetype machines, a Ludlow, a material casters, 100 monotype key-boards and 130 monotype casting machines, which produced about 3,470,000,000 ems of type in fiscal year 1932. The 182 presses of the office are credited with 2,470,000,000 chargeable impressions, not including axa,000,000 on money order forms and z,485,000,000 on postal cards. During the year the office handled approximately 80,000 separate jobs. In addition to the execution of all kinds of printing and binding, this office produced 11,438,000 square inches of electrotypes and stereotypes, and 721,000 square inches of half-tones and linecuts, supplied blank paper to other Government establishments at a cost of \$633,000, and manufactured its own printing and writing inks, rollers, glue, type and type metal, some of these supplies being furnished to various branches of the Government, It also has one of the largest industrial cafetorias and recreational rooms in the United States.

Public Printer, George H. Carter, Iowa. \$10,000 Deputy Public Printer. John Greene, Mass. 7,500 Production Manager, Elwood S. Moor-

head, Pa.

COTTON REPORT AS OF JULY 1, 1930.

The Crop Reporting Board of the United States Department of Agriculture, from the reports and data furnished by crop correspondents, field statisticians, co-operating State Boards (or Departments) of Agriculture and Agricultural Colleges, makes the following estimate of cotton acreage in cultivation on July 1, 1930.

U.S. Acreage in cultivation compared with last year, 97'3 per cent.

U.S. Acres in cultivation, Total, 45,815,000 acres.

Estimate of Cotton Ac

THE PHILIPPINE ISLANDS

are situated between 4° 40'-21° 10' N. lat. and 116° 40'-126° 34' E. long., and are distant about 500 miles from the south-east coast of the continent of Asia. Their total land area is 114,400 square miles, of which total 103,288 square miles are contained in the eight largest islands, the are contained in the eight largest islands, the roots is the rislands having a combined area of 12,112 square miles. At the Ceusus of 12,8 the population was ascertained to be 10,214,310,310 of 3 lalayan stock, of whom (in 1288) 8,724,955 are Roman (atholic, 4,000,000 are Aglinpaya 200,000 are Protestant, (and 1288) 443,037 are Muhammadan, 508,506 are Pagan, 24,253 are Buddhists, and all others 5,454. Of the foreign-born residents about three-quarters are Chinese, and of the white rownleton over one-half are and of the white population over one-half are from the United States (6,93x in 1921). The Philippine Islands were discovered in 1921

by the Portuguese navigator Magellan, who was slain by the natives of Mactan. In 1565 vas simil by the harves of American. In 1925, and under took the conquest of the islands, which were named "Filipinas," after the son of the King of Spain, and in 1971 the city of Mainla was founded by the conquistador Legaspi, who subdued the inhabitants of almost all the islands, their conversion from barbarism and paganism being undertaken by the Augustiman frars in Legaspi's train In 1762 the capital of the Spanish colony was occupied by a British force, but in 1764 the newly-acquired territory was restored to Spain. In the nineteenth century there were frequent disturbances in the Islands, and at the outbreak of the Spanish-American War of 1898 a rebellion under Aguinaldo, a native leader, had just died down. Aguinaldo was deported, but on his return his assistance was accepted by Admiral Dewey, the commander of the American Pacific fleet, after the annihilation of the Spanish vessels in Manila Bay on May z, 1898. Manila was captured by the American troops under General Wesley Merritt on Aug. z3, 1898, and the Islands were ceded to the United States by the Treaty of Paris of Dec. zo, 1898. On Aug. 3z, 1938, the Philippine Scouts, which form a part of the United States regular Army, commented of 88 officers and 6 23c enhisted men. On on his neturn his assistance was accepted by

consisted of 88 officers and 6,239 enlisted men On the same date the regular Army in the Philippines (other than the scouts) consisted of 512 pinies (other than the secouts) Consisted of 527 officers and 3,788 enhisted men, many of these officers being on duty with the scouts. The Philippine constabulary, which is under the Philippine Goveniment, in Oct., 1928, consisted of 327 officers and 6,172 enlisted men. All enlisted men in the scouts and constabulary are natives of the Islands, while almost all the con-

natives of the Islands, while almost all the con-stability commissioned personnel are Flipinos. In 1927 the income of the Philippine Govern-ment was \$39,842,988 and the bonded indebted-ness \$74,800,000. The expenditure on education in 1927 amounted to \$13,809,753 for public schools only; the University had an enrolment of 7,533 students, and there were 1,099,366 pupils eurolled in the public schools. The principal eurolled in the public schools. enrolled in the public schools. exports are sugar, abaca (Manila Hemp), coconut oil, copra, tobacco, embroideries, desiccated coconut, lumber and timber, copra meal and maguey; the imports being cotton and its manufactures, iron and steel and their manufactures, mmeral oils, meat and darry products, automobiles and accessories, wheat flour, silk and its manufactures, paper and its manufactures and coal.

Total Imports..... ... \$146,326,850 160,119,397

Exports to U.S. 128,375,678

Towns.—Capital, Manila, in the island of Luzon; population (1928), 324,522. The next largest towns are Cebu (86,154), Legaspi (32,670), Iloilo (67,147), and Zamboauga (47,305); there are several others with populations from 25,000 to

Governor General, Col. Dwight F. Davis, assumed office at Manila, July 8, 1929

Guam, the largest of the Ladrone or Marianne Islands in the North Pacific Ocean, lies in 13° 26 N. lat. and 144° 39' E long., at a distance of about 1,506 miles east of Manila, the capital of the Philippine Islands, and forms a naval station between that dependency and the United States. The area of the island is United States. The area of the Bianu is estimated at ass square miles, with a population of so,857, of whom 19,571 are classed as native, 485 of the naval station, and 761 other than native. The natives are of Chamorio stock, mingled with Filipino and Spanish blood. The language is a Malay dialect containing many Spanish words, but English is fast becoming the language of the island

CAPITAL, Agana. Port of entry, Apra.

WAKE AND MIDWAY ISLANDS.

Wake Island, annexed in 1898, has an area of about 1 sq. mile and lies in the N. Pacific about 2,000 miles from Hawaii on the direct route to Hong Kong

Midway Islands, with a total area of 28 sq. miles and a population (1930) of 35, he in the N. Pacific about 1,200 miles from Hawaii The group is administered by the U.S. Navy Dept.

PORTO RICO.

Porto Rico (Rich Harbour) is an island of Forto Ree (anen mailed); an island of the Greater Autilies group in the West Indies, and lies between 17° 50° 18° 30′ N lat and 65° 30° 65° 25′ N. long, with a total area of 3435 square miles and a population of 1.543.923 at the census of 1930. Three fourths of the population are of Spanish descent and about one fourth coloured. The island is about 200 miles from west for each and to pulse from one fourth coloured. The island is about roo miles from west to east, and 40 miles from north to south at the western end, narrowing towards the eastern extremity. The capital is 1,400 miles distant from New York, and 98a miles from Key West. Porto Rico was discovered in 1493 by Christopher Columbias. It was explored by Ponce de León in 1508, and he was made Governor of the island in 1508, and he was made a Spanish pressured. 1509. It continued a Spanish possession until Oct. 18, 1898, when it was ceded to the United States as a result of the Spanish-American War. Sugar is grown in the low-lying districts, and tobacco and coffee on the slopes of the hills; fruits, cotton, maize, sweet potatoes, rice, and yains are also grown. The trade is principally with the U.S. About 344 miles of railroad were in operation in June, 1931, and there are good harbours at San Juan and Ponce. The legislative functions are vested in a legislature which consists of elective houses; the Senate, composed of 19 members (a from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (x from

each of the 2s representative districts and 4 elected at large). The term of the Lexislature is 4 years. The Governor is appointed by the President of the U.S. and holds office at the pleasure of the President. A Supreme Court of 5 members is also appointed by the President. There is a Cabinet composed of 7 heads of Departments, two appointed by the President and five by the Governor. The Governor also appoints all inferior judges. Great improvement has been made in the progress and welfare of the Island made in the progress and welfare of the Island during the present century—the Island is selfsupporting, free public schools are established throughout, a system of good roads reaches every important city and town, public buildings are attractive and well built, health and sanitary measures are in force. The capital, San Juan, had ira,715 inhabitants in 1930, other towns being Ponce (53,493), Mayaguez (37,605), Arecibo (12,863), Bayamon (12,936), and Caguas (19,791).

TUTUILA, AMERICAN SAMOA.

American Samoa consists of the island of Tutula, Aunuu, Ofu, Olosega, Tau, and Rose Islands, with a total area of about 56 square miles and a population of x0.055 in x930, distri-buted (x930) as follows:—Tutuilla and Aunu'u, 7,809: Tu'u, x,243; Olosega, 4,28, Ofu, 466, Rose laland, uninhabited; and Swam's Island (annexed

May 13, 1925), 99.

Tutula. the largest of the group, has an area of about 40 square miles and contains a magnifi-cent harbour at Pago Pago, the capital and seat of government. The remaining islands have an area of about 16 square miles. Copra is the only

export of importance.

VIRGIN ISLANDS.

VIRGIN ISLANDS.

The three islands, St. Thomas, St. John, and St. Croix, in the Virgin Island group, West Indies, formerly the possessions of Denmark, were purchased by the United States from Denmark for the sum of \$25,000,000, and proclaimed, January 25, 207. The total area of the islands is 123 8Q miles, with a population in 1230 of 25,012. St. Thomas (28 8Q miles) has a population of 25, the Coix (24 8Q miles) has a population of 25, the capital being Christianstad (or Bassin); St. John (25 44; miles) has a population of 755, the capital being Cruz Ray. St. Croix exports sugar; St. Thomas is famous for its bay rum. for its bay rum.

CAPITAL, St. Thomas, contains one of the fluest harbours in the West Indies, accommodating vessels of large draught, and has a large coaling and oil refuelling station. The climate of the Virgin Islands is delightful at all times, and particularly so during the winter months. Governor, Paul M. Pearson.

Government Sec., Boyd J. Brown.

THE PANAMA CANAL

The administrative organisation for the canal is known as "The Panama Canal." Its headquarters are at Balboa Heights, Canal Zone, with the Governor of the Panama Canal (Colonel Harry Burgess, U.S.A.) at its head. The first suggestion for a canal across the

Isthmus of Panama was made by a Spanish engineer in 1336, and surveys were actively engaged upon by various private companies between the years rates and 1850. In 1876 a concession for the construction of a canal was granted to a Freuch promotion corporation, which conducted surveys during a period of two years, and reported to an international congress held at Paris in May, 1879, over which Ferdinand is at 85 feet above sea-level varies from 85 feet

de Lesseps presided. This congress advised the construction of a canal at sea-level, and in 1881 the work was undertaken by the Universal Interoceanic Panama Canal Company, of which de Leseeps was nominal head. The amount of work to be accomplished proved to be greater than was estimated, and resulted in the failure of the company, a receiver being appointed in of the company, a receiver being appointed in 1889. A new company was formed to carry on the work, and excavation was resumed in 1894. This was continued until May 4, 1994, when the United States Government took possession of the effects of the French company in Panama.

Congress authorised the President in roos to purchase the effects of the French company for S40,000,000. Meanwhile, a treaty was negotiated with the Government of Colombia for the cession, upon payment of \$20,000,000, of the cession, upon payment or \$35,000,000, of the territory through which the canal was to be constructed. The failure of the Colombian Government to ratify this treaty led to the secession of Panama on November 3, 303. The new Government was immediately recognised by the United States, and a treaty was signed on February 26, 2504, in which rights of sovereignty over a strip of land ten miles in width, extending across the Isthmus, were ceded to the United The canal is built through the centre of this territory. In reas a treaty between Colombia and the U.S. provided for the payment to Colombia of \$25,000,000 in satisfaction of all claims arising out of the Canal controversy The independence of Panama was recognised by this treaty

Including the purchase of rights, payments to Panama, and construction and operation of the canal and its adjuncts, the total appropriations by Congress to June 30, 1931, were \$532,387,285. The net revenue from tolls and other revenues (including business operations), to June 30, 1931, aggregated \$151,636,478.

The Canal was opened to commercial traffic Aug. 15, 1914, and was closed from Sept. 18, 1915, to April 1st. 1916

1931	5,527	27,792,246	25,082,800

The canal is fifty statute miles long (44 o8 nautical miles), and the channel is from 300 to 1,000 feet wide at bottom. It contains 12 locks, 1,000 feet wide at bottom. It contains 12 locks, and transt from sea to sea occupies 20 to 12 hours (passage through locks 5 hours). The least width is in Culebra Cut, and the greatest in Gatun Lake, where the channel can be made much broader at any time by the cutting down of trees and a small amount of dredging. The water depth when the surface of Gatun Lake is at 28 foot shows assalated varies from 25 feet.

ARYSSINIA or ETHIOPIA.

Emperor, His Imperial Majesty Haili Sellassic I. Ras Makonnen, Governor of Harar); born 1891; crouned as Negus Oct. 1928; proclaimed Emperor April 2, 1930; crowned Nov. 2, 1930.

Crown Prince, H.I.H. Prince Asfa Wosan, eldest son of the Emperor, born July 27, 1016. Minister in London, Bajirond Zellaka. Aguedlou. Legation. 83 Elm Park Gardens, S.W. 10.

The area of Abyssinia and its dependencies is estimated at 350,000 square miles, with an estimated population of zo to zz millions, of whom less than one-half are Abyssinians and the remainder Gallas, negro tribes on the west and south frontiers, and Danaklis and Somalus on the east. The political neighbours are the Sudan, the Italian colony of Eritrea, French Somaliland, Buttah Somaliland, Italian Somaliland, Kenya Colony and the Uganda Protectorate.

Abyssinia is volcanic and mountainous. contains some mineral wealth; from and coal are not uncommon, and gold is washed in various streams, while mica, platinum, salt, saltpetre, and sulphur are also procurable. lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, rubber, &c., fleurish; in the cane, cotton, coffee, rubber, &c., fleurish; in the middle zone maize, wheat, barley, wild oranges and other fruit trees, tobacco, potatoes, &c., are cultivated; and above &c., coo feet are excellent patures with some corn cultivation. There are two seasons in the year, a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, oxen. coats, and sheep, and camels in the lowoxen, goats, and sheep, and camels in the low-

lands, form a large portion of the wealth of the people.

The Abyssinians are Christian (a branch The Abyssinians are Christian (a branch of the Coptic Church), and their nulers claim descent from Menelek, the ron of Solomon by the Queen of Sheba. The government is nominally an autocracy, but the Emperor's power does not yet extend throughout the country There is very little popular literature, but education shows signs of progress. In addition to foreign mission schools, there are no abpressing according to the country of which addition to foreign mission schools, there are no Abyssinian schools in the country, of which 4 are in Addis Ahaba. The potential army numbers between 600,000 and 1,000,000. The principal pursuits are agriculture and cattle breeding, the chief exports being coffee, civet, wax, hides, rubber and gold. The import duty, wax, indes, ruioer and gold. The import dusy, except for non-spirituous liquors and for a few articles on the free list, is zo per cent. ad valorem; there are certain consumption taxes collected additionally. A railway, which is under French control, links Addis Ababa, the capital, vid Dire Dawa, with Jibuti, 495 miles away. The Government post and telephone administration is under French management, and the Italian Government have a concession that gives them control of a telegraph line from Addis Ababa to Asmara. The principal towns besides Addis Ababa are Dire Dawa, Harar, Gore, Jinma, Debra Markos (the capital of Gojam), Adua (the capital of Tigré), Gondar, Sayo, Aksum, Autalo, Dembecha and Ijube. There are ancient avehitectural remains at Aksum, Gondar, and Ankoher.

CAPITAL, Addis Ababa (population fluctuates. but is ordinarily about 60,000). Harar, in Eastern Abyssinia, has a population of about

45,000. Total imports (about)£z,500,000 Exports to U.K. 1930 (about) FLAG: Green, red, yellow. . 30,000

AFGHANISTAN

King of Afghanistan, H.M. Nadir Shah, born 1880, acceded Oct. 16, 1989.

Minister in London, H. E. Sardar Ahmad Ali Khan, 3z Princes Gate, S.W. z.

Afghanistan lies on the N.W. frontier of India. Afghanistan lies on the N. W. frontier of India. Estimated area, ask_soo sq. miles, and pop. 6,380.500. It is bounded on the W. by Persia (boundary fixed x857 and x904), on the S. by Baluchistan (boundary fixed x865-7), on the N. by Asiatic Russia (boundary fixed x886-7 and x893-5), and on the E. by the N.W. Frontier Province (boundary fixed x895). The northern boundary runs from Zulfikar on the Persian Province (boundary fixed 1895). The northern boundary runs from Zulfikar on the Persian frontier to Kushk, the Russian railway terminus on the tranch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamuab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1893. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by mullahs.

Mountains, chief among which are the Hindu Kush, cover three-fourths of the country, the elevation being generally over 4.000 feet. There clevation bung generally over 4,000 feet. There are three great river basins, the Oxus, Helmand, and Kabul. The climate is dry, with extreme temperatures. The population is very mixed The Duranis have prodominated since xy47, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (alonginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu, but Persian is

more universally spoken.

Afghanistan is divided into five major pro-Afghanistan is divided into five major provinces, Kabul, Kandahar, Herat, Turkestan, and Badakshan (with Qataghan, Kafinstan (now Nuristan), and Wakhan), and four minor provinces, the Eastern, Southern, Farah, and Maimena, which are under governors, with subordinate nobles and judges, police, and revenue officers. Amir Abdurralman (1880-1991) established a strong central government, with a regular civil and multivar or resumention. with a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself. Considerable quantities of litles and artillery have been purchased in Europe and the army now consists of about 35,000 to 40,000 regulars. A small Air Force is maintained. Factories for arms and ammunition, and for various commercial products, have been crected in Kabul. The Afghan laws are based on the "Shariat," or Islamic law and tribal custom. Recently steps have been taken to develop education, hitherto controlled by the mullahs. Two schools under French and German superintendence respectively have been opened and a large number of middle and primary schools in the provinces. Most of the people are industrious cultivators, and the country has become fairly settled, eaceful, and prosperous. There are generally peacetul, and prosperous. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and dal. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woollen, and hair cloths and carpets are manufactured. Salt, silver, copper, coal, iron, lead, rubues, lapiz lazuli, and gold are found. The roads are generally unsuitable for wheeled traffic, but are being improved. Goods are conveyed by pack animals. The chief trade routes to India are the Khyber Pass route, from Kabul to Peshawar (sto miles), and the road from Kandahar to

Chaman (70 miles). The Sind-Pishin railway is now completed to the Baluchistan-Persian frontier. The exports to India are mainly fruits and nuts, raw wool, skins and ghi; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being Kussia, cotton and sink goods, sugar, e.c., cerns taken in exchange. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £2,000,000. There are taxes on land, a grazing tax, customs duties, stamps, incs, receipts from State lands, monopolies, and factories, and mining royalties.

As the result of a Butish mission to Kabul in 1904-5 the engagements which had existed with the Amir Abdurrahman since x880 were renewed by the treaty of March 21, 1905. By the Anglo-Bussian Convention of August, 1907, Russia de-clared Afghanistan outside the Russian sphere of influence. The Amir Habibullah Khan was assassinated on February 20, 1919; his brother, Nasıulla Khan, seized the throne by a coup detat and temporarily held the 1ems of government at Kabul, but the Amu's third son, Amanulla Khan, soon after declared himself, and was recognised as King. Alghan troops crossed the Indian frontier on May z, zgzg, on which the Indian Government took immediate steps to expel them; fighting followed and Dakka was occupied by British troops, but overtures were made by King Amanulla and a treaty of peace was signed in August. By this treaty Afghanistan is left officially free and independent. By treaty of Nov 22, 1921, Great Britain and Afghanistan agreed to respect one another's internal and external independence; to recognise boundaries then existent, subject to a slight re-adjustment near the Khyber; to receive Legations at London and Kabul and consular officers at Dellu, Calcutta, Karachi, Bombay and Kandahar and Jalalabad respectively. The Afghan Government import free of customs duty such material as is required for the strengthening of their country. The export of goods to British territory from Afghanistan is permitted without payment of customs duty. A Trade Convention was concluded and Afghanistan adhered to the International Postal and Telegraphic Union. In 1929 Amanulla Khan, whose modernist reforms had brought on him the charge of infidelity, was expelled. After a usurpation of some months by a local free-booter Kabul was captured (Oct. 1929) by Nadir Shah.

CAPITAL, habul (about 80,000). The chief commercial centre is Kandahar (60,000). Other provincial capitals are liciat (30,000), Mazar-i-Sharif (46,000), and Khanabad (5,000).

British Envoy Extraordinary and Munister Plenipotentiary, Sir Richard Roy Maconachie. K B.E., C.I.E. (1929).

119, Finsbury Pavement, E.C. 2 [Met. 8615.] Albania (the former Turkish Province of Scutari and parts of Kossovo and Yanina) lies on the west of the Balkan peninsula of south-eastern Enrope, the western boundary being the Adriatic; total area about rx,ooo to ra,500 sq. miles; total population (Census of r930) x,003,r04. The political neighbours are, on the north and east, Yugoslavia, and on the south-east and south, Greece. Albania was declared independent by a National Assembly at Valona, Nov. 28, 1912, and its independence was confirmed by the Treaty of London of Dec. 20, 1012 The first Treaty of London of Dec. 20, 1912 The first King of Albania (Prince William of Wied) abandoned the throne in Sept. 1914, having been in power only six months, and during the Great War the country was invaded by troops of the Central Powers and of the Allies, and ismained in a state of anarchy. After the Armistice a National Council at Dunazzo established a provisional government, supported by an Italian military occupation of the country. The independence of the country. pendence of the country was reaffirmed and guaranteed by the Supreme Council of the Allies The provisional government was in power until roso, when a revolt overturned it and set up a new government which remained in power until upset by a further revolution in December, 1924. A new Constitution was proclaimed on Jan 2x, A new Constitution was proclaimed on Jan 27, 2025, under which Albania became a Republic under a President (elected for 7 years), with a Council of Ministers, a Senate, and a House of elected Representatives. On Sept. 2, 2928, the Constituent Assembly proclaimed the country a democratic monarchy and offered the crown to Ahmed Bey Zogu, the President, who assumed the title of Zog I, King of the Albamans; the Senate then ceased to exist, and a High Council of State was formed of zo members appointed by the King.

The country is very primitive, agriculture and sheep and goat rearing being the principal industries, and olives and olive-oil, grains and tobacco the principal products; but there is some mineral wealth which remains largely undeveloped. A harbour, under construction at Durazzo to accommodate vessels up to 4½ metres draft alongside in all weathers, is expected to be completed in 1932.

ANDORRA.

A miniature Republic in the Pyrenees, with an area of 175 sq. miles, and a population of 5,500; it is under the joint suzerainty of France and Spain. There is a Council of Twenty-four, elected by certain of the inhabitants, a judge, and two lay vicars appointed by France and the Spanish Bishop of Urgel. ARABTA.

Arabia is a peninsula in the south-west of the Asiatic continent, forming the connecting link between Asia and Africa, and lies between 30° 30' -60° E. long, and 12° 45'—34° 50' N. lat. The north-western limit is generally taken from Akaba, at the head of the Gulf of Akaba, to a Akana, at the head of the Guil of Akana, to a point in the Syrian Desert about 150 miles north-east, and thence northwards to a point about 50 miles due east of Damascus. The remaining land boundaries are in the foun of a house-shoe, encompassing the Syrian Desert, and descending in a south-easterly direction to the descending in a south-easterly direction to the head of the Persian Gulf, and thus excluding the whole of Mesopotamia and the Euphrates Valley. The other boundaries of Arabia are the Red Sea and Gulf of Adeu, the Arabian Sea, and the Persian Gulf and Gulf of Oman. Generally speaking, the peninsula consists of a plateau sloping from south-west to north-east towards the Euphrates Valley, except that the the broad south-eastern promontory, which that the broad south-eastern promontory, which encloses the Persian Gulf, contains a coastal range in the Sultanate of Oman.

The total area is estimated at 1,200,000 sq. miles (of which nearly one-half is occupied by the Syrian, Nafud, and Dahna deserts), and the total population is believed to be about 5,000.000. The various Arab States are shown below:—

THE KINGDOM OF HEJAZ AND NAJD. King of the Hejaz and Najd and its Dependencies (Jan. 11, 1936), H.M. Abdul Aziz Ibn Abdul Rahman el Faisal al Saud, G.C.L.E., born 1882.

Minister in London, Sheikh Hafiz Wahba, 42 Raton Place, S.W. z. (Sloane, 3898.) 18t Sec., Mahmood Riyad Zada. and Sec., Youssof Salama.

In the 18th century Najd was an independent State and the stronghold of the Wahabite sect it subsequently fell under the Turkish yoke, but in 1913 the present King threw off Turkish rule and captured from the Turks the Province of In rost he added to his dominions the territories of the Rashid family of Shammar, which he captured by force of arms, and in 1925 completed the conquest of the Hejaz, and accepted the surrender of the greater part of Asir, the whole of which is now part of the Kingdom.

Najd ("Plateau") has no definite frontiers, but may be said to extend over about 800,000 square miles of Central Arabia, including the Nafud and Dahna Deserts, and reaches eastward to the Persan Gulf (Hasa). The population is largely nomadic and is estimated at 1,275,000 Arabs, negroes and half breeds, the majority being Muhammadans of the Wahabite movement. Muhammadans of the Wahabte movement. There is little agriculture, but wheat and barley are grown; the principal industry is camel and sheep raising. The exports are woven cloaks, dates, live stock, hides and skins. The capital is Rlyadh, and the principal trading centres are llufuf, on the Persian Gulf littoral (30,000), Shaqra, Anaisah, Burada, Hail and Hauta (Cential), which have populations of 8,000 to 10,000. The only ports (Persian Gulf) are Qutifully are suitable only for saling and Ojair, which are suitable only for sailing Riyadh is a station on the Pilgrims trans-Arabian caravan route from Hasa to Mecca, and contains a large mosque, the "Westminster Abbey" of the Wahabites.

The Hejaz extends from Asir in S. to Trans-jordan in N, and from the Red Sea, the Gulf of Akaba in the W. to the ill-defined boundaries of Central Arabia. The coastline on the Red Sea is about 800 miles, and the total area is about xx2,500 sq. miles, with a population of from 350,000 to 400,000, including many nomad tribes. On the coast are the small ports of El tribes. On the coast are the small ports of El Wedl, Yambo, Rabigh and Jeddah (the chief which contains the reputed "tomb of Eve, the mother of mankind"; and inland are many mother of mankind"; and inland are many settlements though which runs the course of the Hejaz Ralway. The Course of the islway, contains a considerable population, descendants of former negro slaves, with a contained the course of the salway, with a settlement of the considerable population. centre at Kasr el Yahudı. The importance of the Hejaz depends upon the pilgrimages to the holy cities of Medina and Mecca. Medina (Al Medina, "The City"), Sao miles by rail from Damascus, and the present terminus of the Hejaz Railway, has a permanent population of about accoo, and is celebrated as the burial place of Muhammad, who died in the city on June 7, 522 (za Rabia, A.H. zz.). The Mosque of the Prophet (500 feet in length and over 300 in breadth) contains the sacred tomb of Muhammad. Mecca, the birthplace of the Prophet, is 55 miles east of the seaport of Jeddah, by road, and about see miles south of Medina, and has a fixed population estimated at 60.000. The city contains the great mosque surrounding the Kaaba, or sacred shrine of the Muhammadan religion, in which is the black stone "given by Gabriel to Abraham," placed in the south-east wall of the Kaaba at placed in the south-east wall of the Aabas at remain difficult of the Aabas at such a height that it may be kissed by the devout pligrum. Jeddah, the principal port, has a considerable trade in hides, mother-of-pearl, Akhdhar an elevation of 10,000 feet. The popucoffee and carpets. The course of the Hejaz lation is chiefly Arab, but includes also a con-Railway runs from Medina in S. through the siderable foreign element—Indians, Persians, Syrian Desert to Damascus and Beirut, and is Baluchis and Swahlli negroes. The Sultan is in

connected with the projected Barlidad Railway at Aleppo.

Asir extends, geographically, from a line drawn inland from Lith on the southern limit of Hejaz to the northern boundary of Al Yemen (about lat. 17° 15' N.) and includes the seaboard down to lat 16°. Its breadth extends about 180 miles eastwards to Bishah in the north and to the boundary of the Beni Yam in the south. According to Arabian geographers, Asır is part of Al Yemeu. The territory includes the Farsan Islands. The maritime lowland is interspersed with feitile areas near the wadis, which afford pasturage and bear grain. The capital is Sabia, a small inland town.

The total cost to the British Government of the subsidies paid to King Ibn Saud during the years 1977 to 1923 is approximately £542,000. No subsidy was paid before 1917 or after 1923, and the subsidy was given in the first instance in consideration of assistance in the war against Turkey. The later p .vments were made subject to the following conditions

o the following conditions —

(a) That Ihm Saud reframed, and restrained his adherents from nggressive action against the Hejaz, kaweit, and Iraq

(a) That he afforded co operation in the matter of the Hia (algrimage to Mecca) by maintaining the safety of pilgrim routes to his territory

(3) That he consented to be guided generally by the wishes of His Majesty's Government in regard to his foreign policy, and to co-operate with them in promoting their own policy, which had for its object the number of peaceful conditions in Alab countries and the promotion of the economic interests of both but tes

No terms of repayment were anggested.

CAPITAL, Riyadh (pop. 20,000).

Pro Consul, Basil W. Seager.

THE PRINCIPALITY OF KUWAIT.

Ruler, Sheikh Sir Ahmad al-Jabir as-Subah, K C.I E , C S.I , acceded March, 1921.

Kuwait (or Koweit) has been semi-independent for many years, and is in treaty relation with British India. It extends along the shore of the Persian Gulf from Mesopotamia to Najd (El Hasa). The important harbour and gulf port of Kuwait, the capital (pop. 60,000), is an entrepôt for goods for the interior, and for the export of horses, pearls, wool, &c. It was designated as the terminus of the Berlin Constantinople-Baghdad lailway as originally projected in 1903.
The tride of Kuwait (1929 30) was valued at 27.1835 for imports, and £182,900 for exports.

Bittsh Political Agent, Lt. tol H. R. P.

Dickson, C I.E.

THE SULTANATE OF OMAN.

Sultan, H. H. Seyyid Sir Taimur bin Faisal bin Turki, K C I.E., C.S.I., born 1886, suc Oct. 5, 1913. Oman (area 82,000 sq miles, estimated pop. 550,000) is a Muhammadan State in S E Arabia with a coast-line of about x,500 miles along the Persian Gulf, the Gulf of Oman, and the Arabian

treaty relations with, and subsidised by, the Government of India, who have a political agent at his capital. In 1923, at the end of the reign of the last Sultan, the tribes of the Interior rose in rebellion, and, having elected their own Imam or Spiritual Ruler, have since administered the whole of Oman proper, the efforts of the Sultan to establish his control having been, up to date, unsuccessful. This rebellion has, with the war, interfered with the prosperity of the country. The Sultan is pledged not to cede territory to any Power but the British Government. Muscat has a considerable trade, amounting in reap-3e to £45,446, and in 1030-31 to £45,275. Dates and dried fish are the chief export, and rice, wheat coffee, cotton and silk goods the chief imports The capital, Muscat (with the sister town of Matrah), has an estimated population of xa.600.

Muscat-British Consul and Political Agent, Maj. T. C. Fowle, C.B.E., per mensem Rs. 2,300.

THE IMAMATE OF YEMEN.

Imam. Yahva Muhammad Hamid-ud-din, born x860.

Yemen occupies the S.W. corner of Arabia between Asir and the Aden Protectorate, with between Asir and the Aden Protectorate, with an estimated area of 74,000 square miles and a population of 3½ millions. I uder Turkish rule, it was divided into the vilayot of Sana, Taiz, and Hodeida, and it extends inland to the borders of the Hadramut. The highlands and contral plateau of Yemen, and the highest contral plateau of Yemen, and the highest portions of the maritime range form the most fertile part of Arabia, where wheat, barley, millet, coffee and oats, are extensively grown. The chief port of Yemen is Hodeida which is noted for the export of coffee, shipped from Hodeida to Masswa and Aden, and thence to Europe. The trade from Yemen perhaps excells that of the nominuler of Arabia. The ceeds that of the remainder of Arabia. Imam is the head of the Zeidi sect of the Shiah Division of the Muhammadan religion; about half of his subjects are Zeidis, the remainder being Shafais, over whom he rules by force majeure alone. On the withdrawal of the Turks from Yemen, the Imam took over occupation of the territory bordering on the Aden Protectorate populated by the Shafai sect of Sunni Muhammadans, and also the Tihama, or coast lands, from S. of Hodelda to Sheikh Said. Since ease the Imam of Yemen has been gradually encroaching on the Aden Protectorate, which is populated by tribes of the Shafai sect, but has now been ejected by air action from Aden, in support of the Protectorate tribes. In 1925, the Imam occupied Hodieda, which had been evacuated by the Idrisi, and later took the ports of Midi and Loheiya, together with the intervening country between the highlands and the coast, all of which is populated by Shafai tribes. The rule of the Imam is very unpopular with the Shafais owing to his exactions. o miles to the south of Sani is the town of Dhammar, an ancient seat of learning. CAPITAL, Sana; population, about 40,000.

BAHRAIN.

Ruler, H. E. Sir Isa bin Ali Al Khalifah, K.C.I.E. Heir Apparent and Regent, H. E. Shaikh Hamid bin Isa Al Khalifah, C.S.I.
Financial Adviser, C. Dalrymple Belgrave.
Political Agent, Capt. C. G. Pryor.

Bahrain is the largest of a group of islands (Bahrain, Maharao, Sitra, Nabi Saleh and some unluhabited islets) half way up the Fersian Gulf near the Arab Coast (El Hass). Bahrain is the headquarters of extensive pearl fisheries and a distributing centre for the adjacent mainland. Pearls are the principal export, varying in value from 1 to 2 millions sterling per annum. The principal imports are rice, cottons, dates, sugar and spices. The people (about 115,000) are Muhammadans, Bahram has been in treaty relations with the Government of India since 1830. In 1880 the ruler engaged not to make treaties with any other state and in xgs3 the active control of affairs was handed over to the present regent.

CAPITAL, Manama; population, about 25,000.

THE HADRAMUT TRIBES.

The coastal region of Southern Arabia, between Yemen and Aden on the west and Oman on the east, and extending inland (corthwards) to the Dahna Desert, contains a coastal stim of some 550 miles. Parallel with the coast (at a distance of 50 miles from the Arabian Sea) is an extensive plateau inhabited by the Hadharim, an ancient people of Arabian stock (Hadoram was the son of Joktan, Genesis x, 27. There are many settlements on the coast and in the interior, but the latter are being steadily enveloped by the sand of the northern desert. There are sacred shrines near Kasm (Qabr Hud) and Shibam (Qabr Salth). The eastern districts, known as Mahra and Gara, are very sparsely populated. The estimated area of Hadramut is 82,000 sq. miles, and its Muhammadan population, of independent Arab tribes, is estimated at 150,000. The most important Coastal Chief at 150,000. The most important Coastal Chief is the Sultan of Shehr and Mokalla (H.H. Sultan Omar bin Awadh) who is in treaty relations with Great Britain. Inland, the most important tribe is the Kathırı, whose chief towns are Saiwun and Terım. The Kathırı are noted as travellers and traders, and many of them are settled and carry on commerce at Singapore and Java. A long-standing fend between the Kathiri and the Qa'iti (by whom the former were expelled from the coast) was settled by treaty in 1919 on the initiative of the Aden Government. Under this Treaty the Ka'iti Sultan of Mokalla permits access to the port of Mokalla on the part of Kathiri traders. Agriculture and cattle raising are the principal industries, together with the cultivation of dates, indigo and tobacco.

TRUCIAL COAST.

The independent tribes on the Pirate Coast, which partly encloses the Persian Gulf from Ras-el-Kheima to Odeid, are bound under treaties with the Government of British India to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are some-times called the "Trucial" chiefs. The British Political Resident in the Persian Gulf is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. In 1892 these tribes agreed not to enter into relations with, or eede territory to, any other Power than the British. The trade of the coast ports largely consists in exports of pearls to India via Lingah and Bahrain.

_ARGENTINE REPUBLIC. (República Argentina.)

*President of the Provisional Government, General José F. Uriburu (assumed office, Sept. 8, 1930).

Min. for Foreign Affairs, (vacant). Interior, Mg. Octavio Pico. Finance, Dr. Enrique Uriburu. Justice and Public Instruc., Dr. Guillermo Rothe. Agriculture, Dr. David Arias. War, General Francisco Medina Marine, Admiral Carlos Dairreaux. Public Works, Dr. Pablo Calatayud.

Ambassador in London, His Excellency Señor Dr. Don Manuel Malbran, 30 Grosvenor Gardens, S.W. r. Counsellor, Señor Pon Carlos Migueus.

First Secretary, Senor Dr. Don Pablo Santos

Multary Attaché, Col. Avelino J Alvarez. Naval Attache, Capt. Dalmiro Saenz

Air Attache, Senor Don Pedro Zanni

Civil Attachés, Señor Don R. Q Blamey Lafone, Señor Don R C. Quesada: Señor Don Julián

Commercial Counsellor, Seffor Dr. Don Juan R. Richelet.

Attaché, Señor Don A Scilingo

Consul-General, Senor Don Ernesto C, Perez,

7 Gower Street, W C r. There is a Consulate-General at Dublin, and there are also Consulates at Liverpool, Southampton, Cardiff, Neucastle-upon-Tyne, Neuront, and Glasgow; and Vice-Consulates at Aberdeen, Belfast, Bristol, Hull, Manchester, Middlesbrough, and Swamea.

Argentina is a wedge-shaped country, occupying the greater portion of the southern part of the South American Continent, and extending from Bolivia to Cape Horn, a total distance of nearly s,300 miles; its greatest breadth is about 930 miles. It is bounded on the north by Bolivia, on the north-east by Paraguay, Brazil, and Uruguay, on the south-east and south by the Atlantic, and on the west by Chile, from which Republic it is separated by the Cordillera de los Andes. On the west the mountainous de los Andes. On the west the mountainous Cordilleras, with their plateaus, extend from corumeras, with their plateaus, extend from the northern to the southern boundaries; on the east are the great plains, those in the north are thinkly wooded and are known as El Gran Chaco, and further south he the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas, which together constitute the treeless pampas are the constituted to the constitute that the constitute the constitute the constitute that the constitute tute La Plata, extending from the Bolivian boundary in the north to the Rio Negro; and south of the Rio Negro are the vast plains of Patagonia. Arrentma thus contains a succession of level plains, broken only in Cordoba by the San Luis and Cordobs ranges, in the north-western states by the eastern spurs of the Andes, and in the southern portion of the Pro-vince of Buenos Aires by the Tandıl Hills (about specific and the Sierra Ventana, near Bahia Blanca (about 3,000 ft.). The Parana River, formed by the junction of the Upper Parana with the Paraguay River, flows through the north-eastern states into the Atlantic, and is navigable throughout its course; the Pilcomayo, Bermejo, and Salado del Norte are also navigable for some distance from their confluence with the Parana. In the Province of Buenos Aires the Salado del Sud flows south-east for some 300 miles into

Samborombon Bay (Atlantic). In the south the Colorado and Rio Negro rise in the extreme west and flow across the pampas into the Atlantic, many similar streams in Patagonia (notably the Chubut and Santa Cruz) traversing the country from the Andes to the Atlantic.

The Republic is composed of 14 provinces and 20 territories, comprising in all about 1,132,000 zo territories, comprising in all about 1,132,cos square miles, with a population of 10,522,235 in 1928. Immigration is encouraged, and comes principally from Spain and Italy, but legislation, introduced in 1919, lequires intending immigrants to produce certificates of good character and ability to work. In 1929 the immigrants numbered 148,016, and the emigrants numbered 82,805. The climate is moderate. Spanish is

the language of the country. Government.—The estuary of La Plata was discovered in 1515 by Juan Diaz de Solis, but it was not until 1524 that Pedio de Mendoza founded Buenos Aues. In 1810 (May 25) Spanish rule was defied, and iv. 1816 (July 9) the Independence of Argentina was declared by the Congress of Tucumán. In 1833, after more than thirty years of disturbances and civil wars, the country settled down, and is now a well-governed and progressive Republic. The constitution dates from 1853 (revised 1859) and is modelled on that of the U.S. of America, but each province enjoys practically complete autonomy. The executive is in the hands of the President, who selects his Cabinet. The National Congress consists of a Senate of 30 members and of a House of Deputies of 160 members. Members of Congress receive \$18,000 (paper) per annum.

Production — Of the total area about one-third

is suitable for agriculture and cattle raising. is sritable for agriculture and cattle raising. The principal productions are wheat, maize, oats, linseed, sugar, wine, wool, hides, cattle, oats, linseed, sugar, wine, wool, hides, cattle, sheep, and horses. There were (1930) 31,974,000 cattle, 43,084,000 sheep, 9,839,000 horses, 523,476 nules (1922), 489,835 (roats (1925), and 3,764,000 pigs (1920). The exports are made up entirely of pastoral and agricultural products, with the execution of quelyrache courser, managenes and ception of quebracho, copper, manganese, and wolfram. In 1929 the exports of wheat were 13,700, cotton (1938) 18,500 tons, linseed 1,617,000, maize 5,048,000 metric tons, butter (1930) 23,000 tons, wool (1930) 135,000 tons, sheepskins (1936) 25,000 tons, chilled meat (1930) 355,500 tons, frozen meat (1930) 28,700 tons, frozen mutton and lamb (1930) 82,000 tons. Oil has been found in various parts of the Republic and is worked to a considerable extent in the neighbourhood Comodoro Rivadavia, in the Department of Escalante. The Argentine State Oilfields produced 5,207,000 hairels in 1930; the output of private companies was approximately 3,702,000

barrels in 1930

Communications.—There were (1930) 23,795
miles of railroad open. The railroads are almost entirely in the hands of British companies, and absorb about £234,000,000 of British capital. Telegraphs about 75,250 miles, mostly Government lines. There are as wireless stations, of which one is reserved for communication between England and the Argentine. There are aeroplane services between Argentine centres. The principal ports are Buenos Aires, Rosario, La Plata, and Bahla Blanca. In 1930, 2,557 vessels (2,886,812 net tous) entered at all ports; of the total, 4,28,682 net tons (43'38 per cent) were British.

Defence -The Navy consists of a super-

Presidential Election was held in Nov. 1931.

Dreadnought battleships (reconstructed in 1925), rold cruiser, a destroyer leaders, 4 destoyers, 4 coast defence ships, and auxiliary vessels. coast defence ships, and auxiliary vessels. Two light cruisers, 3 destroyer leaders and 3 submarines are being obtained in Europe. Strength about 800 officers and z4,000 men. The principal navai base is at Puerto Belgrano, near Bahta Blanca, and there are minor bases at La Plata and Buenos Atres, while a new submarine base is being built at Mar del Blata. The ravail aviation has is a Puerto. The naval aviation base is at Puerto Belgrano, with a subsidiary base at Punta Indio. The Army is organised in 5 divisions, and numbers about 1,500 officers and 25,000 men on a peace footing. Each divisions would consist of about 40,000 men on a war footing.

Education .- Primary Education is secular. free and compulsory from the ages of 7 to 14. The scattered population of the country districts constitute a problem in attendance which is being gradually solved Secondary Education is controlled by the National Government in is controlled by the National Government in National Colleges, numbering 5r in 1929, with 17,500 students, average annual fees \$45 (paper); in Normal Schools, numbering 86 in 1923, with 30,000 students who pay no fees; and in 60 Special Institutes for Commerce, Arts and Crafts, Mining, Agriculture, &c. There are Crafts, Mining, Agriculture, &c. There are National Universities at Cordoba, Buenos Aires, La Plata, and Incuman, and Faculties at Santa Fé. Rosaria and Parana.

Minister in London, Baron George Franckenstem, 18 Belgrave Square, S.W. 1.

Counsellor, Baron Lothar Wimmer. Secretary, Count May Attems. Consul-General, Charles D. Seligmaun.

Prior to the War the Austrian Empire, joined Prior to the War the Austrian Empire, joined to the Kingdom of Hungary, was the largest Empire, next to Russia, on the continent of Europe, situated between 42°—52° N. lat. and 9° 30′—36′ 20′ E long It embraced an area of 240,456 80. miles, and a population (1914) of nearly 53,000,000. At the conclusion of the Great War, the territories of Austria comprised an area of 32,175 square miles with a population (1923) of 6,534,481 (estimated Dec. 31, 1927, at

6,678,527). On June 28, 2914, the assassination of the Austrian Archduke Francis at Sarajevo (Bosnia) was presumed to be the outcome of a plot fostered by Serbia, and after negotiations an ultimatum was presented by the Empire to the Serbian Government (July 23), and non-compliance with its terms led to the European War of 1914-18. Before the armistice of Nov. 11, 1918, the Hungarians, Czechoslovaks, Poles, Jugoslavs and Rumanians had secoded from the "Dual Monarchy," and a Republic of "German Austria" was declared Nov. 12, 1918, the throne being abdicated by the Emperor Karl (Nov. 28,

Under the Treaty of St. Germain (Sept. 20, 1919) the political neighbours of Austria are Germany and Czechoslovakia on the N.: Italy and Yugoslavia on the S.; Switzerland on the W., and Hungary on the E.

Under the new Constitution (Nov., 1980), Austria became a Republican Federation of eight Provinces:—

Province.	Area (sq miles).	Population 1983.
Lower Austria and Vienna Upper Austria Carinthia Styria Salzburg Tyrol Vorarlberg Burgenland (West Hungary)		3,346,229 876,074 370,817 978,84: 283,02: 313,88: 139,99: 285,609
Total	32,175	6,534,481

Under the Constitution the Bundesrat and Nationalrat were constituted; a government formed, and a President elected; Vienna was later formed into a separate Province. The elections resulted in a majority for the Christian Socializer over the Social Democrate, the Pan-Germans coming next in order. In June, 7932, the Ministry resigned in favour of a non-party Government, which gave way (May, 1932) to a Christian Socialist Pan-German Coalition Government under Doctor Seipel (a priest). Elections were held again in October, 1933, March, 1937, and November 1930, and a simular Government was returned on each occasion

Complete religious liberty is one of the fundamental laws of the new Republic. The prevailing

religion is Roman Catholic.

Defence.—During the War of 1914-18 about 5,000,000, all ranks, were passed into the common Army of Austria-Hungary. The total casualties exceeded 2,500,000, of whom over 700,000 were returned as killed. Under the Treaty of St. Germain the military, naval and air forces were demobilised and reduced to minimum requirements and all warships were surrendered to the Allies, those under construction being broken up Service in the Republican Army is by voluntary enlistment for twelve years.

Rducation.—Primary education is compulsory and free, the children in attendance at schools numbering about 720,000 in 2027. Secondary education is provided in gymnasis, and real-schools and there are universities at Vienna,

Graz and Innsbruck.

Finance.—The finances of Austria went from bad to worse for four years after the Armistice, owing to heavy deficits and incessant inflation. The deficit on the State Budget was estimated in July, 1923, at considerably more than one billion crowns, and by Oct. 1923, the exchange value of the crown had sunk to about one-fifteen-thousandth of its nominal value, £x being equal to 235,000 crowns (in place of 24'22). The circulation on Sept. 30, 1923, was over two billion crowns. In September and October, 1923, the League of Nations worked out a scheme for the restoration of the Austrian finances within two years under the control of a High Commissioner appointed by the League, the Governments of Great Britain, France, Italy, and Czechoslovakia agreeing to guarantee four-fifths of a loan of 520,000,000 gold crowns (about £35,000,000) in order to fill the deficit in the Budget during the two years. The guarantees for the remainder were given by other powers

and a short term loan of £3.500,000 was issued in March, 1922. In the following June the big League of Nations loan was successfully floated, nearly one-half in London, about £5.000,000 in New York, and the rest in various continental capitals. The sum actually received amounted to over £30,500,000. Albout £21,000,000 was used to repay the previous short term loans made in 1922 and 1923. The High Commissioner, Dr. Zimmerman, appointed by the League of Nations to supervise the carrying out of their scheme for the reconstruction of Austria, entered on his office in Dec. 1923. Great progress has been made since in reducing Government expenditure and increasing the revenue. Thus about 79,000 superfituous officials were dismissed or pensioned off by the end of December, 1924, and on the completion of the work of reconstruction Dr. Zimmerman left Vienna in July, 1926. The issue of uncovered bank-notes was stopped on Nov. 18. 1922, and the Austrian crown was stablised at about Crs. 245,000 = £1.

In 1925 a new currency was introduced, the unit being the Austrian schilling (=10,000 paper Crowns), the rate of exchange in Sept., 1929, being 24.37 sch. = £2 sterling. Since the Armistice (Nov. 11, 1928), the labitsh Government has advanced about £1.000,000 to the Republic. The favourable condition of the Austrian State lasted until 1929, but in 1930 there was a small defict on working account and in 1931 measures were passed to reduce expenditure and increase revenue.

Receipts	±43,300,000 38,400,000	1930. £43,600,000 44,000,000
Working Surplus	4,900,000	•••
Deficit	•••	400,000
Capital Expenditure	4,200,000	7,200,000

In 1930 and 1931 Austria has been severely affected by the general trade depression which caused an increase in the number of unemployed, a falling off in production and foreign trade, and a decline in the revenue. In May 1931 the leading bank, the Oesterreichische Credit Anstalt, got into difficulties and had to be supported by the Government. In order to relieve the strain on the Austrian National Bank, the Bank of England advanced £4,300,000 to the Austrian Government on June 16. In August 1931 the Austrian Government applied to the League of Nations to make an enquiry into its situation, and experts were sent.

Total Imports £95,960,000 £79,883,000
Total Exports 63,930,000
Imports from U. K. ... 3,450,000 2,780,000
Exports to U. K. ... 2,850,000 2,950,000

Communications—In Sept, 1919, there were about 4,140 nules of railway (exclusive of narrow guge lines). The mercantile marine was considerable in 1914, but the new Republic is land-locked.

Industries—The principal industry is agriculture, the chief products being wheat, barley oats, rye, maize, and potatoes Forestry and stock raising are important. The forests are principally coniferous trees to dudes horses, cattle, sheep, pigs, and goats. The vine is extensively cultivated. The most important mineral production is that of iron ore, magnesite, and salt; there are also lead, zinc, copper, common and brown coal, and graphite. The principal manufactures are woollens, octons, steel, wood-work, brewing, and machinery.

CAPITAL, Vienna, on the River Danube. Pop. (1933) 1,865,780; other large towns are Grac (123,765), Linz (102,081), and Inusbruck (26,401). Floof, Three horizontal bands, red, white, red. BRITISH LEGATION.

A Kingdom of Central Europe, with a total area (1927) of 11,750 square miles and a population, Dec. 21, 1920 (including Eupen and Malmedy) of 8,229,824. Belgium is bounded

on the N. by the Kingdom of the Netherlands, on the S. by France, on the E. by Germany and Luxemburg, and on the W. by the North Sea. The kingdom formed part of the "Low Countries" (Netherlands) from 1815 until Oct. 14, 1830, when a National Congress pro-claimed its independence, and on June 4, 1831, Prince Leopold of Coburg was chosen hereditary king. The separation from the Netherlands and the neutrality and inviolability of Belgium and the neutrally slid mytoladiny of Beignum were guaranteed by a Conference of the European Powers, and by the Treaty of London (April 12, 12839), the famous "Scrap of Paper," signed by Austria, France, Great Britain, Prussia, The Netherlands, and Russia. On Aug. 2, 1914, the Germans invaded Belgium and ultimately over-came the resistance of the fortresses and overran almost the whole country. In revenge for the heroism of its defenders the Germans sacked and destroyed many cities, burning Louvain (with its library), Termonde, and other places, and established a reign of terror. They levied a war contribution on Belgium of close on £xxx, cox, cox, apart from enormous fines on localities, firms, and private persons. On Friday, Nov. 15, 2718, at the great turn of the tide, Antwerp was recupied by the victorious Belgian army, and Brussels and the remainder of Belgian soil a few days later. About 10,000 persons were added in 1919 by the cession of Moresnet and part of Malmedy by Germany, and the district of Eupen, with the remainder of the district of Malmedy, were ceded by Germany and annexed by Belgum (Sept. 20, 1920) after a plebiscite, thus adding a further 20,000 to the inhabitants.

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Babant, including Antwerp. Nearly all the inhabitants are, at least nominally, Roman Catholics.

Belgium has a frontier of 83r miles, and a seaboard of 42 miles. The Meuse and its tributarythe Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 sq. miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation to a neight of a,330 neet, but the mean crowsnow of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escant) and the Mass (Yeuse). Brussels has a mean temperature of 50° F. (summer 65°, winter 37°). GOVERNMENT.—The constitution jointly vestigation to the Kiper the Savete.

the legislative power in the King, the Senate, and the Chamber of Representatives. The 154 senators (with the exception of 40 elected by the provincial councils and 30 elected by the senators themselves) and 387 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, elected by the people, the former for eight, the latter for four years Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1892. In April, 1919, the Belgian Parliament decided as an emergency measure to hold yags elections on a "one man one vote" basis for Senate and Chamber. (Unmarried widows of soldiers, killed before Jan. z, 1919, or falling widows, the mothers; widows or mothers of civilians shot by enemy; women imprisoned by enemy for patriotic acts, also voted.) This Parliament, anomalous, and unconstitutionally elected, was required to make constitutional the machinery by which it was elected; i.e., to revise article 47 of the Constitution. This was revise article 47 of the Constitution. This was done (Feb 7, 1921) and a new Chamber was elected in 1925. The present Chamber (elected in May, 1925), consists of 77 Catholics, 28 Liberals, 70 Socialists, 12 Frontists (extreme Flemish Nationalists), and 1 Communist. Deputies receive 42,000 france a year and a free pass over the railways. There are in addition representative. Provincial and Communist Provincial and representative Communal Councils, elected on a somewhat more liberal

PRODUCTION.—Agriculture and forestry are important industries, the chief crops being oats, rye, wheat, potatoes, bailey and sugar-heet Under Annex IV. of the Treaty of Versailles Germany undertook to deliver to Belgium certain livestock to replace the animals seized or destroyed during the War of 1914-1918. Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The mineral kingdom yields coal, iron, zinc, lead, and copper. The leading industries are collieries, quarries, and metallurgic (Mons, Charlerot, Llège, Namur, Hainaut, Brabant, and Limbourg), glass, textiles (Gheit and Verviors), laco glass, textules (Ghent and Verviors), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, broweries, &c. DEFERCE.—In 1928 a new Recruiting Law was

passed, entailing compulsory service for an months including rappels. The passed, encating computery service for an average of an months, including rappels. The annual contingent is fixed at 44,000, and the Army consists of a Field Army of 3 Corps, each of a Divisions, and x Cavalry Corps of a Divisions. EDUCATION.—Schools are maintained by com-

EDUCATION.—Schools are maintained by communal taxation, with provincial and State grants, while many are under ecclesiastical control. Roman Catholic largely predominating. There are 134 State high schools, including 44 for grils, and numerous private institutions. Special schools abound. The Universities of Gheut and Liège are maintained by the State; those of Brussels and Louvain are free institutions Louvain University has been rebuilt After considerable opposition, and by way of a com-promise, Ghent University, which had hitherto transacted its business and given its teaching in French, was in 1923 made bi-lingual, many Flemish lectures being substituted for French, and Flemish becoming the official language of the University.

COMMUNIOATIONS.—In 1929 there were 4,800 kilometres of State railways (normal gauge) and 5,137 kilometres of narrow gauge. In 1929 there were 48,000 kilometres of telegraph wire. The navigable rivers and canals have a wire. The navigable rivers and canals have a length of 1,231 miles (1929), and there are 6,177 miles of roads. Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine consisting (1930) of 160 vessels (520,310 tons), in addition to which there were 552 fishing boats in 1930, 18,413 vessels entered at Belgian ports (tomage 29,113,791). The principal port and commercial entiephot is Antwerp, on the Raver Scheldt. Other ports are Ostend, Ghent, Bruges, Nicuport, Blankenhurg and Zeebrugge (blocked by the Blankenburg and Zeebrugge (blocked by the British Fleet April 23, 1928, and since re-opened for traffic). The vexed question of the Scheldt, of wanch the right bank is in Netherlands territory and the left in Belgium, appears likely to be settled by negotiation between the respective Governments. The navigation is to be free to both countries, from the mouth to Antwerp, and the Netherlands war vessels are to be removed from the river.

The Capital, BRUSSELS, had a population (Dec 3x, x030) of 885,924 (with suburbs). Other towns with over x00,000 inhabitants are Antwerp, the chief port (451,334), Ghent (208,530), which has large cotton and flax spinning mills, and is the second port of importance after Antwerp, while its flower shows are famous; and Liège (169,566) the centre of the iron industry. THE BELGIAN CONGO.

Governor-General, His Excellency Lieutenant-General Auguste Constant Tilkens. The Independent State of the Congo, founded in

1884, became a Belgian Colony on Nov. 15, 1508. Situated between long. 12°-31° E. and lat. 5° N.-13° S, the colony comprises an area of 909,654 similes, with a native population estimated (1508) at 10,000,000. The total European population at 10,000,000. The total European population (Jain, 1930) was 25,079, of whom 17,676 were Belgians, 1,392 were British, 1582 Portuguese, 1,490 Italians, 717 French, 695 Greeks, 544 Americans, 315 Swiss, 350 Dutch, and 918 others of various nationalities.

The Congo River is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 249 miles in length. A narrow-gauge line runs from Boma to Tchela in the Mayumbe (86 miles). Above Leopoldville the river and its numerous affluents are navigable by steamer for about 7,000 miles, the falls on the Upper River being avoided by a metre-gauge line from Stanleyville to Ponthierville (78 miles) and another from Kindu to Kongolo (355 kilometres). Another line from Kabalo to Albertville on Lake Tanganyika (270 miles) connects the West Coast of Africa with British East Africa and the East Coast. The Katanga-Bukama Railway (446 miles) links up the Rhodesian Railway system with the steamers plying on the Univer Coave River connecting plying on the Upper Congo River, connecting with both the East and the West Coast. The Bukama-Port-Franqui Railway (702 miles) commenced in 1923 and opened in 1928 makes it possible to travel by train direct from Cape Town to the river Kasai, a distance of 3,400 miles. This new route plays an important part in the export of copper from the Katanga mines, in the export of copper from the Katanga mines, its possibilities being limited only by the capacity of the Port of Matadi. Other railways are kindu-Kongola (233 miles), Aketi-Bondo (95 miles), Charlesville-Makumbi (56 miles) and Manono-Mayumba (23 miles), making a total for the Colony of 2, 128 miles. A new line has been completed from Katanga to join the recently completed Benguela Kaliway m Portuguese Angola, and work has been started on a line from Stanleyville to Lake Albert which will provide the last link to direct river and rail provide the last link to direct river and rail communication between the Cape and Carro. Regular air services are established from Boma to Leopoldville, Luebo and Elisabethville, from Luebo to Kabalo and from Leopoldville to Coquilhatville. Motor roads total over 6,250 miles. The most important motor road is the Route Royale Congo-Ail (563 miles from Djamba, The most important motor road is the on the Rubi, to Redjaf, on the Nile. Another iuns from Bukama (vvi Kanda-Kanda and Luebo) to Djoko-Punda, on the Kasai (625 miles). A complete system of telegraphic communication has been established throughout the Colony and is connected with the international system.

The West Coast District has rather scanty rain (40 inches), but on the Mayumbe Hills and in the whole interior the rainfall averages between 60 and 80 inches, and the country is very fertile and productive. Sleeping sickness, once very prevalent and destructive, is now decreasing. Extensive forests cover the central districts; oil palms are plentiful everywhere, and supply

an ever-increasing trade in palm-oil and palm-kernels. Cotton, cocca, rubber and coffee are suc-cessfully planted. The Colony is rich in minerals. Extensive radium deposits exist in the Katanga which has also enormous deposits of copper, and the smelters at the Lubumbashi produce about 10,000 tons mouthly (1928). Bukama is the centre of an extensive tin-belt, and alluvial and reef gold are found in the North-eastern Congo. Diamond-bearing gravels are worked in the south. The chief exports are palm-kernels the south. The cnier exports are paim-kerneis and palm-oil, cotton, cocoa, gum-copal, rubber, ivory, copper, gold, tin, radium, and diamonds. Capital, Leopoldville (pop. 2,766 whites). Principal towns, Boma (pop 420 whites); Elisabethville (Katanga) (pop. 3,684 whites); Stanleyville, Eastern Province (752 whites); Coquilhatville (406 whites).

Runda and Urundi (ceded July, 1919) formed the N.W. corner of German East Africa from 5 S. lat to the S. horders of (British) Uganda and have an area of about 15,000 square miles, with an estimated population of 3,000,000. They lie W. of the Victoria Nyanza and N.E. of Lake Tanganyika, through which are their respective outlets. The soil is poor, and the only exports are live-stock and hides. The administrative capitals are Nianza (Ruanda) and Kitega (Iyundi), the commercial capitals being Kigali (Ruanda) and Usumbura (Urundi).

The Republic of Bolivia extends between lat. The Republic of Bolivia extends between lat. 8° and 23° S. and long 57° 30° and 73° W., and its area is officially estimated at 594,460 square miles (other estimates giving an area of 708,125 square unles), with an estimated population of 2,911,883. The Republic derives its name from its liberator, Simon Bolivar (born 1783, died 1830).

The chief topographical feature is the great ontral plateau (6,500 square miles) over 500 miles in length, at an average altitude of za,000 feet above sea level, between the two great chains of the Andes, which traverse the country from south to north, and contain, in Illiampu (Sorata), and Illimani, two of the highest peaks of the western hemisphere. The total length of the navigable streams is about 13,000 miles, the principal rivers being the Itenes, Beni, Mamoré, and Madre de Dios.

Mining and agriculture are the principal industries, the mineral productions being very valuable. The ancient silver mines of Potosi are now worked only for tin, but gold, partly dug and partly washed, is obtained on the Eastern Cordillers of the Andes; the tin output is, after that of the Straits Settlements, the largest m the world, while copper, antimony, wolfram, bismuth, salt, and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, indiarubber, cacao, potatoes, cinchona bala, medicinal herbs, &c. Manufactures are in a very undeveloped state. The principal exports are undeveloped state. The principal exports are tin and silver ores, crude rubber, copper ores, bismuth, lead ores, wolfram, wool, coca, hides, and antimony; the chief imports are iron and steel products, textiles, machinery, sugar, flour, and coal. There are (1929) 1,314 miles of railways in operation, and the construction of a line from Cochabamba to Santa struction of a line from Cochabamba to Santa-Cruz, in two sections of rag and rao miles respectively is in the preliminary stages. There are 4,000 miles of telegraph wire, and wireless services between Rhernita, La Paz. Cobjia, Capitandi (Chaco). There is direct railway communication to the sea at Antofagasta (2 days), Alica (x day), and Mollendo (2 days), and also to Buenos Aires (3½ days); branch lines run from Oruro to Cochabamba, and from Rio Mulato to Potosi. Construction on the railway between La Oninca (on the Argentine the railway between La Quiaca (on the Argentine frontier) and Atocha (in Bohvia) is now com-pleted. There is through railway communica-tion with Buenos Aires from La Paz. Com-munication with Peru is effected by rail to Guaqui and thence by steamer across Lake Titicaca to the railroad at Puno. The principal line is the Autofaçasia and Rolivia railroad (719 miles), and a line from La Paz to the province of Yungas (the first section of which is open) may eventually connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Potosi to Sucre, the legal capital, is under construction, and trains run to Betanzos.

Bolivia is without a sea-coast, having been deprived of the ports of Tocopilla, Coluja, Mejillones, and Antofagasta by the "Pacific War" of 1879-1882 (see Chile). The Peace Aimy War" of 1879-1882 (see Chile). The Peace Army amounts to about 5,000, all ranks, the War Effective being about 105 000.

Biazil, the most extensive State of South America, discovered in 1500 by Pedro Alvares Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, the Guianas, Colombia and Venezuela; on the west by Peru, Bohvia, Paragray, and Argentina; on the south by Uruguay, and on the east by the Atlantic Ocean; and extends between lat. 5° ro' N. and 33° 45' 8. and long. 34° 45' and 73° 59' az" W., being a,327 miles from north to south, and a,32x from west to east; with a coast-line on the Atlantic of 3,577 miles The Republic comprises an area 3.37/ minos the acquire compiles an area of 3.38/8,70 square rules, with a population (('ensus 1920) of 30,635,605, estimated at 39.103,856 in 1928

The northern States of Amazonas and Para are mainly wide, low-lying, forest-clad plains. The central state of the Matto Grosso is principally plateau land and the eastern and southern States are traversed by successive mountain ranges interspersed with fertile valleys. In the extreme south, towards the interior, the land rises by gentle gradations to the height of a,ooo to 5,000 feet above sea level. The principal ranges are Serra do Mar in São Paulo, the Serra Geral (Caparao 9,393 feet) between Minas Geraes and Espirito Santo, the Serra do Mantiqueira (Itatiaya, 9,163 feet), and the Serra do Espinhaço (Itacolumi, 5,748 feet), in the south-east of Minas Geraes; the Serra do Paranán, between Goyaz and Minas Geraes, the Serra dos Aymores, which divide Espirito Santo from Minas Geraes; and the Serra da Gurgueia, Branca and Ararips, which envelop Planhy.

Brazil is unequalled for its rivers. The River

Brazil is unequalled for its rivers. The River Amazon has tributaries which are themselves great rivers, and flows from the Peruvian Andes to the Atlantic, with a total length of some 4,000 miles. Its principal northern tributaries are the Napo and Marañon, the Putumayo or Ica, Rio Branco, Rio Negro, and Japurd; its southern tributaries are the Jurud, Purus, Madeira and Tapajos, while the Xingu meets it within so miles of its outflow into the Atlantic. The Tocantine and Aragnaya flow northwards from the Plateau of Matto Grosso and the mountains of Goyaz to the Guil of Pará. The Parnahyba flows from the encircling mountains of Prancisco rises in the South of Minas Gernes and traverses Bahla on its way to the Eastern coast, between Alagons and Sergipe. The Paragnay, rising in the southwest of Matto Grosso, forms a boundary with Bollvia on its way through Paragnay to its confluence with the Parana, which rises in the nountains of that name and divides Brazil from Paragnay On the Iguassu, which unites with the Urugnay at the Argentine boundary, are the majestic Palls of the Iguassu, and on the Sto Francisco are the no less famous falls of Paulo

GOVERNMENT.—Brazil was colonised by Portugal in the early part of the sixteenth century, and in 1822 became an independent empire under Dom Pedro, son of the refugee King Joho VI. of Portugal, the centenery of Brazilian independence being celebrated by an International Exhibition at the capital (Sept. 7, 1922, to July 2, 1923). On Nov. 15, 1889, Dom Pedro II, second of the line, was dethroned and a republic was proclaimed. The constitution rests on the fundamental law of Feb 24, 1891, which established a federal republic under the name of Estadow Unidos do Brazil. The President and Vice-President are elected for 4 years by the direct votes of all male Brazilians over 21 years who can read and write; they are inlegible for the succeeding term. They are aided, as an executive, by a Council of Ministers, who are responsible to the President and not to the legislature. Congress consists of a Senate of 63 members and of a Chamber of Deputies of size members; members of both houses are paid. The language of the country is Portugues, foreign languages being read and spoken in the following order:—French, Italian, English, German and Spanish.

PRODUCTION.—The minerals are very considerable and valuable, comprising gold, silver, iron, diamonds, topazes, and other precious stones. The immense iron deposits have been scarcely touched. Manganese is exported, and there are important deposits of monoxite sand. Low-grade coal deposits are in the south. Its agricultural produce is abundant and its forests are immense. Cattle-raising is an important industry, the number being A₃-70, 224 (Census of 322). The chief products of the country are coffee, maize, sugar, raw cotton, hides and skins, cocca, cleaginous fruits, heroa-maté, rubber and tobacco: the

rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Paria and Manaos; coffee coming chiefly from São Paulo. Tobacco and cocoa are grown largely, especially in Bahia. Cotton is being largely cultivated. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. The exports include also meat, hides, matze, beans, and herva-matic (tea). The principal imports are machinery, wheat, iron and steel products, cotton goods, and coal and coke.

The Kingdom of Bulgaria is bounded on the north by Rumania, on the west by Yugo-Slavia and Greece, on the east by the Black Sea, and on the south by Greece. The total area is stated at 39,824 square miles, with a population (Dec. 31, 1930) of 5,944,000. The prevailing religion of the Bulgarians is the Eastern Orthodox Church. For secular purposes, the Gregorian (Western) Calendar is in use.

A Principality of Bulgaria was created by the Treaty of Berlin (July 13, 1878) and in 1885 Eastern Roumelia was added to the newly-created principality. In 1708 the country was declared to be an independent kingdom, the area declared to be an independent kingdom, the area at that date being 27,200 square niles, with a population of 4,337,500. In 1912-13 a successful war of the Balkan League against Turkey increased the size of the kingdom, but in Angust, 1913, a short campaign against the remaining members of the League reduced the acquired area, and led to the surrender of about 1,000 cmules to Rumains. On Oct. 2, 1912 square miles to Rumania. On Oct. 18, 1915, Bulgaria entered the War on the side of the Central Povers by declaring war on Serbia. She thus became involved in the defeats of 1918, and on Sept. 29, 1918, made an unconditional sur-nender to the Allied Powers. On Nov. 29, 1929, she signed the Treaty of Neutlly, which ceded to the Allies her Thracian territories (later handed over to Greece) and some territory on the western frontier to Yugoslavia.

GOVERNMENT .- The executive power is vested in the Tsar, and is exercised by a Council of Ministers, appointed by him. The legislature is a single chamber National Assembly or Sobranyé of representatives (x per so,000 inhabitants), elected for a maximum term of four years by adult manhood suffrage. Members receive 12,000 leva a month and free railway travel.

PRODUCTION.—About 80 per cent. of the population is agricultural, farming and small holdings, the principal crops being wheat, rye, barley, oats, marze, beans, tobacco, oleagmons seeds and sugar beet. The rearnug of the silkworm is an unportant industry. The live-stock includes sheep, goats, cattle, pigs horses, asses and mules. Rich and extensive brown and black nuties. Rich and extensive brown and black coal deposits produce about 1,500,000 tons yearly for home needs, mainly from the State nime at Pennik. Cortain areas are well numeralised with copper, lead, zinc, fron, manganese, etc., and also lock salt and bituminous shales. There is a variety of thermal and mmeral springs, several of which have been modernised. The only minerals worked on a commercial scale are copper and lead. Local industry, encouraged by tariff protection and other inducements, is rapidly expanding, and

cotton and woollen textiles, chemicals, leathers. timber, oils, soaps and metal articles are being produced. The exports consist chiefly of cereals, off seeds and cake, leaf tobacco and cigarettes, eggs, poultry, dairy produce, live-stock, flour, attar of roses, silk cocoons, minerals, nuts and skins. Imports include raw materials for textile skins. Imports include raw materials for texture and other industries, cotton and woollen piece goods, metals, agricultural and industrial machinery and appliances, motor cars, rolling stock, chemicals, tanning materials, leathers, mineral and vegetable oils, paper, timber, earthen and glass ware, colonial goods and food products.

DEFENCE.—Before the War of 1914-1918 service in the Army was universal and compulsory, and on a peace footing it numbered about 55,000, all ranks. During the War (Oct.-1915-Sept. 1918) about 550,000 passed into the ranks of the Army. By the Treaty of Neutlly the Bulgarian Army is limited to 20,000 all

EDUCATION is free and compulsory and the proportion of attendances is good; the number of illiterates in Bulgaria is comparatively small.

There are several technical schools. Sofia has an
Agricultural College and a Universities.

COMMUNICATIONS.—On Dec. 31, 1930, there were 15,015 miles of roads of which 10,000 miles were open, 4,055 miles under construction, and 368 miles traced. Of roads in actual use 4,718 miles were State and 4,716 miles Communal. There were 1,507 miles of normal and munal. There were 1,507 miles of normal and sp6 miles of narrow gauge railway open in 1929. In 1939 there were 578 post and telegraph offices, 521 telephone exchanges with 17,232 authorthers (7,905 in 80dis). The principal Black Sea ports are Varna and Bourgas; and Rustchuk, 59180v, Vidin and Lom on the Danube. In 1930 the vessels engaged in foreign trade cleared at Black Sea ports numbered 788 (1,381,440 tons).

8.W. z. A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 17° 25' and 55' 59' 8, and long. 66° 30' and 75° 48' W. Extreme length of coast-line about 2,800 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 15,000 feet above the level of the sea; but numerous summits attain a great height—the highest being, in Aconcagua Provincia, 7,019 metres (23,025 feet) with many others over 20,000 feet. The chain, how-ever, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into x6 provinces and a territories (Aysen and Magallanes) and the aggregate area is estimated at a89,798 square miles. In 1989 Chile signed a treaty ceding the province of Tacna to Peru but retained the province of Arica in return for a payment to Peru of

£1,300,000.

The population (Census of 2930) was 4,827,445.
Included in the population are four distinct racial divisions; (a) the Spanish settlers and their descendants; (b) the indigenous Araucanian Indians, Fuegians, and Changos; (c) mixed Spanish-Indians; and (d) European immigrants, who ware represented in reach by at 66 Spanisrds. spanish-indians; and (a) kuropean immigrature, who were represented in 1920 by 25,952 Spaniards, 12,356 Italians, 7,200 British and Irish, 8,920 Germans, 7,200 French and 5,000 Syrians. In 1929, the births numbered 195,030 (40'z per 1000); marriages, 42,004 (9'5 per 1000); and deaths, 12,000 (22'z Per 1000); 110,006 (25'1 Per 1000).

GOVERNMENT. — Chile was discovered by Spanish adventurers in the 16th century, and remained under Spanish rule until 1820, when a

revolutionary war, culminating in the Battle of Maypu (April 5, 1818), achieved the independence mayou (April 5, 2813), achieved the independence of the nation. The present constitution was voted by an overwhelming majority at the plebisette held on Aug. 30, 2825, and superseded that of May 25, 2832. It was drafted by a Committee appointed ad hoe by President Alessandri. In accordance with the new Constitution, the President is to be elected by direct vote of all Chilean citizens who have the right to vote. The National Congress consists of a Senate of 45 members, and of a Chamber of a number of Deputies to be fixed by a new electoral law in 1925. There is universal suffrage for persons who have attained the age of 21, can

read and write, and are on the electoral roll.

PRODUCTION, &c.—Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, lemp, Chile pepper, potatoes, onions and melons are grown extensively; the vine and all European fruit-trees flourish; the exportation of fruit to the United States is increasing yearly. Excellent wines are produced, and the Government is taking steps to develop their exportation. The live stock includes (1925) 1 918,433 cattle, 4,033,872 sheep, 323,581 horses, 357,033 goats, and 346,536 swime. The mineral wealth is considerable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable, the country being extremely rich in copperable. ore, iron-ore and manganese ore The production of bar copper in 1930 was 197,530 metric tons, Chile being the second greatest copper producing country in the world. The rainless north yields more especially nitrate of soda, iodine, borate of soda, copper, gold and silver, a large number of mines yielding both being in actual work in Tarapaca, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper, iron, manganese and silver; and the south, from and coal (1,300,see metric tons of coal were mined in 1930. In 1930-1930 the production of nitrate was 3,000,783 metric tons, the exports of this fertilizer being in the same period x,794,024 tons. Early in 1930 a law was passed constituting a national nitrate company, to be called Compania de Saltro de Chile (Cosac), with a capital of £75,000,000 with State participation, to take over the whole of the nitrate industry, the export tax being abolished, and its place in the budget taken by a fixed payment to the Government during the first three years, and after that by the Government's share in the company's profits. There are smelting-works for copper and silver, tanare smeating-works for copper and silver, tan-neries, corn and saw-mills, starch, soap, biscutt, rope, glassware, paints, mineral waters, boot and shoe, hosiery, hat, cloth, cheese, furniture, candle, match, brush, cordage and paper fac-tories, hreweries and distilleries; and the domestic industry furnishes cloth, embroideries, uumesuc inquistry iurnisnes cioth, emprouetries, baskets, and pottery. No. of industrial establishments in 1928 10,496, employing 96,983 persons, capital invested 2,205,244,660 pesos (nominal capital 1,402,282,150 pesos). The many ports favour commerce, and 2,3 lines of steamers commerce, the country with Paname and the Macallan. nect the country with Panama and the Magellan Stratt direct with Europe, a passage to Liverpool occupying from 30 days The staple articles of export are nitrate of soda, todine, oats, borax, fiozon meat, wheat, copper bars and ores, silver ores, corn, flour, hides, wool, barley, honey and beans. The imports include silks, woollens and other textiles, food, and agricultural and mining machinery, and motor vehicles.

COMMUNICATIONS. - There were (1929) 5,428 miles of railway, of which 1,748 miles are British controlled. In April, 1922, a convention was signed by Chile and the Argentine for the construction of two more Trans-Andine the construction of work have a 14,306 kilometres of telegraph, 909 post-offices, and 8,969 kilometres of teleprone, with 23 public wireless stations. The mercantile marine (1999) numbers ricy vessels (143,765 tons). In 1792 7,63 yessels (3,473,395 tons) entered Chilean ports from abroad, and 18,538 consting vessels (25,5409 tons); legislation was passed in February, 1923, reserving the coasting traffic to vessels of the Chilean mercantile marine.

DRFENCE.—All able-bodied male citizens from active anny is 19,000. The peace effective of the active anny is 19,000. The Air Force has a peace effective of the and 1,000 mechanics. The navy consists of x battleship (recently renovated), x ironclad, 3 cruisers, xx destroyers and 9 submarines, with a

cruisers, 12 destroyers and 9 submarines, with a complement of 6,000 officers and 8,000 other ranks. EDUCATION is free, and in July, 1920, elementary education was made compulsory, and 64;5 per cent of the children attended the 3,722 schools in 1929 of a total on the registers of 564,966. There is a State University at Santiago. The National Library contains 292,082 volumes. AREA AND POPULATION. Territory. China Proper...... Square miles. Population. 1,532,800 414,011,519 Manchuria 363,700 22,083,434 Tibet Chinese Turkestan ... 463,320 6,500,000 550,580 3,491,000 Mongolia 1,360,000 4,000,000

> Total... 4,270,000

449,085,953

The estimated foreign population of China was as follows in 1925: British, 12,547; Japanese, 218,82; Russian, 79,782; American, 9,844; Portuguese, 3,739; German, 3,005; French, 2,576; the total being 326,841. Out of a total of 7,921 foreign firms in China, 725 were British, 1,421 Russian, 3,940 Japanese, 184 German, 377 American, and 229 French (in 1923). China became a Republic on Feb. 12, 1918, with a President and Vice-President and an Executive Ministry, and a Legislature of a Executive Ministry, and a Legislature of a

with a President and Vice-President and an Executive Ministry, and a Legislature of a Senate (Tean Vi Yuan) of 564 members and a House of Representatives (Chung Yi Yuan) of 596 members. The government of the 18 provinces is entrusted to civil and military governors, the latter (Tuchun) ranking first and holding practically all the powers of government; under them each province is subdivided into circuits superintended by Taonius or intendants, and again into districts. All the territorial officials are appointed by the central Government, and the provincial governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign sible to the central Government at Peking in all important questions, and especially so in foreign affairs. The Treaty of Kiakhta, 1975, between China, Russia, and Outer Mongolia, very children as Ruler of Outer Mongolia, while China, as the Suzerain Power, appoints Residents at Urga and three other towns. Mongolia has since developed into an independent self-growpring republic and is in independent self-governing republic, and is in alliance with the Soviet Government at Moscow. The civil government of the three Manchurian provinces and of Turkestan is now similar to that of the province of China proper. exact status of Tibet is still unsettled.

On Oct. x, x930, Weihaliver, the island of Liu Kung and certain other islands, leased to Great Britain in 1868, were restored to China. The area comprised in the lease was about 285 square miles, with a population of about 170,000. On Jan. 15, 1931, the Belgian concession at Tientsin was also formally restored to China.

The revolution of xgrx brought out a victorious general in the person of Yuan Shih-kai, but from his death in xgr6 until June xgr8 his subordinates and their successors fought for supreme power. Presidential elections were held and their results disputed, and the Parliament elected in 1913 held occasional meetings in 1924, but its measures were not carried into effect, The Emperor (who had lived in the Imperial Palace since his enforced abdication) was stripped of his title and driven out of the Scripped of his title and driven out of the Capital in sga4, and such government as existed in rgsy was centred in Peking (for Northern China), while the Kuomentung (People's National Party) was represented by a Nationalist Government at Canton (for Southern China). In June 1938 Peking was captured by the Nationalists, and the capital of the country was transferred to Nanking and on October 2 1928 (Peking and On October 2 1928) to Nanking, and on October 10, 1928 (the anniversary of the outbreak of the Revolution at Wuchang in 1912, Chiang Kai-shek, the com-mander-in-chief of the victorious Nationalist armies, was installed as President of the armies, Republic.

EDUCATION.—In 1918-19 there were 134,000 schools in operation, with 4,500,000 pupils. There is a University in Peking. In 1922 there were upwards of 1,250 Chinese newspapers and magazines, published at regular periods, in Peking, Shanghai, Tientsin, and the other large centres, in addition to English and other Foreign daily newspapers.

COMMERCE.—The net trade of the open ports is stated as follows in Haikwan taels.

Year.	Imports.	Exports	Total.
1914 1926 1927 1928 1929	569,241,382 812,853,874 1,012,932,000 1,212,635,000 1,265,776,821 1,309,755,742	356,226,629 807,755,813 918,620,000 1,103,185,000 1,015,687,218 894,843,594	985,468,011 1,620,609,687 1,931,552,000 2,315,820,000 2,262,466,039 2,204,599,336

COMMUNICATIONS. — Railways. — About 7,000 miles were open in Jan 1928, inclusive of the Mauchurian lines, while 2,500 miles more are projected or under construction.

Shipping.—The China Merchants Steam Navigation Co. have a fleet of 31 ships of an aggregate tonnage of 60,000. Besides this, there are a large number of small vessels engaged in the coasting trade and on the Yangtse. In 1997 the total tonnage of the 154,275 vessels and junks entered and cleared at Chinese ports was entered and cleared at Chinese ports was 15,310,785 tons Of these ships 33,791 (40,358,040 tons) were British, 27,105 (35,745,535 tons) Japanese, and 4,844 (5,577,113 tons) U.S.A. In June, 1918, a vessel of 14,750 tons, constructed at the Kiangnau Dock and Engineering Works at Shanghai, was launched and supplied to the order of the United States Shipping Board.

Telegraphs are being rapidly constructed by the Central Government, and Peking is in communication overland with Europe and Tibet, the line being extended to Lhasa. In rgss there In ross there were about 50,000 miles of land lines and several high-power wireless installations.

CUSTOMS AND POSTS .- The Chinese Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of the Inspector-General (F. W. Maze.) By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. But the change has not materially affected the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports, this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regula-

tions. The Chinese Post Office, formerly a branch of the Customs, was transferred in 1911 to the Ministry of Communications, and a Foreign Co-Director General, with a considerable foreign staff, was appointed; letters can be sent Integra sain, was appointed; reverse can be some all over the 18 provinces at a uniform rate of 3 cents for so grammes. The number of Chinese post offices (1921) was s,429, and of postal agencies 8,877. In 1922, 426,362,576 postal packets and 4,791,420 parcels were handled.

At the end of September, reas, according to the official statement of the Ministry of Finance, the total debt was tacks 1,906,000,000, or less than s tacks (12.8.) per head of the Chinese population. Included in the expenditure of 2919-20 is the sum of 214,000,000 tacks towards repayment of debt.

OUTLYING TERRITORIES.

Manchuria lies to the north of China Proper. and has a total area of albut 360,000 square riles, with a population estimated at 11,000,000. The capital is Mukhen (pop. 250,000), a station on the Manchurian railroad and connected with the Russian system. Indigo, opium, cotton, tobacco, and various cereals are grown, and

there is great mineral wealth.

Mongoliahas an estimated area of aboutz, 360,000 square miles, and a population of 3,000,000 to 5,000,000, of whom the greater number are Buddhists. In 1915 Mongolia threw off its allegiance to China, and by the Treaty of Kiakhta was recognised as an Autonomous Republic. Negotiations with Russia, after the resty revolution, led to an alliance, and by Treaty (May 31, 1924) the U.S.S.R. acknowledge the suzerainty of China over Outer Mongolia. North-West (or Outer) Mongolia covers an area

of about 560,000 square miles, and consists of an elevated plateau bounded by the Russian Altai nange (N.W.), the Sayans (N.E.), the Kentei (S.E.), and the Ektagh Altai (S.W.). The plateau contains many lakes and is watered by numerous rivers, among which are the head-waters of the Yenisei, the Irtish and the Selenga. Agriculture is almost unknown, but excellent pasture provides grazing grounds for numerous cattle and sheep, and particularly for transport cattle and sneep, and particularly for transport animals (camels and oxen). The exports are wool, hides and skins, and gold. The chief centres are Urga (Kuren, or Ulan-Buotr-Khoto, "Town of the Red Knight"), Uliassutai, and Kobdo, all of importance as trading centres on the main caravan routes

Part of Outer Mongolia has caravan routes Part of Outer Mongolia has declared itself independent of its suzerain as the Republic of Tannu Tuva. The districts affected lie between the Sayan and Tannu Ola Red Town ').

Inner Mongolia covers an area of about

x,000,000 square miles and includes the Gobi

("Desert"), or Ska-mo ("Saud Desert"), which covers nearly one-third of the total area, and in the extreme south-east the Ordos Desert, bounded on the south by the Great Wall of China, and encircled on the north by part of the main stream of the Hwang-ho river. In the north-east of Inner Mongolia rises the Keru-lun, which flows into the Daisi Nor in Manchuria. Agriculture is carried on wherever Chinese influence has been exerted, but is mainly confined to the south-eastern borders. The principal industry (as in North-West Mongolia) is sheep and cattle raising and the breeding of camels, oxen and horses for transport, in order to supply the caravan routes from China to Siberia. centres of population depend mainly upon the overland commerce of China and Eastern Russia across the Gobl, the general direction of the caravan routes being from south-east to northwest. The principal centres are: Kalgan, Kuku-khoto Kuku-erghi, Dolon-Nor and Biru-khoto In the north-east, Keru-lun (on the river of that name) is a junction of the southern routes from the Chinese province of Pechlii and the western route from Urga, in N.W. Mongolia.

Tibet (area, 750,000 square miles; pop. 3,000,000) borders on British India. (See p. 672.)

Chinese Turkestan (or Sinkiany) has a total area of 600,000 square miles and a population estimated at 2,000,000. It includes Zungara and Chinese Tartary, and provides sheep, cattle, and transport animals for the caravan routes. The chief centres are Kashgar and Urumchi. (See p. 677.)

CAPITAL OF THE CHINESE REPUBLIC, Nanking. Population (1928), 1,000,000.

Nanking, selected as the capital of China in ages in place of Peking, is the principal city in the province of Kiangsu, and the seat of the provincial government of Kiang-nan (embracing the three provinces of Kiang-su, Kiang-si and Ngan-hui. About 2000 A.D. it was named Kiang man, but in 1368 this was changed to Nanking
("Southern Capital"). The city is built on the
south bank of the Yangtse Kiang river, about
equidistant from Canton and Peking, and is connected by railway (rea miles) with Shanghat.

Peking, the former capital, had an estimated population of 2,300,000 in 1982.

Shanghai comprises (a) the International Settlement administered by the Shanghai Municipal Council (for the defence of which British Forces were despatched), the estimated popula-tion being: 1,007,868 of whom 977,397 were Chinese, 38,478 Japanese, 6,321 British, 3,487 Russians; (b) the French Concession, an independent administration (population: Foreigners, 7,811, and Chinese, 27,720); and (c) the Skangkar City, Chapet and Nantao areas surrounding these settlements.

The population of the principal ports is The population of the principal ports is estimated as follows:—Amoy, 400,000; Canton, 1,370,000; Changsha, 1,272,000; Chingkiang, 500,000; Chungking, 1,011,600; Roochow, 1,500,000; Harbin, 365,000; Ichang, 450,000; Kiukiang, 380,000; Kiungchow, 590,000; Nanking, 1,300,000; Ningpo, 2,800,000; Shanghai, 2,000,000; Soochow, 1,100,000; Tentsin, 838,000; Tsingtan, 310,000; Wanhalen, 723,000; Wenchow, 1,750,000; Wuchow, 100,000. chow, 350,000.

COLOMBIA

(Républica de Colombia) President(1930-1934), Dr. Enrique Olaya Herrera, born 1867, assumed office Aug 7, 1930.

Envoy Extraordinary and Munister Plenipo-tentuary in England, Señor Dr. Don Alfonso Lonez

Counsellor Don Jorge Garcés.

Attachés, Sr. Dr. Don Bernudo Samper; Sr. Dr. Don Camilo Cruz Santos.

Consul-General, Don Alejandro Lopez, 7 Sicilian

Avenue, Southampton Row, W.C. z.

Consul-General in Liverpool, Señor Don Carlos

Vernaza, 4z North John Street.

The Republic of Colombia lies in the extreme north-west of South America, having a coast-line on both the Atlantic and Pacific Oceans. Inte on noth the Australe and rather Oceans. It is situated between a 40 8 to 12 2 N lat. and 68 to 70 N long., with an estimated area of 45, 606 square miles, and a population (Census 1928) of 7,831,000, of whom nore than one-half are whites and half-castes. The country is are writes and nar-castes. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important, as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic.

The principal rivers are the Patia, Cauca, Magdalena, Caqueta and Putumayo. The Patia flows through the famous Minima Gorge of the

flows through the famous Minima Gorge of the Western Cordilleras, and one of its tributaries (the Carchi, or Upper Gulatara) is spanned by the Runnichaca Arch, or Inca's Bridge, of natural stone. On the Finza is the Great Fall of Tequendama, 480 feet in height.

The Colombian coast was visited in 150s by Christopher Columbus, and in 1535 a Spanish expedition under Quesada established a government of certain coastal communities under the name of New Granada which continued under name of New Granada, which continued under Spanish rule until the revolt of the Spanish-American colonies of ren-reas. In 1879 Simon Bolivar (born 1783, died 1830) established the Republic of Colombia, consisting of the territories now known as Colombia, Panama, Vene-

zuela and Ecuador. In 1809-1830 Venezuela and Ecuador withdrew from the association of previnces, and in 1831 the remaining territories were formed into the Republic of New Granada. In 1858 the name was changed to the Granadine Confederation and in r86: to the United States of Colombia. In 1886 the present title was adopted. In 1903 Panania second from Colombia. and is now a separate Republic.

The Colombian forests are extensive; among the trees are mahogany, cedar, fusite, and other dye-woods and medicinal plants. The mineral productions are emeralds, gold, silver, platinum, copper, iron, lead, and coal; petroleum is available in enormous quantities, and in the year 1930 the output was so 346,000 barrels; it is possible that new olifields will shortly be opened near the Venezuelan frontier. The principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, petroleum, gold, banauss, and hides. All religions are tolerated.

The standing army consists of about ro,cos men; the navy has been nearly abolished. Railroads are in their infancy, about 1,800 miles being open in 1930, with az, 900 (1928) miles of telegraph; open in xggo, with xx, goo (xps8) miles of telegraph; there are (xggo) also 3,569 miles of motor roads. There is a daily passenger and mail service (German) between Bogotá and Barranquilla and a bi-weekly service in concert with Pan-American Airways to the U.S. New York can be reached in 34 days and mail is delivered in Fudland xx or xz days after leaving Bogotá. There are wireless stations at Barranquilla, Bogotá, Medellin, Cali and Cúcuta.

Spanish is the language of the country. ogotá, Medellin, Can and Ododos. Spanish is the language of the country. 1930.

COSTA RICA.

(República de Costa Rica.)
President (1926-1923). Cleto Gonzalez Viquez,
assumed ojne May 8, 1928.
Minister of Foreign Affairs, Leonidas Pacheco.

Minister in London (vacant). Consul General, London, John C. Eggers, 33-36 King William Street, E.C. 4. The Republic of Costa Rica, the most southern

The Republic of Costs at ICS, the most south Taste of Central America, extending across the inthmus, between 8° 17' and 12° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 33,000 English square miles, and a popula-

about s3,000 English square miles, and a population (Jan. x, x321) of 5t6,031.

For nearly three centuries (x520-x8x) Costa
Rica formed part of the Spanish-American
dominions, the seat of government being at
Cartago. In z8st the country joined in the War
of Independence, and from z8a-z839 it was one
of the United States of Central America.

"The windral agricultural medical are coffee.

The principal agricultural products are coffee, bananas, rice, maize, sugar-cane, potatoes, coca and beans, the soil being extremely fertile. The chief exports (1330) are coffee (£3.120, 500), bananas (£894,243), cacao, gold and silver bullion, skins and hides, fresh fruit and timber. The imports are dry goods, hardware, provisions, railway materials, machinery, paints, and general merchandise (in 1930, 50 per cent. from United States, 12-13 from United Kingdom, zz'a8 per cent. from Germany).

The chief ports are Limon, on the Atlantic coast, through which passes the bulk of the important banana trade with the U.S. and U.K., important banana trade with the U.S. and U.K., as well as by far the larger part of the other exports and imports; and Puntarenas on the Pacific coast. In 1930, 593 vessels (x,3x3,078 tons) entered at Costa kican ports. About 450 miles of railroad were open in 1939. In 1930 there were sog post offices, and sog telegraph offices (3 wireless), with 2,612 miles of telegraph and telephone line. A considerable amount of English capital any packed in the Rapublic. tions (the largest of the "west india" Islands) lies between 74° and 58° W. long., and 19° and 23° N. lat., with a total area of 44,178 sq miles and a population of 3,661,58s (June 30,

1330).
The island of Cuba was visited by Christopher Columbus, during his first voyage, on October 27, 1492, and was then believed to be part of the Western mainland of India. Early in the xeth century the island was conquered by the Spaniards, to be used later as a base of opera-Spaniards, to be used later as hease of opera-tions for the conquest of Mexico and Central America, and for almost four centuries Cuba remained under a Spanish Captain-General. The remained there is spanish of the rest slave trade was abolished early in the reth century, and the slaves were emancipated from 1880 1886. The government of Spain was marked by a generally corrupt administration, compli-cated by internal unrest fomented by external influences, and the various attempts at independence met with severe military repression. The separatist and autonomous agitation culminated in the closing years of the roth century in a fierce and bloodthirsty war, and although a conciliatory movement was evinced by the Madrid authorities in 1897, the struggle was continued by the party of separation in the island. In 1898 the governon separation in the island. In regs the govern-ment of the United States put into execution a threat of interference by the despatch of the battleship Maine to Havans harbour, and in February of that year the vessel was sunk by an explosion, the cause of which appears likely to remain an unsolved mystery. On April so, 1898, the U.S. Government demanded the evacuation of Cuba by the Spanish forces, and a short Spanish-American war led to the abandonment of the island, which was occupied by U.S. troops. From Jan. 1, 1899, to May so, 1908, Cuba was under U.S. military rule, and reforms of the widest and most far-reaching character were

[•] In process of redemption, but showing increase in rgg through failure of French Bank.

instituted. On May 20, 1902, an autonomous government was inaugurated with an elected government was manugurated with an elected President, and a legislature of two houses. The island was, however, again the prey of revolution from July to Sept., 1906, when the U.S Govern-ment resumed control. On Jau 38, 1909, a republican government was again inaugurated

of the total area of a8,000,000 acres, only about 1,375,000 acres are cultivated, 50 per cent. of these being under sugar cane and 30 per cent under tobacro, sweet potatoes and bananas. Rice, coffee, cocoa and maize are also grown and tropical fruits (oranges, coco-nuts, pineapples, &c.) flourish. The chief agricultural products of the island are tobacco and sugar; sugar crop 5,157,222 tons (1928-9), 4,671,230 tons (1929-30); the chief product of the forests is manogany, while cedar is also used for boxing the tobacco The live stock includes about 4.500.000 cattle and 600,000 horses, the vast savannahs of Central Cuba being particularly suitable for cattle ranges.

3,600 miles of railroad are open and about 6,000 miles of telegraph line; there are about 1,500 miles of roads.

Spanish is the language of the island.

Part of the Austro-Hungarian Monarchy declared its independence on Oct. 18, 1918, as the Czechoslovak Republic, and ten days later the Narodus Výbor (National Council) of Czechothe Nirodan Vibor (National Council) of Czechoslovakia took over the administration of the independent territories. The political neighbours of the Republics are the Austian and Rungarian Republics on the N., the German and Polish Republics on the N., the German Republic on the W., and the Polish Republic and the Kingdom of Rumania on the E. Within these limits are the former Austrian Provinces of Silesia; and Northeru Hungary from the Danube (at Buatishay, on the Austrian frontier) Danube (at Biatislava, on the Austrian frontier) to the Carpathians (at the headwaters of the Ung River in the eastern slope of Mt. Vereezka) -a total area of about 54,877 sq. miles, with a population (Census of 1930) as under :-

Rohemia 7,106,766 Morama and Silesia esia ... 3,563,157 3,330,885 Slovakia Subcarpathian-Russia 725,350

Total..... 14,726,158

Of the total population it is estimated that 65'5 per cent. are Czechoslovaks, a3'3 per cent. Germans, 5'5 per cent. Magyars 3'4 per cent. Ruthenians, and o'5 per cent. Poles. The new State was recognised by Austria in 2018 and by Hungary on March ze, 2019. The National Assembly, consisting of a Senate and a Chamber of Deputies, is elected by universal adult suffrage of both sexes. The executive power is exercised by a Council of Ministers, appointed by the President. The coalition of Czech parliamentary parties (which with short intervals had mono-polised the executive from the foundation of the Republic) broke up in the Spring of 1026. For a time the Government was carried on by a nontime the Government was carried of by a non-pallamentary cablest. At present a coaliton of the Czech, German and Slovak "bourgeois" parties are in office. In the present Ministry two portfolios (those of Justice and Public Works) are, for the first time, held by representatives of the German minority, and in January, 1927, two representatives of the Slovak Peoples (Catholic) Party joined the Ministry. The Constitution guarantees religious and political freedom. About 80 per cent of the beople are Roman Catholics. people are Roman Catholics.

by the Peace Treaty Czeoboslovakia acquired about so per cent. of the whole industry of the former Austrian Empire. It has several rich coalselds, and possesses valuable mineral resources which, notably in Slovakia, have not yet been fully developed. Radium, gold, silver, iron, graphite and lead are all mined, while the whole country is rich in mineral and thermal springs. Bohemia has rich deposits of clay, kaolin and sand. The whole country is well farmed, and agricultural production is on a very high level of excellence. In foodstuffs, however, the country is not self-supporting. Thirty-three per cent. of the total area of the country is forest land, and both in the productiveness of the forests and the quality of the timber the forest wealth of the Republic is enormous. In its industrial development Bohemia may be compared to Belgium. In Bohemia, Moravia and Silesia, which have a total population of xelf-millions, more than four million people are engaged in industry. The various industries are well organised, and as regards both machinery and modern improvements the factories are as well equipped as any in Europe. Except in Slovakia and Ruthenia liliteracy is almost unknown, and both the German and Czeob elements which compose the working-class population are hardworking and in many cases highly skilled. The new Republic possesses, therefore, many valuable economic advantages, and it is no exaggeration to state that Czeohoslovakia is in a far more flourishing state than most of its neighbours

Czechoslovakia has no direct access to the sea, but has a right of access over the Elbe and Oder to Hamburg and Stettin, for which purpose the Government proposes to canalise the Upper Elbe in order to connect it with the Oder and the Dannbe. If this proposal is carried out, the country will be traversed by a waterway affording a communication from the North Sea and Baltic, vid the Dannbe, to the Black Sea.

DANUBE COMMISSIONS.

The International Danube Commission (Headquarters, Vienna) was created by the Treaty of Versailles (1929), the States represented under the Treaty being Austria, Bayaria, Bulgaria, Czechoslovakia, France, Great Britam, Bulgaria, Czechoslovakia, France, Great Britam, Bulgaria, Czechoslovakia, France, Great Britam, Bulgaria, Lady Rumania, Wirttemburg, and Yugoslavia. The Commission maintains the liberty of navigation and the equal treatment of all flags of the Danube from Ulm (Wurttemburg) to Braila (Rumania) and tis international system, obtaining funds for administrative expenses from equal contributions of all the States represented. From Braila to Sulina (the mouth of the Danube), the navigation is controlled by the European Commission of the Danube (Headquarters, Galatz), created by the Trenty of Paris 1856, after the Crimean War; the representation on this Commission is confined to France, Great Britain, Italy and Rumania. The river is connected by canals with the Main, a tributary of the Rhine (Ludwig Canal); a new and deeper canal index construction to permit the passage of larger craft than at present, thus linking up the whole Rhine and Danube systems across Europe from the North Sea to the Black Sea. The total length of the river is about 1,732 miles, and ocean-going vessels reach Braila, where trans shipment into river barges is necessary. A pilotage and river-improvement service is maintained by the International Commission at the Irou Gates (headquarters, Orsova), the expenses being met by shipping dues.

The chief towns on the Danube are the Black Sea port of Sullins, with Galatz (confluence of the Sereth), Braila, Turnus-Severin and Orsova (Iron Gates), in Runania; Russchuk, Vidin and Lom Palanka, in Bulgaria; Belgrade, the capital of Yugoslavia; Buda-Pest, the capital of Hungary; Bratislava in Czechoslovakia, Vienna (the seat of the Commission), and Linz, in Austria; Passau and Regensburg, in Bavaria and Ulm, in Wittenharm

and Ulm, in Wirttemburg.

The financial situation of the European Commission is shown below:—

 Receipts during 1929
 Gold france

 Expenditure, 1929
 4,652,550

 3,807,53

The receipts consist almost entirely of navigation dues (5,020,653 francs in 1927). The expenditure (1927) included 2,063,297 francs the prolongation and strengthening of the embankments at Sulina, and 25,507 francs in repayment of the British portion of the loar raised by the Commission in 1924.

Spanish portion of the island of that name, is the oldest settlement of European origin in America. The island was discovered by Christopher Columbus in December, 2498, who named it "La Española" or "Little Spain." In 2496 he ordered his brother, Bartholomew Columbus, to found the capital at the mouth of the Czama River, on the south of the island, which city he called Santo Domingo. The island immediately became the objective for adventurous Spanish colonists, who exploited the netter Indians colonists, who exploited the native Indians almost to the point of extermination for the sake of the gold found in the streams. African negroes were imported for the sugar and other plantations both in Santo Domingo and Haiti, and this accounts for the present large pro-portion of negroid blood in both countries. A short time after its discovery Santo Domingo short time after its discovery Nanto Domingo became the "jumping-off point" for other adventurers proceeding from Spain to the newly-found mainlands of the western hemisphere, and this greatly diminished the importance of the island and caused an exodus to those places. In 1821 Santo Domingo broke away from Spain

The Republic of Santo Domingo, formerly the

Spanish portion of the island of that name, is

In 1821 Santo Domingo broke away from Spain and declared itself independent, but in 1822 it was invaded and subjugated by its negro neighbours from the west, the Haitians. The latter were driven out in 1824, when the Dominican Republic was definitely proclaimed by the natives, and has so remained except for an interregnum of two years (1862-1864) when the Spaniards again took possession, but were eventually forced to withdraw.

On November 29, 1916, American military forces landed in Santo Domingo and a Military Government was proclaimed From October sz., xozs, a Provisional Dominican Government was in office until July zs., xozs, when a properly elected Constitutional Government was installed, with complete authority over all matters except the collection of the customs and the redemption of foreign obligations, which con-tinue to be administered by an American official.

The Dominican Republic comprises an area of The Dominican Republic comprises an area or about 19,328 square miles, with a population estimated at 1,000,000. An extensive system of motor highways, totalling nearly 700 miles of first class roads, has been built, but they have been allowed to fall into very poor condition for want of proper maintenance. There is a direct road from Santo Domingo City to Port-au-Prince, the cantial of Maiti anabling the fourney from the capital of Haiti, enabling the journey from capital to capital to be made in one day. There are about 150 miles of public railway, and a tele-phone system connects practically all the towns of the republic. There are six wireless stations, and the All America Cable Company maintains an efficient service with all parts of the world.

Sugar and cocoa beans are the most important

crops, and coffee and tobacco are grown in fair quantities, the other products being mahogany, divi. cotton, wax, honey, maize, hides and turtle-shell.

The total import trade in 1930 was \$15,889,210 of which 56'12 per cent. came from the United States, 7'04 per cent. (rice) from British India, and 5'88 per cent. from the United Kingdom. British trade is hampered by distance (as compared with the U.S.), by lack of resident British menchants and industrial undertakings, and by will@arshand alow stampahin services from indifferent and slow steamship services from Europe.

Chargé des Archives, Sr. Carlos Arrarte.
Consul-General in London, Sr. Carlos Arraite,
a3 College Hill, Cannon St., E.C. 4. Consuls at Liverpool, Birmingham, Hull, Glasgow, and Cardiff.

An equatorial State of South America, extending from lat. 1° 38' N. to 6' 5' S., and between 60' 20' and 81° W. long. (according to the Ecuadorian geography, but there are boundary disputes with Peru), comprising an area of

276,000 English sq miles.

The former Kingdom of Quito was conquered by the Incas of Peru in the latter part of the 15th century. Early in the 16th century Pizarro's conquests led to the inclusion of the present territory of Ecuador in the Spanish Vice-Royalty of Peru. The independence of the country was achieved in a revolutionary war which culminated in the battle of Mount is the chief port (population, 1920, about 200,000);

Pichincha (May 24, 1822).
The Republic of Ecuador is divided into 17 provinces and one territory. It has a population of about 2,000,000, mostly descendants and red of the Spaniards, aboriginal Indians, and others). provinces and one territory.

Mestizoes. The territory of the Republic extends across the Western Andes, the highest peaks of which are Chimborazo (20,702 ft.), liniza (27,402 ft.), Caribuairazo (26,512 ft.), Cotocachi (26,302 ft.), and Pichincha (26,000 ft.) in the Western Cordillers; and Cotopaxi (26,498 ft.), Antisana (28,864 ft.), Cayambe (20,250 ft.), Altar (27,730 ft.), Sangay (27,464 ft.), Tungurahus (26,696 ft.), and Sincholagua (26,365 ft.) in the Eastern Cordillera Renador is watered by the Upper Amazon, and by the rivers Gusvaouii. Upper Amazon, and by the rivers Guayaqui, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. The Witchbroom disease, which appeared (1921) in the cocca plantations, has had a disastrous effect on the agricultural wealth of the country. The average yearly output previous to sear was one million quintals (of 100 lb.) as compared with 335,osa quintals in 1939 and 387,424 in 1930.
Its chief products are cocoa, petroleum, rice,

vegetable ivory, bananas, cotton, coffee, indis-rubber, sugar, orchella weed, straw hats and ham-mocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quickwheat, &c. silver, lead, iron and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are cocoa, petroleum, caoutchouc, vegetable ivory and gold, cinchona bark, Panama hats, coffee, and cattle; the chief imports are textile machinery, foodstuffs, and manufactured goods A railroad connecting Guayaqui and Quito was opened in 1908. The Galapagos (Tortoise) Islands (2,570 square miles) belong to Ecuador. In October, 1926, an American Financial Mission arrived in the country and their recom-

mendations have been enacted as laws A new customs tariff, prepared by the Mission, came into force on July x, x227, and produced 26,727,725 sucres in the year ended Dec. 3x, x228, a6,249,303 sucres in 1930, but only 11,321,1321,132 succes in the first six months of 1930, and a new monetary law neutroducing the gold standard, the currency being stabilized at 5 sucres = \$x U.S. A Central Bank was established on March 4, x927, and a new banking law enacted.

In November, 1927, the Swedish Match Company of Stockholm secured the exclusive right to import and manufacture matches in Ecuador for a period of 25 years in return for a loan of 8,800,000 sucres, which sum was applied towards the establishment of a Mortgage Bank.

The language of the country is Spanish.

The territory of Egypt comprises (1) Egypt Proper, forming the N.E. corner of the African Proper, forming the N.E. corner of the African continent, divisible into (a) the valley and delta of the Nile, (b) the Libyan or Western Desert, sad (c) the Arabian or Eastern Desert; (a) The Pessisuala of Sinai, forming part of the continent of Asia; and (3) a number of Islands in the Gulf of Stez and Red Sea, of which the principal are Jubal, Shadwan, Gafatin and Zeberzed (or St. John's Island). This territory lies between sa' and 32° N. lat. and 24° and 37° E. long. The northern boundary is the Mediterranean, and in the south Egypt is conterminous with in the south Egypt is conterminous with

the Sudan. The western boundary runs from a point on the east, N. of Sollum (long as E.), inland in a south-westerly direction for some minimum in a south-westerly direction for some distance and then turns S. along a meridian line approximately in long. as E. intil it meets the parallel of sso N. lat., which forms the N. boundary of the Sudan. The E. boundary follows: boundary follows a line drawn from Rafa on the Mediterranean (34° 15′ E. long.) to the head of the Gulf of Aquaba, from which point the remainder of the E. boundary is washed by the waters of the Gulf of Aquaba and the Red Sea. The "settled land area" is stated officially at 7,667,000 feddins (x2,43x square miles) and the area of lakes at \$4,000 fedding (1,039 sq. miles), at total of 8,308,000 fedding (13,470 sq. miles); but within the boundaries above-mentioned is euclosed an area of about 363,282 sq. miles. The population (Census of 1927) numbered 14,168,756, distributed as under :-

Of the total population in 1917 males numbered 6,369,517 and females 6,348,738; in 1927, males numbered 7,036,398 and females 7,096,996 (Nomade being excluded in each case). Physical Features.—The Nile valley varies

in width from less than half a mile in the southern granitic region to over ze miles in the northern limestone region, and the cliffs in some places use to heights of over a thousand feet above the river. The fertile lands, on which the prosperity of the country depends, occupy the floor of the valley between the river and the bounding cliffs, while to the north of Cairo they

[•] A Wasf is an institution of Mulammadan Law similar to the "trust" of Enclish Law. When property is made Wasf it is dedicated expressly or implicitly to some charitable or religious ob ect, or for the benefit of private individuals. The nearest British equivalent is "The Public I rustee."

^(†) Dahkla and Kharga Oases. (2) Including Siwa.

spread out into the irregular fan-shaped forma-tion of the Delta which comprises the six provinces of Lower Egypt, with the richest soil in the country. The Nile has a total length of 3,470 miles from the Victoria Nyanza to its mouths. In the 960 miles of its course through Egypt it receives not a single tributary stream. The river has a regular yearly rise and fall, attaining its maximum level about the middle of September and its minimum about the end of May. At Cairo the average rise and fall is about 13 feet.
Westward from the Nile Valley into Tripoli
stretches the Libyan Desert. Though as a whole it constitutes one of the most arid and inhospitable regions of the world, the Libyan Desert contains a number of depressions wherein wells and springs furnish water in sufficient quantity to irrigate small areas and to support populations of several thousands. These depressions are the Oases, of which the principal from S.E. to N.W. are known as Kharga, Dahkla, Farafra, Baharia, and Siwa. On the eastern edge of the Libyan Desert, a few miles south-west of Cano, stand the Pyramids of Giza, of which the highest, the Great Pyramid, is 431 feet high. Close to the pyramids is the Great Sphanz, 389 feet long. In the Eastern Desert a great back-bone of high and rugged mountains extends north-westward from Abyssinia to near Suez, and reappears as a detached mass in the Peninsula of Sinai. Flanking this mountain chain on the west, between the axis of the range and the Nile, are plateaux of sandstones and limestones, dissected by wadis (dry water-courses), often of great length and depth, with some wild vegetation and occasional wells and springs. The roads follow the course of the main wades from well to well, and here and there are to be found small encampments of wandering Arabs. The north (Mediterranean) coast of Sinai is flat and sandy. Inland, the ground gradually rises into a highly dissected limestors plateau, which extends southward for about 150 miles and terminates in the great scarp of El Tih. South of El Tih the character of the on MI III. South of MI III the character of the country abruptly changes, the southern third of the poninsula being formed of rugged granitic mountains intersected by deep ravines. Springs and wells occur in fair abundance, mostly in the scadie, and running water (mostly brackish) is found at a few points.

Native Population -There are three distinct Native Population —There are three distinct elements in the native population of Expyt. The largest, or "Egyptian" element, is a Hamito-Semite race, known in the rural districts as Fellahin, fellah = ploughman, or tiller of the soil. The fellahis have been mainly Muhammadans since the conquest of the country in the 7th century, but 834,474 Coptic Christians are enumerated, but be to the control of t ated in the towns and villages. These Egyptian accu in the towns and villages. These Egyptian townsmen and peasantry numbered 12,404,94 in the total of the Census of 127 (including 126,432 local subjects of foreign origin). A second element is the Bedouin, or nomadic Arabs of the Libyan and Arabian deserts (22,663 Bedouins and 127,364 Sudanese and Berbarin), of whom about one-seventh are real nomads, and the remainder semi-sedentary tent-dwellers on the outskirts of the cultivated land of the Nile Valley and the Fayum. The third element is the Nubian of the Nile Valley between Aswan and Wadi-Halfa, of mixed Arab and negro blood. The Bedouins and Nubians are Muhammadans.

Foreign Population.—At the Census of 1917 the

British, ar, 270 French and Tunisians, 2,789 Austro-Hungarians 4,225 Russians, 157 Germans, 23,032 other Europeans and Americans, and 1,496 Persians.

Religions.—At the Census of 2917 there were 21,623,753 Muhammadans, 1.026,207 Christians, 59,531 Jews and 8,814 other religions. The chief Muhammadan religious authorities in Egypt are the Sheik el Game el Azhar and the Mufti el Di-udr el Masriva.

Government.—From B.C. 30 to A.D. 639 Egypt was a province of the Roman Empire, but in A.D. 640 the Christian inhabitants were subjugated by Moslem invaders, and Egypt became a province of the Eastern Caliphate. In 1517 the country was incorporated in the Ottoman Empire, and was governed by pashas sent from Constantinople until the beginning of the 18th century, when for about 100 years the ruler was chosen from among the Mamelukes, or bodyguard Moham-med Ali, who was proclaimed Pasha in 1805, Mohamexterminated the Manielukes in 1811, and was eventually made hereditary governor of Egypt and the Sudan by a firman from the Sultan of June 1, 1841.

Rulers of Edunt since 1811.

Legislature -Legislative power is exercised by the King in concurrence with the Parliament within the limits laid down in the Constitution established by Royal rescript of April 19. 1923, and general elections took place for a Parliament. consisting of two houses, which first assembled March 15, 1024. Parliament consists of a Senate of 121 members of whom two-fifths are nominated by the King, the renamer being elected on the hasis of a Senator for every 180,000 inhabitants; and of a Chamber of Deputies elected on the basis of a for every 60,000 inhabitants.

Executive. - The executive power is exercised by the King through his Ministers within the limits of the Constitution, the Ministry being held jointly responsible to the Chamber of Deputies.

Local Government.—The chief towns constitute governorships (muhafzas), and the remainder of the occupied country is divided into provinces (mudirias), which are subdivided into districts (markaz), each under a mamur, who controls the head man (omda) of each village in his district. By the law of 1883 provincial councils were in-stituted, consisting of two representatives from each markaz, under the presidency of the mudir (or governor) of the province. These councils were reorganised in 1910 and were made the elementary education authority for the province, with certain restricted nowers of local government.

Defence.—In 1882, a military revolt, headed by an officer of the Egyptian Army (Ahmed Arabi Pasha) assumed slarming proportions, and a British expedition was despatched to re-establish the authority of the Khedive. Meanwhile a revolt had broken out in the southern foreign residents were 205,998, of whom 30,797 while a revolt had broken out in the southern were Turks, 56,732 Greeks, 40,198 Ita ians, 24,354 provinces, headed by Sheikh Mohammed Ahmed, of Dongola, who proclaimed himself a Mahdi of Islam, and the British expeditionary force, sent to quell the rebellion of 1838, remained in the country as an army of occupation. The defence of Expt is reserved by the Constitution and remains under British control, the British general officer) amounting to 3 cavalry regiments, 3 batteries of artillery, 2 companies of engineers, 7 battalions of infantry and x armouned car company, a total of xx,450. Service in the Eupprican Army is nominally compulsory on all Egyptian subjects between the ages of xg and 37, the recruits required each year being chosen by ballot; but certain classes (professors, students, Government employees, &c) are exempt, and exemption may also be purchased for £E20, if paid before the ballot. Natives of the Sudan are enlisted voluntarily for service in the Egyptian Army, which had a strength of about xx,350 all ranks in 1922.

There is no Namy in the proper sense of the term of the arm a small cruisers belonging to the

There is no Nary in the proper sense of the term; there are 3 small crusers belonging to the Coast Grard and Fisheries service, and 4 vessels under the Ministry of Communications, while the different Government Departments possess icaniers on the Nile for inspection purposes.

The Egyptian Police (under the Ministry of the Interior) consists of City and Provincial Police, the former comprising 306 officers (75 Europeans), 476 European constables, and 6,585 men, the latter 356 officers and 6,765 men. There are also 60,859 that/s, or native night-watchinen. Education on native lines has long been given in elementary vornacular schools. The native

Kilucation on native lines has long been given in elementary vernacular schools. The native system of education is completed by the more promising pupils the Azhar University in Cairo, the principal University of the Moslem world. In 1923-3 there were 151 Elementary Schools (Maktab) under Government supervision, with 23,996 pupils and 2,710 Maktabs under inspection for grants-in-aid with 279,499 pupils; there were also 24,528 pupils in other elementary schools. The government primary schools give a 4-years' course and prepare for admission to secondary, agricultural and other special schools. There were also 1,128 Egyptian institutions with 15,916 pupils. There are Colleges of Medicine, Law, Education, Engineering, Commerce, Veterinary Science and Agriculture at Cairo. Much assistance is given to education by private enterprise and benevolence and foreign schools abound. A National University was founded in 1936 at Cairo.

Agraculture.—The total area of Egypt is estimated at approximately \$22,400,000 English acres, of which about \$4,50,000 acres are formed of the alluvium brought down by the Nile from the Abyssman hills, the remainder being chiefly limestone desert. Only the former are cultivable, and only the portion that can be irrigated from the waters of the Nile—this pot ton amounts at present to 5,600,000 acres (1926), and is capable of extension (to 7,600,000 acres) by the improvement of water storage facilities and means of distribution. In 1936 fedddins by \$1,70,033 native owners, and as to 480,74x fedddins by \$6,904 foreign owners. The principal crops grown during Sayft (summer) are cotton, rice, sugar cane, and Sorgho (a varlety of maze) Nul (flood) part of Sauft, has the date of its commencement fixed by the Irrigation Department according to the quantities of water available

before the flood, which reaches its highest level in September—it generally commences in July. The principal crops are maize and uce **Chutzei* (winter) commences in November and ends in June. The principal crops are cereals, bersim (a variety of clover) and—mainly in Upper Egypt—beans, lentils, onlions and helba. The total cotton crop and the value of the quantities exported in recent years:—

Year,	Kantars	Export value
1984-25	7,273,974	£E57,544,253
1925-26	7,964,645	43,825,564
1926-27	7,652,189	35,961,447
1027-28	6,041,493	45,138,000
1928- 29	8,070,000	41,361,000
1030-31	8,015,400	

Live Stock.—In 1939 the cattle numbered 800,853, buffaloes 828,587, horses 38,371, mules 21,738, donkeys 739,121, sheep 1,002,683, guats 731,176, and camels 173,619.

Minerals — The riparian districts of the lower Valley of the Nile are ill-provided with workable mineral deposits, with the except in of abundant building materials. The mineral resources of Egypt, therefore, are situated in its otherwise barien deserts. Known deposits are chiefly situated at great distances from one another and from the Nile. This fact has retarded exploration and development, but of late years considerable progress has been made. Owing to lack of knowledge of mining, consequent upon their pursuit being entirely agricultural, the local industrial classes have had very little hand in the existing enterprises, whose capital and organisation are chiefly foreign.

Manufactures and Industries.—The principal articles of Egyptian manufacture are cotton and woollen fabrics, silks, embroideries, brass, silver and copper ware, leather goods, rugs, pottery, alcoholic beverages, sugar, perfumery and cigarettes. The principal Egyptian industries are dyeing, tanning and cement.

Railrays.—The principal lines radiate from Cairo to Alexaudria (and on to Rosetta), Damietta, and Ismailia (continuing northwards to Port Said and southward to Sucz). From Cairo the line runs southwards for a distance of 554 miles to Shellal, the First Cataract. At this point a steamer connexion runs to Wadi Haifa, connecting the Egyptian State with the Sudan Government Railways. Westwards from Alexandria (and close to the coast) runs a line, which it is hoped to extend eventually to the fronter at Sollun, thus joining Tripoll to Egypt. The total length of the Egyptian State Railways (excluding the Auxiliary Railways of Upper Egypt, and the Western Oases Railway) on March 31, 1930, was 2,300 miles. 27,285,000 passengers and 5,780,487 metric tons of merchaudise were carried during 293-4, the net receipts being £1,810,487. The gauge is standard (4ft. 8½ in.), with the exception of 138 miles hetween Jaixor and Shellal, which are 3ft. 6 in. gauge. There are two other State-owned lines in Egypt, namely, the Auxiliary Railways of Upper Egypt, consisting of 38 miles of standard gauge, and the Western Oases Railways, a length of 14x miles (75 centimetre gauge) connecting the oasis of Khaiga with the Nile Valley. In addition to the Government lues, there are \$65 miles of light railways eyploited by public companies.

Motor Vehicles.—On Dec. 31, 1928, there were 14,122 private motor cars, 6,311 taxi-cabs, and 4,045 lorries and omnibuses.

Caravan Routes,-The principal caravan routes lead to the Cases of the Libyan Desert (though Kharga can now be reached by train), whence there is a route, known as the Darb el 'Arbain, leading to Dar Für and the south of the Sudan. There are many well-known toutes across the Arabian Desert to the Red Sea, that from Qena to Qoseir being probably the most frequently

Shipping .- For the SUEZ CANAL see page 868. - Apart from the three great seaports of Alexandria, Port Said, and Suez, Egypt has but few harbours and anchorages adapted for large craft; the principal are those of Sollium and Matruh on the Mediterranean, Tor, Abu Zenima, Zeitia, Jemsa and Hurghada in the Gulf of Suez, and Safaga, Qosser and Halab on the Red Sea. The Khedivial Mail Steamship Line (which is under British management) has its headquarters at Alexandria and a depôt at Suez. The principal port is Alexandria, where 2,102 vessels (4,781,305 tons) entered and 2,106 vessels (4,800,655 tons) cleared in 1925.

Posts and Telegraphs —There were in 1925 3,311 post offices and stations, dealing with 58,753,000 letters and post-cards, and 26,391,000 newspapers, &c., and a total foreign correspondence of 43,000,000 Therewere on March 31, 1925, 136,522 miles of telegraph and telephone wire. A system of savings banks has been introduced, under the control of the Post Office, the actual deposits being collected in rural districts by the sarraf (village tax-collector).

1030-31 Revenue£E41,886,428 £E36,277,000 Expenditure 41,128,413 44,915,000 £E47,488,760 Imports ... £E56,274,912 Exports ... 52,286,625 Imports from U.K. £12,576,000 31,941,59a £9,808,000 Exports to U.K. ... 23,583,000 13,910,000

Debt.-The Caisse de la Dette, a body representing the creditors of the Egyptian Treasury, has considerable powers and special privileges. The Cause, appointed during an era of bank-ruptcy, succeeded in protecting the interests of the bondholders, but as Egypt became solvent and prosperous, its stingent regulations pre-vented the development of the country out of surplus revenue, a large part of which was held in suspense as contingent security for the service of the debt. Though the Cause still exists, its or the deut. Inough the Carses still exists, his duties are now limited to receiving the revenues necessary for the interest and for the payment of the coupons as they become due, while it also holds a considerable reserve fund (£836,565,x40 on April 30 1938), the interest on which reduces the amount of the Treasury contribution. The Egyptian debt was stated as follows (in £ sterling) on April z, 1928 and 1929 :-

Debt.	1920.	x930.
Guaranteed Debt, 3)	£ 4,227,900	£ 3,994,400
Privileged Debt, 3½)	30,633,980	30,633,980
Unified Debt, 4 per	55,426,320	55,250,460
Total	00.288.200	80.878.840

The Cost of the Debt (in the Budget for 1930-31) inclusive of £E664,826 assigned to the service of the Ottoman Loans of 1855, 1891 and 1899,

which were guaranteed on the Egyptian Tribute. was stated at £ E4,607,284.

CAIRO, the capital (population 1927, 1,064,567), stands on the E. bank of the Nile, about 14 miles from the head of the Delta. Its oldest part is the fortress of Babylon in old Cairo, with its Roman hastrons and Coptic churches. The carlest Arab building is the Mosque of 'Amr, dating from A.D. 643, and the most conspicuous is the Citadel, built by Saladin towards the end of the 1sth century. The bazuars are always interesting, especially the Khan-ol-Khalili, the Hanizawi, and the Brass Bazaar, though the Muski, which leads to them, is fast losing its oriental character.

ALEXANDRIA (population 1927, 573,023), founded B.C. 332 by Alexander the Great, was for over 1,000 years the capital of Egypt 1ts great Phanos, or lighthouse, was one of the "Seven Wonders of the World" (see p. 87). It now contains two roys palaces, Ras-el-Tin and Montaza, while almost the entire cotton trade of the country is here controlled by the law delegant. the country is here controlled by the big dealers and brokers. At the census of 1927 the towns of Tauta (90,014), Port Said (104,603), Mansura (63,696), Assut (57,132), Fanyûm (52,372), Zagazig (52,351), and Damanhur (51,709), also exceeded 50,000 inhabitants.

(Suomi.)

President. Pehr Evind Svinhufud, born 1861, assumed office, March, 1932. Prune Minister, Juho Emil Sunita Foreign Affairs, Baron A. Yijb-Koskinen.

Minister in London, Monsieur A. H. Saasta-moinen, a Moreton Gardens, S. Kensington,

S.W. 5.
Counsellor, Eino Wälikangas.
and Sec., Aaro Pakaslahti.
Attaché. Col. Aejme

Müstary Attaché, Col. Asjmelæus-Aimii, C.B.E. Commercial Attaché, J. E. Lundstrom (acting),

Tog Cannon Street, E.C. 4.

A country situated on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and united to the Russian Empire, as an autonomous but not sovereign Grand-Duchy, in 1809. When the Russian Empire broke down in 1917 Finland declared herself an independent sovereign state (Dec. 6, 1917). The following year the country sustained severe disturbances on account of the aggression of Russian Bolshevism, but succeeded in restoring order, and the rela-tions between Finland and Russia were finally tions between Finland and Russia were finally settled by the Treaty of Dorpat (Oct., 1920). The area is 149,926 square miles, with a population (1930) of 3,634,047, of whom (in 1920) 1,574,128 were Finnish-speaking, 24,953 Swedish-speaking, and 1,623 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. The Aland Archipelago, a group of some 300 small islands at the entrance to the Gulf of Bothnis (area 537 square miles, population about 27,000), forms part of the Republic. There are 3 universities, 2 at Helsinki (Helsingform) and 2 at Turkn (Abo): Helsinki (Helsingfors) and a at Turkn (Åbo); the university of Helsinki (founded 1640 at Turku and removed to Helsinki in 1828) has xternal Debt (1939):—

are a great source of wealth; there is no European country so wealthy in forests except Russis, the exports of timber in 1938 being Russis, the exports of timber in 1928 being 1,141,000 standards; wood pulp, cardboard and paper, and dairy produce are also exported. There are (1931) 3,378 miles of railroad and about 2,000 miles of telegraph, with a well developed telephone system (32 per 1,000 inhabitants). There is railway connexion with Sweden and Russis, and telephone connexion with most European countries and with U.S.A. The merchant fleet (1930) consists of 982 vessels (331,032 tons), of which 527 are steamers. Service in the Army is universal and compulsory, the peace effective being about 22.000 all

sory, the peace effective being about 25,000 all ranks; there is also a volunteer organisation of Civic Guards with an enrolled atrength of about

The country was formerly governed by the Finnish Senate of as members, with a Diet of 4 estates elected by the people; but under the Constitution of Jan. 1, 1907, there is a single Chamber elected by universal suffrage of both sexes, women being likewise eligible for election to the Chamber. Finland was thus the first country to concede woman suffrage and representation, and it is noteworthy that it gained without agitation.

Finland is a Prohibitionist country, the only

one in Europe.

Finnish and Swedish are the official languages.

of whom (1926) 2,495,230 were resident there, including (in 1921) 470,873 Italians, 475,546 Belgiaus, 303,141 Spanish, 55,456 British, 34,027 Russians, and 30,948 Americans.

GOVERNMENT. - The monarchical system of The monarchical system of government was overthown by the French Revolution (1769-1793), and the First Republic endured until the Great Napoleon (born Aug. 15, 1769, died May 5, 1821) founded the First Empire in 1804. The monarchy was restored in 1814, and also after the "Hundred Days" of Napoleon (March ac-June 29, 1875), until the Second Republic of 1848, which became the Second Empire on Nov. 22, 1852. On Sept. 4, 1870, the Emperor Napoleon III. (nephew of the Great Napoleon) was deposed, and the Third Republic was set up. The head of the Republic is the President, elected for 7 years by the National Assembly of elected for 7 years by the National Assembly of the two houses of the Legislature, the Senate of 314 members (elected by undirect vote for 9 years, one-third being renewable every 3 years) and the Chamber of Deputies of 612 members (elected by direct vote for 4 years) Members of the legislature receive 62,000 francs a year and travelling facilities over the railways Production ...The chief agricultural products

PRODUCTION .- The chief agricultural products are wheat, barley, rye, malze, oats, potatoes, beetroot (for the manufacture of sugar), hops, &c. Fruit trees shound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig. plum, &c The agricultural production is shown in the

following table :-

Production (Metric Tons).

Crop	1929.	1y30,
Wheat	8,705,000	6,891,000
Rye	1,002,000	750,000
Barley	I,285,000	1,000,000
Oats	5,744,000	4,400,000
Potatoes	13,429,000	14,000,000

Forestry is an important industry, the principal forests being those of the Ardennes, Complègue, Fontainebleau, and Orléans, consisting chiefly of Foliationical, and off-easis, consisting menty of coak, birch, pine, beech, elm, chestnut and the cork-tree in the south. The vine is cultivated to a very great extent (994,34,900 gallons of wine were produced in 1930), as the names Bordeaux, Burgundy, Champagne, &c. universally testify; citier-making is also an important

of Versailles, the coalfields of the Saar Basin are ceded to Krance for 15 years, at the end of which time the inhabitants are to decide by a piblisails whether they will remain French, return to Germany, or become a self-governing return to Germany, or become a self-governing community. The coalields abut on Lorraine, and have an area of sry square miles, with a population of \$40,000, and they include the towns of Saarbrick (\$6,000), Saarlouis (16,000), and Merzig (10,000), on the River Saar. In 1911 the coal mines of France produced 30,000,000 tons, and the production of the enlarged area reached \$4,000,000 tons of ooal in 1939. The most important manufactures are of metals, watches develler; calinet-wark carving notmost important nanuscates are of messas, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper making, woollens, carpets, linen, silk and lace. Glass manufacture and pottery are also important, and the sardine fisheries and the culture of oysters are a source of wealth.

DEFENCE.—The National Army of France consists of the Metropolitan Army, the Colonial Army, the Gendarmerie and Republican Guard, Army, the Gendarmerie and Revublican Guard, and of the partly native armies of Algeria, Morocco, and Tunis. The peace strength of the Metropolitan Army (1930-32) was 376,992 all ranks, including the (Military) Air Force (35,600). The Naval Air Force (for Coast Defence) is included in the Naval personnel. In the War of 1937-1938 over so per cent. of the French people were mobilised, and 9,717,000 all ranks passed into the Armies of France (exclusive of troops from Naval Carlos 1930-1930). Algeria, Tunis and Morocco). The French Navy was manned in 1930 by 57,415 officers and other ranks. For strength see Tables pp. 286 and 287.

ARMISTICK MONUMENT.—In the Forest of Complègne is a Carrefour de l'Armistice, from Complegne is a Carregour ac Latterative, from which the Claure're de la l'actoire leads to the Armistice Monument, unveiled Nov. 12, 2022. The monument marks the spot where the Germans signed the armistice terms presented by Maréchal Foch, and bears the inscription Ict le 11 Novembre 1918 succomba le criminel orgueil de l'Empire Allemand vanicu par les peuples libres qu'il prétendait asserver.

EDUCATION .- The educational system is highly developed. Central Administration comprises (a)
Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. Local Admanistration comprises (a) Territornal Academies, with inspecting staffs for all grades; and (b) Departmental Councils, presided over by the prifet, charged especially with primary educa-tion. By the Law of July, 1904, all congrega-tionist institutions are to be suppressed within 10 years, and many were at once closed, some re-oponing under lay management. (i.) Primary Secular, comp. and free Age6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary cortificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. wine were produced in 1930, as the names | funds. Schools are fot boys, for girls, or mixed. Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important and many private establishments, 7-yrs, course, industry, and the production in 2903 amounted to 513,160,000 gallons. The live stock (1938) | either (a) purely classical; (b) purely modern; to the 150,000,000 gallons. The live stock (1938) | languages. Degree of Bachelor conferred on conspiction. For females, a similar organisation, coal, pig iron, copper, lead, silver, antimony and salt. Under Article go of the Treaty | Association well-known. (iii.) Special Schools are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) Universities (State universities alone grant degrees, but numerous private faculties and private institutions further nigher education): Aix, Algiers, Besançon, Bordeaux Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Montpelier, Rancy, Paris, Poitiers, Reunes, Strassbourg, and Toulouse.

COMMUNICATIONS. — The length of the Routes Nationales in 1928 was 24,426 miles. The principal rivers of France are the Seine, Loire, Garonne, and Rhône; the navigable waterways having a length of (1924) 4,222 miles, with 3,227 miles of canals. The system of railroads in France is very extensive; they are almost entirely concedes, and become State property after the expiration of the concession. The length of lines of general on January 1, 1330, was 26,177 miles, of which over 750 miles are electrified. The length of over 755 mires are electrical. The length of telegraph wires (1295) was 231,437 miles, and of telephone lines 120,000 miles, with nearly 1,000,000 subscribers. In 1938 there were 642,744 private motor-cars legistered in France, of which (1936) 547,438 were touring cars. Goods transport vehicles numbered 305,587, cycle-cars 27,450, motor-cycles 222,207, and motor-bosts 3,313. In 1927 the passengers carried in civil aircraft numbered 15,857, the weight of cargoes being 1,644,000 lb. (exclusive of 276,000 lb. of mails).

Shipping -The gross tonnage of the French mercantile marine in 1930 was 3,530,599 gross tons, of which 146,911 tons were motor vessels and 6,328 tons were sailing ships. During the year 1939 the tonnage of French and foreign vessels entering French ports amounted to 58,091,343 tons, of which 14,426,216 tons were French, while the total clearings amounted to 49,529,523 tons, of which za,772,843 tons were French. The chief pot sare Marsellles, Cherbourg, Le Havre, Rouen, Bodeaux, Calais, Boulogne, and Dunkirk. A bill was passed by the Chamber in 122x for the canalisation of the Rhone, which will make the river navigable for 1,200 ton vessels from the sea to Switzeriand, and will also provide electric power and irrigation to the surrounding departments.

COMMERCE.—The principal imports are wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, cereals, timber, caoutchouc, copper, petroleum oils, coftee, and wines. The principal exports are cotton tissues, silk tissues, wool, woulen tissues, wines, smallwares, automobiles, &c, silks, raw skins, nillinery and artificial flowers, dressed skins, tools and netal goods, machinery, pig 1701, butter, table fruits, re-fined sugar, brandy and liqueurs, fish, and cheese.

Algeria.—The three departments of Algeria—Algeria, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4.50 W. to 6.70 E. longitude, 37 G. N., covering an area estimated at zaz, 120 square miles, with a population (1295) of 6.064,865. of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of whom \$272,439 were Europeans and 5.723,426 of the exports to France amounting in \$293 to france 2.233,723,000 (total exports fr. 4.925,250,000), and the imports from France to fr. 4.523,250,000 (total imports fr. 5.499,950,000). The exports consist mainly of wine, wheat and other cereals, sheep and oxon, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, ootton tissues, tin plates, clothing, and prepared skins. Iron, copper, quicksliver, zinc, and lead mines are being worked. In \$295 there were 2.566 miles of railroad open for traffic; and in \$295 then number of ships engaged in foreign trade entering Algerian ports was 4,322 of a net tonnage of \$6,98 ase tons. The principal town is Algiers, the capital (municipal population, 1995, 2008, 536-64) on and nuch frequented as a health resort; other large towns are Oran (150,507). Constantine (93,733), Sons (51,985), Sidi-bAbas (4,3000), Philipville (20,000), Mascara (28,000), and Tiemneen (27,000) (overnor-Geneva at, M. Juies Carde (1930).

CAPITAI, Paris, on the Seine. Population (1932), 2,871,039; there are 82,127 houses and 1,249,366 families according to the census of March 1931. Fourteen other cities exceed 100,000 — Marseilles 652,195, Lyons 570,740. Bordeaux 25,025, Lille 201,201, St. Etienne 193,727, Nantes 184,509, Nice 184,441, Toulouse 180,771, Strasburg 174,492, Le Havre 128,022, Rouen 123,828, Roubaix 127,205, Toulon 125,120, Kancy 124,491, Clermont Ferrand 111,701, and Reims 100,005. Mulhouse, Amiens and Limoges exceed 90,000, and 30 others exceed 50,000.

exceed 90,000, and 30 others exceed 50,000.

FLAG: The "tricolour," three vertical bands, blue, white, red (blue next to flagstaff).

It lies between Algeria and Tripoli, and extends southwards to the Sahara, with a total area of about 45,000 sq. miles and an estimated population of s,000,000, of whom about 600,000 are Berbers and 500,000 Arabs. The valleys of the northern region support large flocks and herds, and contain rich agricultural areas, in which wheat, barley, and oats are grown. The winch wheat, parrey, and ones are grown.
when and olive are extensively cultivated. The
principal minerals are coal, copper, lead, zinc
and iron, and phosphates and maible are also
worked. The clust exports are phosphates,
olive oil, wheat, espanto grass, barley, beans,
blankets, sponges, and dates; the chief imports
are textiles and other manufactures, iron, steel,
are textiles and other manufactures, iron, steel,
are textiles and other manufactures, or and of machinery and provisions. Eighty per cent. of the trade is with France and Algeria. In 1996 the imports were valued at s,co6,coo,coo francs and the exports at 1,641,coo,coo francs. Tunis, the capital, has a municipal population of 185,co6; the exports at x,6x,000,000 fruites. Tunis, the capital, has a municipal population or \$85,995; other towns are Sfax (27,723), Bizerta (20,392), Suas (21,326), Kairwau (19,426), Gabes (15,119), and Monastir (8,837). French West Africa extends from Mauritania to Dahomey, and has a total area of x,509,723 square miles, and a population of x1,344,076. It consists of Senegal (74,000 sq. miles, pop. x 250,900), capital, St. Louis; the trade of Senegal in x926 was fraues 909,908,934 imports, and france 885,945,699 exports, the principal export being ground nuts (48,000 tons france y40,869,000 (and the principal import cotton fabrics (france 200,549,000); Upper Senegal Niger (304,000 sq. miles), and the Niger Military Territory (533,000 sq. miles), which have a total population of about 6,036,200; French Giunea (23,600 sq. miles, pop. x,737,320); Indradomey (38,000 sq. miles, pop. x,737,320); and Dahomey is the French Sphere of the former German colony of Toyoland (23,400 sq. miles, pop. 800,000); while the hinterland of these colonies forms the French Schara, which has an estimated area of 924,160 sq. miles and a population of about 450,001. French Equatorial Africa consists of the French Conge (53,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory (513,000 sq. miles, pop. 9,000,000) and of the French Sphere in the former German territory French Sphere in the former German territory of Cameroon (25,000 84, milles, pop. 3,750,000). The ASIA.—French India includes Pondicherry, on the Coromandel coast; Chandernagore, on the Hooghly; Karikal, in the Cauvery delta; Island of Madagascar (25,000) and of the large Yanaon, in the Godavery delta; and Mahdo, on the Malabar coast—the total area being 25,25,200 with its dependencies (Nossi E6, 81mic Marie, Edunion, and the Mayotie-Comoro square miles with an estimated population of Islands, and St. Paul, Amsterdam, and Kerguelen (1928) 28,000. The trade of Pondicherry and Karikel in 1927-8 was valued at £265,529 for the principal industries; the minerals include

gold, silver, iron, copper, lead, and zinc. The chief exports are gold, cattle, bark, manioc (for arrowroot), beans, hides, skins, fibre, rice, timber and rubber; the chief imports are cottons, metal manufactures, wines and spirits, coal, clothing, lime and cement. The capital, Antananarivo, has a population of 75,000; other towns are Tamatave (the chief port), Majunga, Diego-Suarez, Mananjary, Tuléar, Andevoranto and Vohémar Off the south-east coast are the uninhabited islands of St Paul, Kerguelen and Amsterdam. There is now direct communication across French and British territory in Africa, with posts on the Atlantic and Indian ocean.

In AMERICA -- Off the south-east coast of Newfoundland are two small groups of islands, of which the largest are St Pierre and Miquelon. In the Vest Indies, Martinque and Guadaloupe, with Basse Terre, Marte Galante, He des Samtes, Petite Terre, St. Bartholomew, and St. Martin; Petito Telle, at harmonew, and at Marun; and in South America, Cayenne or French Guiana. Included in Cayenne is a group of islands (St. Joseph Ile Royal, and Ise du Diable) known as Isle du Salut. On Derul's Isle Major Dreyfus was imprisoned from 1894-1899. The total area of French possessious in North and South America is 35,320 square miles, with a

South America is 35,330 square miles, with a population of 488,85°. In OCEANIA—New Caledonia (7,200 84. ms., pop. 50,500) is a large island with dependences, the Isle of Pines, the Wallis Archipelago, the Loyalty Islands (Mahé, Lifou, Uvéa, &c.), the Huon Islands, and Futuna and Alofi. The Society Islands (Tahiti, Moorea, &c.) have an area of about \$65 square miles, and a population of about \$4,000; the Marquesas (Nukahiya, Mingaré, Sundaron, Hivasa, &c.) 500 sq. miles, pop. 2,500. Leeward Isles (Huahiné, Raiatéa, Tahaa, Bora-Bora, Maupiti, &c.); the Gambier Islands (Mangareva, Ac.); the Tubua Islands (Rurutu, Raivavae, Rimatava, &c.): Rapa Island; Makatea; and Maino Island. The New Hebrides are under joint Franco-British administration.

GERMANY. (Deutsches Reich.)

President of the German Reich, General Field-Marshal Paul von Hindenburg, born Oct. s, 1847, assumed office May 12, 1925

MINISTRY (October 10, 1931).

Ambassador in London, Baron von Neurath, g Carlton House Terrace, S.W. r. Consular Dent. of the Embassy, 9 Carlton House Terrace, S.W r.

The area of Germany is approximately 182.200 square miles, with a population on June 16, 1925, of 62,592,575 (without Saar district), of whom 30,196,42x were males and 32,396,154 were females. The population on Dec. x, 1910, was 64,925,993. Bit his in 1930 numbered 1,126,829 and deaths 710,905, births being 17'5 per 1,000 of population, deaths 11'x per thousand. Religious confessions in the present area were

neigious confessions in the present area were in 1925:—Protestants 40,014,677, Roman Catholics 20,193,324, Jews 504,379, others 7,638,229.

There are 45 large towns with over 200,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 3 in Bavaria, 2 each in Baden and Hesse, 2 each in Winttemburg and Brunswick, and three Hanse Towns.

At the outbreak of war, Aug 1914, "Germany" was a Confederate League, bearing the name "German Empire," under the hereditary presidency of the King of Prussia, holding the title of "German Emperor."

By the Treaty of Versaules the "Reichsland" of Elsass-Lothringen and the Saar coal basin of Eisass-Lobhringen and the Mari coal basin (temporarily) were ceded to France; parts of Posen and West Prussia to the newly-formed Republic of Poland; North Schleswig to Demark; and Moresnet and Malmédy to Belgium. Plebisettes held in June 2300 in parts of East and West Prussia yielded majorities for Germany. A plebiscite to decide the fate of Upper Silesia, which was held under the Peace Meaty, resulted in division between Poland and Germany. Memel City with adjoining territory has been ceded to Lithuania.

The Colonial possessions of the German Empire extended over 1,035,086 sq. miles in Africa, 96,20 sq. miles in the Pacific, and 2,943 sq. miles in the Pacific, and 2,943 sq. miles in Asia—2 total of 1,134,23 sq. miles, with a population estimated in 1914 at 15,000,000. By the Treaty of Versailles Germany renounced her overseas possessions, with all rights and titles therein, and the delegates to the International Council at Paris allocated Togoland and Kamerun to Great Britain and France; German Rast Africa to Great Britain; German S.W. Africa to the Union of South Africa; the German Pacific possessions N. of the Equator to Japan; and those S of the Equator to Australia and New Zealand.

On Nov. 9, 1918, the German Emperor abdicated, and the Government of the country was cated, and the Government of the country was taken over by the Council of the People's Commissioners in Berlin. On Nov. xx, 1928, Germany was granted an armistice, and on June a8, 1929, peace was signed at Versailles. In Jan. 2929, elections were held to a National Assembly on the basis of universal adult suffrage (male and female), and on Feb. xx, xore, the first President of the German Versammlung was elected at Weimar. Under the new Constitution of August 11, 1979, the federal legislature consists of a Reichstay representing the whole nation and elected by popular suffrage (male and female), with proportional representation, and a Reichstat representing the separate States The people possess the right of initiative and the referendum. Bills dealing initiative and the referendum. Bills dealing with economical questions or social issues arising thereout must first be submitted to the new advisory Economical Council (Reichswirtschaftsrat)

PRODUCTION AND INDUSTRY.—Germany is primarily an industrial country. On June 16, 1925, 41.4 per cent of all persons with earning occupations were engaged in industry, 30's per cent. in agriculture, 16's per cent. in trade and communications, 4'p per cent. in the public services and the professions, 1'8 per cent. in the health services, and 5'x per cent. in domestic service. Of the total area in 1925 the area under agriculture was 25,508,000 hectares (whereof 20,681,147 hectares arable land in 1927), and the area under forests 12,737,292 hectares. The Live Stock (Dec. s, 1989) included 3,617,141 horses, 19,943,974 cattle, and 19,943,974 pigs. The production of coal in 1989 was 163,440,000 netric tons, lignite 174,444,000 tons. iron ore 6,373,500 tons, and potash salts 13,378,000 tons. Rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolf-ram-ore, pyrites, vitrolic-ore, and alum-ore are also worked. Crefeld, Elberfeld-Barmen, Chemitz, Augsburg, and the provinces of Westphalia and Silesia are the great centres of the textile industries. By laws of 1919 and 1920, all coal, heavy iron and steel, potash and coal-tar producing concerns were compulsorily fused into All-German Syndicates, governed by assembles representing Producers, Traders and Consumers, with equal representation for Employers and Employed.

Economic Condition.—Industrial production passed the highest point in 1927, but did not begin to sink rapidly until 1930. In 1931 output of iron and steel fell more than 40 per cent. below the highest post-war volume, and some manufacturing industries were occupied to less than half their capacity. In consequence of drastic increases in agrarian import duties, the production of primary food-products increased, and in 4 years the importable wheat-deficit fell from a million to about a quarter million tons. In February, 1930, the total number of unemployed was 3,36,000; February, 1934,497,000; September, 1931, 4,344,000. Export trade in 1930 and 1931 fell off less than that of other commercial countries, and as import trade declined heavily very large active trade balances were attained. Shipping was badly depressed, 183 per cent, of tonnage being laid up in August, 1932. In the summer of 1931 a serious credit crisis, accompanied by bank failures, was caused by the summary withdrawal of foreign short-term credits, and the Reichsbank's reserves were dangerously depicted. The crisis was met by placing payments to abroad under Reichsbank ontrol, expropriating foreign currency in private hands, and negotiating the suspension of further credit withdrawals until March, 1932. The stability of the reichsmank at gold parity was maintained. By emergency decrees under Art. 48 of the Constitution the Government drastically regulated Finance and Credit, reduced official salaries, increased social-insurance contributions and reduced benefits, and precedited recents agrart unemplayment.

scribed measures against unemployment.

OLD AGE AND INFIRMITY INSUIANCE.—The
German scheme of social legislation gives all
subordinate bread-winners in Germany a legal
right to pecuniary subvention when unfitted for
work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. This
National Insurance is based on mutual insurance
and self-administration. The Infirmity Insurance
Act came into force Jan. 1, 2000. The insured include all persons working for wages or salary as
workpeople, artisans, journeymen, apprentices,
domestic servants, laundresses, dressmakers,
sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and
apprentices in merchants' offices (excepting
assistants and apprentices in chemists' shops),
schoolmasters, schoolmistresses, tutors and
governesses, including foreigners working in
Germany under these categories. Pensions for

premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work. A comprehensive project of reform of the State insurance legislation became law in 1911. The new law codified previous legislation, established new Insurance Authorities, reduced working-class influence in the Accident Insurance organisations, provided pensions for widows and orphans, and made other changes of importance. Another Bill extending Insurance benefits to private officials, clerical employés and others above the class of manual workers, became law in 1911. A law establishing Federal Unemployment Insurance for all persons subject to Sickness Insurance and also for seamen, which is financed by equal contributions from employers and employed, came into force on Uct. 1, 2021.

contributions from employers and employed, came into force on Oct. 7, 1927.

DEFENCE.—By Article 160 of the Treaty of Vernailles the German Military Forces, as from March 21. 1920.

Article 281 of the Treaty, the German Naval Forces must not exceed 6 battleships of the Deutschland or Lothringen class, 6 light cruisers, 28 destroyers, and 22 torpedo boats. No submarine vessels are to be included in the naval forces, and all war vessels in excess of the above numbers are to be broken up or devoted to commercial purposes. Under the terms of the Armistice of Nov. 21, 1928, the German High Sea Fleet surrendered to the Allies (Nov. 21, 1928) and was interned in Scapa Flow, manned by German naval crews. It was scuttled by the Armistice agreement by the German crews the Allies (Nov. 20, 1929) called upon the government to surrender 3 light cruisers, and certain floating docks, cranes, and dredgers, in addition to the previous naval surrenders. By Article 198 of the Treaty the armed forces of Germany must not include any military or naval Air Forces, and no dirigible balloons, aeroplanes, sea-planes or flying boats.

COMMUNICATIONS.—The total length of the full-gauge Rairoads at end of 1928 was \$6,329 kilometres, of which all except 3,735 kilometres belonged to the German Railroads Corporation, which under the Danes Reparation Scheme of 1924 nequired all the lines taken over by the Republic from the States in 1921. In addition there were 1,866 kilometres of narrow-gauge railroads. The number of registered automobiles (July 1, 1921) was 20,668, motor cycles 792,075, and motor lorries 161,072. Length of Tetegraph and Tetegraphene Lines 392,700 kilometres; telegrams transmitted, (1930) 33,900,000; post, telegraph, and telephone offices, 51,213; telephone subscribers, 3,223,000; letters carried, 5,900 millions; value of cash on delivery orders, 3,168 mill. m.; money orders, 3,827 mill. m. The number of employés in the service of posts, telegraphs, and telephones was 376,605. The postal services have been financially separated from the general administration. In addition to some 6,000 miles of navigable rivers there are over 1,500 miles of canals and 1,500 miles of ship canals. At the outbreak of the War of 1912-1918 Germany ranked second to Britain in the list of martime countries. On January 1, 1923, the Mercantile Marine consisted of 1,098 sea-going steamers of 1755 register tons and upwards (4,380,348 tons gross register), and of

s.450 milling vessels (447,870 tons gross register); number of seamen, 77,746. As a result of the War and of the Peace Treaty shipping in 1979 sank to 419,000 tons, but there has since been a rapid recovery, due mainly to native building, but partly to purchases from abroad. Finished new constructions of vessels exceeding no gross tons were in 1979, 134,33 tons; 1985, 1995, 1975 tons; 1989, 287,600 tons. On June 30, 1989, 1995, 1999, 287,600 tons. On June 30, 1989, 1999

reased since the War at a great rate, and now exceeds that of 1913. Arrivals at all ports were: 1913, 34.396.691 net tons: 1923, 44.906.992 net tons: 1923, 44.906.993 net tons: 1923, 44.907.936 net tons. Traffic in the Kiel Canal in 1929 was: vessels 49,000 tons, net tonnage 21.740.057. Finance.—Under Articles 245-253 of the Treaty of Versailles the German Government undertook to pay the cost of the Armies of Occupation from Nov. 11, 1928, until they shall be withdrawn, the occupied area extending to the Rhine (with "bridgeheads" on the right bank) from Riten, on the Netherland's frontier, in the north, to the junction of the German-Lorraine frontiers, in the south. The amount of the reparations due by Germany under the Treaty was fixed in January, 1921 (by the Kinacial Council of the Allies at Brussels) at 132 milliards of gold marks (£6,600,000,000) payable in bonds, to be redeemed by annual payments of a milliard gold marks, together with a sum equivalent to as per cent. of German exports. Of the amounts thus payable the various shares from 1921-1929 so per cent, or terman exports. Ot the amounts thus payable the various ahares from rear-reas were apportioned to France 5s ninety-second parts, Great Britain 2s, Italy 10 and Belgium 3 ninety seconds; from 1929-1932 the shares are varied to France 130 two hundred and thit iteth parts, Great Britain 5s, Italy 25 and Belgium so two hundred and thirtieths; and for the succeeding 2 weers Krance 15s two hundred and two hundred and thirtieths; and for the succeeding 21 years France x56 two hundred and seventy-six parts, Great Britain 66, Italy 30 and Belgium at two hundred and seventy-six parts. A new Reparations Scheme was agreed to by Germany and the Allies in August, x54, providing for annual newmants righty 2, 200 viding for annual payments rising to 2,500 million gold marks, liable to increase according to an index of prosperity, the money to be supplied from (r) taxation, (a) railway bonds, and (3) bonds imposed on private industry. In rage, by an agreement come to at the Hague on the basis of recommendations by a Committee of Experts which met in Paris in the spring of 1929, Reparations were definitely settled. Germany Reparations were definitely settled. Germany agreed to pay during a term of 3y years annuities averaging 1,989 million marks, and thereafter until 1987-88 annuities varying between 1,712 million and 898 million marks. The Reparations control of German taxes and the mortgages on the railways and on industry were removed. In connection with the settlement German occupied territory was excusted. ment German occupied territory was evacuated in 1930. On the initiative of president Hoover, Reparations Payments were suspended for one year from July 1, 1931.

In November, 1923, was put through a Currency Reform, consisting in the creation of a renter-norsk, nominally worth 1 gold mark, and in the stabilisation of the depreciated paper-mark at 1 hillion paper-marks to 1 gold-mark. The stabilised paper mark notes have since been withdrawn from circulation, and the renten-marks are being gradually replaced by reichs-marks of pre-war gold value, issued by the Reichsbank as reconstituted under the Reparations settlement of 1924. Although the currency reform of 1924, Although the currency reform of 1924, Although the currency reform of 2923 was only provisional it reacted beneficially on the Finances, stopping the rise in the cost of administration and preventing depredation in the value of the taxes received. For covering the deficits in the weeks intervening between stabilisation and complete balancing of the budget, the Republic obtained limited credits from the new Rentenbank. In the financial year 1924-193 complete budget balance was attained, but in consequence of declining revenue due to trade depression and of heavy expenditure for Uneu-playment Relief deficits have of late been the rule. The Budget Batimates for 1923-23 (in which are not included the separately financed Rallways and Posts) were:—

The German Debt.

The long and short term Debt of the Republic on May 31, 1931, totalled 11,494 million reichsmarks. Of this sum 78c million marks represented the outstanding liability on the Reparations Foreign Loan of (nominally) 8cc million marks, 4,077 million marks represented the dypreciated paper mark pre-war and war debts as valorised under the law of July 16, 1925, and 1,433 million marks the international 5% per cent. (Young Plan) loan of 29c. Under the paper-mark debt valorisation law bondholders who acquired before July 1, 29c. will ultimately receive 12½ per cent. In gold marks of the nominal value of their holdings with interest. Bondholders who acquired later will receive 2½ per cent., but this will bear no interest until Reparations are paid.

GERMAN FEDERATED STATES.
PRUSSIA.
GOVERNMENT (April, 1945).

President, Horr Braun.
Interior, Herr Severing.
Finance, (vacant).
Agriculture, Herr Steiger.
Trade and Commerce, Dr. Schreiber.
Instruction and Worship, Herr Grimme.
Minister of Justice, Herr Schmidt.
People's Welfare, Herr Hirtslefer.

The Republic of Prussis comprises the larger portion of Germany, with a total area in x94 of x13,730 sq. miles and a population on June 26, x95, 07 §6,x50,x73 (Saar district excluded). The number of births in x999 was 701,738, against x,209,500 in x973. The number of deaths in x999 was 493,981 against 695,490 in x913. Marriages were 365,201, against 293,790. The surplus of births over deaths in x999 was 207,757. Frussia possesses a large number of navigable rivers intersecting the country—xiz. the Pracel

rivers intersecting the country—viz, the Pregel, Oder, Elbe Weser, and Rhine. The coasts of the Baltic and North Seas form a number of gulfs and bays. The principal mountains are the Hart and the Giant Mountains, the latter reaching an altitude of 5,255 feet. The forests are extensive, occupying an area of 18,033,000 acres, chiefly consisting of fir. Minerals consist of coal, iron, copper, lead, potash, alum, nitre, zinc, cobalt, sulphur, nickel, arsenic, baryta, amber, agate, jasper, onyx, &c., and, to a small extent, silver. Salt (from the brine springs of Prussian Saxony) is abundant. Metallic ores, coal, sait, precious stones belong partially, and amber totally, to the Crown. Agriculture and the rearing of cattle are the industries employing the largest number of persons, but Prussia has long ceased to be a mainly agricultural State. Wheat, rye, eats, barley, peas, millet, rape-seed, maize, linseed, flax, hemp, tobacco, sugar-beet, hops, &c, are extensively cultivated. Prussia's manuactures comprise practically all branches. The cotton works are extensive, and there are numerous manufactories of silk, woollen, mixed cotton and linen fabrics, including shawls, carpets &c., and woollens, with leather, earthenware, glass, paper, and tobacco manufactures, as well as metallurgical works of great importance and large output. Brewing is a business of great importance. r,000,000 Reich 1-marks.

Budget (net), 1931-32 2,248

The whole of the old Funded Debt of Prussia was taken over by the Republic under the arrangement for transfer of the Prussian State Railways. It will be valorised on the same conditions as those laid down for the Federal Debt under the law of July 16, 1925.

CAPITAL, Berlin, on the Spice. In 1920, by fusion of suburban municipalities and of some adjacent rural communes, was created Great Berlin with a population on June 16, 1925, of 4,013,588.

Other largest cities are Cologne, on the Rhine (698,064), Breslau, on the Oder (554,801), Essen, on the Ruhr (468,696), Frankfort, on the Mau (467,849), Düsseldorf, on the Rhine (421,095), Hannover, on the Leine (422,435), and Dortmund on the Emscher (320,256)

BAVARIA.

Minister-President Dr. Held.

also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Francouia, and in Middle Franconia. The hop-plant is most extensively cultivated. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c. The Thuringian Duchy of Coburg was incorporated in Bavaria in rosz.

> z,000,000 Reichs-marks 648

Budget (net), 1930 31 CAPITAL, Munich, on the Isar. Population (1925), 680.704. Other large towns are Nurnberg, N.W. of Munich (202 (20) 20) N. W. of Munich (392,494), and Augsburg, on the Wertach-Lech (264,522).

JAXONY.

The Republic of Saxony has an area of 5.856 English square miles, with a population on June 16, 1925, of 4,980,589. More than one-half of the surface is arable, and has always been June 16, 1925, 07 4,980,689. More than one-hair of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and legummons plants, with rape, buckwheat, flax, and fruits The forests supply tumber of excellent quality; minerals are rich and abundant (coal, silver, tin, busmuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture staffs, hoslery, gloves, and other knitted goods, laces, ombroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, sait, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief town, after the capital, is Leipzig (pop. 679,328), the great book-market, with, next to those of Berlin and Munich, the most frequented University of Germany (having 5,985) frequented University of Germany (having 5,005 frequented University of Germany (having 5,005 frequented University in vors-ra): Platien matriculated students in rgra-rg); Planen (pop. rrr,398), and Chemmitz (pop. 331,641), the Manchester of Saxony.

Budget (net), 1930-31 458 CAPITAL, Dresden. Pop. (1925), 618,684.

WÜRTTEMBERG.

The Republic of Wurttemberg has an area The Republic of Wurttemberg has an area of 7,534 English square miles, and a population (in 1925) of 2,595,124, of whom 30 per cent. are Roman Catholics. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops, potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, tronstone, fireclav. &c. abound in the kingdom: Minister-President Dr. Held.

The Republic of Bavaria is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47 '16'—50' 34' N. lat. and 9' or'—13' 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine The total area is 29,486 sq. miles, and the population on June 76, 7925, 7,471,539. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn.

The Bavarian forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, 77e, cats, and barley being the chief products; buckwheat and maize are clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, stays, beer, wine, &c.

z,000,000 Reichs-marks

MINOR STATES.

Baden, separated by the Rhine from France Baden, separated by the Rhine from France (Alsace) and Switzerland, has an area of 5,829 aquare miles, with a population (1985) of 3,325,498. A great part of the surface is mountainous and covered with forest trees, including the Schwarzwald (Elack Forest) and the Odenwald, but more than three-fifths of the total area is under cultivation, corn, wine, fruit, potatoes, tobacco and hops being the chief agricultural products. The wrinches manufactures are clears: cotton The principal manufactures are cigars, cotton and silk stuffs, brushes, jewellery and trinkets, clocks, chemicals, paper and machinery. More than half the population are Roman Catholics.

than half the population are Roman Catholics. Capital, Karlaruhe, pop. (1985) 145,694. Other large towns are Mannheim (427,486), Friburg (92,559), Pforzheim (78,434), and Heidelberg (74,892).

Land Thuringen. The Thüringian States, Saxe-Weimar-Eisenach, Saxe-Meiningen, Saxe-Altenburg, Schwarzburg-Rudolstadt, Schwarzburg-Sondershausen, Reuss-Greiz, Reuss-Gera, and Gotha, have been constituted into a single state under the title Land Thüringen, with an area of 4,54x square miles, a population of 2,568,398, and two seats in the Federal Reichsrat. In size Land Thüringen is sixth among German states. The new state is governed by a "Volksrat." (Spital, Weimar (45,68).

Hesse, in the West Centre, consists of Northern and Southern portions, nearly equal in size, on

and Southern portions, nearly equal in size, on either side of the Main River, with a total area of a,968 square miles and a population (1928) of 1,358,445, of whom more than half are Protestants. The country is mountainous but fertile, and agriculture is flourishing. Capital, Darm-Mayence (Mainz) at the confinence of the Main and the Rhime (20,285), Offenbach (78,780), Worms (47,000), and Giessen (33,527).

Mecklenburg-Schwerin, between the Elbe and the Raits has a that ages of the Confinence of the Main and the Rhime has a that ages of the Rhime has a that a

the Baltic, has a total area of 5,068 square miles, with a population (1925) of 686,838. Agriculture and stock raising are the principal industries, the Mecklenburg breed of horses being famous. The chief manufactures are bricks and machinery.

Capital, Schwerin, pop. (1923) 48,157.

Oldenburg, on the North Sea, between the estuary of the Weser (at Bremen) and the Prussian province of Hanover, has detached territories in Lübeck (between Holstein and Mecklenberg) and Birkenfeld (Rhine Province of Prussia). The total area is 449 square miles, with a population (1925) of 553,670. The chief industries are agriculture, bee-keeping and stock-raising; the principal manufactures are brewing and distilling, tanning, tobacco and corks, Capital, Oldenburg, pop. (1923) 52,187.

Brunswick, 1,418 square miles, pop. (1928) 58,187.

W.C. 1.

A martime Republic in the south-east of Europe, bounded on the N. by Albania, Yugoslavia and Bulgaria, on the S. and W. by the Joulan Sea, and on the E. by the Aegean and Turkey, with an estimated area of 50,371 sq miles and population (census of May 15, 1928) of 6,204,684.

of 6,204,684.

Prior to the Balkan Wars of 1912-13 the area was less than 25,000 sq. miles, the addition of portions of Macedonia and Epirus, Crete(2,950 sq. miles, pop. 336,151), and certain Aegean Islandia increasing the area to 43,322 sq miles. During the War of 1914-1918 Greece eventually declared for the Allies against the Central Powers, and her territories were increased by the occupation of Thrace (including the monastic republic of Mount Athon), and the islands of Imbros and Tenedos. Under an arrangement with Italy, to come into effect after the ratification of the Treaty of Serres, Hodes, Egeo, and the Hodecanes (12 islands) were surrendered by Turkey, and these were to be handed over to Greece hy Italy. Greece also received under the Treaty a mandate for the occupation and administration of the town and district of Smyrna, but military operations by forces of the Angora Government, under Mustapha Kemal Pasha, recovered the mandated region in Sept. 1922, the Greek forces being annihilated. and Smyrna was evacuated on Sept. 8, 1922, and that part of the Greek population of Asia Minor which escaped massacre by the Turks took refuge in Greece. By the Treaty of Lausanne (1923) Greece lost Eastern Thrace (that part lying E. of the Maritza river) and the islands of Imbros and Tenedos, which were retroceded to Turkey. The country is thus composed of a continental portion (the southern part of the Balkan Peninsula), and of islands in the Ægean, Mediterranean, and Ionian Seas. The surface

is nearly all mountainous; the coasts are elevated, irregular, and deeply indented.

Government.—Greece became independent in 1830, after a successful insurrection against the Turkish government, to which the country had been subjected since the 18th century, and after a succession of rulers of the Glucksburg dynasty was declared a Republic by the Constituent Assembly on March 25, 1924. The legislature consists of a Senate of 120 members, and of a Chamber of Deputies (or Boul?) elected for 3 years by universal manhood suffrage.

Production. — Agriculture is the principal industry and employs more than half the population. The most important of the fruit trees are the clive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-vine. The principal minerals are silver, lead, zinc, emery, copper, magnesium, sulphur, salt, and marble.
The chief manufactures are smelting, textiles, and shipbuilding. The imports are cotton and other manufactures, corn, tumber, cattle, hides, sugar, salt fish, and coal. The exports consist of wine, oilves, olive oil, tobacco, currants, figs, cognac, hides, lead, iron ore, magnesite, iron pyrites, chrome ore, emery, marble, sponges and carpets.

Defence.-Service in the Army is universal and compulsory between the ages of az and 57. Both the land and sea forces were reorganised during the War of 1914-1918, and about 150,000 all ranks fought with the Allied Armies. The Navy consists of z armoured cruiser, z cruiser minelayer, 4 modern t.-b.-d, 7 torpedo-boats, a d 6 submarines with 5 patrol vessels (small torpedo boats).

Education is free and compulsory, maintained by local taxation supplemented by State grants. Secondary education is somewhat backward, particularly in the country districts. The University at Athens is of some repute.

Finance—The debt in 1912 was 1,040,900,000 drachine, and the Balkan Wars of 1912-32 added 354,960,000 drachine, the Great War added 1,026,000,000 drachine, and subsequent military 1,029,000,000 artenime, and subsequent anneas, operations to March, 1921, were responsible for 1,776,140,000 diadhaæ. On May 31, 1930, the total was stated at £110,077,506.

Communications —There were (1928) 1,993 miles radroad open for traffic There is a ship of railroad open for traffic canal cutting through the Isthmus of Corinth canal cutting through the latimuts of Cornith for ships up to 1,500 tons. The post offices number 1,146, telegraphs, 4,960 miles. The mercantule marine consists (1931) of 547 steamships (1,407,868) tons and 7-29 sailing ships (58,968 tons). The principal harbours are the Pireus (port of Athens), Syra, Patras, Salonica, Volo, Corfu, Calamata, Laurium, Cavalla, and Canea (Crete).

Guatemala, the most northerly of the Repul-lican States of Central America, is situated in N. lat. from x3° 4g' to x7° 4g', and in W. Long. from 88° xs' 4g'' to y3° x3', 43' and comprises an area of x,456 square miles, and a population in yoar of x,660,335. The Republic is divided into as depart-ments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to x3,000 feet above the sea; earthquakes are frequent, and the capital (which is at an altitude of 4,80e ft.) was destroyed by an upbeaval in Jan. 1928. The climate is hot and somewhat malarious near the

coast, but very temperate and healthy in the higher regions. About 65c miles of railway were open for traffic in 1935. There were 4,257 miles of telegraph working in 1935. The chief ports are San José de dustemals and Champerico on are San Jose de Guateman and Champerro on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, other articles being bananas, sugar, timber, chele (chewing gum), hides and beans. Spanish is the language of the country.

(République d'Harti.)

President, Stenio Vincent, assumed office Nov. 18.

Foreign Affairs, M. Abel N. Léger.

Vinister in London, Dr. Louis Baron. Consul, W. Haines, 4, Denmark Street, N. 27.

The Republic of Halti is the western or French The Republic of Halti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the "West India" Islands. Formerly a French colony it was proclaimed independent on Jan. x, 1804, and is governed under a Constitution ratified on June xs, 1918. The legislature consists of a Senate and a Chamber of Deputies. The President is elected by the legislature for a period of six years. In rors a treaty was entered President is elected by the legislature for a period of six years. In 1973 a treaty was entered into with the U.S.A. whereby certain public services of the Republic were to be controlled by U.S. officials. The Treaty expires in 1936. On Oct. x, 1931, the U.S. officials in charge of Public Health, Public Works, and the Agricultural Technical Sorvice were withdrawn. The Kingh. Technical Service, were withdrawn. The Kinan-cial and Constabulary services still remain under U.S. control.

The area of the Republic of Haiti is estimated at ro,204 square miles, with a population estimated (Jan. r, rgsy) at 2,300,200 inclusive of white foreign residents and military forces of the United States. The mountains are richly

^{*} At par : Queteal = \$z U.S.

and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocos, cotton, hides, sugar, honey, gums, and oliseeds, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany; the principal articles imported from Great Britain are piece-goods, jute bags, hardware, and agricultural tools. An armed Constabulary, urban and rural, was formed in 1926. This force is officered in part from U.S. Marine Corps and Navy, and consisted (Oct. 1, 1931) of 193 officers (U.S. and Haitians) and 1,950 other ranks. A coastguard service is attached to the Constabulary. There are about 135 miles of railway. In 1935-36 the entries and clearances at Port-au-Prince were 408 steam vosseli (1,001,007) to 101). Fieuch is the official language of the country, but most of the people speak a debased dialect known as Creole French.

By unanimous vote of the National Assembly, Hungary was re-constituted a Kingdom in 1920, atter having been declared a Republic on Nov. 17, 1918. The area of present-day Hungary is about 56,179 sq. mules, its territories being decreased from the area of the former Kingdom of Hungary (which was united to the Austrian Empire by the identity of sovereigns) through the transfer of Transylvania to the Rumaniana and of Croatia and Slavonia to the new Yugoslav Kingdom (q.v.) and of Slovakia and Ruthenia to Czechoslovakia (q.v.). The population (almost entirely Magyar) was 8,651,757 (Dec. 1929). The political neighbours are Czechoslovakia on the N., Yugolsavia on the S., Rumania on the E., and Austria on the W.

On the declaration of Republican institutions in ror8.Count M. Karolyi assumed office as Provisional President, but on March 22, 1919, Count Karolyi resigned, and was succeeded by a "Bol-shevik" administration with a "Soviet" (Wolk-meu's Council), in which Bela Kun (or Cohen) was the dominant personality. This administration was driven out of power by the successes tration was driven due of power by the succession of the Rumanian military forces (which invaded Hungary and occupied Budapest) and was followed by a Socialistic Government under Julius Peidel (Aug. r. 1929). Six days later the Socialistic Government was superseded by an administration appointed by the Archduke Joseph, who accepted office as Provisional President, Aug. 7, 1919, but resigned in consequence of the protests of the Supreme Council in Paris. On March r 1920, Admiral Nicholaus von Horthy of Nagybana was elected Governor of Hungary by vote of the National Assembly, which gave him sovereign rights, with certain restrictions. Socialistic Government was superseded by an

In rear, the ex-king Karl made two efforts to regain the throne, remaining in the country from March so to April 5, and from Oct. as until removed under escort. On each occasion the Hungarian Government was informed that a Hapsburg restoration would not be tolerated by the European Powers.

All religions are tolerated; the greater number of Magyars are Roman Catholics, but there is a large Protestant minority. The parcelling out of the great estates, which was forcibly attempted during the Karolyi régime, forciby attempted curing the Marcy: regime, has been continued to a small extent, but on an economic basis; a land-reform bill aiming at "a more equitable distribution of landed property," was carried out in 1920-1925, reducing by about 10 per cent. the total area of large estates.

A single chamber National Assembly (introduced Jan. 4, 1920), was replaced in Dec., 1928 by a Parliament composed of a Chamber by a Parliament composed of a Chamber of Deputies elected by universal suffrace, and an Upper Chamber, which corresponds in a modulied form to the Chamber of Magnates as it existed before the revolution of rors.

The greater part of the arca of present Hungary consists of the Alfold or Great Plain, parts of which may be considered as among the most fertile for agricultural purposes in the world, producing grain of excellent quality and supporting a number of horses, cattle and swine. The mountainous districts having been ceded to surrounding states by the Peace Treaty, Hungary has lost the greater part of the forests and mines, which formerly contributed so largely to the national wealth.

No part of Hungary touches the sea. The length of navigable rivers is 687 miles; there are about 5,000 miles of railways and 5,800 miles of telegraph in the present Kingdom.

Charge d'Affaires, Hussein Bey Afnan, M A.

Charge d'Affaires, Husseln Bey Afnan, M. A. Legation, 5x, Queen's Gate Gardena, S.W. 7 Iraq, or Mesopotama, "the land between the rivers" (Euphrates and Tigns), extends from Kurdistan on N. and N.E. to the Persian Gulf on the St. and S.E., and from Persia on E. to Syria and the Arabian Desert on W. the approximate position being between 37½ to 48½° E. long., and from 37½° to 30° N. lat. The territory was freed from Turkian rule during the War of 1914-18 by Anglo-Indian and Bitush Dominion Marshall (Gen. Maude succumbing to cholera after the capture of Baghdad). Under the Tiesty of Lausanne, ratifed on Aug. 6, 2023, Turkey of Lausaine, ratified on Aug. 6, 1923, Turkey renounced the sovereignty over Mesopotamia, and its future administration has been en-trusted to Great Britain by the Supreme Council of the Allies. A provisional Arab Government ments have been effected; the Irrigation Downs set up by the High Commissioner in Nov. partment is at present confining itself to small gao and in Aug. 1921 the Emir Faisal (3rd son of and immediately remunerative schemes. The of the Allies. A provisional Arab Government was set up by the High Commissioner in Nov.

ex-King Hussein of the Hediaz) was elected King of Iraq, to be enthroused on Aug. 33, 1921. By Treaty between Great Britain and Iraq (Oct. 10, 1922) the former undertakes to exercise its good offices to secure the admission of Iraq to the League of Nations, and as soon as that admis-sion has been accomplished all the responsi-bilities of Great Britain as the mandatory power will be terminated, by a protocol signed April 30, 1923, the duration of the treaty was cut down rom so years to 4; but in a new treaty signed at Baghdad on Jan. 13, 1926, provision was made that the treaty of Oct. 1923 should remain in force for a period of as years from Dec. 16, 1928, unless before the expiration of that period unless before the expiration of that period traq shall have become a member of the League of Nations. In March, 1924, a Constituent Assembly met in Baghdad, ratified the treaty between Great Britain and Inay, and passed an organic law and an electoral law for the election of a Cramber of Deputies. The constitution thus instituted is a Constitutional Monarchy, hereditary in the family of King Falsal, with a Senate of so members uominated by the King, and a Chamber of Deputies of 88 members elected by manhood suffrage. The first Parlament under this Constitution was opened by King Falsal on Constitution was opened by King Faisal on July 16, 1925 In September, 1929, the British Government gave an assurance that they would support Iraq's candidature for admission to the League of Nations in 1932. On June 30. 1930, a new Treaty was signed at Baghdad by the High Commissioner and the Prime Minister. This Treaty which, if ratified, will come into force on the entry of Iraq into the League of Nations, is of s years' duration and regulates the relations between Great Britain and Iraq during that period on the basis of an alliance between two equal and independent States.

The total area of the districts comprised within the British Mandatory Sphere is about 116,000 sq. miles, the distance from Basra in the south to Mosul in the north being approximately so miles. The sphere comprises the former Turkish vileyet of Mosul, Baghdad and Basra. At the Census of rose the population was ascertained to be 2,849,282, as under:—

Raghdad vilayet 1,360,304 Rasia vilayet 785,600 Basıa vilayet Mosul vilayet 703,378

Of the total population there were in 1930 1,146,685 Suum Muhammadans, 1,494,025 Shifte Muhammadans, 87,488 Jews, 78,792 Christiaus, and 43,302 other religious.

Mesopotamia is capable of supporting a population many times in excess of its present inhabitants if irrigation is developed and extended. In 1908 certain works were undertaken, following on the report of Sir W. Willcocks, and since the British occupation notable improve-

wealth of the country depends entirely upon wealth of the country depends entirely upon agricultural development, and two harvests can be gathered in the year, the chief crops being wheat, harley and beans, and rice, and Indian corn; wheat averages 45th per acre, barley 5raib, and rice over 1,000lb. In 2025-12 there were 1,247,000 acres (deivling their water from the Tigris and Euphrates) under general cultivation, an increase of 64 per cent. on the previous year. Cotton growing is a developing industry and it is esti-mated that Mesopotamia could yield 200,000 bales annually if sufficient labour is for the oming. A concession for the exploitation of the oil in the Baghdad and Mosul vilayets was granted to the Turkish Petroleum Company (now the Iraq Petroleum Company), in March, 1925. The results of the geological surveys made by the company suggest that Iraq may contain one of the richest oilfields in the world. A number of wells have been drilled in the neighbourhood of Kirkuk, and in October, 1927, the first "gusher" was struck and capped at Baba Gurgur. The Khanaqin Oil Company (a subsidiary of the Anglo-Persian Oil Company, holds a concession which is conflued to the Transferred Territories (an area on the N.E frontier transferred from Persia to Turkey in 1913-14), which is an adaptation of the D'Arcy concession held by the A.P.O.C. Since the war oil has been struck near Khanaqin and the field is considered a promising one. The Khanaqin Oil Company have opened a refinery near to Khanaqin town which produces sufficient petrol, kerosine and crude oil for the needs of Iraq. The country is being opened up and existing communications improved and secured. Schools, hospitals and dispensaries have been established under dispensaries have been estamented with British auspices. Barra was equipped with wharves, railway sidings, &c., for military purchases in the suited for commerce. The chief imports are textiles, sugar, and tea, and the chief exports are dates, wool and barley.

The Euphrates (which has a total length of s.800 miles from its source to its outflow in the Persian Gulf) is formed by two arms, of which the Murad Su (415 miles) rises in the slopes of the Ala Dagh, a mountain of Eastern Erzerum. and flows westwards to a junction with the Kara Su, or Frat Su (275 miles), the latter rising in the north-west of Eizeroum in the Dumiu Dagh. The Tigris has a total length of 1,150 miles from its source to its junction with the Euphrates at Garmat Ali, 70 miles from the Persian Gulf, and rises in two arms south of the Taurus mountains, in Kurdistan, uniting at Til, where the boundaries of the vilayets of Diarbekir, Van and Bitlisconjoin.

The Baghdad Railway -In 1899 the Anatolian Railway Company obtained a concession from the Sultan of Turkey for the construction of a railway from Konieh (the eastern terminus of the Anatolian Railway) to the Persian Gulf at Koweit, vid Baghdad, a total length of x,550 miles, with a single track of 4 ft 8½ in. gauge. Its projected course was from Konieh to Adana. thence S.E. to Aleppo, Jerablus (where it would cross the Euphrates and enter Mesopotamia), and Mosul, and thence S. down the right bank of the Tigris to Baghdad and the Persian Guif. The section Konieh-Eregli-Bulgurlu (124 miles), was opened in Oct. 2004, and at the outbreak of the Great War about 1,200 miles (out of the total of 1.550 miles) were in operation, with gaps in important sections (notably in the hills N.W. of Aleppo, and in the Mesopotamian desert W. & S.

of Mosul). The line crosses the Euphrates at Jerablus and is open to goods and passenger traffic as far as Nisibin. The track actually extends a further 10 miles into Syrian territory in the direction of Mosul. Railheads at Nisbin and Kirkuk are connected by a motor service, and through bookings by this route from Europe to Baghdad are obtainable. The first through train from Basra to Baghdad left Basra on Jan. 13, 1920. The total length of line Jan. 13, 1930. The total length of line open at that date was 945 miles compared with 1,112 miles during the War, some unimportant lines having been disused since the cessation of hostilities with Turkey; since that time lines have been laid from Baghdad to Kerbala and Baghdad to Kirkuk. The line to Kirkuk will be extended to Mosul.

The chief city is Baghdad, the former capital of the Abbasside dynasty, one of the Caliphs of that dynasty being Haroun al Rashid of "the Arabian Nights." Baghdad has an estimated population of 270,000, other towns being Basra, 85,000, and Mosul (opposite the site of Naleveh), 90,000.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardina, the island of Elba, and about 70 minor islands (with certain dependencies hereinaftenoted). It is bounded on the N by the Republics of Switzerland and Austria, on the S. by the Mediterranean, on the E. by the Adriatic and Yugoslavia, &c., and on the W. by France and the Ligurian and Tyrrhenian Seas. The total area of Inguiran and 1711 course the kingdom of Italy in 1914 was 110,623 8q miles, and by the Treaty of Vesailles (June 28, 1919) Italy gained from Austria-Hungary the Trentmo (about 4,000 sq. miles) and Trieste (with about 1,000 sq. miles of the Adriatic Sea-board).

The total area of the Kingdom of Italy was estimated (Dec. 1927) at 119,743 square inites, with a population at the census of March 29, 1931, of 42,125,817. There is a large settled and floating population of Americans and English.

By a treaty signed at Rome (Jan. 27, 1924), the Free State of Fiume came to an end. Yugo-slavia's sovereignty over Port Baros and the Delta is established by the treaty, and Italy acquired the town and harbout works of Fiume. together with a narrow strip of hinterland. Italy agreed to lease to Yugoslavia the Thaon di Revel quay at a rental of one gold lira for 50 years, the railway station being established as an international frontier station. Fiume is now the capital of the newly created Italian Provincia del Carnaro, and has the status of an Italian provincial town.

The Italian peninsula is traversed throughout its length by the chain of the Apennines; the Alps form its northern limits, dividing it from France, Switzerland, Germany, Austria and Yugo-slavia. Mont Blanc (15,78s feet), the highest peak of the Alps, is in the French Pennine Alps,

but within the Italian borders are Monte Rosa (15,217 feet) and several peaks from 12,000 to Adige, the Tiber, and the Arno.

GOVERNMENT.—Italian unity was accom-pliahed under the House of Savoy, after an heroic struggle from 1848-1870, in which the great patriots Mazzini (born 1805, died 1872) and great patriots Mazzini (born 1805, died 1873) and Garialdid (born 1807, died 1883) were the principal figures. It was completed when Lombardy was ceded by Austria in 1860 and Venice in 1865, and through the execution of the Papal States by the French in 1870. In 1873 the King of Italy entered Rome, and that city was declared to be the capital. The government was that of a constitutional monarchy with a King of Italy entered Rome, and that cify was declared to be the capital. The government was that of a constitutional monarchy with a legislature of two houses—the Senate (of 282 life members appointed by the King), and the Chamber of Deputies of 356 members (elected by adult manhood suffrage). Under the reforms matituted by Signor Mussolini an entirely new and complex form of government has been built up—the Fascist "syndical-corporative" state. The Senate and Chamber are retained, but the latter are elected en Moc. a list below but the latter are elected en bloc, a list being drawn up by the Fascist Grand Council and submitted to the electorate for acceptance or rejection as a whole. The basis of the composition of the list is roughly equal representation of capital and labour, the essence of the "syndical-corporative" idea being that the State should take charge of the economic development and functioning of the country.

PRODUCTION — Agriculture (including the growing of grapes, olives and chestnuts) is the principal industry. Italian wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely ex-ported. The cultivation of the silkworm forms an important industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amanthus, alum, and boracic acid. Silver is found in Saidinia. and some gold in the Alps. Salt and tobacco are

Government monopolies.

The principal exports are cotton, silk and woolen tissues, motor cars, olive-oil, wine, candied ctron, slenna earths, pastes, coral, 1ags, boracic acid, raw and thrown silk, hemp, cattle, atraw hat, riew and chrown sitt, nemp, cattle, strain hats, rice, fron, zinc and copper ores, sulphur, mable, fruit, vegetables, fresh and prepared meats, poultry chemical products, woods, roots, &c., for dyeing and tainning, attastic works, &c. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raskilk, silkworms' eggs and cocoons, machinery, iton and steel in hars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The manufactures are woollen, cotton, silk-mmp, and linen yarns and tissues, motor cars, rubber tyres and tubes, leathers, straw and felt hats, furniture, chemical products are reserved. jute and manufactured goods, woollens, raw felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabater ornaments), &c. Sugar is extracted from beet in large quantities for

home consumption.

DEFENCE.—The Army consists of 30 Infantry
Divisions and a Divisioni Celeri (Cavalry and Cyclists) organized in 11 Army Corps, but a large number of Umts and Services, e.g., Bersaglieri, Alpini, Tanks, &c., are not included in these

formations. During summer months (with two classes of conscripts with the colours) the strength is about 400,000; in winter months 200,000 (with one class). Age of liability for recall to Military service was raised in 1929 and brings total numbers available in case of war to 4,000,000-4,500,000 men. The National Militia (Black Shirts) are also part of the Land Forces of Italy. Their establishment is 300,000, but only a small percentage are on permanent service, the remainder being in civil employ, ready for duty whenever required. The Militia supplies a Battalions to each Infantry Division in supplies a Battalions to each infantry Division in war. On May 24, 1915, Italy declared war on Austro-Hungary, and on Aug. 27, 1916, a state of war was declared to ents with Germany. The cost of the war to Oct. 3x, 1918, amounted to 28 millards of lire (\$\frac{1}{2}\$, 290,000,000). During the War of 1914 1918, over 25 per cent. of the population were mobilised, and 5,250,000 men passed into the Armies of Italy. The Navy includes g modern and x pre-Dreadnought battleship, 26 cruisers, x airmaft carrier, x 16 tulla leaders, 56 destroyers. aircraft carrier, zz flotilla leaders, 60 destroyers, Art torpedo boats, 4s submarines, 1s gunboats and despatch vessels, a river gunboats, and 46 minesweepers and minelayers. The peace personnet of the Italian Navy is about 45,000 all ranks. Spezia and Pola, the chief naval and military ports of the kingdom, are securely fortified. The Air Force consists of xzo squadfortined. The Air Force consists of ree squadrons of aircraft, of which re are employed in the colonies. The official first-line strength of aircraft is 973 machines, with a further roo in reserve. The personnel for 1920 includes 941 officers and 18,632 other ranks, the expenditure for 1920 poling roo million live, of which 60 million is for Civil Aviation.

EDUCATION Privator Education is the 2021

EDUCATION.—Primary Education is free and compulsory, and evening continuation classes are also compulsory for military recruits. is maintained by local taxation and State grants. is maintained by local taxation and State grants. Secondary education is generally State-main-tained, and schools are increasing in number. Several of the Universities are of very ancient

foundation.

COMMUNICATIONS.—On July 31, 1930, there were 10,407 miles of railway open for traffic, 1,022 being electrified and 352 in course of electrification; the post-offices (1299) numbered 121,238, and there were (1299) 40,855 miles of telegraph line. The sea-going commercial marine (1299) formstated of 155 for the NATION Commercial (1299) (120) onnsisted of 1,396 steemmer(a; marine (1929) consisted of 1,396 steemmer (3,237,302 gross tons) and 2,692 salling vessels (168,279 tons). In 1929 248,379 ships (77,177,450 net tons) entered Italian ports; the clearances were 248,494 (77,185,386 net tons).

ITALIAN COLONIES, &c.

Libia.—The Turkish vilayet of Tripoli and the mutessarifat of Benghazi on the northern coast of Africa, were occupied by Italy in 1911-12, and under the Treaty of Ouch (Oct. 1912) the sovereignty of the province was transferrod to the King of Italy, the spuittual head-ship over the Muhammadan population being retained by the Caliph. Tripoli is the most retained by the Campin. Triport is the mose easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast-line of nearly z, zee miles, and inland to the south a distance of about See miles. The transferred territory comprises the four sub-provinces or Mutes-sarifik of Tripoli, Khoms, Jabel-el-Ghatb, and Fezzan, and also of Benghari or Cyrenaica, a total area of 8xo,000 square miles, with a population of about 1,000,000. There are no rivers in the country, and, the rainfall being precarious, a good harvest can only be reckened on every four or five years Barley, dates, olives, oranges, lemons, and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter spirits, besides a number of articles for carter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, wool, cattle, and horses. The ancient rums in Cyrenaica, i.e., at Cyrene, Ptoleman, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli. The population of Benghazi consists of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests. The capital of "Tripolitana" is Tripoli (population 60,000), and of Cyrenaica, Benghazi (population 60,000), lation 35,000)

Governor of Cyrenaica, and Tripolitana.

Marshal Badoglio.

Marshal Badoglio.

Eritrae is a Red Sea colony, and extends from
Ras Kasar, 18° s' N., to Ras Demoirs, 10° 42′ N.,
and is bounded on N.W. by the Anglo-Egyptian
Sudan, on S. by Abyssinia, and on S.E. by French
Somailland. It consists of a triangular portion of
barren and sandy lowland with a coast-line along
the Red Sea of about 700 miles, and covers a total
area of 6 con square miles, with a population of area of 64,000 square miles, with a population of about 510,000, of whom about 3,500 are Europeans. The capital is Asmara, Massowa being the chief port, where there is a good harbour. The prin-cipal products are potash, skins, and salt, of

great value as being the monetary currency of Southern Abvasinia

Governor of Eritrea, H.E. Duke Astuto di Lucchesi.

Somaliland.—Italian Somaliland comprises a constant comprises a coastal strip on the Gulf of Aden and the Indian Ocean, from xx N. lat. to the Equator, and is bounded on the N. by the Gulf of Aden, on E. by bounded on the N. By the Guir of Aden, on E. Dy the Indiau Oesan, and on W. by British Somali-land, Abyssinis, and British E. Africa. The total area, including the territory of Jubaland (and the port of Kismayu) transferred from Kenya by Great Britain in 1935, is about 250,000 sq. miles, and the population is estimated at 900,000. Agriculture and camel and cattle realing are the principal industries. The capital is Mogadisho, on the Indian Ocean.

Governor of Italian Somaliland, Signor M.

Tientsin.—Italy obtained in 1902 a concession of land fronting the Penho river (China), with a total area of so square miles and a population of

about ro.coc natives.

Agean Dependencies.—Rhodes, Egeo and the Dodecanese (12 islands occupied by Italy in 1012 during the war with Turkey, viz.—Stampalia, Scarpanto, Caso, Piscopi, Nisiro, Callinno, Lero, Patino, Cos, Simi, Calchi, and Lipso). The seat of administration is at Rhodes (Rodi) and the total population is about roo, oco.

JAPAN.

(Nipron)

Emperor (Tenno) of Japun, His Imperial Majesty Hinohito, K.G., G.C.B., G.C.V.O., born April 29, 2007; succeeded Dec. 25, 2326; married (1924) Princess Nagako (born March 6, 1903), daughter of the late Prince Kuniyoshi Kuni (died Jan. 27, 1929), and has issue three daughters :-

(i) H.I H. Princess Shigeko.

(ii) H.I.H. Princess Kazuko. (iii) H I H Princess Atsuko. Brothers of the Emperor

(r) H.I.H. Prince Yasuhito Chichibu, born June 25, 1902, married Sept. 28, 1928, Setsuko Matsudaira (born Sept. 9, 1909).

(2) H.I.H. Prince Nobuhito Takamatsu, born Jan. 3, 1905, married Feb. 4, 1930, Kikuko Tokugawa, grand-daughter of the late Shogun Tokugawa

(Middlesbrough), Alfred William Bulmer
(Cardyf), E. H. Trimby (hon).
(Glasgow), A. Scott Younger (hon.).
(Dublun), A. M. Weatherill (hon.).

This ancient and extensive Empire consists of four large and many small islands, said to comprise in all above 4,223, the principal of which are Honshu, Shikoku, Kiū-shū, Hokkaido or Yezo, situate to the north of the main island, from which it is separated by the Tsugaru Straits, and Formosa, called by the Japanese, Taiwan. The Aine, an uncivilised but harmless tribe, who in ancient times occupied the greater part of the country, are still found in Yezo, but in diminishcountry, are still found in Yezo, but in diminishing numbers. The Kurile Islands have belonged to Japan since 1875, and in 1875 she incorporated the Luchu (Riu-kin) Islands under the name of "Prefecture of Okinawa." The empire, with its dependencies, comprises an area of 250,783 square miles, with a population (Dec., 1928) of 25,256,311.

The population of the mainland only on Sept. Ine population of the mannard only on Sept.

1, 1999, was 62,938,300 The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-no-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 18,390 ft. high, and has been dormant since 1707. Japan is also liable to frequent, since 1707. Japan is also liable to frequent, and occasionally disastrous, earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agriculproductive, oceaning with every variety of agricul-tural produce. Copper, fron, sulphur, lead, nanganese, tin, tungsten, molybdenum, anti-mony, zuce, agate, cornelian, and rock crystal are found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale: while there is a good supply of middling coal. Petroleum is also being produced in quantities, especially in the Province of Echigo Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the Cryptomeria japonica, Pinus The principal Massoniana, and Zelkowa Keaki; the Paulownia imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, beech, and elm are comparatively

rare and little used. The tobacco-plant, teashrub, potato, rice, wheat and other cereals are all cultivated; rice is the staple food of the an cuttivated; rice is the staple rood of the people, about 347,500,000 bushels being consumed annually in Japan proper (home-grown crop 1930, 65,305,430 koku; koku=5 bushels, approximately). Agriculture, upon which the Japanese bestow great care, is their chief occupation. The coasts are extremely rich in fish.
The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit is abundant, including the orange, per-simmon and loquat; European fruits, such as apples, strawberries pears, grapes, figs, and peaches are produced, and the American navel orange is extensively grown.

Commerce and Industry.—The chief manufactures are silk and cotton woven goods, cotton yarn (210 cotton spinning mills were in operation in Dec., 1928), matches, paper, glass, cement, chemicals and fertilisers, sugar, brushes, flour, insulated electric wire, woollen brushes, flour, insulated electric wire, woollen fabrics, rubber goods, soap, lacquer ware, porcelain, earthenware, mats, matting, hempbraids, knitted goods, vegetable oil, crude camplior, camphor oil, straw-plaits, and bronze, while shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S.A., Egypt, and China; wheat from Canada, Australia and U.S.A.; ol cake from Kwantung Province and China; wool from Australia and W.S.A.; ol cake from Kwantung Province and China; wool from Australia and U.S.A. tralia : crude rubber from Malaya : lumber from U.S.A.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from the U.S.A. and Europe. Sugar is largely imported from the Dutch East Indies, Philippine Islands and Formosa; kero-sene oil from U.S.A. and the Dutch Indies; beans, peas, and pulse from China, Kwantung province, and Korea; and rice, principally from British India, French India, Korea, Stam, and China. The chief exports are silk, cotton fabrics, cotton yarns, tea, refined sugar, kultted goods, matches, coal, camphor, straw-plats, porcelain, earthcuware, marine products, paper, glass and toys.

Communications - There were about 13,560 miles of Government and private railroad (steam and electric) on Dec. 3z, 1929, in addition to s,200 miles open in Korea, 95z miles in Formosa and 3oz in Saghalien, while the South Manchuran Railway in China (754 miles) is under Japanese control. The inercantile marine of Japan and her dependencies consisted in 1929 of steamers and motor vessels of 4,215,772 gross tons, in addition to small craft and wooden ships. The total tonnage entered and cleared ant the chief ports in 1929 was 133.140.249 (25,106 vessels). The three great ports are Kobé, Yokohama and Osaka, the first named having a large transhipment trade, in addition to direct imports and exports. In March, 1927, there were 8,784 post offices dealing with about 4,000,000,000 postal packets annually, and 166,271 miles of telegraph line carrying 67, 165, 166 messages outwards in the financial year 1026-27.

Defence.-Service in the Army is universal Defence.—Service in the Army is universal and compulsory between the ages of so and so. The Army is divided into a first line (Gen-eki), and its reserve (Yob); a second line (Kobi), and its reserve (Kokumın), with a third line to make good the wastage of war (Hoju). The peace strength of the first line is 17,766 officers and about 200,000 other ranks. The military Air Force is organized in 8 flying regiments and a balloon corps; the Naval Air service consists of 17 shore-based squadrons, in addition to machines carried by aircraft carriers and other ships, with 4 small air-ships and a balloon section. The Navy includes 6 battleships, 4 battle cruisers, 4 (10,000 ton) cruisers and 80 thers, 5 aircraft carriers, 109 destroyers and 66 submarines. Japan declared war against Germany on Aug. 23, 2924, and captured the German fortress of Tsingtau in November, 1914.

Education is in the lower grades free and compulsory. High schools are State-aided, and prepare for a 3 years' course at the Universities. There are high schools for girls, and the technical and special schools are well attended. There are six State Universities of Tokio (a), Kyoto, Tolioku (at Sendai), Hokkaido and Kyushu (at Fukuoka), and 5 medical universities.

₹8,064,000 Exports to U K. .. £9,132,000 Formosa, -The island of Formosa (Taiwan) was ceded by China to Japan (June 2, 1895) in accordance with the Treaty of Peace. On the E. coast of the island are the highest known sea chiffs in the wold, 8,000 feet sheer above the water. Its total area is x3,500 square miles, with 4,440,x14 inhabitants (x928). Imports, Yen 204,910,684; exports, Yen 27,893,256, in x929. The colony has been self-supporting since x906. producing 36,580,000 bushels of rice in 1930, and it is the principal source of the world's camphor supply. Estimated rev. and exp (1928-29), 1'enxog, 246,000. Capital, Taihoku; pop. (1928),

219,566. Saghalin (Karafuto).—The southern half of this island was coded by Russia at the close of the Russo-Japanese war. The ceded territory the gusso-spanes war. The coded territory has a total area of 9,824 sq. miles with a population (1928) of 240,502. The Japanese Government is encouraging the settlement of agriculturists, and there is a large fishing industry. Estimated revenue and expenditure (1928-29) Yen 27,340,000.

The Kwantung Peninsula, which had been leased to Russia by China, was similarly leased to Japan after the Russo-Japanese war. Area, 1,300 sq. miles; population (1930) 905,181. The port of Dairen provides Japan with a mainland port, ice-free all the year round, and the peninaula is fertile. Imports (1999), £32,395,333; exports, £38,503,936. Estimated revenue and expenditure (1998-29), Yen 24,091,737. Capital, Port Arthur (Eyojunko); chief port, Dairen;

pop. (1930), 369,767.
The Pescadores (Bokoto) consists of about 63 islands, with a total area of 85 square miles, and a population (x928) of 62,606.

Korea (Cho-sen).—By a treaty of Aug. 23, 1910,

Korea was annexed to Japan and became part of the Japanese Empire.

Korea is situated between raa" and ras" E. long, and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of about 8, 156 square miles. Population estimated at 19,189,699 (Dec. 1988); there are 459,043 (Dec. 1988) Japanese in the country. The soil is fertile, but the anable land is limited by the mountainous nature of the country. The staple agricultural products are rice and other cereals, beans, cotton, tobacco, and hemp; fruit-growing is making progress and seri-culture is thought to have a bright future. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision at Songdo (Kaijo), and, being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. There are extensive forests in the externe north. The principal exports are rice, beans, silk, fish, fish-oil and manure, iron and iron ore, raw cotton, livestock and hides. Manufactures are as yet in a primitive condition, but are growing, including cotton yarn, silk-reeling, sugar, paper, artificial ferti-lisers, cement, flour (output at present small in each case). The greater part of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the ame propers ighting of the coast. The total railway mileage open to traffic is (1929) a, soo miles. Estimated iev. and exp. (1930-31), 1en 28,859,783. Capital, Seoul (Keijolu); pop. (1928) 321,845.

Imports into Korea, 1930 Yen 367,050,000 Exports from Korea, 1930 ,, 266,540,000

Pacific Islands .- Under the Treaty of Ver-Pacific Islands.—Under the Treaty of Versailles, 1919, Germany renounced the sovereignty of all her over-sea possessions, and the German Pacific Islands N. of the Equator have been placed under Japanese mandate. These islands, in Micronesia, are (1) The Marshall Islands (pop. 9,5-78), with seat of government at Jaluit; a) The Caroline Islands (pop. 28,647), with seats of government at Truk and Ponape (Eastern group) and Palew and Yap (Western group); (2) The Ladrone (or Marianne Islands (pop. 16,596, with seat of government at Sipan. Estimated rev. and exp. (1927-188) for the Pacific Islands. rev. and exp. (1927-28) for the Pacific Islands, Yen 4,546,526.

CAPITAL OF THE JAPANESE EMPIRE, Tokyo, formerly called Yedo, the residence of the Emperor; population estimated at 2,294,600 (Sept. 1,292). A Baltic Republic at the eastern and southern shore of the Gulf of Riga, formerly part of the Russian Empire. Latvia was proclaimed an independent state on Nov. 18, 1918. Its frontiers are common with Esthonia, Russia, Poland and Lithuania. The constitution is that of a democratic republic, with universal suffrage and proportional representation. Parliament (Sacina) consists of a single chamber of roo members. The area is about 25,000 sq. miles, with a population of about z,000,000.

The surface of the country is generally flat with marshy areas, interspersed with many

principal occupations of the people, and there are many flourishing industries. The fisheries are also of importance. The chief exports are fax, timber, butter, paper and glass; chief imports are agricultural machinery and implements and wood and metal machinery. The tourage of slips entered in 1930 was 1,951,848 tons. The chief ports are Rigs, Libau and Windau. In 1930 there were 1.860 miles of railway in operation.

An independent Negro Republic of Western
Africa, occupying that part of the coast of North
Guinea which is between the rivers Cavalla, S.E., lakes. Agriculture and dairy farming are the and Mano, N.W., a distance of about 350 miles,

with an area of about 43,000 square miles, and which an area of whole 43,000 square limbs, and extending to the interior to latitude 2° 50', a dis-tance of 150 miles from the seaboard. It was founded by the American Colonization Society in rounces by the American Colonization Society in 1820, and has been recognised since 1847 as an independent State. The population is estimated at 1,500,000 to 2,000,000, including about 12,000 Americo-Liberians. The principal exports are paim-kernels, piassava, paim-oil, coffee, cocca, ivory, kola nuts and rubber. The chief imports are rice, tobacco, Manchester goods, provisions, spirits, sait, hardware, glass and earthenware and building materials. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Sonate, with 10 members elected for six years, and the House of Representatives with as members elected for four years. There is no regular army, but there is an enlisted frontier force of about 600 men under American and native officers. In 1927 under American and native officers. In 1927 arrangements were made with the Finance Corporation of America for a loan of 5,000,000 dollars, and the issue of the first half is to be completed by the end of 1930. The previous 1921 loan, in which British financial interests preponderated, was paid off from the proceeds of the new loan, which is secured by a first hen customs revenues and head monary. on customs revenues and head moneys. Loan Agreement also provides for financial supervision by American officials. There are 15 ports of entry, including 4 river ports, along the 350 miles of coast and 12 interior ports. In 1929, 1,029 vessels (2 426,579 net tons) entered and cleared at all ports; of these 272 (825,033 net tons) were British.

The independence of the Lithuanian Republic (Lietuva) was proclaimed at Vilna on Feb z6, zoz8. The Republic consists of the former Russian Government of Kovno and portions of the Suvalki and Vilna Governments, and is bounded on the N. by Latvia, on the S and E, by Poland, and on the W by Germany and the Baltic Sea, the total area included in the Republic (including Memel Territory) being about 20,000 sq. miles, with an estimated population of a,000,000. Under the Treaty of Versaules Germany renounced the sovereignty over the town and territory of Memel, and a French High Com-missioner, with a small garrison, governed the Territory in the name of the Allies until Jan-zaga, when the Territory was invaded and occupied by the Lithuanians. The sovereignty of the Territory has been transferred to Lithuania, as set out in the Convention signed at Paris (Nay 8, 1924) and ratified Aug. 1925. The total area administered is 945 square miles, with a population of about 1950,000, of whom about 350,000 inhabit the town of Memel.

The legislature consists of a single chamber assumble. (Search betted by a search of the sample of the sampl

Assembly (Senn), elected by universal adult suffrage, the Executive being entrusted to a council of ministers

The chief industries are agriculture and forestry, the chief products of the Republic being ryc, wheat, barley, oats and potatoes; the exports are flax, liuseed, timber, livestock, and dairy produce; the chief imports are textiles, awar, butters and machiner and machiners. sugar, herrings, and machinery.

Consulate General in London, Moorfield House,

Tenter Street, E.C. s.
A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1813-66, and was included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23, 1890, it passed to the Duke of Nassau. The territory was invaded and overrun by the Germans at the commencement of the war in 1914, but was liberated in 1918, U S troops entering the capital on Nov. 22. By the Treaty of Versailles, 1919, the country is declared to be free from all ties with Germany. The area is 999 square miles the population (292) 222,092, hearly all Roman Catholics. The principality is rich in 1701-0re The revenue in 1931 was estimated at 483, so8,600 francs, expenditure 445,588,000 francs (clan. r, 1930) 478,000,000 francs. There are 388 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 52,800), is a dismantled fortress.

FLAG: Red, white, blue.

MEXICO.

(Estados Unidos Mexicanos.)

President (1930-1934) Pascual Ortiz Rubio, elected Nov. 18, 1929; assumed office Feb. 5, 1930.

CABINET.

Minister of the Interior, Manuel C. Tellez. Foreign Affairs, Geuaro Estrada. Finance, Luis Montes de Oca. Communications, Gustavo Serrano. Industry Commerce and Labour, Asron Saens. Agriculture, Francisco Elias. War, Plutarco E. Calles. Education, Narciso Bassals.

Minister in London, Señor Don Leopoldo Ortiz,

48 Belgrave Square, S.W. z.

Consul-General in London, Señor Don Gustavo
Luders de Negri, Bush House, Aldwych,

Mexico occupies the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from rg° to 32° 30'N. lat. and 37° to 117° W. long., and comprising one of the richest and most varied zones in the world. It comprises and the federal district of Mexico, making in all 3x political divisions,

comprehending an area of 768,883 square miles, with a population (1930) of 16,404,030. Mexico is rich in archeological remains, and work is proceeding in every district to remove the earth covering which for many centuries has kept them from view. Near the City of Mexico Rept them from view. Near the City of Mexico are a number of pyramids built to a great extent with boulders from the river beds. The Pyramid of the Sun (now called "Tonatiuh") is 76x feet from N. to S., and 72x feet from E. to W., and rises to a height of 2x6 feet. The Pyramid of the Moon (now called "Mextli") is 45x feet x 5xx feet, and rises to 3x5 feet. The staircases vary in construction between terrace and terrace vary in construction between terrace and terrace and are found to be intact. Other places of interest are near Oaxaca, Papantla, Zempoala on the Continent, and Uzmai, Chichen-Itza and other points on the E. side of Yucatan.

The two great ranges of North America, the Sierra Nevada and Rocky Mountains, are prolonged from the north to a convergence towards longed from the north to a convergence towards the narrowing Isthmus of Telunantepec, their course being parallel with the west and east coasts. The surface of the interior consists of an elevated plateau between the two ranges, with steep slopes both to the Pacific and Atlantic (Gulf of Mexico). In the west is the Peninsula of California, with a mountainous surface, separated from the mainland by the Gulf of California. The Sterra Navada known in Marko. California. The Sierra Nevada, known in Mexico as the Surra Madre, terminates in a transverse series of volcanic peaks, from Colima on the west to Citlaltopete on the east. The low-lying lands of the coasts form the Tierra Caliente, or tropical regions (below 3,000 feet), the higher levels form the Tierra Templada, or temperate levels form the Tierra Templada, or temperate region (from 3,000 to 5,000 feet), and the summit of the plateau with its peaks is known as Tierra Fria, or cold region (above 5,000 feet). The only considerable rivers are the Riva Grande del Norte, which forms part of the northern boundary, and is navigable for about 70 miles from its mouth in the Gulf of Mexico, and the Riva Grande & Systhaga. which runs from Lake Chanala to de Santiago, which runs from Lake Chapala to the Pacific. The remaining streams are governed by the formation of the land, and run in mountain torrents between deep-cut casions or "barrancas." The largest fresh-water lakes are Chapala (70 miles long and 20 miles wide), and Patzouaro and Xochimilco. In the north-west are saline lakes amid bare and dry regions. The climate varies according to the altitude. Yellow

climate varies according to the altitude. Yellow fever sometimes occurs at Merida, Yucatan.

The earliest invaders, or Toltees, gave place in the 13th century to the Aztees, who were conquered in the 15th century by Spanish adventurers under Hernan Cortes.*

Spanish rule was established at Tenochtitlan, a 14th century hy Attec city (now Mexico), and Mexico remained a Spanish dominion until its freedors was asserted by a realistic material. freedom was asserted by a revolutionary war, 1810-1811. From 1837-1848 the province of Texas gave rise to hostilities with the United States, terminating in a three years' war and a cession of the disputed territory to the victorious northern States. In 1810 a Republic was proclaimed, but Iturbide declared himself Emperor in 1821. He was shot in 1824, and a Republic was again established. In 1865 the French troops came to Mexico, and in 1864 an Empire under Ferdinand Maximilian of Austria was declared. In 1867 the downfall of the Empire

[•] The remains of Hernan Cortes have been definitely located in the Temple of Jesus, Moxico City. They are contained in a marble vault, with the funeral garments.

and the death of the Emperor gave rise to the new Republic, which has endured to the present day. The most prominent of modern Presidents is Porfirio Diaz, who ruled (except during 1880-4) from 1876 to May 25, 2912. Since the fall of Diaz internal disturbances, in which eleven Presidents have figured, have continued eleven Presidents have figured, have continued with varying degrees of intensity, and considerable friction (amounting almost to a state of war) has arisen with the United States. On July 15, 1914, Venustano Carranza assumed control of the executive, but his anti-foreign attitude and legislation, together with the seizure of many properties (a few of which belonged to British subjects) led to a refusal of the British Government to great recognition of the British Government to grant recognition of his administration. The degree to which Carranza departed from his declaration of neutrality during the Great War undoubtedly influenced the British Government when this influenced the British Government when this policy was adopted. Carranza was overthrown by a further revolution in 1920, and is believed to have been shot by the insurgents. After the fail of Carranza the executive power was assumed by de la Huerta as provisional President, and on Dec. 1, 1920, General Obregon, whose comp détat had caused the downfail of Carranza, became head of the Republic. The determination of the new government to uphold the Carranza executives of the provision of the provi the Carranza constitution of 1917, which has led to confiscatory measures in connection with nationalization of the petroleum of the country, and contains (among other departures from the accepted comity of nations) provisions which restrict the lights of foreigners, caused the British, American, French and Belgian governments to adopt a policy of non-recognition of the Obregon administration. The expropriation, without payment of compensation, of several hundreds of private properties, in pursuance of the Obregon agrarian policy, called forth strong protests from foreign Powers, but all the Powers except Great Britain eventually recog-nised the Obregon administration. General Obregon was afterwards assassinated relations between Great Britain and Mexico were re-established, and a Special Auglo-Mexican Claims Commission has since met.

Vers Cruz, Tampieco, Progreso, and Puerto Mexico are the chief ports on the Atlantic or Gulf of Mexico, and Acapulco, Manzanillo, Mazat-lan, Salma Cruz, and Gusymas on the Pacific There were 16,110 miles of railroad open on Sept. 1, 1926, and 54,670 miles of telegraph. The railroads have in a large measure been built by American and English companies. In Sept. 1925 the Highway Commission of Mexico had constructed (to Dec. 31, 1938) 247 kilometres of road. fluished with asphaltic treatment: of road. finished with asphaltic treatment;

32a kilometres lacking only bituminous treatment, and 700 kilometres open to traffic, but
still in various stages of construction. The
city of Mexico is linked with Puebla, Tampleo,
Vera Cruz, Toluca, and Saltillo by telephone;
the line is now extended to the U.S. border and
thence is connected to Canada. The city is
connected by wireless to U.K. and Europe.

The principal agricultural crops are maize,
beans, wheat, barley, Chile-pepper, sugar, coffee,
cotton, tobacco, vanilla, flax, grapes, and ali
kinds of tropical fruit. The maguey, or Mexican
aloe, yields a favourite beverage, "pulque";
other species of the same plant supply pita-flax

trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, fron and coal, are the leading products of the mines, and Mexico produced 50,150,610 barrels of petroleum in 1928. The inineral production is atated at .-

Woollen and cotton spinuling and weaving, the making of footwear, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports so per cent. consist of silver and gold, while as per cent. represents the walks of gold, while 35 per cent. represents the value of petroleum and its derivatives, mainly shipped from Tampico. Other important exports are copper, lead and zinc, also sisal hemp (henequen), coffee, cotton, resins, fresh vegetables and dried vegetables.

and dried vegetaties.

The monetary system has been placed on a gold basis, with a gold perso = 50 cents U.S. currency or as #84.; there is a large amount of silver currency in circulation. In Sept. zoss, the Mexican Government undertook to set aside for the service of the debt the sum of 30,000,000 gold peece in 1923, rising by 5 million gold peece annually to 50 million gold peece in 1927. However, this agreement with the International Commission of Bankers was amended in roas, after the Government had found it in 1925, after the Government and found it mecessary to suspend the service of the debt in June, 1924. The effect of the 1925 agreement was to eliminate the debt of the National Railways of Mexico from the public debt, thereby reducing this from 1,561 million Mexican thereby reducing this from 1.56: million Mexican gold peace to 890 millions, as at Dec. 21. 7025. Furthermore, the 2925 agreement provided for the postponement of payment of the 25 million peac (which had not been met in 1924 and 1925) until 1928-1925. Service of the debt was resumed in 1925. In addition to the 890 millions above mentioned, other items which had not been included in the debt agreement of Sept... rgas, as amended in 1925, amounted to 1025 millions as at Dec. 31, 1925, thus making a grand total of 926 million 1920 Mexican gold. The total debt, funded and floating and interest, was stated to be \$1,233,105,699 as at Dec. 31, 1928.
The language of the country is Spanish.

Estimated revenue (1931) \$298,000,000

Imports from U.K...... £2,537,652 Exports to U.K...... 2,689,866 £2,433,505 2,886,488

MOROCCO.

(Moghreb el aksa "The Farthest West") French Protectorate, and Spanish and Interna-tional Tangier Zone.

Sultan, Sidi Mohamed, born 1909; proclaimed Nov. 20, 1927.

Morocco, the largest of the Barbary States, is situate in the north-west of the African Conis studed in the month were of the Arthur timent, between sy' 36' N. lat. and x'-x'' 40' W. long., with a total area estimated at xx, seg square miles, and a population of about 5,300,000. Morocco is traversed from the Atlantic coast in Morocco is traversed from the Atlantic coast in the south-west to the Algerian frontier in the north-east by five parallel ranges, known generally as the Atlas Mountains. Between the various ranges ile well-watered and fertile plains, the lower slopes of the northern flanks of the mountains being well wooded, while the southern slopes are exposed to the dur while of the desert and are responsible rid. dry winds of the desert and are generally arid and desolate. The most northerly point of Morocco is the peninsula of Ceuta, which is separated from the Continent of Europe by the narrow strait of Gibraltar. The Jobel Musa narrow strait or Gibraltar. The Jebel Musa dominates the promontory, and with the rocky eminence of Gibraltar was known to the ancients as The Pillare of Hercules, the western gateway of the Mediterranean. Between 32° N. and 30° N. is the headland Ghir, which encloses a bay containing the port of Agadir, formerly known as the "Gate of the Sudan."

The climate of Morocco is generally good and healthy, especially on the Atlantic coast, the country being sheltered by the Atlas Mountains from the hot winds of the Sahara. The extremes of temperature in Tangier and Mogador are gas Fahrenheit in the summer and 37° in the winter, with a ramy season from November to April, but the summer-heat figures at all the intervening ports (Larache, Kenitra-Mehedia, Rabat-Sale, Fedalah, Casabianca, Mazagan, and Saffi) are markedly higher; the last-named port being the hottest. The Mediterranean coast is drier and less temperate, but not unhealthy, while the plains of the interior are intensely hot.

Government.-France is the paramount power and represents the Sultan of Morocco in all foreign relationships, but the country is divided into three zones—the French Zone, the Spanish Zone, and the International Tangier Zons. Spain has had relations with Morocco for many centu-

ries. The northern portion of Morocco, as defined in the Franco-Spanish Treaty of xgrs, forms a Spanish "sphere of influence." In this Spanish zone (which extended over the whole of Northern Morocco, with the exception of the International nauroco, with the exception of the international zone round Tangler) there were tribal risings in rgsr, and during the operations to quell these risings the Spanish Expeditionary force met with serious reverses in the neighbourhood of Melilla. A Civil High Commissioner was appointed in 1922 over the Spanish zone to inaugurate a policy of pacification. In 1924 the military forces of Spain met with further reverses, and were withdrawn to a line running west from Rio Martin (on the Mediterranean) to within fifteen miles of the Atlantic Coast, and thence southwards to the French zone, near Aleazar el Kebir. In 1925 the French became embroiled and a considerable force was despatched from Algeria and France to strengthen the French Army in Morocco. In spite of the fact that he was fighting two European powers, however, abd el Krim, the Riff leader, achieved such success as to be able to threaten the safety of Fez itself in July. But the danger was averted and after an anxious summer the autumn brought relief. The French and Spanish in conference in Madrid realised that their best chance of success lay in close co-operation, and the effect of this new policy soon made itself felt. In September the Spaniards landed at Alhucemas Bay and forced Abd el Krim to evacuate his headquarters at Ajdir. Simultaness evacuate his headquarters at Ajdir. Simultaneously the French by pressure from the south were able to make progress which, if less spectacular, was of no less solid a nature, and by the time the rainy season forced a retirement to winter quarters the tide was definitely on the turn. In the Spring of 1926, following an abortive peace conference at Oujda, the French and Spaniards launched their final attack. By May 24 the Riff had been effectively crossed and Abd el Krim's headquarters at Targuist occupied, and on May 27 the Riff leader surrendered himself to the French. This was the signal for the general to the French. This was the signal for the general break away of the tribes. The French virtually restored peace in their zone and the Spaniards commenced a general movement for enforcing submission and disarmament in theirs, their arduous task being practically completed in 2997. The following year saw the work of pacification consolidated by development of all kinds. Cauta (on the Mediterranean coast, opposite Gibratar), in 35° 54' N. lat and 5° 18' W. long., has been a Spanish possession since the close of the 16th century, and forms part of the administrative province of Cadiz, and the adjacent Alhucems and Zaffarin islands are Spanish possessions.

A special international regime was designed for Tangier before the War by negotiations between the British, French and Spanish Governments, but the outbreak of the War prevented this régime from being put into operation. A new Convention instituting the International Zone of Tangier was, however, signed by the three governments at Paris on Dec. 18, 1923, and was brought into force on June 2, 1925, 1926, by the three Powers and Tally, who thereby adhered to the Convention. Both instruments have been adhered to by Parising Power of the Netherlands Portugal and Sweden. Belgium, The Netherlands, Portugal and Sweden, but the United States have not yet (Oct., 1931) signified their acceptance, and therefore retain their Capitulatory rights in the International

Zone. The Convention provides for a complete international administration of the zone, except as regards native affairs, which are reserved to

the Shereeffan authority.

the Shereeflan authority.

Production, Indicatry, etc.—Among the agricultural products are wheat, barley, maize, beaus, peas, birdseed, linesed, coriander, cumin, fenugreek, esparto, and hemp, and the northern slopes of the Atlas produce many fruits, principally figs, almonds, pomegranates, lemons, oilves, oranges, and grapes, the latter growing also in the planus. The live stock includes large quantities of horses, cattle, sheep and goats, while the egg industry is of importance. Important deposits of coal, manganese, iron ore, lead and zinc, as well as other minerals iron ore, lead and zinc, as well as other minerals in smaller quantities, have been prospected, but their evploitation awaits transport facilities. Gold and silver are also found. Phosphates are exported in increasingly large quantities and constitute a gre t source of wealth for the French zone. The trade of Morocco is chiefly with French zone. The trade of Morocco is chiefly with France and Algeria, Great Britam, Italy and Spain, the chief imports being cottons, sugar, notor vehicles, petroleum, building materials, and soft goods, the exports being grain, phoephates, eggs, indes and skins, and wool. The unit of currency in the French protectorate is the Moroccan franc, which is closely allied to the French franc, while in the Tangier zones the franc, the peseta and the Hasvani peseta are all current, and in the Spanish zone the two last of these currencies. last of these currencies.

Communications.-The French Protectorate authorities are engaged in the serious developient of normal gauge railways in their zone, and (Oct. 1931) 1,240 kilometres of normal and 1,300 kilometres of narrow gauge track are in working order. In addition, the completion of the Tangier-Fez full gauge system gives through the Langer-Re full gauge system gives through service between Tanger and the principal towns of the French zone. Telegraphic communication is established by submaine cables from Tanger to Cadig, Gibraitar, Rio Martin, Melilla, Tarifa and Oran, also between Cassellance and Brook. blanca and Brest. There are wireless stations at Tangler, Tetuan (military), Rabat, and Casablanca; inland lines have been built by the French connecting all important places in their zone, as well as to the borders of the Spanish zone, and the latter line is being extended to Tangier. The chief roads in the Tangier and Spanish zones are those linking Tangier to Ceuta vut Tetuan in the North, and to Arzila, Laraiche, and the French zone in the South. The French zone is well equipped with good main and secondary roads. Air Services are maintained between Casablanca and Toulouse (daily), and Casablanca and Dakar (weekly).

The principal Harbours are Casablanca, and Centa (for Tetuan), Tangier, Laraiche, Rabat, Mazagan, Safil, Kenitra, and Mogador.

External Trade. -'I he imports into the French. Zone in 1930 were valued at 2,209,727,000 francs, of which 300,000,000 francs represent the value of imports over the Algerian frontier; exports from french zone, 1930, fr. 719,000,000. The imports into the Tanguer Zone were valued at 125,509,688 francs and the exports from the zone at 16,818,497 francs.

CAPITAL of French zone, Rabat, population 52,000 (Fez in the North, and Marrakesh in the South being the old capitals of the Sultans). The French Resident-General is M. Lucien Saint. CAPITAL of Spanish zone, Tetuan, population 30,000 (principal ports, Laraiche and Rio Martin, for Tetuan).

A martime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46′—53° 34′ N. and long 3° 22′—7° 24′ E., consisting of 12 provinces, and containing a total area of 12,762 square miles, with a population, May 1, 1931, of 7,928,124 The majority, about 55 per cent., belong to the several Reformed Churches, and the remainder are Roman Catholics, with 'bout 12,500 Jews. The land is generally flat and low, intersected by numerous censels, and conpecting rivers— The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The highest point is at Vaals, 656 ft. above mean sea level, but almost half the country is below the mean level of the sea. The principal rivers are the Rhine, Mass, and Yssel, withit the mouths of the Schelde. The chief native products are herrings and other flah, cattle, horses, swinc, sheep, poultry, eggs, seed, potatoes, oats, rye, wheat, barley, beans, peas, bluckwheat, sugarbeet, chicory, flax, hemp, tobacco, bulbs and dairy produce. The principal manufactures are shipping, bricks, margarine, cocca, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, glass bottles and ware, sugar, chemical and pharmaceutical products, matches, perfumery, bicycles, boots and shoes, starch, potato flour, engines, metal substances, iron and steel, wireless sets and pa ts, works of art in gold and silver, incandese ut lamps, wireless apparatus and parts, machinery, motors, paper, printing, oils, beer, "geneva" and other liqueurs. Coal appropriate that the production of the second content of th production (1930) 12,211,000 tons. Diamond-cutting employs numerous hands in Amsterdam. Diamond-

Communications.-The total extent of canals railroad open in 1939, 1,330 miles of telegraph cable, and 2,782 miles of telephone cable. The mercantile marine, on Jan. 1, 1931, consisted of gon steam and motor vessels of 6,944,000 cubic metres gross. In 1930 about 20,000 curic (84,714,000 tons) entered and cleared at the various ports An Act for the damming and draining of the Zuyder Zee was passed in 1918, and work is now in progress; the dam is expected to be completed in 1932.

Defence.—The Home Forces consist of a conscript army, with an annual levy of x0,500 men, producing a first-line army of 27,000, or (including reserves) 350,000 all ranks. The Royal Navy consists of 12 protected and 58 unprotected vessels.

unprotected vessels. Education.—Private State-aided primary instruction is encouraged rather than public, though the latter is provided if required, by local taxation. The average attendance at primary schools is 96 per cent. Secondary schools for working classes are numerous, well equipped and attended. The principal Universities are at Amsterdam, Groningen, Leiden,

and Utrecht, and there are technical universities at Delft (polytechnic), Rotterdam (commercial), Wageningen (agriculture), and Utrecht (veterinary)

NETHERLANDS COLONIES.

Netherlands' East Indies — "Netherlands' India" comprises the islands of Java and Madura, the island of Sumatra, the Rooter Langga Archipelago (which with Karimon, Anambas, Natuna Islands, Tambelan, and part of Sumatra, forms the "Residency of Riouw"), of Sumatra, forms the "Residency of Riouw"), the islands of Bangha and Billitton, part of the island of Borneo, Celébes Island, the Molucoa Islands (Ternate, Halmahera, Buru, Ceram, Banda, Timor-Laut, Larat, Bachiam, Obi, Kei, Aru, Babar, Leti and Wetart, part of New Guinea, part of Timor Island, and the islands of Badi and Lombok, with a total area of 730,000 sq. miles, and a population estimated at 53,000,000. The administrative capital is Batavia (pop. about z€0,000).

Governor-General, Jonkheer Dr. A. C. D. de Graeff, appointed March 26, 1926.

Java and Madma (51,000 sq. miles, pop. 1030, 40,000,000) furnish sugar, tobacco, tea, coffee, tin, rubber, and other products for exportation. The "outlying" islands are frequently adminisoutlying islands are nequently adminis-tered by their own pinces, subject to the directions of a Netherlands Resident. There was (1929) a colonial army of 1,293 officers and 37,100 men The colonial revenue for 1931 was estimated at fl. 833.524,000 and the expenditure at fl. 887,202,000. The trade of Netherlands India was valued in 1929 at fl. 1,487,801,000 for exports and at fl. 1,166,305,000 for imports. The trade with Great Britain in 1930 was valued at £4,510,420 for imports from, and at £6,586,271 for exports to Great Britain.

BRITISH CHAMBER OF COMMERCE FOR NETHER-LANDS E. INDIES, Batavia, Java.

II. Netherlands' West Indies :-"Netherlands' West Indies" comprise the mainland colony of Surmam ("Dutch Guiana in South America, and certain islands in the West Indies known as the "Colony of Curação" ('uraçao, Bonaire, Aruba, part of St. Martin, St. Eustatius, and Saba) with a total area of 400 sq miles, and a population estimated (1929) 400 sq mines, and a population capital of Surinam is Paramaribo (pop. 50,000); the capital of Curação is Willemstad (pop. 21,000).

> NICARAGUA. (República de Nicaragua.)

President (1929-1933), Señor Don José Maria Moncada, assumed office Jan. 1, 1929.

Minister in London, Señor Don Eduardo Perez-Triana, 4 Moorgate, E.C. 2. Consul-General in London, General Carlos A.

Custro Wassner, z Union Court, E.C. a.

The largest State of Central America, with a long scaboard on both the Atlantic and Pacific Occans, situate between 9° 45′—15′ N lat. and 3° 40′—87° 38′ W. long., containing an area of 51,666 English square miles and a population (1930) of about 750,000, of whom about three-quarters are mixed blood and the rest Indians, including the Mosquitos, who dwell on the Atlantic littoral and were formerly under British protection.

Nicaragua was discovered by Columbus in 1502, and was overrun by the Spaniarvis under Davila in the first quarter of the 16th century,

forming part of the Spanish Captaincy-General of Guatemala until 1821, when its independence was secured. The present constitution rests on the fundamental law of Nov. 10, 1921 (amended 1913) and is that of a centralised republic. The President is elected by direct suffrage for four

years.
The chief products are coffee, bananas, sugar, timber (cedar, mahogany, rosewood, &c.), tobacco, maize, rice, beaus, cocos, hides, gold and silver. Considerable quantities of foodstuffs are imported as well as cottons and other manufactures, principally from the United States, which also take the greater part of the exports There are (1930) 160 miles of railway, 2,842 miles

of telegraph and 3,216 miles of telephone, and a powerful wireless station was completed at Managua in 1924. Good roads are very few, and transportation, especially in the rainy season (May-Nov), is attended with great difficulties.

Corinto, on the Pacific coast, is the chief port of the country, handling about 70 per cent. of the total trade. Bluefields is an important port on the Atlantic coast, whence considerable quantities of bananas and timber are shipped to New Orleans. Owing to defective communica-tions the Atlantic littoral is practically isolated from the rest of the Republic and the chief centres of population.

Education is backward, at least 60 per cent. of the population being illiterate.

The official language of the country is Spanish.

Norway, an independent kingdom, founded in Norway, an independent kingdom, founded in 872 (fundamental law of May 27, 2814), was united with Sweden under the same King from Nov. 4, 2814, to Juno 7, 2905, when the union was dissolved. The Parliament of 250 members is called the "Storthing," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsting" and "Lagting." Norway, the western and northern portion of the Scandinavian pening is about a year miles in length, its greatest. sula, is about 1, roo miles in length, its greatest width about 250 miles. It is divided into 20 mowidth about 350 miles. It is divided into 30 provinces, or fylker, and comprises an area of 124,533 sq. miles with a population (1930) of 1,809,564. The coast-line is extensive, deeply indented with numerous flords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys The cultivated area is about one-fortieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains.

nabitable mountains.

The chief industries are agriculture and forestry, manufactures, fisheries and shipping Agriculture and forestry give employment to one-third of the population but it has been necessary to import considerable quantities of grain Manufactures are aided by great resources of water power, estimated at 10,000,000 kw., of which about 13 per cent. are utilized. The quantity of fish caught by Norwegian fishing vessels is next to that of Gt. Britain, and 60 per cent. of the whales killed are killed by Norwegian Companies. The imports consist chiefly of raw materials for the manufacturing industries and coal and oil fuel. The chief exports are fish, oil, and other products of the fisheries, condensed milk, tinned goods, pulp, paper, iron ore and pyrites, stone, cement, calcium carbide, nitrate of soda, aluminium, terro-alloys, nitrate of lime, zinc, cyanide, &c.

Defence.—Service in the National Militia is universal and compulsory. The peace strength is about 10,000 all ranks. In time of war all males between the ages of 18 and 25 are liable for service. The Navy consists of 4 ironclads, 77 torped-boats, 3 destroyers, 9 aubmarines, and several minelayers. There are 60 seaplanes and accordance.

and aeroplanes.

Education is compulsory and free between the ages of 7 and z4, schools being maintained by local taxation with State grants in aid. The attendance is high. Secondary schools are provided by the State, by local authorities, and privately. There are many special schools and industrial and technical institutes. The University of Other was attended in received. versity of Oslo was attended in 1930 by 3,476 students.

Communications. - The total length of railways open in 1930 was 2,383 miles, of which 23 miles were private lines. The length of telegraphs and telephones in 1930 was 36,556 miles (State, 23,015) with 588,129 miles of wire (State, 445,462 miles) The mercantile marine, Jan. 1, 7937, consisted of 3,953 vessels, of 1,294,000 het tons. The gross earnings of the Norwegian mercantile marine in foreign traffic amounted m 1930 to about 412,200,000 kroner.

PAPAL STATE, The.

(Stato Città Vaticana.)

overeign Pontif (260th), His Holmess Pope Pms XI. (Achulle Ratti), Lorn at Desio, March 21, 1857, elected Pope (in succession to Benedict XV) Feb 6, 1922. Sovereign

The office of the ecclesiastical head of the Roman Catholic Church is vested in the Pope of Rome, who is the Sovereign Pontiff of the Western Church. The Papal States were incorporated with Italy from 1866 to 1870, and the territory of the Papacy was confined to the palaces of the Vatican and the Lateran and the Villa of Castel-Cardelle In 1866 to 1870. Gandolfo. In 1870 the incorporation of the Papal States in Italy left the temporal power of the Pope in suspense until the treaty of Feb. 11, the Fope in suspense until the treaty of Feb. 23, 299, which recognised the full and independent sovereignity of the Holy See in the City of the Vatican. Accompanying the treaty were conventions regulating the condition of religion and of the Catholic Church in Italy and agreeing to pay 750,000,000 live in cash and the income at 5 per cent on 1,000,000,000 live state bonds as a final settlement of the claims of the Holy See against Italy for the loss of temporal power.

Square, W.C. I.
An inland State of South America, situate between 20°-6' 30' S. lat. and 24°-62° W. long. The area of Paragruay (exclusive of the Chaco) is computed at 51,500 square miles, and it contains a population estimated at about 800,200.

Paraguny was visited in 1527 by Sebastian Cabot, and in 1533 was settled as a Spanish possussion. In 1817 Paraguny declared its independence of Spain, and from 1814-1840 was governed by Francia, a Paragunyan despot, who was succeeded by Lopez, 1840-1861. In 1861 was succeeded by Lopez, 1840-1862. In 1862 Francisco Solano Lopez succeeded his father, and in 1864 declared war against Brazil, Argentina and Uruguay being involved in the struggle.

Against these three nations Lopez conducted a

Adrian IV (Nicholas Brakespeare, the only Englishman elected Pope, was born at St Albans, elected Pope (on the death of Anastasius IV) 2254; died 2259.

five years' war, which terminated in his defeat and death at the Battle of Cerro Cord, March 1, 1870. This dogged struggle reduced the country to complete prostration, and the population, which was 800,000 in 1887, is alleged to have fallen in 1890 to 250,000, of whom barely 20,000 were men. The present constitution was adopted at the close of the war, and under its provisions the head of the executive is the President, elected by an electoral college for four years and ineligible for office for eight consecutive years after the expiration of his term. A Vice-President is similarly elected, and succeeds automatically in the case of the death, expulsion or absence of the President. There is a Cabinet of 5 members

Paraguay proper consists of a series of plains, intersected by abrupt ranges of hills, some of which reach an altitude of a,coo to 3,coo feet above sea level. The Paraguay and Alto Parani rivers are navigable at all seasons for vessels of 6 to 7 feet draft. Many of the tributary streams are also navigable for much of the year. The Pilcomayo river is navigable for small craft for 36 miles from Asuncion; but is liable to shrink unduly with drought. Paraguay is a country of grassy plains and dense forest, the soil being marshy in many parts and hable to shrink unduly with Arana descend precipitously into that river. In the angle formed by the Parana-Paraguay confluence are extensive marshes, one of which, known as "Neembucu," or endless, is drained by Lake Ypon, a large lagoon, south-east of the capital. The Chaco, lying between the rivers Paraguay and Pilcomayo and bounded on the north by Bolivas, forms the subject of a long standing dispute with that country; it is practically a dead level, though a slight and uniform rise westward is now known to exist, and suffers much from floods and still more from drought.

more from drought.

The chief agricultural products are tobacco, oranges and cassava (manioc), maize, lice, sugarcane, ground-nuts, and other tropical and subtropical plants. The forests contain many varieties of timber, but only cedar and a few of the best known hardwoods find a market abroad. Stock-raising, lumbering, cotton and tobacco growing, and the gathering of Yerba (Paraguay tea), are the principal industries. The chief articles of export are hides timber, yella maté, tobacco, quebracho extract, cattle and mest products, oranges, and petit grain oil. The Army numbers g.ooc to 3,000 men. A railway, 23 miles in length, which belongs to an English company, connects Paraguay with the Argentine railway system. The journey from Asuncion to Buenos Aires (98 miles) occupies 53 hours. Train ferries enable the run to be accomplished without break of bulk. The language is Spanish.

[Kens 3341] Consul, (vacant.)

Persia—called by the natives Irán—comprises an area of 628,000 sq miles, with a population estimated at 10,000,000.

Persia is mostly an arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karim, which was opened to foreign navigation from Mohammeral to Ahwaz in 1888. There are 178 miles of railway open, including 80 miles of the projected N to 8, line, in the N. from Bander Shalt to Aliebad; while 156 miles are nearing completion in the 8, from Bander Shappur to Dizful. Caravans and pack-animals are also being superseded by motor transport of passengers and goods on the road between fapts. Tehran-Tabliz, Tehran-Meshed, Moshed-Duzdab and Tehran-Bushire, while the German Junker

Company has recently secured a contract for the carriage of mails and passengers by aero-plane between Tehran-Khanikin, Tehran-Pahlevi

plane between Tehran-Khanikin, Tehran-Pahlevi (Enzell), Tehran-Bushire and Tehran-Meshed.
The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Olifields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats faprics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The Persians are mostly Shah Muhammadans; but there are many adherents of Bahaism (an eclectic form of Deistic religious), and Armenian Christians. The laws and popular education are based on the precepts of the Koran, tion are based on the precepts of the Koran, but efforts are being made to approximate the educational system more closely to European models. Persia is divided into provinces, of which the principal are under Governors or Governors-General.

Owing to increasing popular discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec. 1905. In Aug., 1905, the Shah, Muzaffer-ud-Dm, admitting the need for reforms, granted a Constitution. He was succeeded in 1907 by his son Muhammed Ali Shah, who was deposed by the National Assembly in 1909, to be succeeded by his son, Sultan Ahmad Shah (under the regency of Nasr-ul-Mulk, until 1914). As a result of the energy of Prime Minister H.H. Reza Khan the authority of the Persian Government was re-established over almost the whole of Persia by means of a disciplined army of \$5,000 cavalry and 25,000 a corrupt and incompetent administration disciplined army of 8,000 cavalry and a2,000 infantry, with 94 guns and 200 machine guns, and a number of aeroplanes and armoured cars. On a number of aeroplanes and armoured cars. On Oct. 32, 1928, the Shah Ahmed Mirza, who had been absent from the country for some time, was deposed by the National Assembly which handed over the government to the Prime Minister. On Dec. 13, 1928, the Constituent Assembly elected Reza Khan Pahlavi, Shah of Persia. The Shah took the oath on Dec. 13 and was publicly proclaimed, and was crowned on April 25, 1926.

The revenue is derived from land tax, Crown lands, customs, onlum and salt, while the

lands, customs, opium and salt, while the recently enacted law concerning a sugar and tes monopoly is calculated to bring in £600,000 annually (at the present reduced rate of exchange), and this sum is being earmarked for the construction of railways; in x928-29 £,353,000
was so expended. British commercial interests in Persia much exceed those of any
other country, the trade between the British
Empire (including India) and Persia amounting to 45 per cent. of the total trade of the country

(rosp-30), inclusive of oil.

The leading imports into Persia are cotton

Foreign Relations .- By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Peria, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic

reasons, special interests.

In March, vgsr, Persla sigued a treaty with
the Russian Soviet Republic, which provides
(inter alsa) for mutual diplomatic and consular (inter also) for mutual diplomatic and consular representation, restores to Persia Firuseh and Ashurada, annuls all concessions previously granted to Russians in Persia, hands over the Russian Discount and Loan Bank to the Persian Government, cancels all Persian debts to Russia, denounces all previous Russo-Persian treaties, abolishes the "capitulations" as regards Russian subjects in Persia, and denounces all treaties made between Russia and third Powers regarding Persia.

In 1922 the Persian Government engaged a number of American advisers (under Dr. Millspaugh) for the supervision and direction of the paugn) for the supervision and direction of the country's finances. Considerable strides have been made by the country under this new regime, a balanced budget and a programme for gradual development of the country's resources having been evolved; Dr. Milispaugh's contract has now come to an end; he has left the country and German and Swiss financial experts have replaced the Americans.

have replaced the Americans.

In May, 1928, the capitulatory régime came to an end; at the same time a new Tariff Convention was signed, giving Persia Tariff autonomy.

Peru is a maritime Republic of South America, situated between xº 3x' ag' and 2y° 13'8. Latitude and between 69° and 8x' xg' W.

The territory between xº 4y' S. and xg° x3' S. was occupied by Chile, as the result of the Pacific War of x879-x882. In x992 the Province of Tacna was returned to Peru, Chile retaining the Province of Arica. The area of the Recubilic is Province of Arica. The area of the Republic is estimated at 358,000 square miles (including 6,000 square miles for Tacna), and the population (rest) at 5,550,000. It is bounded on the north by Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by Brazil and Bolivia, and on the south by Chile and Bolivia.

by Francisco Pizarro (born 1478, died 1541), who subjugated the Incas (a tribe of the Quichua Indiana), who had invaded the country some goo grar earlier, and for nearly three centuries Peru remained under the Spanish rule. A revolutionary war of ran-rand established its independence desired as Indiana. independence, declared on July 28, 1821. The constitution rests upon the fundamental law of Oct. 18, 1856 (amended Nov. 25, 1860), and is that of a democratic Republic under a nowly drawn constitution of 1919. The President is elected for five years by direct vote of the people and and the years by direct vote of the people and under an amendment to the Constitution (1987) may be re-elected indefinitely. The Constitution is again to be amended by the Constitution Assembly, for which elections are held (as also for President) in Oct. 1931.

The country is traversed throughout its length

The country is traversed throughout its length by the Andes, running parallel to the Pacific coast, the highest points being Huasaaran (22,05 feet), Huanday (21,200 feet), Arrquipa (or Misti) volcano (20,013 feet), Hualcan (20,000 feet), and Livima, Tocora, and Sarasara, all over 19,000 feet. There are four distinct regions, the costa, west of the Andes, the purias or mountainous wastes below the region of perpetual snow; and the inward slopes (montain) and boundless forests of the Amazonian hasin and boundless forests of the Amazonian basin. The coastal area, lying upon and near the Pacific, is not tropical, though close to the equator, being cooled by the Humboldt-Current; its wool, hides and skins, and it contains the chief towns and most of the white population. In the barren mountain section are to be found mmerals in great richness and variety which await improved transport facilities before their production can be considerably increased; it is inhabited by Indians in a low state of civilization Upon the eastern slope of the Andes are to be found very large tracts suitable for cultivation and stock raising, at present almost wholly unexplored owing to lack of communication, but efforts have been made in recent years to open up an routes. This part of the country should show most interesting developments in the future. The tropical lowlands lie east of the Andes towards the borders of Brazil, and consist mainly of unexplored or little known country inhabited by Indians in a savage state. There are here dense jungles, of which the principal commercial product is wild rubber. The mineral production in 1929 was valued as follows: gold (6,31,515 80/68) silver (28,477,521), copper (54,207,622), lead (8.053,324), rinc (4,454,084), vanidium (16,538,084) and petroleum (233,325,546 soles). The Lobos and other islands on the Pacific coast provide guano (152,000 tons in 1929). The principal imports are coal colors. inhabited by Indians in a savage state. There

The principal imports are coal, cotton, woollen, linen and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber and wheat. The chief exports in 1929 were petroleum and derivatives (129,048,826 soles), minerals (95,896,000), cotton

(51,315,280) and sugar (33,377,390 soles).
The Lotal length of the railways open (x026) was about 2,500 miles, of which 1,084 miles are under the control of the Peruvian Corporation. There is also steam navigation on Lake Titicaca and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. y Chile and Bolivis.

Peru was conquered in the early 16th century many places. There is considerable activity in air services. The Naval Air Force maintains services to Iquitos and other places in the interior. The coast district is served by anational company and by the Chile-U.S.A. route vid Peru. National Air Mails are carried

by Peruvian military machines.

Defence.—The Army is recruited by voluntary enlistment, supplemented by conscription, and numbers about 8,000 of all ranks; the Navy includes a cruisers bult at Barrow, a destroyer bought from the French Government, and 4 submarines built in U.S.A. There is a military aerodrome at Chorillos (near Lima) and a seaplane station at Ancon.

Language.—Spanish is the official language of the country, but native dialects (of which Quichua is the most important) are spoken by a considerable portion of the Indian population.

The Republic of Poland was proclaimed at Warsaw in November, 1918, and under the Treaty of Versailles (June 28, 1919) the assentors to the Covenant of the League of Nations, and the signatories of the Treaty of Peace, guarantee the independence of the Republic, which is reconstituted within the 'imits of the 18th-century "Polish Commonwealth." This State cathended in the year 1773 over an area of about 286,000 80. miles, and included a population of about 23,000,000. The political boundaries of the Republic are the Baltic Sea, Germany (East Prussia), and Lithuania, in the N.; Czecho-slovakia in the S.; Rumania in the S.E.; Soviet Russia in the E.; and Germany in the W. The present area of the Republic may be estimated at 150,000 sq. miles, with a population estimated (Jan. 1, 1930), at 30,737,448 (of whom 18,660,000 are Poles, and 8,500,000 other nationalities). The predominant religion of the people is Roman Catholic, but all faiths enjoy equality, and there are a considerable number of Protestants and a very large number of Jews.

In 1919 hostilities broke out between Poland and Soviet Russia, and after initial successes the "Red" armies of Bolshevik Russia appeared (in August, zoso) likely to deal a crushing blow at August, 1920) likely to dean a crusting now at Polish independence, the capital (Warsaw) being in peul of capture. A dramatic counter-attack by the Polish troops at the critical period reversed the nature of the campaign, and Poland was enabled to conclude peace on favourable terms.

Government.—A Republican form of government was adopted by the Constituent Assembly in zgrg, the Chief of State exercising the executive authority through a Ministry responsible to the Legislature. The Legislature consists of a Diet (Sgrm) elected by universal adult (male and female) suffrage, and of a Senate elected by adult (male and female) suffrage of those over 30 years of age. The Constitution voted on March 27, 1921, is very Liberal. Since Marshal Pilsudski's coup d'état of May 12, 1926, amendments have been inserted in the Constitution conferring on the President of the Republic the power of legislation by decree at times when the Diet is not sitting,

decree at times when the Diet is not sitting, subject to subsequent ratification by the Diet. Production.—Mining, cotton, metal work, agriculture, sugar, forestry and stock raising are the principal industries, the chief crops being rye, wheat, oats, barley, potatoes, and sugar-beet; the live stock includes cattle, horses, sheep, and pigs. There are valuable coal mines in Upper Silesia, Congress Poland, and Little Poland (Galicia); zinc, lead ore, mineral and potassium salts, and in Galicia (Boryslaw) are famous oil fields: the output of ordie oil (lacea) was 652, oce fields; the output of crude oil (1930) was 663,000 metric tons. The chief manufactures are textiles.

those of minor importance being machinery and metal works, chemicals, and leather. The exports are principally coal, timber, spelter, agricultural produce and textiles, the imports being raw wool, cotton and jute, woollen and cotton goods, and machinery.

Defence.—The peace effective of the army is 17,000 officers and 250,000 other ranks. A small navy, for coastal defence, has been organized. Education.—Education is compulsory and free, and there is considerable voluntary effort

in addition to the work of the State. Secondary education is conducted on a high level, with good attendances, and there are universities at Cracow (founded 1364), Warsaw, Lwow, Poznan, Lublin, and Wilno; Polytechnics at Warsaw and Lwow, and an Academy of Science at Cracow. Communications.—There are about 10,000

miles of railway and over a5,000 miles of telemiles of railway and over as,000 miles of telegraph line, with well-developed telephone systems in all the large centres. Over 4,000 miles of navigable waterways exist on the Vistula, Narew, Bug, Warta, and Phica, of which about 2,700 are navigable by steamers. The free city of Danzig is within the Polish Customs area, free transit for Germany being guaranteed. A purely Polish port is also being constructed at Gdynia, north of Danzig, with a total water area of 470-495 acres, and an estimated maximum handling capacity of 6 to 7 million tons a year, when complete. During 1930 Gdynia year, when complete. During 1830 Gdynia handled nearly 3,200,000 tons of goods. Direct railway communication is being built linking Gdynia with Upper Silesia and Czechoslovakia on the one hand, and with Rumania and the Black Sea on the other. Zloty8

and Secretary, Senhor J. de B Ferreira da Fonsecs.

Attaché, Senhor Antonio Rato Potier. Commercial Counsellor and Consul-General (London), Senhor Joaquim Pedroso, 40, Woburn Sq., W.C. x.

Portugal lies between 36° 58'—42° 9' 12" N. lat. and 6° 12' 48''—9° 19' 45" V long, being 30s miles in length from N. to S, and averaging about 117 in breatth from E to W. Continental Portugal contamean area of 34 500 square miles, with a population in x920 of 6,032,991, and the Portuguese Colonies a total area of 800,400 square miles, with and Madeira are regarded, not as colonies, but as a part of continental Portugal. The chief products are wheat, harley, oats, maize, flax, henip, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, vines, and almonds. There are extensive forests of oak, chestnut, sca-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from wine known to us as "port" is shipped from Oporto. Its nineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of so per cent of wine, which is the chief industrial product of the country; others are cork, cattle, tin, copper-ore, fruits, oil, and the chief industrial product of the country; onners are cork, cattle, tin, copper-ore, fruits, oil, sardines, and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The mercantile marine (1920) number ed 63 steam vessels, with a tonnage of 220,227 Railways 2,045 miles in extent were open for traffic in 1930, and there were 5,742 miles of telegraph line ın 1928.

Defence.—Service in the militia is universal and compulsory. The peace effective is about 35,000. War strength, about 150,000. The Navy Consists of a few amali ships of old pattern. Air Fleet, 84 aeroplanes.

Education is free and nominally compulsory between the ages of 7 and 15, but is not strictly enforced, and about 54 per cent. of the population above 7 years old are illiterate. Secondary education is conducted in State lyceums. There are also military, naval and other special schools. There are Universities at Coimbra, Lisbon and Oporto.

Consul-General, (vacant). Consul-Gen. (Hon.), M. G. N. Gologan, 5-7 St. Mary Axe, E.C. 3. Rumania is a kingdom of South Eastern Europe

formerly the classical Dacia and Scythia Pontica, territory roughly defined by the three great rivers barnitory roughly defined by the times great rivers and bnester, whose central point is the line of the Capathians. The kingdom is divided into the 7 Provinces of The Banat, Transylvania, Bukovina, Bessarabia, Muntenia, Oltenia and Moldavia Rumania has its origin in the union of the Danubian principalities of Wallachia and Moldavia (and the addition thereto of a strip of Southern Bessarabia) under thereto of a strip of Southern Dessuration, unter the Treaty of Park (April, 1856). The princi-palities remained separate entities under the suzerainty of the Turkish Empire until 1859, when Prince Alexandru Ion Cuza was elected Prince of both Principalities, still under the suzerainty of the Porte. Prince Cuza abdicated in 1866 and was succeeded by Prince Charles of

an independent State, and part of the Dobrudja (which had been occupied by the Rumanians) was incorporated in the new Principality. On March 27, 2821, the former Principality was recognised by the Great Powers as a Kingdom.

Hohenzollern-Sigmaringen, in whose successors the crowns is now vested. By the Treaty of Berlin (July 13, 1878) a new Principality (consisting of the two above mentioned) was recognised as

Rumania is not a "Balkan" State. She took no part in the military operations of the Balkan League against Turkey in 1912-13. Her unexhausted military power secured for her a re-

adjustment of her south-eastern (Dobrudia) frontier in 1913. In the War of 1914-1918, Rumania fought on the side of the Allies from Aug. 27, 1916, and after many vicissitudes (due mainly to the sudden collapse of the Russian Armies in 1917), she emerged in triumph at the cessation of hostilities. Her territories were greatly of hostilities. Her territories were greatly increased as a result of the War, and the antebellum area of the Kingdom (74,46z sq. miles) may now be estimated at razoos 81 miles, and the rors population of 7,897,311 has been increased to nearly 18,000,000. The domi-nating religion is that of the Greek (Orthodox) Church

GOVERNMENT.—The government is that of a Constitutional Monarchy, the legislative assembly consisting of a Senate (56 members) elected for 4 years, and of a Chamber of Deputies (36 members) elected for 4 years by universal suftrage, provision being made for the proportional representation of minority parties. The executive is cutrusted to a council of ministers.

PRODUCTION.—The soil of Wallachia, Bessarabia, and Moldavia is among the richest in Europe. The agricultural produce consists of wheat, maize, millet, oats, barley, rye, beans, and peas The wheat crop for 1931 was estimated at 3,480,000 metric tons. 1ye 400,000, maize 6,000,000, barley 1 530,000, and oats mated at 3,480,000 metric tons. 1ye 400,000, maize 6,000,000, harley a 530,000, and oats 8x0,000 metric tons. Vines and fruits are abundant. The fertile plain of Transylvama yields large crops of maize, wheat, ryo, oats, flax, and hemp, and the rich lands of Bessarabia produce wheat, maize, barley, flax, tobacco, water melons, fluit, and grapes. Agriculture and sheep and cattle taking are the plain ipal industries of the kingdom, but the chunde of thus not of South-Kastein Europe plincipal industries of the Ringdom, but the chinate of this part of South-Rastern Europe is of the Continental character, with intense winter cold and summer heat, and fleree summer droughts sometimes defeat these principal in-dustries. The forests of the mountainous regions are extensive (17,795,353 acres), and the timber industry is important. The country is rich in minerals, and produces petroleum, sait, coal, hguite, iron, gold, and mica; the workers in the oilfields are the largest single unit of workers on any one industry; the production of crude oil was x,885,225 metric tons in x93, 3,669,354 metric tons in x92, 4,300,000 metric tons in x92, 4,482,278 metric tons in x930, and 5,792,31x in x930. Manufactures are in their infancy, and in 1936. Analizatives are in their intancy, and the imports are chiefly manufactured goods, textiles, machinery and metals; the exports consist principally of wheat, barley, manze, oat, petroleum, timber, cattle, saft and indes. All large estates have been expropriated and divided among the peasants

DEFENCE. - Service in the Army is universal and compulsory. In the War of 1914 1918 over 900,000 all lanks passed into the Armies of Rumanna, and of this number over 25 per cent. were killed or returned as "missing." resurgence of Nov. 1928, an anny of 400,000 was again in the field. This force was the deciding factor in the Rumano-Hungaulan question, and it drove the Bolshevik dictator (Bela Kun) into exile from Buda Pest There is a small Navy on the Black Sea and on the Danube (30 vessels).

EDUCATION is free and nonlinally compulsory, there being 19,374 schools with 1,612,765 in attendance. Secondary schools are well attended. There are also special schools and Universities at Eucharest, Jassy, Cluj, and

A Government High School of Cernauti. Commerce was opened in 1913.

COMMUNICATIONS.—In 1930 there were 7,364 miles of railway open for traffic in the whole kingdom; railway communication requires great development in order to cope with the problem of carrying the cereal crops to the shipping ports. There are as soo telegraph and telephone offices. The mercantile marine consists of about use steamers and soo saling vessels The Black Sea ports are Sulina and Constantza; the latter is liuked with the interior by a railway.

The Union of Soviet Socialist Republics .- The federal system of Russia was adopted by the roth All-Russian Congress of Soviets on Dec. 21, 1922. The Union covers the greater part of the area of the former Russian Empire, from which the independent states of Finland, Poland, Estonia, Latvia and Lithuania have also been formed. The greater part of the remaining territory forms the Russian Socialist Federal Soviet Republic (R.S.F.S.R.), which is in union with other Soviet Republics in Russian territory to form the Soviet Union. Prior to the War of 1914-18 the Russian Empire of the Tsar Nicholas II. covered more than 8,500,000 square miles, with a population of about 183,000,000

The constituent Republics of the Union are :-

Republic. Sq miles 7,638,004 II. Ukraine (Kharkov) ... 174,372 Population. 94,865,174 28,397,000 5,938,100 71,800 III. Transcaucasia (Tiflis)

8,241,673 138,851,250

The rural population forms so per cent. of the whole.

According to the latest census returns (Jan. x According to the latest census returns (am. 1, 2088) the total population was 145,964,365, of whom 71,010,659 were males and 75,953,707 females. The returns include 29,408 persons over 100 years of age (12,340 men, 17,128 women.) The Union is governed by the Congress of Soviets of the Union, and during the intervals of the temperature of the congress of the Union, and during the intervals of the congress of the Union, and during the intervals of the congress of the Union, and the congress of the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the Union, and the congress of the congress of the congress of the Union, and the congress of the con

sessions the supreme authority is vested in the Central Executive Committee of the Union, which consists of the Council of the Union and the Council of Nationalities. The regular session of the Union Soviet Congress is convened by the Central Executive Committee ("Teik") of the Union once a year. The Council of the Union consists of 37x members elected by the Soviet Congress of the Union from among the representatives of the several constituent republics, counted in proportion to the population of each republic. The Council of Nationalities is formed from the proportion of the constituent and articals. of the Union Soviet Congress is convened by the of representatives of the constituent and autonomous Soviet Socialist Republics on the basis of g representatives from each, and of representatives of the autonomous Provinces of the R.S.F.S.R. on the basis of x representative from each. The composition of the Council of Nationalities as a whole must be confirmed by the Congress of Soviets of the Union.

(The autonomous Republics of Ajaria and Abkhasia and the autonomous Province of Southern Ossetia send one representative each to the

Council of Nationalities.)

The regular sessions of the Tsik meet three times a year, and in the intervals the supreme authority is vested in its Presideum, formed by the Tsik of the Union, of 21 members, amongst whom are included the whole of the Union-Council Presidium and the Presidium of the Council of Nationalities.

Chairman of Presidium, Michael Ivanovitch Kalimn (R.S.P.S.R.); G. T. Petrovsky (Ukraine); M. Musabekoff (Transcaucasia); A. G. Tcherviakoff (White Russia), M. Altakoff (Uzlekistan); M. Khaizula-Khodzhaieff (Uzlekistan); M. Nusratulla (Tapkistan)

Secretary, A. S. Yenukidsky. Representatives are elected to the Soviet Congress of the Union by indirect voting, each village Somet souding representatives to a Volont Soviet, the Volonts to Uyezd (district) Soviets, the Uyezds to Government Soviets, and the Inst-named to the Congress of Soviets of the Union. The cities and townships Soviets send representatives to the Congress of Soviets Union on the basis of x deputy for each 25,000 electors, whereas the provincial Societs send x deputy for each 125,000 inhabitants.
The principal executive and administrative

organs of the Tsik of the Union are . The Council of People's Commissaries, the Council of Labour and Defence, and the Supreme Court of the Union.

The People's Commissariats of the Union are divided into (1) Federal People's Commissariats for the entire Union, and (2) Joint People's Commissariats of the Union. Federal People's Commissariats of the Union are: (1) War and Maine,
(a) Koreign Affairs (3) Foreign Trade, (4) Transport, (5) Post and Telegraph. The Joint People's Commissariats are: (1) Supteme Council of National Economy, (a) Finance, (3) Internal Trade, (4) Labour. (5) Workers and Peasants' Inspection. The Federal Commissariats have their representatives in the constituent republics, who are directly subordinated to them The Joint Commissariats exercise their functions through corresponding Commissariats of the several constituent republics on their territories. Each of the constituent republics has within

its territory its own Congress of Sovicts, its Central Executive Committee (Tsik), and Council Central Executive Committee (Tuk), and Council of People's Commissaries (Sovnarkon), the latter consisting of Chairman, Vice-Chairman, and the following Commissaries: (a) Chairman, Supreme Council of National Economy, (a) Finance, (a) Internal Trade, (4) Labour, (5) Workers' and Peasants' Inspection (all these are subordinate to the People's Commissaries of the Union, (6) Agriculture, (7) Education, (8) Health, (9) Social Welfare, (20) Justice, (12) Internal Affairs (the latter six independent), and also including with an advisory or deciding vote, according to with an advisory or deciding vote, according to the decision of the respective Tsik, the repre-sentatives of Federal Commissariats of the Union,

sentatives of Federal Commissariats of the Union, i.e., of Foreign Affairs, Foreign Trade, War and Marine, Transport, Post and Telegraph.

The Council of Labour and Defence (Soviet Truda i Oboromy, or S.T.O.) is attached and subordinate to the Soviatrom. and in addition

economic and military activity, has the power to ratify statutes of joint-stock companies and

The Supreme Court of the Union is attached to the Central Executive Committee, and has power and jurisdiction (x) to promulgate authoritative opinions on questions concerning general Federal legislation to the constituent republics, (a) to adjudicate controversies between the constituent republics, (3) to try charges against high officials of the Union for offences committed in the discharge of their duties. The Supreme

Court consists of 11 members.

To the Council of People's Commissaries (Somarkom) of the Union is attached a Joint (Somarkon) of the Chind is attached a some State Political Department, formerly known as the Tcheka, but since reas as the O.G.P.U. (Oliedinionnoje Gosudarstvennoje Politicheskoje Upravience), which is designed to combat political and economic counter-revolution, espionage cal and ecolomic counter-revolution, espionage and brigandage. The Chairman of the O.G.P.U. is a member of the Council of People's Commissares of the Ution. The O.G.P.U. is directed by special rules and regulations, which have not been promulgated The control of the legality of the acts of the O.G.P.U. is exercised by the Attorney-General of the Union in accordance with a special decree issued by the Tsik.

From the economic point of view this vast territory is usually divided into "Black Soil" and "Other Zones," the Black Soil Zone being subdivided into (x) Central Agricultural Region, (a) Middle Voiga Region, (a) Lower Volga Region, (a) Northein Cancasus, (5) Siberia, (6) Kirghiz Autonomous Republic, (7) Crimea; while the Other Zones are (x) Western Region, (a) North-Western Region, (3) Central Industrial Itegion, (4) North-Eastern Region, (5) Basins of the rivers Viatka and Vetluga, (6) Ural. Government.—The Soviet Government, although

Government .- The Soviet Government, although Truda i Oborony, or S.T.O.) is attached and composed of representatives indirectly elected subordinate to the Somarkom and in addition by the masses, cannot be called representative, to a general direction of commissariats in their as no provision is made for "the opposition" to the executive power; and although the rural population (i.e., 80 per cent. of the population) elects usually a very small number of Communists (=-Bolsheviks), nevertheless the Congress of the Soviets consists almost entirely of Communists. As to the cities and towns, only candidates nominated or approved by the Bolsheviks can succeed in these elections. Under Soviet rule individual liberty is considerably less than in the time of Tasardom, while freedom of speech and the liberty of the Press are definitely denied to the people.

Press are definitely denied to the propic.

Local Government was, and still remains, highly developed The villages in Imperial Russia had their assemblies (skhod) under the presidency of a mayor (starosta); they were grouped into "volosts," the latter into districts (syezd), and these into governments (guberniya). The districts and governments had their elective councils (zemstvos) for the administration of local affairs. Combined with this system of village communities was a highly organised system of co-operative trading, the population being grouped into voluntary local associations usually corresponding with local government areas. The produce of the soil was disposed of in return for manufactures obtained by the society and distributed at the co-operative shops. Municipalities were also administered by elective councils (dumas) under the presidency of a mayor (golova); but in many cases the local authority of such municipalities and local land councils (zemstvos) was overshadowed by the superior authority of the bureaucratic governor. After the Revolution, the village and other administrative units set up sowiets of workers and peasants, and the provincial councils send representatives to the All-Russia Congress, municipalities having a double representation from their own soviet and from that of the province (or district) in which the

municipalities are situated.

Municipalities are situated.

Ratection — Under the Bolshevik régime popular education is administered by a commissary, in whose charge have been placed all educational institutions, theatres, museums, and gallentes. Beyond this, the State has monopolised the photo-curematographic industry and the publishing of manuals for schools of all types; and as the Soviet Government possesses almost all the printing houses, it practically controls the printing and publishing trades. The education of the workers in the towns is facilitated by lectures and school teaching, but among the peasants in the rural districts even the inadequate provision formerly made has in many places been discontinued. Generally speaking, only children of workers and officials are allowed to attend the primary schools in towns, and only those who belong to the Communist youth or are members of the Communist party may enter secondary school and universities; expetions to this rule are reduced to the minimum. The average salary of a village schoolmaster does not exceed £a month, which very often is not paid regularly. Very often professors of universities and higher schools get a remuneration of £4 to £7 a month. Only schools established by the Communist party for special party purposes are well supplied in every regard. In 1995 there were stated to be 8,000,000 pupils in the 95,000 elementary and secondary schools, and about 1,000 pupils in the reference in the large centres.

Religion.—The Orthodox Church was disestablished by the Bolsheviks and all its property confiscated. All ecclesiastic schools, seminaries and academies have been abolished, and the teaching of religion to persons under 28 years of age forbidden. But the law does not forbid the exercise of religion, and churches remain open in virtue of contracts concluded between the congregations and the local authorities. A recent questionnaire addressed to the soldiers of the Red Army shows that 70 per cent. of them believe in a Deity. The clergy live on voluntary donations from their parishioners. On Feb. 14, 1918, the Soviet Government adopted the Gregorian (Western) Calendar.

Soviet Union Budget, 1931.

Debt.—The outstanding Foreign Debt of Russia on Jun. 1, 1917 (before the Revolution), may be stated as under:—

Since the revolution various internal loans have been raised, and these were stated to amount on Oct. x, x929, to a,623,200,000 gold roubles.

Defence.—The Real Army, recruited by universal military service, consisted in 1998 of about 800,000 all ranks, including 37 cavalry brigades of about 3,000 men, and about 30,000 sailors serving on land. It was reported that the Real Air Fleet was to comprise an organisation of 10,000 aeroplanes for the year 1994; in 1996 it was stated to consist of less than 100 aeroplanes. The Real Navy is believed to consist of a Dreadnought battleships launched in 1921, old crusers, 13 destroyers, and 8 submarines.

The Five Year Plan.

The Soviet Five Year Plan (1928-1933).—The avowed object of the Five Year Plan is to increase the industrial and agricultural production of the U.S.S.R. so that it may overtake and outstrip all other nations. For this purpose the territory is being equipped with factories, railroads, steamships, telegraphs, motor vehicles and tractors. The land is to be made to produce food, houses are to be built, and opportunities for recreation provided, so that the population may have these amenities in greater abundance than the peoples of capitalist nations. The Plan has the political aim of making the U.S.S.R. a far more powerful industrial, economical and political State, and the political aim is being pursued at the expense of the people, the products of the soil being employed primarily in payment of imports required for industrial development, even if starvation is thus imposed on the people. The principal industries undergoing development are asbestos (at Azbest), steal (at Magnetogorsk), manganese (at Chisiuri), tractors (at Cheliabinsk, Stalingrad and Kharkoff), wheat (at Baku), and tea and oranges (at Chakwa). The factories are to be provided with electric energy from Dilepostroy, where a dam is under construction, the work being under the superintendence of U.S. engineers. The political

development of the Plan appears to be abreast, in most particulars, and in some directions ahead, of the time schedule; and in April, 2937, M. Kulbyahev, Chairman of the State Plauning Commission, stated that the Five Year Plan would be completed in 1932 (one year ahead of the schedule), and the Government had therefore decided to begin work on a new Five Year Plan for 1933-1938.

Agriculture-The Soviet Board of Statistics publish the following particulars of the har-

The principal railway lines are the main European network from Lenungrad, through Moscow to Astrakhan and across the Urals via Perm, Ufa, Samara and Saratov, with northern extensions to the Kola Peninsula and to Archangel and running southwards to the Baltic, the Crimea and the Caucasus ; the Trans Siberian Line from Chelyabinsk, on the Ural frontier, to Omsk, and round Lake Baikal to Chita and Stryetensk, Chita the line crosses the Manchurian frontier (as the Eastern China Railway) to Harbin and Visitives to khabarovsk. The Amur Railway connects Stryctensk with Khabarovsk, and the Trans-Specian line thus connects the the Trans-Siberian line thus connects the western and eastern limits of Russia on Russian territory. The Trans-Carpana Railway runs from Kiasnovodsk (opposite Baku) to Askabad, Mery, Bokhara, Samarkand, Khokand and Andijan, with a soo-mile branch from Mery to Kushk (near Herat) ou the Afgl anistan boider. The Orenburg-Tashkent Line, from the European boundary, across the Kirghiz Steppe to Kazalmisk, Perovsk and Tashkent, whence a short line connects with the Trans-Caypian system. The Trans-Caucasian Line, runs through Georgia, Azelbaitan and Line runs through Georgia, Azerbaijan and Armenia, from Batum and Poti, on the Black Sea, vid Thiis, to Baku, on the Caspian, where it is met by the European system of Rostov on the Don. From Tiffis branches run to Kars, and wat Erwan to Monut Aranat on the Armenian frontier, and to the Persian frontier at Julia There are in the Soviet Union (1927) 28,600 miles of inland waterways, of which 54,500 are navigable by steam vessels, and neatly 110,000 miles by rafts. The principal seaports are Leningrad and Kronstadt on the Gulf of Finland, Sevastopol and Novorossiysk (Black Sea), Archangel on the White Sea, and Ekaterminsk in the Kola River (Murmansk), Vladivostok (Sea of Japan), and Petropaulovsk in Kamtchatka.

Capital.—On March 14, 1918, the seat of Government was transferred from Petrograd to Moscow, which had a population in 1930 of about MOSCOW, which had a population in 1930 of about 25,000,000 LENINGRAD (before the war "St. Petersburg," and until the death of Lenn, "Petrounal"), the former Capital, founded by Peter the Groat on the banks of the Neva in 1703, Peter the Groat on the banks of the Neva in 1703, had a population in 1930 of about 1,500,000. Other centres are Saratov (220,000), Rostov (300,000), Voroneza (120,000), Nijni - Novgorod (190,000), Voroneza (100,000), Kazan (180,000), Krasnova, formerly Ekaterinodar (150,000), Astrakhan (180,000), Orenburg (120,000), Irkutsk (104,000), Tomsk (50,000), Oursk (170,000), Vladivostok (100,000). Archangel had about 40,000 inholitation in 200

II .- THE UKRAINE. (Ukraina.)

President. V. J. Tchubar.

On Nov. 21, 2017, the greater part of "Little Russia," consisting of the former governments of Chernigov, Kharkov, Kieff, and Poltava (with Eksterinoslav and Kherson in "South Russia," and Podolia and Volkynia in "West Russia," was encouraged by Germany to declare itself independent as the Republic of the Ukraine. The new Republic was invaded by Germany in 2017-28, and subsequently overrun by Bolshevik forces, and a military and economic alliance was concluded between Soviet Russia annance was concuted between Solvie Response to the Ulratine Sociatist Soviet Republic (Dec. 28, 1920). The majority of the inhabitants belong to the Greek Orthodox Church. The chief town and seat of government is Kharkoff (pop. 1083, 312,000), other large centres being Odessa, the great port on the Black Sea (with a populathe great port on the Black Sea (with a population in 1932 of 25,000), Kieff (1901. 1933, 405,000). Ekaterinoslav (pop. 1933, 127,000), Nikolayev (81,000), Poltava (85,000), and Isgamrog (100,000). The Ukraine is the great cereal-growing district of Russia, and before the Great War the harvests exceeded 1,000,000,000 poods; during the Civil War the production was reduced to 48 million poods but in 1,200 th lad increased ags million poods, but in 1923 it had increased to 700 millions. In 1923 there were 122 sugar-beet factories (200 in 1925) producing 10,000,000 poods (500 millions in 1914-15). The Ukraine also contains large deposits of iron or beautiful and in the remarkation of the contains a sugar-section of the contains a sugar-Dariaine also contains large deposits of iron of the and coal, and is the principal source of the European supply of quicksilver. Agriculture is the principal industry, and there are large iron and steel works. Before the Great War the exports from the Ukraine (grain, sugar, hides, bristles, quicksilver, and wool) were of the annual value of about £75,000,000, and the imports (manufactured goods and machinery) about £50,000,000

CAPITAL, Kharkoff. Population (1936), 417,342. Other towns: Dmepropetrosk, 233,000; Kieff, 514,000; Nikolaieff, 105,000; Odessa, 481,000; Poltava, 92,000.

III.-TRANSCAUCASIA. (Zakavkarskava F.S.S.R.)

President of the Council of People's Commissars, M. D. Orakhelashvili.

The Transcaucasian Federation consists of three Socialist Soviet Republics :

Republic.	Sq miles	Population.
Armenia		z,339,969
	25,470	a,135,033
Azerbaijan	33,570	2,463,098
	74,105	5,938,x00

Armenia, or Hyastan. (B.S.S.R.A.)

President of the Council, M. S. Hambartsumian. Armenia occupies the uplands between the Armenia occupies one upianus between the Iranian plateau and Asia Minor, and is bounded by the Black Sea on the N., by Kurdistan on the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great Warit was

the meeting of the former Turkish, Persian, and Russian boundaries is Mount Ararat (27,260 feet), the traditional resting place of "Noah's Ark." In the uplands the climate is severe, Ark." In the uplands the climate is severe, but in the valleys and plains the soil is fertile, producing all kinds of cereals, cotton, rice, sesame, hemp, flax, and tobacco. Sericulture (silkworm breeding), sheep-breeding, and fruit growing are capable of great development. Armenie has great mineral resources hardly as yet developed. Naphtha, sulphur, bitumen, and nitre abound, while the mountains yield salt (mineral and in solution), gold, silver, copper, lead, fron and valuable marbles; there are also numerous hot and cold mineral springs (smilar numerous hot and cold mineral springs (similar numerous not and cold mineral springs (similar in nature to those of Vichy); more than half the supply of copper from Russis was derived in 1914 and the value of carpets manufactured in 1914 exceeded 10,000,000 gold roubles. The Armenian Church is the oldest established Christian church, Christianity having been recognised as the State religion in 300, and from the 5th century there is a national language and literature. C. account of their religion the Armenians have suffered a general persecution by Islam, particularly in the vilaget of Sivas, Bitlis, Diarbekir, Manuret el-Aziz, Van, and Erzerum, where massacres have frequently occurred. In 1913-17 there were wholesale deportations and massacres of the Christian population of Turkish Armenia, while the Armenian Christians of Azerbaijan and of Russian Armenia were similarly treated by Turkish and Kurdish hordes. In 1918 the Supreme Council of the Allied Powers recognised the independence of the Republic of Armenia. Under the Treaty of Peace with the Allies (May 17, 1920), Turkey recognised the independence of Armenia, with its capital at Erivan. In 1920 a Bolshevik movement set up the Armeman ocialist Soviet Republic, on the lines of the Moscow government.

CAPITAL, Erivan; population, 65,000. Leninkan (formerly Alexandropol) 43,000.

Georgia, or Sakartvélo. (G.S.S.R.)

President of the Council, M. Ivanoff Kavkazsky. The Socialist Soviet Republic of Georgia includes two autonomous Republics (Abkhasia and Adjaria), and one autonomous Province (Southern Ossetia).

Georgia, a former Kingdom in Transcaucasia with a history of more than a,000 years as a State, was annexed by Russia in x80x in violation of the Treaty of Alliance of 1783. At the beginning of 1718 it regained its independence, but m 1721 the country was occupied by Bolshevik forces and became a member of the Transcaucasian Federation, Soviet Georgia is bounded on the N. by the Caucasian Mountains, on the S. by Armenia, on the E. by the Republic of Azerbaijan, and on the W. by the Black Sea. There are 970 miles of railway, the truth line connecting the Black Sea ports of Poti and Batoum with Baku, on the Caspian. Batoum and Baku are also connected by a petroleum pipe-line. The manganese ore beds are the richest in the world. the S., by Azerbaijan on the E., and by Turkey on the W. Until the outbreak of the Great War it was ahared between Turkey (25,600 sq. miles). Russia (25,25 sq. miles), and Persia (6,528 sq. miles). The creat Kuphrates, Tigris, Aras, Kur, and Tchorokh and over 500 mineral springs partly unexploited. take their rise within its boundaries, and at the tobacco plant (chiefly in Abkhasia) yielded Sco.cco poods in 1914, a great deal of which was imported by Egypt and produced as local grown. Timber (especially box) is an important industry. Oil wells with unproved quantities of crude oil have been discovered in many places, particularly in the Shirak Steppe. The chief town nave been discovered in many praces, paractal larly in the Shirak Steppe. The chief town and seat of government is Tiffis, population 300,000; the administrative centre of Abkhasia being Sukhum (62,000), and of Ajaria, Batum (22,000) other large centres being Kutais (50,000) and Poti (22,000).

CAPITAL, Tiflis. Population (1925), 400,000.

Azerbaijan. (A.S.S.R.)

President, M. Musoabekoff.

Azerbaijan, on the south-western shore of the Caspian Sea, extends from the Caucasus in the north to Persia in the south, and from the Caspian on the east to Armenia and Georgia. It includes the provinces of Baku, Hanjin (Elisavetpol), the district of Zakathal and the autonomous territories of Nakhitchevan and Nagorni-Karabach. More than 75 per cent. of the people are Muhammadaus. The Azerbayan Socialus Somet Republic entered the Union as a Member of the Transcaucasian Federation on Dec. 21, 1932. The Republic is very rich in Dec. 31, 1922. The Republic is very rich in minerals (naphtha, magnetic ironstone, and mangauese), but oil is the principal industry, concentrated in the Baku region, the production being 466,800,000 poods in 1924, and 23,000,000 poods in 1924, and 23,000,000 poods of cavine were produced in The principal crop is cotton.

15,000,000 pools of control of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Captal of the Batum (Georgia) on the Black Sea, via Tiffis, and with Moscow, via Rostov. Other towns are Hanjin (60,000), Kuba (14,000) and Nucha (23,000).

IV.-WHITE RUSSIA. (Byelorussiya.)

President (and Chairman of the Central Executive Committee), A. G. Tchervyakoff.

The independence of White Russia was recognised by Somet Russia in 1919, and a military and economic alliance was concluded Jan 16, rgar. The independent republic covers the former government of Minsk and parts of Vitebsk and Moghiler. The political negliphours are Lithuania and Polandon the west, and the Ukraine on the south. The capital is Minsk (pop. 121,520), where there is a University founded by the Sout Government; other towns are Gomel (87,000), Bobrusk (52,000) and Moghileff (50,000).

CAPITAL, Minsk. Population, 131,530.

V.—TURKMENISTAN. (T.S.S.R.)

President, M. Atabaieff.

Turkmenistan is bounded on the west by the Caspian Sea and on the south by Persia, with Afghanistan as a south-eastern neighbour. Eighty-five per cent. of the inhabitants are Muhammadan Turkomans, with about ten per cent. Muhammadan Uzbegs and five per cent Russians of the Orthodox faith. The seat of administration is temporarily at Poltarask (formerly Achabad), other centres being Merv

(22,000) and Karichi (20,000). Krasnovodsk is a port on the Caspian and a railway terminus on the Trans-Caspian line.

CAPITAL, Poltarask (42,000).

VI.-UZBEKISTAN. (U.F.8 R.)

\	,	
Bokhara	50,000 13,640	Population.
ALID VIII	13,040	400,000
	E- C	

President, Achun Babaieff.

Bokhara lies between Turkmenistan (on the W.), the Kara Kalpak territory of the R.S.F.S.R. (on the N.), and is bounded on the south by Afghanistan. The majority of the inhabitants are Muhammadan Uzbegs. The former capital are summinusual Uzoegs. The former captus (Old Rokinara) is a station on the Russian Trans-Caspian Railway. The principal products are rice, wheat, fruit, hemp, cotton, silk, and carpets. hyports (mainly to Russia) are agricultural products and silk and cotton manufactures; imports are principally manufactured goods and sugar. The Emirate was abolished in 1920 and the Emir fied to Afghanistan. A Soviet Republic of Bokhara was established and its independence was recognised by Soviet Russia by treaty of March 4,

Khiva, or Khorezm, formerly the Khanate of Khiva, lies between Bokhara and the Kara Kalpak territory of the R.S F.S R., and has a population of whom about half are nomads, and nearly all Muhammadans. The country occupies the fertile delta of the Oxus and is highly pro-

the ferrite delta of the Oxids and is highly pro-ductive (rice, wheat, cotton, silk, fruit, hemp). CAPITAL OF UZEKKISTAN, Taskent (population 700,000). Other towns: Samarkand (206,000); Andijan (80,000), Bokhara (50,000), Kokand (70.000), Namagan (71,000). Khiva has about (70.000), Namagan 20,000 inhabitants.

VII.-TAJIKISTAN.

Tadzhik.—The autonomous Soviet State of the Tadzhik lies between Bokhara (on the W.) and the Kara Kirghız territory of the R.S.F.S.R., with Afghanistan as a southern neighbour. The inhabitants are largely nomads, and almost all are Muhammadans. The estimated area is 56, ro8 square miles, with a population of about 2,000,000

CAPITAL, Stalinabad; population, 6,000. Other centres, Kojent 38,000, and Dura-Tube 22,000.

SALVADOR.

(República de El Salvador.)

President (1931-1935), Señor Arturo Araujo, assumed office March 1, 1931.

l'ice-President, General M. Hernandez Martinez-Foreign Affairs, Education, Justice, Charity and Health, Senor Dr. Don Reves Arrieta Rossi.

Interior Development, Agriculture and Labour, Señor Dr. Don Joaquin Novoa.

Finance, Industry and Commerce, Señor Dr. Don Francisco Espinosa.

Consul-General, Señor L. A. Gallardo, 7 Union Court, Old Broad Street, E.C. s.

The Republic of Salvador extends along the Pacific coast of Central America for 170 miles, with a general breadth of 43 miles, and contains an estimated area of 12,176 square miles, with a population estimated in 1931 at 1,437,157. It is divided into 14 departments. In 1939 there

It is divided into 14 departments. In 1939 there were 61,091 births and 24,689 deaths. Salvador was conquered in 1926 by Pedro de Alvarado, and formed part of the Spanish viceroyalty of Guatemala until 1831. In 1840 the Republic broke away from the federation of Central American States. The government is Central American States. The government is based upon a written constitution and is composed of (a) the Executive power, which is exercised by the President, (b) the Legislative power, which is in the hands of the National Assembly, and (c) the Judicial power, which rests ultimately with the Supreme Court. Elections take place once every four years, and the President is includible for a successive term.

The surface of the soundry is very mountain.

The surface of the country is very mountainous, many of the peaks being volcanoes. The highest peak is the Santa Ana volcano (8,300 feet). Much of the interior has an average altitude of s.ooo feet The lowlands along the coast are generally hot and unhealthy, but towards the interior the altitude tempers the severity of the heat and much has been done in recent years to improve sanitary conditions and services. There is a wet season (winter) from May to October, and a dry season (summer) from November to April. Earthquakes have been frequent in the instory of Salvador, the most recent being that of xoxo, when great damage was done to the capital and other towns.

The principal river is the Rio Lempa There is a large volcanic lake (Hopango) a few miles to the east of the capital, while further away and to the west lies the smaller but very picturesque lake of Coatepeque, which appears to have been formed in a vast crater flanked by the present Santa Ana volcano. The eastern spur of this volcano forms the peak of Izalco, which is in an almost constant state of volcanic activity, and (on account of its visibility from the ocean) is known as "The Lighthouse of the Pacific."

The chief industry is the cultivation of coffee, which is grown under shade-trees principally on the slopes of the volcanoes; cane sugar is also produced, as well as maize, indigo, rice, balsam, etc. Cotton-growing on a large scale was commenced in space, but on account of the ravages wrought by insects it was practically abandoned after two seasons. In the lower altitudes towards the east honequen is produced. The

henequen, hides and skins. The chief imports are cotton textiles, flour, iron and steel goods, lard, motor cars, manures, jute sacks, chemical ard, motor cars, manures, jute sacks, chemical products, cement, petrol, thread. A British railway nearly roo miles in length connects Acajutla with the capital and with the important Acajutia with the capital and with the important coffee centre of Sauta Aun. A line from the port of La Union (on the Gulf of Fonseca) to the capital was opened in ress. Two new lines were opened in ress. Two new lines were opened in ress, one from the capital to Santa Lucia, a suburb of Santa Ana, tapping the upper Lempa Valley; the other from the coffee centre of Ahuachapan to Santa Lucia. A new line from Santa Lucia to Zacapa (in Guatemala) was opened to traffic in 1930 and affords continuous railway communication between San Salvador and Guatemala City and Barrios During 1924-26 the re-draining and re-paving of most of the capital were completed, and plans have been made for the pieted, and plans have been made for the macadamizing or paying of several hundred miles of rural roads, many of which are now impassable during the roiny season. There is a good motor road between the port of La Libertad and the capital, while motor transportation is usually possible in the dry season between the capital and Guatemala season between the capital and chatemans City, over the International road opened in 1923. The Pan-American Airways maintain regular sevices connecting San Salvador with the U.S. rud Guatemala-Mexico-Brownsville, and vid Havana-Miami, and connecting with Panama vid Honduras, Nicaragua, Costa Rea.

There are 202 post-offices and 257 telegraph offices. There is a wireless (receiving and transmitting) station at the capital, and during rese a broadcasting station was inaugurated.

The language of the country is Spanish,

STAM

Muang T'al.)

King, Prajadhipok, born Nov. 8, 1893; succeeded Nov. 26, x925 Foreign Minister, H.H. Prince Devawongs

Varodaya.

Envoy Extraordinary & Minister Plenipotentiary London, H.S II Prince Varnvaidya, 23 Ashburn Place, S. W 7.

The Kingdom of Suam, or Muang Tai (area about 195,000 square unles; population, 1929, 12, 206, 207), is a buffer State between British Burma and French Indo-China, and its integrity is guaranteed by the British and French Governments by the Anglo-French Agreement of April. appoints his successor. There is an Executive Council of Ministers with an adviser in Foreign affairs (usually of American nationality), and a Financial adviser (hitherto always of British nationality), and, since 189, a Legislative Council of State, consisting of the Ministers, eight royal princes, and over twenty members appointed by the King, who has an absolute power of veto. There is also a Supreme Council of Five which

advises the King in important matters. number of English, French, Italians, Danes, and Americans are employed in the various State departments. There is an army of nearly 50,000 departments. There is an army of nearly 50,000 men, and a few small gunboats; compulsory unitary service has been introduced. The Kingdom contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,800 Europeans. The principal religion is Buddhism. There are 364 Government schools and 4,724 schools of all kinds, attended by 448,360 children. The Chulalankaran University is organised with faculties of medicine, political

science, engineering, and literature and science.
The upper part of Siam is mountainous, the lower flat. Bangkok is the only much-frequented port. Eighty-five per cent. of Sunnese sea-borne port. Biguey-nee per cent. of claimese sea-connectrade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. Norwegian shipping holds the lead in tonnage, followed closely by British. the chief products of Siam are rice, teak, and tin (from Lower Siam). The area underrice is being much enlarged by migation and by milway extensions, bringing the provinces into closer touch with the capital. There is a large number of rice nulls, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in Eiglish hands. In 1928 29 11ce constituted 69, tin 7 and teak 44 per cent of the exports from the port of Bangkok, while hides and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, nietals and metal wares, machinery, &c. The general tariff rate is 5 per cent. ad rationem. Burma imports teak and cattle overland from Sam, and exports thither cotton and silk goods, &c. Except tin, wolfram, rubies and sapplines, there are no important mineral products as yet. About x,880 miles of railroads (mostly State-owned) are now open for traffic Railways from Bangkok run to Waniedt (357 miles N.E.), with an extension (12 miles) to Tha Chang, Chrongmat (452 miles N. of Bangkok), Aranya Pradus (159 miles E.); the southern line to Frang, on the west coast of the Malay Pennsula, was open to traffic in October, 7216, and in July, 7218, was completed to the Kedah border, where function with the Federated Malay States Railway system was effected The E. coast time to Sungei Golok (Kelantan) has also been opened to tastie. There is through railway connexion between Bangkok and Penang and Singapore. Good roads are few. There are 4,000 miles of telegraph lines.

Gaspar, 20, Gordon Square, W.C. 2.
Consul, Señor Don Eduardo Danis.
A Remulticativati

A Republic situate in the south-west of Europe, between 36°-43° 45' N. lat. and 4° 25' E -9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,327 miles—722 formed by the Mediterranean and 605 by the Atlantic—and it comprises a total oog by the Atlantic—and it comprises a total area of 196,700 Euglish square miles, and an estimated population, in Jan. 1924, of 21,763,000—120 to the square mile. The interior of the peninsula consists of an elevated tableland surrounded and traversed by mountain ranges—the Pyreness the Centaintain Acceptances. —the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morens, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadal-

quiver, the Ebro, and the Minho. Spain is rich quiver, one horo, and the minno. Spain is from in fron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. In 1930 the coal production was 7,547,094 tons, of which 6,546,864 were pit coal, 380,804 lignite, and 600,066 anthracte. The country nighte, and sell adapted to agri-culture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almouds, pomegranates, and dates. The agricultural pro-ducts comprise wheat, barley, mulze, oats, rice, with hemp and flax of the best quality. The with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, tamber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, raisins, oranges, cork, esparto grass wool, salt, quick-silver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany had, before the War, become a serious Germany had, before the War, become a serious competitor, while the United States and Belgium shale an increasing proportion of Spanish trade. Home manufacture is protected by high customs duties.

In 1929 there were 10,197 miles of railway open and 70,000 miles of telegraph line. The open and 70,000 miles of telegraph line. The sea-going mercantile marine over 50 tons, on Jan. 1, 1931, consisted of 1,276 steamers (1,189,645 tons) and 394 sailing vessels (50,277 tons). In 1939, 22,094 vessels of 33,627,024 tons entered and 19,534 vessels of 32,752,245 tons cleared at Spanish ports.

Defence.—In 1931 the Army was reduced from 16 Divisions to 8 Infantry Divisions and x (avalry Division, having an authorized Peace establishment of 4,942 officers and 98,124 men for the Spanish Peninsular Army and of 2,876

or the Spanian Pennisular Army and of 1,870 officers and 4,849 nen for the Army in Morocco.

The Navy consists of 3 (15,700-ton) battleships and 3 modern cruisers, with x old battleship and 4 old cruisers; there are also 7 torpedo-boat dostroyers, 20 torpedo-boats, 7 submarines, and az gunboats.

Education, Primary, is nominally compulsory and mainly free, and is State-aided, the public schools being maintained by local taxation. Many private schools are under clerical control and supervision is lacking. Secondary High Schools are in each province, but the curriculum is defective. Unwestites at Barcelona, Gianada, Madrid, Murcis, Oviedo, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolud.

BRITISH CHAMBEL OF COMMERCE FOR SPAIN. Rambla de los Estudios, Barcelona (Branch, Calle Marqués de Cubas, Madrid).

Madrid, 1,150 miles; transit, 45 to 50 hours.

The Balcaric Isles, Centa, Melilla and the Canary Islands, are integral parts of Spanish territoru.

The BALRARIC ISLES are an archipelago of 15 islands in the Mediterranean, the largest being Majorca, Minorca, Iviza, and Formentara; the total area is 1,935 square miles, with a popu-lation (1923) of 342,462. The archipelago forms a province of Spain, the capital being Palma in Majorea.

CRUTA, which forms part of the Province of Cadiz, is a fortified post on the Moroccan coast, opposite Gibialtar. The total area is 5 miles, with a population of 35,219.

MELILIA is a town on a rocky promontory of the Riff coast, connected with the mainland by a narrow isthmus. Melilla has been in Spanish possession since 1492 and is an integral part of Spanish territory. The population is

The CANARY ISLANDS are an archipelago in the Atlantic, off the African coast, consisting of 7 islands and 6 uninhabited islets. The total area is alor square miles, with a population of 473,497 The Canary Islands form a Province of Spain, the capital being Santa Cruz in the island of Teneriffe.

Spanish Colonies.

The Spanish Colonics consist of certain settlements in, and islands round the coast of, Africa, with a total area of close on 82,400 square miles, and a population exceeding 275,000.

FERNANDO PO (Fernando Póo) lies in the Bight of Binfra in 3° 12' N. lat. and 8° 48' E long, about 20 miles distant from the west coast of Africa, and is a mountainous island (Pico de Santa Isabel, xo.800 feet), with forests of oil pain, ebony, mahogany, and oak, and sugar-cane, cotton, and indigo. Cocoa, coffee, sugar, tobacco, vanilla, and kola nut are cultivated, and large quantities of cocoa and other products are exported. With its dependencies it has an area of about 800 square miles, and a population estimated at spece. The capital is Basile, and the largest town Port Clarence (1,500 inhabitants). Dependencies are:

Annobon Island (Anno Bom), in the Gulf of Guinea, in 2° 24' S. lat. and 5° 35' E. long.; population x,30x.

Corisco Islands, consisting of Corisco, Elobey Grando, and Elobey Chico, lie in Corisco Bay, and export chony, logwood, and other forest produce. Total population 96,072.

RIO DE ORO AND ADRAR (Capital, Villa Cisneros) is a possession on the north-west coast of Africa, between Cape Bogador and Cape Blanco, or approximately between ar 20'-26' N. Hanco, or approximately between x^o $xo^c - xo^c$ N. lat., and extending eastwards to about x_3^o W long. The territory is part of the waterless Salara, with a sparse population of wandering Muhammadan Arabs; population x_3^o .

Rio Muni (or Spanish Gunea) is a coastal settlement of West Africa between cameroon and French Congo $(x^o$ N. $-x^o$ x^o N. lat.), extending about x_3^o miles inland. The inhabitants are larger without and the previously stronger and the provided settlement.

Bantu tribes, and the principal settlements are at the mouths of the Muni, Benito, and Campa rivers, and at Bata on the coast.

SPANISH MODOCCO — Spain exercises a protectorate over a part of Northern Morocco (see "Morocco"), and on the Moroccan seaboard are certain Spanish presidios, formerly used as convict settlements.

Alhucemas is a settlement on the bay of that name, and includes six islands; population 322.

Pefion de la Gomera (or Pefion de Velez) is a fortified rocky islet about 40 miles west of Allincemas Bay ; population 398

Spanish Southern Morocco .- Ifni, on the Atlantic coast of Morocco, about xoo miles south of Agadit, affords access to the interior of southwest Morocco, but has no great trade at present.

The Chaffarinas (or Zaffarines) are a group of three islands near the Algerian frontier, about s miles north of Cape del Agua; population 318

THE SHEZ CAWAL

The Sucz Canal - The Compagnic Universelle du Canal Maritime de Suez (x Rue d'Astorg Paris VIII) is an Egyptian company, authorised in 1856, and confirmed in 1866, with a capital of 300,000,000 frames in 400,000 shares of 500 frames each. The British Government acquired from the Khedive in 1975 a total of 176,500 shares (cost £4,000,000, value March 31, 1931, £42,533,929) Since 1924 cach 50 frame share has been divided intertaints. into two 250 franc shares.

The Nuez Canal was opened in 1869. The total length of the canal is nor miles, with a minimum width of 45 metres (147 ft 8 m.), the maximum draught of water allowed for vessels using the canal is zo of metres (33 feet). average time for the transit through the canal is 14 hours 34 minutes By a convention, signed on Oct. 29, 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, me to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 10 are British (three representing H.M. Government and seven the shipowning interest).

British Commercial Directors, The Earl of The Commercial Directors, Inc. Earl of Inchcape, P.C., G.S.I., G.O.M.G., K.C.I E. (Vice-President of the Company); Sir Alun G. Anderson, K.B.E.; Sir John Cadman, G.C.M.G.; Rt. Hon. Sir E. S. Horne, G.B.E., K.C., M.P.; T. Harrison Hughes; Sir E. Wyldbore-Smith; Sir Thomas Royden, Rt. c. H. Representing H.B.M. Govt., Sir Ian Malcolm, K.O.M.G.; Sir J. T. Davies, K.O.B., C.V.O.; The Earl of Cromer, G.C.I.E., G.C.V.O.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal since reso, with the percentage of British vessels :-

Year	No of Vessels	Net Tons.	British Tonnage

Swedish Church, Harcourt Street, Marylebone

Rord, W 1 Sweden comprises the eastern half of the Scandinavian pennisula, and comprises the capital and 24 governments, "Lan," with an capital and 24 governments, "Lan," with an area of 173,147 square nules, and a population, Dec. 31, 1930, of 6,141,571, nearly all Protestant This area includes the great lakes of Vanern, Vattern, Malaren, and Hjalmaren. Nearly 40 per cent of the population are devoted to agriculture, about 205,000 being owners and 80,000 tenants of the land they cultivate. The country may be divided into three separate districts, the northern, forest; central, mining and agricultural; the southern, agricultural. The climate in the south is favourable for producing grain. The principal articles of cultivation are outs, wheat, rye, barley, potatoes, roots and grasses rye, harley, potatoes, roots and grasses The forests are very extensive, covering over one-half of the surface of the country, and consisting chiefly of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and the chief fuel of the country, in addition to sulphite and mechanical wood pulp for the paper-making industry. The mineral products are extensely rich: iron of excellent quality; lead, zinc, sulphur, manganese, arsenic,

granite, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Lulea on the Gulf of Bothnia and to Narvik on the Atlantic; coal is being worked in Scanna (Shāne). The chief imports are coffee, tobacco, and other ordinary colonial produce, corn, coal, machinery, motor cars, mineral oils, cloth, cotton, wool, manures, skins, non, copper, and yarn. The chief articles of export are timber, wood pulp, paper, machinery, iron ore, matches, butter, pork, and stone. In 1930 the exports of wood pulp and paper were

2,325,000 tons.
Railroads zo,447 miles in length (of which 4, zz7 are the property of the State) were open on Jan. x, 1931; and 46,902 miles of telegraph wires (inclusive of 19,951 railroad telegraph wires), 133 control stations, and 1,950 railroad and 1,600 other telegraph stations. There were at the befence—Service in the Army is universal

and compulsory, about 24,500 being trained annually; war strength about 20,000. The Nary consists of 63 fighting vessels (350 guns), 12 being ironclads, with submannes, and some training ships, &c

Education .- (1) Primary Compulsory and free Illiteracy rare. Maintained by local taxation, with State grants. Attendance tavation, with State grants. Attendance good (ii.) The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50′—47° 48′ N. lat. and 5° 58′—10° 30′ E. long. It is composed of sz Cantons, of very dissimilar size, united under a Constitution dated sp May, 1874, and comprises a total area of 15,950 square miles, with a population of 4,056,400 in 1930, who are divided between Roman Catholics, 41 per cent., and Protestants, 27 per cent., Jews numbering 21,000, and others 43,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French

ar per cent., Italian 6 per cent., and Romansch (Grisons), z/2 per cent. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to x5,xz3 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-fifth of the whole surface. The chief industries comprise the manufacture of silks, artificial silks and silk ribbons, wool, cotton and cotton ribbons, linen, embrodderies, strawplait, machines, paper, chemicals, chocolate, condensed mulk, dyestuffs, and tobacco; while the metallurgical, electrical and pharmaceutical industries are also extensive; clocks and watches have long been the staple products of Geneva and Neuchâtel. In 1930 there were 3,650 miles of railway in operation, 350 railes of telegraph line (17,000 miles of circuit), 20,500 miles of telephone line (920,000 miles of circuit), and 4,0xs post-offices.

The legislative power is vested in a Pai liament, consisting of two Chambers, a National Council of 187 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for four years, an election taking place in October. The executive power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of 35,000 francs; the Vice-President and other members of the Federal Council as,000 francs each The members of the Federal Council are elected for four years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for four years. Not more than one of the same canton may be elected member of the Federal

Council.

Defence. Militia. Active Army, 12 yrs.; initial trg., 65-90 days. Subsequently 11 days per ann.; then Landwehr, 8 yrs.; 1 trg., 11 days. for dismidbranches only; then [Landsturm to age 48]. War Strength, Militia, 140,600; Landsturm, 55,000; Landsturm, 57,000

Education.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i) Primary. Free and nominally compulsory, but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) Secondary: Age 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) Special schools make a feature of commercial and technical instruction. (iv.) Universities: Bale, Berne, Fribourg, Geneva, Lausanne, Zurich, and Neuchatel.

SYRIA AND LEBANON.

Suria,-British forces, together with small French and Arab detachments, drove the Turks out of Syria and Lebanon in 1918, and occupied those districts and the district of Cilicia By decision of the Supreme Council of the Allies the districts in question were entrusted to France, to be administered under a mandate (Cilicia was restored to Turkey by the French in xozz).

The Emir Felsal (son of the ex-King of the Hedjaz and, since xoax, King of Iraq) had from the outset assumed the administration of the districts of Aleppo, Hama and Homs, which had been assigned as Independent Arab districts under an assigned as interest of May, 1916, between Finnee and Great Britain (the Sykes-Picot Agreement), and it was intended to allow the Emir to remain under French guidance, but on March 8, 1920, the "Syrian Congress" at Damascus declared Syria independent, and the Emir Feisal was crowned King of Syria. The action of the Syrian Congress did not receive the sanction of the Allied Powers, and General Gouraud occupied Damascus, Aleppo, Hama and Homs. The Emir Feisal left the country, and afterwards became King of Iraq (q, v). The French Mandatory Zone was of Iraq (q,v). The French Mandatory Zone was first divided into the four autonomous states of Great Lebanon, Damascus, Aleppo and the Alaouites (the region round Latakia), each

having a French adviser responsible to the High Commissioner at Beyrout. The latter three States were later grouped together to form the Syrian Feleration with a nominated Council. The Federation has now been abolished. Damascus and Aleppo have been amalga-mated into a single State, and the State of the Alacutes (now known as the Government of Latakia) is again independent. The Jebel Druze forms a small independent State. The form of government differs in each of the actual States, but the guiding principle in each is French control.

Syria is a geographical term for part of the former l'unkish territones in Asia Minor, and its Northern limits have recently been marked out by a Commission. The Northern boundary between Syria and Asiatic Turkey was defined in between Syria and Asiatic Turkey was defined in the agreement between France and Turkey, and is roughly as follows:—From a point immediately S. of Payas (on the Gulf of Alexandretta) to Meidan Ekbes (the railway station and environs remaining in Syria), thence S R. to the railway station of Tchoban Bey, leaving the districts of Marsova to Syria and of Marsova and Willis to Turkey. These of Karuaba and Killis to Turkey; thence along the Baghdad Railway to Nussebin and along the old highway to Jizireh ibn-Omar on the Tigris (the districts of Nussebin and Jizirchibn-Omar remaining in Turkish territory, with the roadway between these two places). with the roadway between these two places. The E. bundary (not yet finally delimitated) separates Syria from Mesopotamia along a line running roughly N.E. from the E. side of Jehel Druze to a point 15 miles S.E. of Jezireh Ibn Omar (80 miles E of Mardin); the S. boundary (which has been only partially delimitated) follows a line from Ras cl Nakoura on the coast, N. of Akka, and running S.E. by E to the Hedjaz railway line S. of Nasib, with a projection northwards to include the head waters of the Jordan, the Hule Lake and the Lake of Tiberias being included in Palestine. Within these limits the estimated raisestine. Within these inities the estimated area is about 60,000 sq. miles, with a population of about 3,000,000, of whom the greater number are Orthodox Muhammadans, with a proportion of Shittes and Druses. The products of Syria are wheat, tobacco, fruit, wine, silk, liquorice, copper and brass goods; there is little cultivation without irrigation, the inland districts being cut off from the moisture-laden winds by a mountain barrier running parallel with the coast The mineral wealth is believed to be unimportant, but there is a certain amount to be unimportant, but there is a certain amount of bitumen The principal Syrian towns are Dama-cus (est pep 300,000), Aleppo (250,000), Homs (70,000), and Hama (60,000) Dama-cus contains the Mosque of the Ominayedes and the tomb of Saladin, and in the southwestern quarter is "The Gate of God," through which the pilgrinage to Mecca used to pass, while the "street called Citation of August 1988, while the "street called Citation" (Auts in v.) runs E to W used to pass, while the "street called Straight" (Acts ix, 1x) runs E. to W. through the city. Damascus is an important through the city. Damascus is an interest are commercial centre, and among its industries are metal work and mother-of-pearl inlay, and cotton stuffs. At also native-made silk and cotton stuffs. handle (Heliopolis), on the western slopes of the Anti-Lehanon range (35 miles N.N.W. of Damascus), are ruins of 1st to 3rd century Roman temples (the Circular Temple, the Great Temple and the Temple of Bacchus), and in the vicinity of the ruins is the largest cut stone in the world $(60 \times 27 \times 24 \text{ feet})$, weighing

z,500 tons. The railway system consists of a line from Beyrout to Damascus (narrow gauge), with a connexion at Rayak for Homs, Hama and Aleppo (standard gauge). The line from Tripoli to Aleppo, vid Homs, was reopened in 1921. A narrow-gauge transway runs from Besrut to Mameltein gauge trainway runs from Bentut to Mannetest and along the coast. From Damascus there is railway communication with Palestine and with Transfordan, and the Syria railways link up with the Baghidad railway at Aleppo. Road communications between Beyrout and Baghdad, vid Damascus, have been developed by the opening up of the desert motor routes. Baghdad is now within a4 hours of Damascus by car, and a weekly air service has been opened for mails and passengers.

In the autumn of 2505, following a revolt of the Jebel Druze in the Hauran, noting took place in Damascus on Oct. 18, and the city was bombarded by French artiliery, when part of the Azm palace and parts of the "street called Straight" were destroyed by shell-fire or burned. Straight were destroyed by shell-nice in influences of the disturbances in Syria, the High Commissioner (Gen. Sarrail) was recalled by the French cabinet. A long period of disorder followed, but in Sept., a one period of the state of the state of the state of Syria.

The state of Syria.

Beirut is the residence of the French High Commissioner and the capital of the Lebanese Republic. Damascus was the Federal capitul, and has become that of the new State of Syria. Latakia is the capital of the Government of that name, formerly known as the State of the

Algouites.

The Lebanese Republic (the former Turkish provinces of Lebanon and Beirut), declared a State by the High Commissioner, under the title of Etat du Grand Liban, in 1920, extends along the Mediterranean littoral from the Palestine frontier to Nair el Kebir (25 miles N. of Tripel) and is bounded on E. by the Great Central Depress on, known as the Bekaa, in which flow the rivers Orontes and Litani. Its total length is about tao miles, and its width varies from 30 to 35 m i es The estimated area of the Lebanese Republic is about 4,300 square miles, with an estimated population of 379,778. The products of the soil are clives, wheat, grapes, o auges and mulberry Great efforts are being made to develop the district as a summer resort The capital is the district as a summer result. The capital is Beirut (pop. x50,000), which is the chief seaport and commercial centre, and the seat of the French mandate. Tripol is the next important town and seaport. Minor ports are Junieh, Tyre and Sidou. The national flag is the French tricolour with a Cedar of Lebanon on the white

Vice-Consul, Saffet Bey. Chancellor, Abdullahat Bey.

The Turks belong to the Turanian Race, which comprises the Manchus and Mongols of North China, the Finns, and the Turks of Central Asia. Their numbers probably exceed 50,000,000, with the same language, religion and culture, but the actual Turkish State occupies only a small part of the arca inhabited by the Turkish Race, the remainder being in Soviet Russia, Chma, Afghanistan and Persia Under the Seljuks (Turkish rulers in Anatolia) the conquest of Asia Minor was completed in the arth century. The Seljuks were succeeded, early in the 14th century, by the Osmanli dynasty, which remainded in power until the Great War.

During the 15th, 16th and 17th centuries the Ottoman Empire was one of the strongest Powers in the world, extending from the Caspian Sea to the Adriatic and Hungary, and from the Indian Ocean to Morocco and the Sudan. It comprised Asia Minor, half of present-day Russia, the Ukaine, the Crimea, the Balkan States and the whole of Arabia The Black Sea, the Mediterranean, the Red Sca and the Aegean were dominated by Turkish ships, and the Ottoman dominions included not only the Byzantine Empire, but the greater part of the whole Roman Empire.

For two centuries preceding the Great War disintegration had reduced the power and extent of the Turkish Empire, and during the Great War its boundaries were further restricted, Iraq, Syria and Arabia passing into other hands under the Treaty of Sevres. Attempts to wrest further territory were defeated by Gazi Mustafa Kemal, who won a decisive battle at Afion, the results of which were confirmed at the Lausanne Conference.

Turkey now extends over an area of 410,000 sq. miles, from Adrianople to the Caucasus and Persia, and from the Black Sea to the Mediter-

ranean, Syria and Irad.

Government.—Sultan Muhammad VI., the last of the Osmanli rulers, fled from Constantinople to Matta on Nov. 20, 1923, and the Sultanate was allolished by the National Assembly. On Oct. 29, 1923, the National Assembly declared Turkey a Republic and elected Gazi Mustafa Kemal President On March 3, 1924, the Assembly passed a law abolishing the oritice of Caliph and ordering all members of the Ottoman dynasty to leave Turkish territory. Grand Assembly is a single-chamber legislature elected for four years, and delegates its executive power to ministers acting in its name and responsible to it for their actions.

Turkey in Europe (23,975 sq kilometres=9,256 sq miles) consists of Eastern Thrace, including the cities of Istanbul (Constantuople) and Adrianople, and is separated from Asia by the Bosphorus at Constantinople and by the Dardanelles (Hellespont)-about 40 miles in length, with a width varying from t to 4 nules—the political neighbours being Greece and Bulgaria

on the west

Turkey in Asia (738,761 sq. kilometres = 285,246 sq. miles) comprises the whole of Asia Minor. and extends from the Agean Sea to the western boundaries of Georgia, Erivan and Persia, and from the Black Sea to the Mediterranean, and the northern boundaries of Syria and Iraq. This are corresponds approximately with Anatona ("Land of the Rising Sun," or Orient) and includes Cilicia ioning the Miles, but restored to Turkey by the French. Cilicia is generally fertile and produces wheat, cotton, wool, assame, &c., and is capable of considerable agricultural development; the chief port of

Cilicia is Mersin.

Population. — The first general census of Turkey was taken on Oct. 28, 1927, and showed the population of the Republic to be 13,660,275, the excess of women over man being annual. the excess of women over men being approximately 500,000. The population of each of the 8 Regions into which the country is divided was given as follows

Sq Kil Population Per Sq Kil Region Black Sea 73,621 2,174,425 2,746,069 Marmora & Ægean 92,744 56,879 29 Mediterranean 753,639 13 Turkey in Europe 23,975 71,180 1,044,306 Western Vilavet . 1,303,114 228,791 Central Anatolia. 3,499,707 15 S.E. Anatolia 40,125 Eastern Anatolia 176,621 1,534,718 Total...... 762,736 13,660,275 18

Religion.—The majority of the inhabitants re Muhammadans. There are a few Christians are Muhammadaus. There are a few Christians (of the Latin and Eastern rites) in Istanbul

(Constantinople) and a small number of Jews. On April 10, 1928, the Grand National Assembly passed a law in virtue of which Islam ceased passed a life in virtue of which land teach to be the State religion of the Republic. On Nov. 1, 1928, the Grand National Assembly passed a bill establishing the neo-Latin alphabet in place of Turkish characters. Education is nominally compulsory and free. There are primary schools, training schools for teachers,

and at Istanbul a university, founded in 1900.

Production.—Although the soil of Asia Minor is generally fertile, agriculture is still very primitive in centies that are not served by railways. The peasant is, however, gradually adapting himself to the more modern methods, particularly in the vilayet of Aydin, Adana, and Mersin. The live stock in 1929 was 12,124,031 sheep, 8,878,405 gouts, 2,804,685 mohair goats, 4,728,803 cattle, 496,964 horses, 849,485 asses, 74,803 camels and 496,060 builfaloes. Uereals are abundantly produced, as well as tobacco, raisins, figs, cotton, cpum, beet-sugar, nuts, olives, valones and inquorice root, and many varieties of fruit are grown. Samsun is the chief centre of the tobacco-growing industry, which is also of importance at Iznir (Smyrna), Ismit and Bursa (Brusa). The export of merchandise is conaderable and consists principally of opium, tobacco, cotton, carpets, guns, mohair, wool, hazel-nuts, raisins and firs The forests should be a source of wealth, but scientific exploitation is disregarded; beech, pine, oak, elm, chestnut, lime, plane, alder, box, poplar and maple are among the chief varieties of trees. The mulberry is planted for the silk-worm industry, which centres round Bursa and Isnut, and this industry, which declined after the war, is now showing signs of revival. The mineral wealth of Asia Minor is stated to be considerable, but is almost undeveloped. Chrome ore, znic, manganese, antimony, copper, borax, corundum (emery), coal and lignite, silver and arsenic, are among the mmerals produced.

Communications.—In Europe Turkey has about

208 miles of railway, known as The Oriental Railway and run by a French ('ompany. In Asia Minor the position as regards railways is the following :-

Lines under Exploitation

1	Izmir-Aydin (British)	Klm
i	Smyrna-Kasabara (French)	703
-	Bozanti-Aleppo-Nissiberi	632
	Anatolian Railway	1,031
-	Mersin-Tarsus Adana	67
,	Angora-Cesarea-Sivas	
	Samsun-Zilé, to join up with Sivas	220
	Kutahya-Tavsanii	51
,	Samsun-Charshamda, narrow gauge	-53
	Lines under Construction.	

Zilé to Sivas Tayshauli to Balikessir (completed, but not yet working).

Ulu Kishia to Cesarea. Filios to Irmak.

Malatya to Diarbekir.

There is also a line from Sari Kamis to the Russian frontier (78 miles, Russian broad gauge) and a narrow gauge line from Sari Kamis to Erzurum (156 miles), but both lines are in a bad state of repair.

TURKISH NATIONAL HOLIDAY.—Oct me is observed throughout the Republic as a National Holiday.

It is the intention of the Turkish Government to construct the following lines, but no contracts have yet been granted: Eregil—Filios (about 30 miles); Sivas—Erzurum (about 30 miles); Ada Pazari—Bayindir (about 50 miles). are electric trams in Istanbul, Scutari and lymir. In 1930 the mercantile marine consisted of steam and motor vessels, with a total net tonnage of 87,ss4. 1930 31

[Ken. 7208]. The smallest Republic in South America, on The smanest Republic in South America, on the cast coast of the Rio de la Plata, situate in lat. 30°-35° S. and long. 53° 25'-57° 44' W., containing an area of 72,780 square niles, and a population on Dec. 31, 1930, 01, 1993,083.

Cruguay resisted all attempted invasions of

the Portuguese and Spaniards until the beginning of the 17th century, and 100 years later the Portuguese settlements were captured by the Spaniards. From 1726-6814 the country formed part of Spanish South America and underwent many vicissitudes during the Wars of Independence. In 1814 the armies of the Argentine Confederation captured the capital and annexed Confederation captured the capital and anneadd the province, and it was afterwards anneadd by Portugal and became a province of Brazil. On Aug s5, 1825, through the heroism of the 33 liberators (whose memory is perpetuated in the name of the province of Trenta y Tres), the country threw off the Brazilian yoke. This action led to war between Argentina and Brazil, which was settled by the mediation of the United Kingdom, Uruguay being declared an independent state in 1828. In 1830 a Republic was inaugurated, with a Constitution of Sept. 20, 18ag. The President is elected by the legislature for a term of 4 years and is ineligible for a consecutive period of office By an amendment to the Constitution (which came into force March z. 1919) an administrative council was appointed to share the Executive power with the President.

The country consists mainly (and particularly in the south and west) of undulating grassy plains. The principal chains of hills are the Cuchilla del Haedo, which crosses the Brazilian boundary and extends southwards to the Cuchilla Grande of the south and east. In no case do the peaks exceed s,ooo feet. The principal river is the Rio Negro (with its tributary the Yi), flowing from north-east to south-west into the Rio de la Plata. The boundary river *Uruguay* is navigable from its estuary to Salto, about see miles north, and the Negro is also navigable for a considerable distance. Smaller rivers are the Cuareim, Yaguaron, Santa Lucia, Quequay, and the Cebollati. On the south-east coast are several lagoons, and the north-east boundary crosses (the Brazilian) Lake Merim. The climate is extraordinarily healthy, with great uniformity of temperature, the summer heat being tempered by the breezes of the Atlantic and the geographical position causing a high thermometer in winter.

Wheat, barley, and maize are cultivated The wealth of the country is obtained from its pasturage, white supports large herds of horned cattle (7,x27,0x2 in 1930) and sheep (20,525,224 in 1930), the wool of which is of excellent quality. Gold The exports are mines exist at Cunapirú entirely animal products, and include frozen and preserved meat, wool, hides, horn, hair, tallow, and jerked beef; the imports are prucipally machinery, textiles and clothing, food substances and beverages, coal, oil, timber, fuel and blood-stock. The principal imports from the U.K. are woollen and cotton goods, hardware, and coals There are 1,703 miles of railway open (1927), of which 1,564 miles are in British hands, and three short lines owned by the State; 45 kilometres of the State line from San Carlos to Garzón have been opened and 73 kilometres from San Carlos to Rocha are now open to traffic; and 4,850 miles of telegraph, with 19,039 miles of telephones. There were 995 post-offices, dealing with 116,687,496 letters and packets. The language spoken is Spanish.

The most northerly Confederation of South

America, situated approximately between 1°40'S. lat. and ra' 26' N. lat. and 59' 52'—73' rg' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1925 gave the population as 3,026,878.

Venezuela lies on the north of the South American continent, and is bounded on the north by the Caribbean Sea, west by the Republic of Colombia (with which Republic Republic of Colombia (with which Adoptine the boundary is in dispute), east by British Guiana, and south by Brazil. Included in the area of the Republic are over 70 islands off the coast, with a total area of about 14,650 square miles, the largest being Margarita, which is politically associated with Tortuga, Cubagua and Coche to form the newly constituted State of Nueva Esparta. Margarita has an area of about

Nutro Esparia. Margarita has an area of about 400 square niles.

Venezuela was visited by Columbus in 1408, and in 1499 by Alonzo de Ojeda and Amerigo Vespucci, the former naming the Gulf of Maracaito Venezuela, or "Little Venice" (on account of the Indian pile-built settlements on the coast and shores of the lake), and the name was afterwards extended to the whole of the Ornoco begin. It was the territory was formed into the basin. In 1550 the territory was formed into the captaincy-general of Caracas, and the country remained under Spanish rule until the revolt under Simon Bolivar, a native of Caracas, who defeated the Spanish forces in the battles of unenteu die Spanisi incres in the Battles of Lastoguanes (1813) and Carabobo (1821), and thus secured the independence of the country. Bolivar was an untiring hero in the cause of independence, and through his efforts (and those of his adjutant Sucre) Venezuela, Ecuador and Colombia (Upper Peru) achieved their freedom from Spain, while Peru was enabled to establish

its independence in consequence of his victories. He died in 1830, at the age of 47, and his remains were re-interred at Caracas in 1842. Venezuela formed part of the Federal Republic of Colombia from 1822-1830, since which time it has been independent. There have been many revolutions macpenuent. There have been many revolutions since 1846, particularly in 1849, 1858, 1889, 1891, 1890, and 1890, and 1894 President Monagas liberated the African slaves, and in 1854 President Falcon divided the country into States and formed them into a Kederal Republic. The present constitution rests upon the fundamental law of University and President Monagas. present constitution rests upon the fundamental law of June 13, rgpq, under which the govern-ment is that of a Federal Republic of twenty autonomous States, a Federal District, and two Territories, with a President elected by the Federal Congress for seven years; a new Cou-stitutional Law of xga left that position

unchanged.

The Eastern Andes from the south-west cross the border and reach to the Caribbean Coast, where they are prolonged by the Maritime Andes of Venezuela to the Gulf of Paris on the north-east. The main range is known as the Sierra Nevada de Merida, and contains the highest peaks in the country in Picacho de la Sierra (15,420 feet) and Salado (13,878 feet), the maritime ranges containing the Silla de Caracas (8,531 feet). Near the Brazilian border the Sierras Parima and Pacaraima and on the the Sierras Parima and Pacaraima and on the eastern border the Sierras de Emocte and de Usupamo enclose the republic with parallel northward spurs, botween which are valleys of the Orinoco tributailes. The Sierra Parima contains Yaparana (7,275 feet) and Duida (8,200 feet), and Para Canna contains Maraguaca (8,200 feet), the latter being on the Venezucla-Guitana boundary. The slopes of the mountains and foothills are covered with dense forests, but the basin of the Orinoco is mainly llanes, or level stretches of open prairie, with occasional woods.

The principal river of Venezuela is the Orinoco, with innumerable affluents, the main river exceeding 1,500 miles in length from its rise in the north-western mountains of the republic to its outflow in the deltaic region of the northeast. The Ormoco is navigable for large steamers from its mouth for some 700 miles, and by smaller vessels as far as the Maipures Cataract, some see miles further up stream Among the many tributaries of the main stream are the Ventuari, Caura and Caroni from the south, and the Apure can and caron from the south, and the Apure (with its tributary the Portuguesa), Arauca, Meta, and Guaviare from the west, the Meta and Guaviare being principally Colombian rivers. The upper waters of the Orinoco are united with those of the Rio Negro (a Brazilian tributary of the Amazon) by a natural liver or canal, known as the Casiquare. The costal regions of as the Canquiare. Venezuela are much indented and contain many lagoons and lakes, of which Maracaibo, with an lagoons and lakes, of windin artraction, with an area exceeding 7,000 square miles, is the largest lake in South America Other lakes are Zulia (200 square miles), south-west of Marazaibo, and Valencia (216 square miles), about 1,400 feet above sea-level in the Maritime Andes. The llanos also contain lakes and swamps caused by the river floods, but they are dry in the summer

The climate is tropical and, except where modified by altitude or tempered by sea breezes. is unhealthy, particularly in the coastal regions and in the neighbourhood of lowland streams and lagoons. The hot wet season lasts from

April to October, the dry cooler season from November to March.

The principal industries are agriculture and cattle raising. The oilfields are of increasing importance, the production being as follows:—

1983	metric tons	640,000
1984	,,	1,330,911
1925		B,812,42E
1926	,,	5,318,000
1927	,,	9,125,000
1988	**	15,000,000
1929	••	19,000,000
1030		20.157.012

The principal imports are cotton prints and shirtings and cotton dull, mainly from the U.K., and hardware, principally from the U.S. The and hardware, principally from the U.S. The principal articles of export are petroleum, coffee (64,388 metric tons in 1920); cacao (ar,128 metric tons in 1920); cacao (ar,128 metric tons in 1920); goatskins, asphalt, sugar, hides, and balata. The U.S. is the principal customer. There are about 680 miles of railway in

operation. Spanish is the language of the country.

Yugoslavia consists of the former Kingdoms of Seibia and Montenegro and of Croatia and Slavonia, part of the Banat, Bosnia, Herzegovina, part of Carmola, and part of Styrm, and has an estimated area of 248,050 square kilometres (24,230 square miles), with a population (Census 1931) of 13,930,918.

Montenegro (Tzrna-Gora) was, before the Turkish occupation of the remaining territory, a province of the Serbian Empire. Its independent existence ended with the decision of its Parliament (Nov. 29, 1918) to depose King Nicholas and reunito with Serbia The chief towns are Cettinge (pop. 5,000) and Podgorica

Pre-War Serbia had no seaboard, but the inclusion of Croatia, Dalmatia and Montenegro in the Kingdom of Yugoslavia gives access to the Adriatic down a lengthy coast The principal Yugoslav ports are Susak, Split, Dubrovnik and Kotor, and by an agreement with the Greek Government Yugoslavia has a free zone at the port of Salomka. In 1926 there were 4.050 miles of normal gauge and 1.083 of narrow gauge railway in operation. The Danube forms a great commercial highway, and the tributary rivers Save and Trsa provide other important shipping routes; the port of Belgrade is now the second busiest on the Danube. The Paris-Istanbul service of the French Aviation Company (via Prague, Vienna, Budapest) calls daily at Belgrade, which has also regular air services to Bucharest and Salomka . national company connects the chief towns with the capital. The Army on a peace footing consists of 130,000 officers and men, the war strength

being about 250,000
The Greek Orthodox, Roman Catholic, Protestant, Muhammadan and Judaic faiths are recognised by the State, nearly 47 per cent of the population is of the Greek Orthodox faith the population is of the Greek Otthodox faith Education is compulsory and clementary schools, with zz,oco teachers and z,oco,oco pupils; about zo,oco attend continuation schools, and some zo,oco attend continuation schools, and some zo,oco attend continuation schools, and some zo,oco attend continuate technical colleges. There are Universities at Belgrade, Zagreb, Liubijana and Skopije.

The principal mulater is sericulture over

The principal madustry is agriculture, over

So per cent. of the population being engaged therein. In 1929 about 5,250,000 acres under wheat yielded 2,600,000 tons of wheat; maize (5,730,000 acres, 4,200,000 tons), bailey (1,200,000 acres, 420,000 tons), oats (1,000,000 tyaso, as a so, oso tous), tye (600, oso acres, aso, oso tous); about 500, oso acres are under vines, which yielded 60 to yo million gallons of wine in 1929. The live stock in 1930 included 3,730,000 1929. The live stock in 1930 included 3,730,000 cattle, 1,141,000 horses, 7,736,000 sheep, and 2,700,000 swine. The mineral resources include coal (output 6,000,000 metric tons in 1929), iron. copper, lead, chrome ore, antimony, &c The principal exports are marze, wheat, timber, live stock and meat products, prince, eggs, poultry, skins and minerals; the imports are chiefly textile manufactures, machinery, food products

THE International Institute of Agriculture at Bome was founded in 1903 as the result of a Convention made between the representatives a Convention made terween the representatives of 40 different countries. The number of nations subscribing to the Convention is 7s, and the Institute may be regarded as the ploneer of official international institutions, and as the most representative of all. It is estimated that the countries and colouies adhering to the Institute represent

over 95 per cent. of the population of the world.

The following is a complete list of the countries now adhering to the Convention of 1905, and therefore represented at the Institute

Cyronaica.

Tripoli.

Italian Somaliland.

Dutch East Indies.

and contributing to its funds :-

Hungary. Abvasinia. Italy. Eritrea. Argentina. Austria. Belgium. Belgian Congo. Bolivia. Japan. Latvia Brazil. Bulgaria. Chile Lithnania Chius Luxemburg. Colombia. Mexico. Netherlands. Cuba. Czechoslovakia. Denmark. Nicaragua. Renador. Norway. Egypt. Panama. Estonia Paraguay. Finland. Persia. France. Perm Algeria. French West Africa. Poland. Portugal. Indo-China Rumania. Madagascar. Russia San Marino. Morocco. Tunis. Siam. Germany. Spain Great Britain and Sweden. Northern Ireland Switzerland. Turkey. United States. Australia British India. Canada. Irish Free State. Union of South Africa.

Greece. Uruguay Venezuela Guatemala. Haiti. Yugoslavia. The essential objects of the Institute are defined in Article 9 of the Convention and may be summarised as follows:—

Hawaii. Philippine Islands Porto Rico. Virgin Islands.

The Institute, confining its activities to the international sphere, shall:—

Collect, examine and publish, with the least possible delay, statistical, tochnical and economic information with regard to farming, crop and live-stock production, trade in agricul-tural products and the prices current on the

different markets;

Indicate the wages paid for farm work; Record any new diseases of crops which may have appeared in any part of the world, showing the countries affected by such diseases, their progress and, where possible, any effective measures for their control;

Study questions concerning co-operation, insurance and credit in all their forms; collect and publish all information that may be useful in the various countries for the organisation of systems of agricultural co-operation, insurance and credit;

Submit, should occasion arise, for the approval of the various Governments, measures for the protection of the common interests of farmers, and for the improvement of their con-

The Institute has its seat in Rome, in a palace In the Villa Borghese, specially erected through the munificence of H.M. Victor Emmanuel. The Governing Body consists of a General Assembly of Delegates of the adhering Governments, meeting once every two years, and of a Permanent Committee of Delegates, mostly resident in Rome, acting as its executive. Apart from the General Secretariat to which, in addition to the ordinary advantage. to the ordinary administrative offices, the Section of Agricultural Legislation is attached, there or Agricultural Legislation is attached, there are special bureaus dealing with General Statis-tics, Agricultural Science, and Agricultural Economics, respectively. The Institute also tics, Agricultural Science, and Agricultural Economics, respectively. The Institute also possesses an important Library, contaming about 135,000 volumes and pamphlets, and 80,000 unbound sets of periodicals from all parts of the world, while over 3,500 peric licals are received regularly. Thus the Library offers quite unusual facilities for the study of agricultural problems, and permission to utilise its resources is readily accorded to all properly accredited persons.

Information on agricultural questions is given Information on agricultural questions is given mainly through periodical publications, issued in English and French and, in some cases, also in Spanish and Italian. These periodical publications include two Year-Books, the International Year-Book of Agricultural Statistics and the International Year-Book of Agricultural Legislation; the International Review of Agri-culture, published monthly, and divided into three separate sections, dealing respectively with Agricultural Science and Practice, Agricul-tural Economics and Sociology, and International Agricultural Satisfies, while in addition an International Bulletin of Plant Protection appears each month. These periodical publications are from time to time supplemented by monographs based on special research or specially acquired information.

A new feature in the publications of the Institute is the Economic Commentary published for the first time at the beguning of rogs, of which the second issue should appear at the end of the year. This Commentary discusses agricultural markets and prices, Government and unofficial action in relation to agricultural questions, and the position of farmers during the previous agricultural year. It is intended to serve as a volume complementary to the Inter-

national Year-book of Agricultural Statistics.
In addition, special monographs dealing respectively with the Crop Results of the 1930 season and with the provision of Evperimental Stations and similar institutions in Tropical Countries have been published during the year. The various publications of the Institute may be obtained in London from Messrs. P. S. King and Son, or may be ordered from Bestetti and

Tumminelli, 3s Via Michelangelo Gaetani, Rome.
The economic work of the Institute has been greatly strengthened by the recent appointbeen greatly strengthened by the recent appointment of its expert Agricultural Economic Committee, which advises on the economic and statistical programme in its international aspects in general, with special reference to the requirements of the Economic Consultative Committee of the League of Nations. With the establishment of this Committee the Institute

may be said to have completed the list of advisory bodies required to give the cachet of authority to its work. The International Agricultural Scientific Council, through the expert members of its various Commissions, is in a position to advise on any purely technical questions that may arise, and the Permanent International Commission of Agricultural Associa-tions (which has now a regular monthly organ) provides means for ascertaining the views of practical agriculturists. At the same time liaison with other bodies interested in agriculture is maintained by the International Commission for Co-ordination in Agriculture, which is also

attached to the Institute.

The World Agricultural Census of 1929-30, undertaken by the Institute with the object of undertaken by the institute with the object of obtaining on a uniform basis as complete an inventory as possible of the agricultural resources of the world, has, as a result of very careful and detailed work of preparation, achieved a large measure of success. The number of countries which made their census in accordance with the standard forms prepared by the Institute fully reached expectation, and many completed returns are already available. A beginning is now being made with the publication of these results, and in order to facilitate their utilisation they are being issued separately for each country as they come to hand, in as uniform a shape as possible, and in Euglish and French as the most generally known languages General studies interpreting the documentation thus collected and methodological studies—of which the particular object is the perfecting of future censuses-constitute the second stage in the programme of work which the Institute proposes to accomplish on the basis of the information supplied by this first world census of agricultural production.

The most important feature of the public work of the Institute during roar was the International Preparatory Conference of the and World Wheat Conference, which took place at the Palace of the Institute from March 26 to April 2. Official Delegates from nearly 50 countries took part in the proceedings, and there were also present, as Observers or specially invited persons, representatives of the League of Nations, the International Labour Office, the International Chamber of Commerce, the London and Liverpool Corn Trade Associations, and simple bodies. The main questions discussed Secretary General. Prof Alessandro Brizi.

included the International Organisation of Wheat Production and of the Wheat Trade, International Agricultural Credit and Preferential Tariffs, and the Conference adopted an important series of resolutions, which have been communicated to the various Governments.

Inter alia, special stress was laid on the necessity for an improved organisation of the Wheat Market, on the better organisation of world wheat production (which would largely depend on improvements in the provision of information and of statistical foreasts), and on the value of short term agricultural credit in the present clisis. A direct outcome of the Conference was the

meeting on May 18 at Canada House in London, under the Presidency of the Hon George Howard Ferguson, High Commissioner for Canada. of representatives of Overseas and European wheat exporting countries for the purpose of drawing up a plan for dealing with the wheat export

season 1931-3s, and with existing stocks.

The question of Short Term Agricultural

Credit was again discussed on August 12-13 at a meeting of experts convened by the Institute, when a scheme for the constitution of an International Agricultural (short term) ('redit Bank was drafted.

A Conference of Experts preparatory to an International Diplomatic Conference on the Marking of Eggs in International Trade, which it is proposed to hold at an early date in Biussels, took place at the Institute on May 11-13. The Conference was of a fully representative character and drew up a Draft Convention, which will form the basis of discussion at the later meeting.

The two most inportant events at present arranged for regeneral world wheat Conference and the Eleventh General

Assembly of the Institute

. DISTANCE OF THE HORIZON.

THE limit of distance to which one can see varies with the height of the spectator The greatest The limit of distance of which of the surface of the sea, or of a level plain, can be seen by a person whose eyes are at a height of 5 feet from the same level is nearly 3 miles. At a height of 20 feet the range is increased to nearly 6 miles, and an approximate rule for finding the range of vision for small heights is to increase the square root of the number of feet that the eye is above the level surface by a third of itself, the result being the distance of the horizon in miles, but is slightly in excess of that in the table below, which is computed by a more precise formula. The table may be used conversely to show the distance of an object of given height that is just visible from a point in the surface of the earth or sea. Refraction is taken into account both in the approximate rule and in the Table.

At a height of	the range is	At a height of 500 ft		At a height of	the range is 83'3 miles.

og 1937 had been gathering loice for a year or more, unseen by all but the most scute and experienced observers. Its immediate conse-quences at home were the fall of the Labour Administration, the institution of a National Government which will probably affect the whole field of politics for a generation, the suspension of the Gold Standard, and a general election fought under conditions which had never previously existed As early as February, Mr. Snowden had indicated that all was not well with the national fluances, and in his Spring Budget he showed anxiety concerning the world depression, but he seemed hopeful that the deficit might be cancelled out by the economies which had been set up. But although that committee made a series of drastic proposals, committee made a series of drastic proposals, the general situation, not only in Great Britain but throughout the world, had by that time gone from bad to worse. "To produce a properly balanced Budget in 1932," said Sir George May and his colleagues, "a deficiency of £120,000,000 has to be made good by new taxation and by economies." Mr. Snowden's own view of the rottion when he produced his memorators Rules! position when he produced his emergency Budget was that the deficiency would be even greater £170,000,000—and it was this enormous sum that the National Government set itself to cover by a "Nationcombination of economies and taxes ally, we have for some time been living beyond our means and living to a considerable extent upon our capital," declared Mr. Snowden. There were, however, other important causes. financial stability of Germany was one, the gold shortage caused by the withdrawals by the United States and France was another. Only a week after Parliament adjourned for the recess, the Bank of England realised that a serious situation might have to be met because of the outflow of deposits and the danger to gold reserves. Temporary credits were obtained, but these were nearly exhausted by the time the National Government took office There is no doubt that but for the change of administration the £ would have crashed—not merely declined, as was the case when Britain went off the Gold Standard. There was a lack of confidence abroad, and the immediate need was to balance the Budget, so that a loan could be obtained. Even when the Budget had been balanced, the interwhen the Budget had been balanced, the first mational position was too serious. In two months funds amounting to over £200,000,000 were withdrawn from the London market, the withdrawals being met partly from gold and foreign currency held by the Bank of England, partly from the process of the first credit of the partly from the process of the first credit of the process of the first credit of the process of the first credit of the first credit of the first credit of the process of the first credit of £50,000,000 secured from New York and Patis, and partly from new French and American credits of \$80,000,000. Finally the withdrawals, mostly for foreign account, became so constant, and the international fluancial markets so demoralised-so much so that they were liquidating their sterling assets regardless of their intrinsic worth—that the Government decided that there was no alternative but to protect the financial position of Great Britain by suspending the Gold Standard. The step was generally The step was generally approved and was not so serious as it appeared. It was taken not because of internal financial difficulties, but because of excessive withdrawals of borrowed capital, a very different matter

INTERNATIONAL in its origin, as well as in its effects, the financial crisis which swept like a lanced Budget and uncontrolled inflation, typhon over Great Britain in the holiday month of 1887 had been gathering force for a year or more, unseen by all but the most acute and quickly arrested and slight improvements were experienced observers. Its immediate conse-

THE MACMILLAN REPORT.

THE Committee on Finance and Industry began work, under chairmanship of Lord Macmillan, in November, 1929, and issued its report on July 12, 1932, with approval of all members except Lord Bradbury. Inter alia, the report expressed: The 1925 return to Gold Standard had not fulfilled a laterature that the standard had not fulfilled a laterature to the standard had not fulfilled a laterature to the standard had not fulfilled a laterature to the standard had not fulfilled a laterature to the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfilled a laterature than the standard had not fulfill the standard had n filled auticipations, but a reversal of policy would not necessarily mean making good miswould not necessarily mean maxing good instakes. Important British income was derived from international banking and associated services. It is not our case that industry should be sacrificed to finance. It would not be possible for a country so intricately concerned with outside would as Great Britain to escape simply from repercussions of instability elsewhere. We must continue attempt to cevers cound international contractions of the same country and the country of the country o must continue attempt to recure sound international currency. De-valuation of a currency standing at par without notice is emphatically inexpedient. International confidence is based on belief that national currencies will be mainon before that hatchnat currencies win for maintained at fixed legal value. Great Britain's position as creditor country remains immensely strong. Stabilisation of world wholesale prices at present figures would be a world disaster. The aim of British mouetary policy should be, with the co-operation of the central banks, to with the co-operation of the central banks, to first ruse and then stabilise a price level in com-modities. Sound policy must lie at home in maintenance of foreign exchange partites, avoid-ance of a credit cycle, and price level stability. Managing authority should be the lank of England, that would adapt itself to new conditions. After pointing out that sole use of a gold reserve was to meet deficits in international payments until measures could be taken to seem equilibrum again, it was laid down that central banks should not pass gold or gold certificates into currency, should give collective consideration to legal requirements for gold reserves, regard deposits in B.I.S or other central banks as gold emissalest. Cantral banks central banks as gold equivalent. Central banks should be autonomous, especially in collection of gold and stopping inflation. The long term investment should go with the present fashion of short terms, and tendencies in a country to keep excessive liquid balances should be curbed

Present emergency called for greater willingness to buy and lend on part of credutor countries as first step towards restoration of price level. Otherwise, creditor countries would absorb remaining gold from debtors and create defaults. A concerted policy was essential between Central Ranks of Britain, France and U.S.A. With Bank of England, policy was wrong in locking up gold instead of having it available for export. Parliament should give Bank power to issue notes up to £400,000,000 and to reduce gold holding to £75,000,000, but as statutory figures only. The Committee desired to give elasticity on occasion of necessity, but was not in favour of a reduction in the normal stock of gold. Joint Stock Banks were to reduce their holdings of notes. Increase should be made in total resources of Bank of England, including liquid funds abroad. Banks should assist in setting up financial organisations of type of Bankers Industrial Development Company to help industry. Suggestions were

put forward in distribution of trade statistics and information. The Committee reviewed recent international financial history—maldistribution of gold being held responsible for price falls—and dealt with production costs.

THE HOLMAN-GREGORY REPORT.

Royal Commission on Unemployment Insurance was appointed Dec. 9, 1939 (Judge Holman Gregory, K.C., Chairman), to enquire into working of Insurance Scheme, recommend means to make it solvent and self-supporting and suggest arrangements outside the Scheme to provide work for unemployed. Pressure was brought on Commission to fundsh an early Report after hearing certain witnesses and this became available in June The Majority Report (five members) drew attention to a surplus of £22,000,000 in the Unemployment Fund in July, 1921, and a deficit of £82,810,000 on May 23, 1931 Revision was necessary to limit benefits to a6 weeks in any year, increase all contributory to so weeks in any year, increase an contributory rates in ratio to an adult male standard of 9d. from employee, employer and State, reduced benefits based on 15s. weekly for adult males, plus 8s. and 2s for adult and children dependents. Transitional benefit should be same as insurance benefit claimants having to show 8 contributions in preceding two years or (30) in six previous years; resources of applicant should be taken into account and no benefit to be paid to a person refusing work offered. Anomalies in regard to part-time workers, married women and seasonal workers were to be dealt with. The Minority Report (two members) objected to sweeping proposals in an interim report, desired maintenance of unemployed on a level not lower than that in force, accepted casual workers' proposals but differed themselves on limitations of benefit to married women. A Bill was subsequently introduced in Parliament and became Law, Unemployment Insurance Act No. 3, on July 31, putting into force most of the recommendations in regard to Anomalies. This Measure would effect small economies but left untouched the greater financial proposals of the Majority Report

THE ECONOMY REPORT

A Committee of seven, Sir G E May as Chairman, was appointed by Mr MacDonald in March, 1931, to make recommendations "for effecting forthwith all possible reductions in national expenditure on Supply Services." Reports (majority signed by five and minority by two members) were issued July 31, Parliament had just risen for the summer adjournment. After pointing out Parliament's habit of voting expenditure, "enjoying benefits for which we are not providing the cost," with fixed amounts without taking into account the falling price level, the borrowing on behalf of the Unemployment and Road Funds, and additions to national and municipal burdens at a time when industrial enterprise and employment were decreasing, the Committee stated that with even optimistic revenue collections this year the Budget of 1931 revenue confections this year the Budget of 1931 would show a deficiency of £120,000,000, apart from any extra sums arising through the Wai bebt moratorium. This was "no transient feature to b brudged by temporary expodients." Tables in the Report showed a comparison lebt moratorium. This was "no transient leature to be bridged by temporary expedients." Rothschilds 20,000,000 each (\$\frac{4}{1}\$ = 35 sch.), in feature to be bridged by temporary expedients." hope of austaining public confidence, but foreign Tables in the Report showed a comparison between 1924 and 1931 national expenditure and grants (chief increases being Pensions and Insurance, \$\mathcal{L}\$54,600,000; Education, Housing, and the Government obtained permission from

&c., £22,200,000) to make a gross addition of £130,000,000 in social services and home developments. The Report submitted reductions of money obligations previously fixed to meet the rise in money value, national realisation of whether country can afford much of present expenditure considered desirable, but not necessatily essential, and trade restoration with reabsorption of unemployed into industry could only follow strict regard to State efficiency and economy. For the future, Parliament should be given more economic information than by one Budget speech annually, a finance Committee on lines of Imperial Defence Committee established in Cabinet, and politicians curre their electoral promises of financial help. The Minority Report asked for the long view as against temporary reductions in expenditure, and if sacrifices are essential they should be distributed according to capacity to withstand and not only upon certain large sections of the community as recom nended in the list of "cuts by the Majority Report. The proposed cuts were :--Development-

AUSTRIA AND GERMANY.

Next to the War itself, the root of collapse goes back to the action of Germany in 1923, in destroying the value of the old mark. Thenceforward, Germany could only carry on with the aid of foreign loans to meet reparation payments and finance home industry. Austria's position was weak, a particular sign being the compulsory acquisition of the Boden Credit Anstalt, and another bank by the Credit Anstalt, that became then the predominant financial house of Austria with 70 per cent. of the total bank deposits of that country. In May, 1931, the announcement was made of tremendous losses. The Austrian Government had subscribed 200,000,000 schillings, and the Austrian National Bank and Mesers,

the League of Nations Commission to borrow specioscocosch. This was to be raised internationally, but owing to the pressure of time the Bank of England provided the whole on June 26. The Anstalt's debtors included £75,000,000 belonging to foreigners, of which Great Britain was largest with £27,000,000. British money was thus locked away to this extent.

Though Germany was interested to the extent of only £5,000,000 in the failure, the reaction was felt acutely. German nationals began to withdraw home funds and remit overseas for fear of another mark collapse; credits by France, Great Britain, U.S.A., and other short term lenders began to be called in. The result was a banking crisis in Germany, the Darmstadter and Nationalbank having to suspend payment. Germany was also still feeling the effect of the big capital withdrawals of the September, 1930, election crisis. The Berlin Bank Rate increased from 5 to 7 per cent. on June 32, 1933, to 20 on July 15. The cover on notes had now fallen to best than the legal minimum of 40 per cent. The loss of gold by the Reichsbank, from May 23 to June 23, was 979 000,000 reichsmarks; foreign exchange holdings fell in same time from 171 to qual sums by Fed. Res Bank of New York, Banks of England and France, and B.I.S. Now came an appeal from Germany against the Young Plan, on the ground that its assumptions were wrong. Germany possesses power to postpone payment for two years, apart from the 650,000,000 marks to be derived from State railway duties.

WAR DEBTS POSTPONEMENT.

On June 20, x93x, President Hoover issued from Washington a statement—"Subject to confirmation by Congress, the American Government will postpone all payments on the debts of foreign Governments to the American Government, payable during the fiscal year heginning July x, 193x, conditional on a like postponement for the year of all payments of inter-Governmental debts" Obligations by Governments to civilians were not included. This moratorium, became effective from July 6, apart from agreement on minon details. The relief to Germany in a year's payments was 800,000,000 marks. The total Inter-Government Debt repayments due to Great Britain in the year to June 30, x93z, was given in House of Commons, July 4, a. £42,790.000; this included £337,000 from South Africa that wished to make the payment, but not the £1,686,000 previously postponed by Australia. The experts, who considered the moratorium, recommended on Aug. xx that the suspended payments for the year should be paid in ten equal annual instalments with interest at 3 per cent. from July x, 1932.

LONDON CONFERENCE.

On July 8 a German guarantee syndicate was established to give collateral security of \$500,000,000 marks through the Gold Discount Bank. This inspired confidence. The G. D. B. then closed with an old offer of a \$50,000,000 credit in U.S.A. The June credit of \$40,000,000 marks was extended to the Reichsbank. A run upon gold and foreign exchange resources (not a simple run upon the banks by the public) was in full swing in Germany. On July 20, the sevenpower Conference summoned by the British

Government met in London (Mr. MacDonald, Chairman). As a result of the private deliberations at was decided to call upon the B.L.S. to ascertain the futher credit needs of Germany and the possibility of turning its short term into long term loans. Massrs. MacDonald and fleuderson then paid a personal visit to Berlin, returning on July 29 with an announcement of "a most successful meeting." On Aug. 1 the Reichsbank raised its discount rate to 12 per cent.; the Darmstadter (Panat) Bank also reopened to pay m full if needed, this being made possible by introduction of new industrial capital of 43,000,000 marks. German banks had been closed, except for small business, since July 24, but their re-opening did not lead to extraordinary withdrawals.

STERLING AND CREDITS.

A constant drain had been observable upon London Funds since the General Election of 1039. In 1939, the favourable credit balance was £138,000,000 in British Trade, though our £138,000,000 III Drivin 17aus, Mough our imports exceeded exports by £366,000,000 thanks to foreign investment yields, shipping, hanking and other services rendered the world by Britain. Within a year, the favourable credit balance had dropped to £39,000,000 in the estimate of the Board of Trade, and by the middle of r931 the credit balance no longer evisted. With that disappearance, the real basic strength of sterling had gone On July 6, the Bank of England's return showed the highest gold holding of the year. Nine days later, immediately after the German bank crisis, the value of the £x fell to below the point at which gold moves (\$4.83 x/x6 compared with 484 13/16). The French franc value moved upwards. In eight days £20,250,000 gold was taken from the Bank of England. To stem the tide of withdrawal from London, the bank rate of discount was raised from a½ to 3½ per cent. on July 23. Then followed the visit of Messis. MacDonald and Henderson to Berlin. Gold was still leaving the Bank. In the course of a week, the loss was £16.734,931, bringing down the holding to £133,309,000, with the result that the discount rate had to be raised to 4% per cent. on July 30. At this point the Economy Committee Report threatening a deficit of £120,000,000 in the Budget appeared. On Aug. 1, the Bank of England raised credits of £25,000,000 each with Bank of Fiance and Federal Reserve Bank of New York in the hope of maintaining the exchange for sterling. The Theasury now gave authority for the increase of the fiduciary issue from £56,.co.,coc to £275,000,000 (permission being extended in periods), thus enabling the Bank to ship gold, if necessary, without interfering with supply of currency. The credits soon disappeared and negotiations began with a view to further support. On Aug. 28, the Treasury amounced that one year Loans for £40,000,000 each were to be raised in New York and Paris. Commissions and expenses of issue were £1,047,000. During these days, a political crisis was careeling madly on in London, the world assuming the worst and the foreign exchange manipulators driving hard against the value of the £1 Britain was driven off the Gold Standard to which a return had been made after the war by the Act of reas. Parliament passed the necessary Suspensory Act on Sept. 22 The Bank return of Sept. 30, 1932, showed a gold holding of £124,817,865, plus gold and silver coins of

Bolivia, Norway, Portugal and Sweden also temporarily abandoned the Gold Standard after Sept zz, zagz. The Danish Government prohibited export of gold as from Sept. zz, and on Sept. zo suspended the Gold Standard unti Nov. zo, the note cover being reduced officially from 50 to 32% per cent. N. and S. Rhodesia and Finland joined the list of countries that temporarily suspended gold payments on Oct. zz. Canada stopped the export of gold on Oct. za. and so practically came off the gold standard.

An immense amount of capital has been lying "frozen" in the U.S.A. banks, failure to employ the undoubtedly making unemployment acute, and, in the hope of creating luquidity and confidence, President Hoover suggested in the first week of Oct. the establishment of a \$500,000,000 Institution. The debentures were immediately subscribed by the banks, a z per cent. levy on deposits being proposed in the Presidential statement issued on Oct 7 after an all-party Congress Conference. By discounting securities ineligible for discounting by the Federal Reserve Banks was also recommended by the President. In view of the Federal Reserve Act in giving more discount powers to the twelve Reserve Banks was also recommended by the President. In view of the U.S.A. bank collapses (Jan. z-Sept. 30, 1,224, lanks were suspended, involving \$929,485,000 deposits; som with \$122,555,000 were re-upened rents.

payment of dividends to creditors. The U.S.A. felt a gold draught in September and October; the equivalent of the net gain in gold in 1929 and 1930 of \$700,000,000 was exported in the course of six weeks, Europe being the destination. In October, M. Laval paid a visit from France to U.S.A.

BANK FOR INTERNATIONAL SETTLEMENTS

First annual report of the B.I.S. was issued on May 19 to cover the period May 17, 1930 (date of beginning business) to March 31, 1931.

Accounts are kept in Swiss francs. Deposits Accounts are kept in Swiss francs. Deposits on latter date were 1,780,000 fcs.; assets, 1,900,000 fcs.; sasets, 2,900,000,600 fcs.; profit for xe¾ months working, 11,186,321 fcs., distributed between legal reserve fund 5 per cent., dividend on shares, 6 per cent., dividend reserve, 1,004,189 fcs., and general reserve, 1,883,378 fcs. Bank accepts deposits only from central Banks and Governants besides below trustee of German cuntit. ments besides being trustee of German annuity reparation payments. B.I.S. reported having transferred surplus sums from certain markets for easing stringency in others whilst book transfers were made between Central Banks without transactions going through ordinary exchange markets, thus obviating wide exchange fluctuations. The monthly statement of July 3x showed a drop of deposits to 1,63x,000,000 fca., due, it was said, to changes brought about by the Hoover plan (Germany having paid only 51,000,000 marks of the Young Plan on July 15), central banks selling exchanges to meet with-drawals of capital from their markets, but losses in this direction were partly counterbalanced by increased deposits of banks of countries making the withdrawals On Aug 3 the B.I S. renewed for three months a credit of £20,000,000 to German Reichsbank. In July the B.I.S. had loaned the Austrian National Bank, 200,000,000 schillings for the discounting of the bills of the Credit-Anstalt, the first instalment of so per cent. was repaid on Sept. 29. Deposits were shown in the BIS. statement of Sept. 30 as 1,273,617,673 Swiss fcs., a drop of a fifth in the month; this fall was due to withdrawals, owing to monetary situation and reparation re-arrange-

PILOTS' EARNINGS.

The majority of the 320 pilots attached to the Port of London had net average incomes approaching £1,000 or over that amount during 1929.

An official return issued Nov 8, 1930. shows that the average net earnings were .—

Service and Number Engaged.	Average Earnings.	Extra Services
Channel pilots (76)	£1,059	£*3
Cinque Ports pilots (70)	903	19
North Channel pilots (47)) 863	30
('ompulsory River Tham (85)		95
Home Trade pilots (2)	793	147

Two pilots at Rochester did even better, for they averaged £1,098, with £217 for extra services.

SIGNS OF THE ZODIAC.

TER system of government by party in Great Britain is the outcome of a gradual constitutional development. Until the "Gloious Revolution of x686," the principal Officers of State, chosen by the Soveneign, were responsible to him alone and not to Parliament or the nation at large. Such officers acted sometimes in concert with one another, but more often independently, and the fall of one did not necessarily involve the fall of another, although all were liable to dismissal at any moment. Pattes came into existence and gained increased importance as Parliament claimed and secured predominance in affairs of State, and it has long been a custom of the Constitution for the Sovereign to entrust the conduct of affairs to the accredited leader of the party in Parliament which enjoys, or can secure, a majority of votes in the House of Commons. The principle of joint Cabinet responsibility is also fully established, and internal disagreement leads to a change of personnet or resignation of the whole.

change of personnel or resignation of the whole. In 1693 the Earl of Suudeiland recommended to William III. the advisability of selecting a Ministry drawn from the political party which enjoyed a majority in the House of Commons. The existing parties were known as Whijs and Tories, names given by opponents to each other in the reign of Charles II., and continuing as political labels until Whig was changed to Liberal in 1828, and Tory to Conservative in 1830. The first united Ministry was drawn in 1866.

The first united Ministry was drawn in 1596 from the Whigs, to which party King William III. owed his throne, the principal members being Russell (the Admiral), Somers (the Advocate), Lord Wharton, and Charles Montague (afterwards Chancellor of the Exchequer). This group was known as the Junto, and was regarded with suspicion as a novelty in the political life of the nation.

At the accession of Queen Anne the government was largely in the hands of the great Duke of Marlborough, with a Tory Ministry and a strong Tory majority in Parliament, but in 1702 a Whig Parliament was elected with a gradual return to power of the Whig Ministers, but their persecution of Dr. Sacheverell offended Queen Anne and led to their downfall. At the end of the reign there was a Tory Parliament and a Tory Ministry under Lord Harley and Lord Bolingbroke. Harley was dismissed by the Queen, and Bolinghroke opened secret negociations for the return of the Stuarts, in which he was thwarted by the Duke of Shrewshury, himself a former supporter of the eviled King, but in his later life an avowed Whig, and the most notable adherent of the Hanoverlan succession.

The accession of George I. was a complete triumph for the Whigs, whose cause was strengthened by the suppression of the first "Jacohite Conspiracy" of 1715-16. The effect upon the development of the party system was even more marked, as the King was scarcely able to understand the English language. His attendance at meetings of the Cabinet became useless and irksome, and allowed the appearance of a Prime Minister, and his example has been so consistently followed as to have become a settled custom. The two foremost statesmen at the time were Lord Townshend and Lord Stauhope, but after the financial crash of 1720, which witnessed the failure of the South Sea Company and several others formed in connexion with it, Sir Robeit Whipole took office and held it without a break for over twenty

years (1720-42) resigning his various offices after a parliamentary election which returned a majority of members opposed to his policy. During Walpole's strong administration the Tory party had sunk into insignificance in the

During Walpole's strong administration the Tory party had sunk into insignificance in the House of Commons and opposition to Walpole was offered principally by a section of the Whig party, headed by Lord Pult.ney and Lord Chesterfield. This section was joined by the remnant of the Tory party, but there was no great change in policy after Walpole's retirement, Lord Wilmington becoming Prine Minister until his death in 1743, when he was succeeded by Henry Pelham, brother of the Duke of Newcastle, who remained in office until his death in 1754.

Two years later William Pitt became Secretary

Two years later William Pitt became Secretary of State under the Duke of Newcastle, who had led the government since his brother's death, but the accession of George III. was followed by the rise of Lord Bute, a Tory and an avowed advocate of the supremacy of the monarchy over parliament and parties. Lord Bute was appointed Prime Minister in 1762, and caused the resignation of Pitt as Secretary of State and leader of the House of Commons. Lord Bute was succeeded by George Grenville, who became unpopular at home owing to his attempted suppression of the liberty of the Press and in the North American Colonies through the imposition of the Stamp Act Upon Grenville's retirement in 1765 the King invited William Pitt to form an administration, but Pitt declined owing to lack of parliamentary support and the post was accepted by Lord Rockingham.

In 1766 Pitt became Prime Minister and was created Earl of Chatham, but his health failed in 1767 and the Duke of Grafton (1767-70) and Loid North (1770-82) led the Tory party until the return of the Whigs to power under Lord Rockingham and Lord Shelburne.

In 178x, William Pitt, the younger, second son of the Earl of Chatham, entered Parliament at the age of 22, and became Chancellor of the Exchequer in Shelburne's government. In 1783 Lord Shelburne resigned, and a Coalition Ministry was formed by the Duke of Portland, with Charles James for and Lord North as Secretaries of State, the Ministry including the Whigs who followed Fox and the Tory supporters of North. This Coalition marked the first departure for over 60 years from the rule of strict government by party, but it soon broke up after a defeat on the India Bill introduced by Fox, and the Ministers resigned

William Pitt became Prime Minister in 1983, when in his sight year, and a general election in 1894 gave him an overwhelming majority in the House of Commons. He remained in office until 1801, when he resigned owing to the King's opposition to Catholic emancipation, and was succeeded by Henry Addington. In 1804 Pitt returned to office, but his health was failing and he died on Jan. 23, 1806. During his membership of the House of Commons, parliamentary debates were distinguished by the oratorial duels between Pitt and his great opponent Fox, and opposition and occasional support from Edmund Burke.

Pitt's second administration was followed by a National Ministry, known as "The Ministry of All the Talents," formed under Charles James Fox and Lord Grenville for the prosecution of the war with France. This Ministry was dissolved by the death of Fox in Sept. 1866, and the Duke of Portland became Prime Minister in

2807, followed by Spencer Perceval, who was assassinated in 1812. The death of Perceval was followed by the long administration of the Earl

of Liverpool (1812-27).
George IV.'s accession did not alter the political course of the country, and in 1827 George Canning, who was an aldent supporter of Pitt in his early years and had held office under him, was Prime Minister for a few months. At his death he was succeeded by Lord Goderich, who resigned in 1829, when the Duke of Wellington accepted office as Prince Minister.

The Duke of Wellington's administration was marked by the passing of Catholic emancipa-tion, largely through the aid of Robert Pea, and by means of support from the Whigs, but the Tory party had become disorganised, and

Wellington resigned in 1830.

weinington resigned in 1830.

Parkinnentary Reform had been advocated by the elder and younger Pitt, and was brought about at the beginning of William IV.'s reign in Earl Grey's administration (1830-34). The Wings had adopted (1828) the name of Liberal, and the Reformed Parliament contained a large majority of Liberals, with an advanced wing, known since 1816 as 'Radical Reformers' or Radicals. The Reformed Parliament also witnessed the growth of an Irish Party under Daniel O'Counell, formed from the Irish members brought into the House at the Union of 1801. The Tory Party also changed its name (at the mstigation of John Wilson Croker, an Irish M.P.) to Conservature, and formed a compact opposition under the leadership of Sir Robert Peel, who there is the leadership of the house the second Prime Munister for a few months (1834-32) between the two administrations of Lord Melbourne, and held office again, with a considerable Conservative majority in the House of Commons, from 1841 46. Sir Robert Peel entered office as an avowed

Protectionist, but a potato famme in Ireland, and a disastrous harvest in England brought about the repeal of the Corn Laws with Liberal When Peel retired from office the support. When reel tetred from office the Conservative party was disunited, the mal-contents or "Young England" party including Benjamin Disraeli, who had been elected M.P. for Maddstone in 1837

Free Trads was the dividing line between Conservatives and Liberals at the holls for many

years, the principal exponents being Richard John Bright. Free Trude carried the day, and from 1847 to 1865 the Government was in Liberal hands (with the exception of two short administrations under Lord Derby in 1852 and 1858), the great parliamentary figures (in addition to Cobden and Bright) being Lord John Russell, Lord Palmerston (whose Insh peerage enabled him to sit in the Commons) and William Ewart Gladstone, whose oratorical duels with Benjamin Disraeli revived the memories of Pitt and Fox.

Lord Derby was Conservative Prime Minister for a third time from 1866, with Benjamin Disraeli as leader of the House of Commons. Disraeli succeeded as Prime Minister on Loid Derby's retirement in February, 1868, but the House of Commons, elected after a Reform Lill passed by the aid of the Liberal, showed a large Liberal majority. Gladstone's first administration lasted from 1868 to 1874, when a General Election again placed Distaeli in power for six years, but in 1880 the Liberals were returned with a majority of 62, and the second Gladstone administration lasted until the Home Rule

election of x886, except for an interval of a few months in 1885, when the Conservatives were in office under Lord Salisbury.

Home Rule for Ireland temporarily displaced Free Trade as a dividing line between the two great parties in the State, and a new party had been formed in the House of Commons from Irish members pledged to Home Rule, following a movement initiated in 1871 by Isaac Butt, member for Limerick. A Home Rule resolution was defeated in the House by 314 to 52 in 1874, but the General Election of 1880 returned 60 members pledged to fight for Home Rule Butt died in 1879 and was succeeded as leader by William Shaw, who gave way in 1880 to Charles Stewart Parnell,* member for Meath and afterwards for Cork City. Government by Party

existence of a third party possessed of sufficient voting strength to turn the scale in a division. Worning strength to turn the scale in a division. Home Rule caused many secessions from the Liberal party (including Lords Hartington, Selbon ne and Derby, John Bright, G. J. Goschen, Joseph Chamberlain, Sir John Lubbook, and Sir Henry James) and resulted in the formation of a new party of Liberal-Unansis, who acted generally in concert with the Conservatives. In 1888 a lineary Election, returned a maintry of 1886 a General Election returned a majority of

majority thus became complicated through the

114 against Home Rule, and Lord Salisbury became Prime Minister as leader of the Unionist party, which was in power, except for a Liberal Administration (1892-95), until 1905, Arthur James Balfour succeeding Lord Salisbury as

Prime Minister in 1908.

In 1903, Joseph Chamberlain spoke at Birmingham on trade preference and reciprocity with the Dominions. His policy became known as I ariff Reform, and was vigorously opposed by the Liberals. Mr. Chamberlain claimed that the fiscal relations of the country had wholly changed since the days of Colden and Bright, and he advocated retaliatory tariffs when the interests of Great Britain and the Dominions were threatened. The policy was much in prominence during the election of 1906, which, however, gave the Liberals the unprecedented majority of 356. But another party had come into being, Labour members being elected in a strong force. The pioneers in the cause of Labour had hitherto professed advanced Radicalism, and the small handful of 1895 (12) and 1900 (11) was increased to sa 10 1006.

In 1905 the office of Prime Mmister, which had been in existence for nearly 200 years, was officially recognised, and its holder granted a place in the Table of Precedence

Sir Henry (ampbell-Jannerman, the new Liberal Prime Minister, died in 1908 and was succeeded by Herbert Henry Asyntibl, who remained in office until after the outbreak of the Great War. He was succeeded on Dec 7, 1216, by David Lloyd George (who had been Chanceltor of the Excheque: since 1208 at the head of a National Ministry formed from the Liberal and Conservative parties.

Home Rule had been granted to Ireland before the war, but the state of affairs in Ireland caused the Legislation to be suspended, and Irish members of the House of Commons numbered 105 until they were reduced to 13 by the passage of the Government of Iteland Act of rosz.

[·] Owing to trouble of a non-political nature the Irish Nationalists split in 1890 into Parnellites and Anti-Parnellites Parnell died in 1892 and John Redmend became leader of the Irish Home Rule party in 1892.

The Coalition, for National Government, appealed to the country in 1918 and was returned to power with a majority of 253, the Opposition consisting of 8c Irish Nationalists, 63, Labour and 85 Independent Conservatives and Liberals. The Coalition was dissolved in 1922, and government was again conducted on party lines, 347 Conservatives being returned at the General Election, the Opposition (s89) consisting mainly of 14s Labour and 59 Liberals.

Women of 30 were admitted to the Franchise at the election of 1918, but the first woman elected to Parliament (Countess Varkiewicz) did not take a scat in the House, the first to do so being Lady Astor (1919). At the dissolution in 1932 there were 15 women members. Margaret Bondfield was the first woman member of the Bondfield was the first woman member of the Cabinet and of the Privy Council. At the election of 1929 women had the vote on equal terms with men. Women so elected (up to the Dissolution in Oct. 1931) have been Labour (12), Conservatives (4), Liberal (4), and Independent (12). They have not formed a separate party. Andrew Bonar Law was the first post-war Conservative Prime Minister, to be succeeded in 1922 by Stauley Baldwin. In Newsymber 1922.

1923 by Stanley Baldwin. In November, 1923, Mr. Baldwin outlined a policy of protection for British Industries, which was vigorously opposed by Mr. Asquith and Mr. Lloyd George. In December a General Election resulted in the defeat of Mr. Baldwin's policy, although the Unionist party remained the largest, but without a clear majority (Conservatives 258, Labour 292, Liberals 256). After meeting Parliament in the following January Mr. Baldwin's Government was defeated by 328 votes to 256 on a Labour amendment to the address

on Jan. 22, 1924, J. Ramsay MacDonald, leader of the Labour party, formed the first Labour ministry, and although a minority in the House, subject to occasional reverses in the lobbics, Labour remained in office until the dissolution

in the following October.

The General Election of October 1924 was fought mainly on "Socialism or Anti-Socialism," tariff questions being excluded for the time being. The Liberal party suffered severe reverses, Mr. Asquith being unseated, and the leadership of the party devolved upon Mr Lloyd George.

Mr. Baldwin became Prime Minister for the second time, with Winston Churchill as Chancellor of the Exchequer, the House consisting of arg Conservatives, zgo Labour, and 39 Liberals.

The Conservatives remained in office until zgs, when a General Election, for the first time, returned Labour members as the largest single party (287) against 259 Conservatives and 59 Liberals.

In 1931, owing to disagreement in the Cabinet as to the method to be employed in restoring fluancial equilibrium and the balance of trade,

Mr. MacDonald placed his resignation in His Majesty's hands (Aug. 23), and accepted office next day as Prime Minister of a National Government, with a Cabinet of so members, four of whom were Labour, four Conservative and two Liberal.

The change caused a definite cleavage in the Labour party, a small number following Mr. MacDonald, while the bulk of the party went into opposition under the leadership of Arthur Henderson, a member of Mr. MacDonald's cabinet in 1224 and 1239. Mr. Lloyd George was absent from Farliament through ill-health but after negotations he declined to support the after negotations he declined to support the National Government. After carrying certain emergency measures through Parliament the National Government appealed to the country in October, 2922, the opposition consisting of the bulk of the Labour party, the official Liberals under Mr. Lloyd George, and other independents, including the New Party, under Sir Oswald Mosley, but a considerable number of Liberals formed the Liberal National Party under the leadership of Nie Luby Swom in appropriof the leadership of Sir John Simon in support of the Prime Minister.

There were 1,231 candidates for the 615 seats, made up of :-

For the National Government: National Labour (supporting Mr. MacDonald) as; Conservatives 520; Liberal Nationals 40; Liberals (under Sir Heibert Samuel) 86; Independent Nationals 3.

Against · Laboui (supporting Mr. Henderson) 513; Liberals (following Mr. Lloyd George) 34; Sir O. Mosley's party 24; Communists 25.

Women candidates numbered 62, of whom 21 were for the Government and 41 against

The election resulted in the return of the National Government by the largest majority ever known in the House of Commons, 497, made up as shown on p. 181.

Of the Ministers who resigned on Aug. 23, Lord Sankey (Lord Chancellor), Mr. Snowden (Exchequer) and Mr. Thomas (Dominions), joined Mr. MacDonald in the National Labour Party. At the General Election in October Mr. MacDonald (Scaham) and Mr. Thomas (Derby) were returned by their former Constituences, while Mr. Snowden (Colne Valley) did not seek re-election. All other members of the Labour Cabinat of 1939-1931 were defeated, with the single exception of Mr. Lansbury (Bow and Bromley Division of Poplar).

The National Ministry was reconstructed on Nov. 5, further appointments being made during the month. In its final form the Ministry (see p. 169) numbered 64 (Cabinet 20, other Ministers 44), drawn from the different Parties as under ..

ALLOTMENTS FOR UNEMPLOYED.

Towards the end of 1930 a Committee was formed by the Government under the Chairmanformed by the Government under the Charlman-ship of Sir William A. Waterlow, Bart., K.B.R., to assist unemployed and partially unemployed men in obtaining and cultivating allotments. This plan was put forward not only for the economic value of their homes but also "in order to provide occupation for both mind and body, and to bring an interest into the lives of body, and to bring an interest into the lives of those who, in these difficult times, may lose hope and spirit." The necessary statutory powers were laber obtained under the Agri-cultural Land (Utilisation) Act, 1937. The pro-vision of the necessary land was the duty of the local authorities, and it was their task to find out what land was available for cultivation as allotment-gardens, and what were the numbers of unemployed men and women who were likely to take advantage of any facilities which might be provided for them. In the areas of some authorities where successful efforts had already been made to secure the cultivation of allotmentgardens by the unemployed, there were in exist-ence Committees for maintaining and extending such cultivation. In these cases it was not necessary for new organisations to be set up, but where no such Committees were in existence Voluntary Committees were set up varying according to local needs and circumstances, but usually consisting of representatives of the Trades Council, the manager of the local Labour Exchange, and the county Horticultural Adviser. Each Voluntary Committee appointed a Secretary and a Chairman, whose first task was to keep closely in touch with the ('entral Executive Committee which was set up by the Minister for the purpose of promoting generally the cultivation of allotment-cardens by the unemployed. Supplies of seeds, fertilisers, &c., were available at very low rates, but as supplies were restricted, and to prevent abuse, it was generally required that the financial status of the applicant was in accordance with the following scale. Total net weekly income after deducting

Man and wife with a childen or over ... 388
This assistance applied not only to unemployed or partly unemployed persons who alroady had allotment-gardens, but also to those persons to whom plots were newly provided. For approximately 6s, the following supplies could be obtained:—4 stones of spicial fertiliser, 4 stones of potatoes, and a special collection of 33 different kinds of garden seeds (or a smaller amount as selected by the member), while a spice or folk was provided at zz. each, and z cwt. of line was given free when specially recommended. For this outlay of 6s, therefore, a plot-holder had sufficient seeds to plant and cultivate a zo-rod allotment. To assist the plot-holder furthen, it was arranged that payment for seeds could be made by instalments either weekly or as arranged by the Committee. It has been calculated that by this means about 64,000 membloyed men throughout England and Wales have been assisted to grow their own food; and in the Sheffield area alone, it was reported that z.485 men were working their allotments, and

that at a cost of about £1,500 vegetables to an approximate value of £15,000 were being grown. It has now been aunounced by the Minister of Agriculture and Fisheries, however, that in consequence of the present national emergency, no financial assistance will be forthcoming in connection with this scheme for the 1932 coropping season.

CAPITAL PUNISHMENT

THE Report of the Select Committee of the Till Report of the Select Committee of the House of Commons on Capital Prinshment appointed in December, 1929, was Issued in December, 1929, was Issued in the Committee stated that their investigations fully warranted a recommendation for the immediate passing of a Bill to provide for the abolition of the death penalty for an experimental period of five years in cases tried by dvil courts in time of peace, and tried by civil courts in time of peace, and that in the meantime the House of Commons should pass a resolution declaring that the Home Secretary and the Secretary of State for Scotland should, in tendering advice as to the exercise of the Royal prerogative of mercy, recommend in each case the commutation of the death sentence, the penalty to be substituted being that now attached to reprieved murderers, interpreted and administered in the same way as at present. In the event, however, of Parliament deciding to maintain the death penalty, alternative recom-mendations were made; the McNaghten Rules on the subject of insanity to be revised so as to give fuller scope to general medical considera-tions and to extend the area of criminal responsibility in the case of the mentally defective and insane; the death penalty to continue to apply to women on the same terms as men; as ar is the age when full civil responsibility is assumed, no person below this age to be sentenced to death; a still larger exercise of the Royal prerogative to be made and, by means of a resolution of the House of Commons, the line that has come through precedent to mark the limit of its application to be laised. Amongst the statistics relating to capital crime given in the report it is stated that in 1929 the number of executions was almost the lowest on record, 7 for England and Wales, and none in Scotland, while the average for the whole country for the 10 years, rage to 1929, was 147, during this century 471 persons have been executed in England and Wales and 327 reprieved, the corresponding figures for Scotland being 22 and 125 respectively. The value of the Report was scrously dimmished by the fact that, of the z5 members of the Committee, the 6 Conservatives were so opposed to the report as drafted that, being denied the opportunity of preparing an alternative, they withdrew and took no further part in the proceedings. As, according to the practice of Select Committees, the Report was not signed and no minority report was possible, there was no means of ascertaining whether it represented the unanimous opinion of the remaining members of the Committee, and in consequence it was criticised as lacking the authority demanded by the nature of the subject 1 p to the present Parliament has taken no further steps in the matter.

THE CENSUS, 1931,

THE fourteenth census of the population of Great Britain was taken on Sunday, April 26, 1931, and in order to meet the more urgent

purposes for which the results were awaited. a preliminary report dealing almost entirely with Eugland and Wales was assued on July 6; the figures are provisional, but judging by past experience no material discrepancy is anticipated. The totals for 1931 are the largest hitherto recorded:—

ngan,	2932. I	inci e use (+) or Decrease(-).
England35,230,225	37,354,917	+60%
Wales 2,656,474	2,593,014	- 2.4%
37,886,699	39, 94 7,931	+ 5.5%
Scotland 4,882,497	4,842,554	-0.8%

As regards England and Wales, the density is 68g persons per square mile, far higher than that of any other country recorded, with the possible exception of Belgium, and more than double those of a large majority of other countries. With the sole exception of the war decade, rorr-ar, the numerical increase of a,ofr.aga is less than that of any decennium since 1861, and the percentage increase is only half or less than half of any previously recorded The comparative lowness of this increase is stated in the report to be wholly due to the enormous reduction in the number of births 1921-31, although marriage rates have been well maintained; the total births are 16:3 per cent. fewer than in 1911-21, which covered the war years, when the birth rate sank to a level lower than any before recorded, and are 25'4 per cent. less than the normal decennium zoor-zz; the full significance of the fall will be but dimly appreciated for many years to come. The present rate of 16'3 per 1,000 is lower than in any country except Sweden, and is regarded as definitely insufficient to maintain a stationary population in the future, as the Registrar-General's estimate of the birth rate necessary to avoid a future decline in the population is about x9½ per thousand. A partial set-off against the decline in births is to be found in the death rate, which for the decade x9xx-3x is lower than any previously recorded rate; the reduction is more than xo per cent., which, if allowance be made for the increasing age and numbers of the population exposed to risk, represents a reduction in true mortality of more like 20 per cent. compared with 1911-21 (excluding deaths on active service), or 30 per cent. compared with zooz-zz.

A further stage is recorded in the steadily increasing predominance of the urban as com-pared with the rural element of the population, the proportion now being roughly 80 and 20 per cent. respectively as compared with 79'3 and 20'7 in xgax and 78'x and xx'g in xgx; this is not due to a drift from the countryside to the towns due to developing industries, but largely to the encroachment of urban upon rural areas consequent upon the natural development of the former. More than one-half of the total population is aggregated in comparatively dense units of 50,000 and upwards, and one-quarter in the 13 largest towns (counting London as one) with populations exceeding 250,000. The Census figures indicate that development is concentrated primarily in the South-Eastern counties, and that the London area is growing at the expense not so much of rural areas as of the provincial towns, particularly those of South Wales and of the North of England.

The figures for Greater London, which com-

prise the County of London and the Outer Ring, and coincides with the area of the Metropolitan and City of London Police Districts, are as follows :-

29	er. 19	32. Increase (+) o Decrease (-).	r
County of London 4,48 Outer Ring 2,999	1,523 4,39 1,678 3,80	96,821 -2'0% 95,997 +27'0%	
Greater London 7,48c	,201 8,20	02,818 +9'7%	

It is considered that further time is required to prove whether the movement towards the metropolis, which has been somewhat precipitate, is more than a transient phase during the widespread industrial depression to be succeeded by an equally marked reaction if and when the older industries regain their former established positions.

Excluding the County of London, there are now xxx towns with populations exceeding 50,000 as compared with xoo in xoax; the figures for the six largest towns are :-

;	zg a z	1931.	Increase.
Birmingham . 92	12, 167	1,002,413	8.7%
Liverpool 8c	5,046	855,539	6.3%
Manchester 73	35,774	766,333	4.3%
Sheffield 5		511,742	0.0%
Leeds 40	63, x22	484,789	4'2%
Bristol 3	77,018	396,9x8	5'3"

The preponderance of females over males. which in rost rose as a direct result of the war, shows a decrease, but is nevertheless greater than in 1911, the proportion to 1,000 males being 1,087 in 1931, as compared with 1,096 in 1921 and 1,068 in 1911.

The Census operations were handicapped by events and circumstances described at some length in the Report, and a complete enumeration only achieved by exceptional efforts, the authorities in face of very general demands for exclusive recruitment of unemployed labour were of opinion that compliance would have meant disaster, and their refusal was felt to be instified by subsequent experience; a careful and prudently conceived measure of resort to the unemployed, in the words of the Registrar-General, was, however, attempted, and the 40,016 enumerators for the x,770 registration subdistricts were composed as follows:—

12,704 Unemployed.

Local Authority officers or employees. Other employed or retired persons. 6,347 19,144

A tribute is paid to the preparatory word of explanation by the Press, B.B.C. wireless tall large industrial concerns, and instruction in elementary and other schools by the co-operation of the Board of Education, local education authorities and school teachers.

CIVIL SERVICE COMMISSION.

A DIFFICULT task was completed during zozz by the Royal Commission on the Civil Service, which under the chairmanship of Lord Tomlin, examined nearly two hundred problems and in examined nearly two induced problems and in its report made a number of important recom-mendations. On the question of remuneration in the Service, the Commission found no support for the view that there had been a lowering in the standard of remuneration as compared with that in the community generally. The claim

for a minimum wage of £3 ros. od. a week was rejected, as was that suggesting that Civil servants should be regarded as "a highly selected class in each field of labour" and therefore class in each near or isolar and inserence treated better than their fellow countrymen. The Commissioners were satisfied that the present general standard of remuneration of Civil servants was reasonable in the light of the wage levels prevailing, but they recommended that the remuneration should cease to be varied automatically in accordance with changes in the cost-of-living figure and that the practice should he abandoned of attempting periodic comprehensive reviews of the remuneration of all nonindustrial Civil servants on the basis of a single formula. The majority of the Commissioners recommended that cost-of-living bonus should forthwith be consolidated with basic salary and that the bonus should meantime be considered at the then existing rate. A review of the at the then existing rate. A toric consolidated rates should be made early in 1934, in their opinion, to consider what changes, if any, were necessary in the light of changes in general wage levels. They expressed the view that the fall in bonus had resulted in reductions which were felt most by adult Civil servants with pay, inclusive of bouns, not exceeding 70s. a week. The proposed consolidated rates would give £80 to those with a present salary of £77 10s. 6od. £718 for £152, and £755 for £152, above which the proposed rate would mean a small reduction. New future scales were also recommended, but in view of the economic attuation an immediate increase in salaries above £500 here, was not recompiled as which were felt most by adult Civil servants above £500 basic was not regarded as practicable A few minor changes in the methods of recruitment were proposed, and in general the system of promotion was regarded as satisfactory. In filling the higher posts in the Service, the Commissioners declared, merit should be the only consideration; in the middle langes merit should be the determining factor but in the lower ranges seniority and length of service would necessarily carry weight. Even in service would necessarily carry weight. Even in the lower ranges, however, steps were urged to ensure that exceptional ment should be rewarded by accelerated promotion. "In regard to the Service generally," it was added, "the factor of seniority is unlikely to be undervalued, and we deprecate the exercise of any pressure designed to stress the claims of seniority as against exceptional merit." The Commission considered the question of the employment of women in the Service and agreed that the object should be to secure for the State the advantage of the services of women wherever those services would best promote its interests. Speaking generally, the Commissioners held that the lest course was to adopt the policy of "a fair field and no favour," but that rule must be subject to modificatious in certain areas of the Service. They were divided almost equally on the question of equal pay for amost equally of the destort of the opera-tion of the marriage bar was also recorded. A majority approved of the retention of the bar but agreed to some provision to meet objections as to the loss of experienced workers. Commission as a whole agreed that if a discretionary power was to be adopted it should be a power which was capable of use. The view was expressed that the time had come when the practice of reserving temporary clerical posts to ex-Service personnel should be changed and that in future the main clerical classes should be recruited by open competition.

CONFERENCES.

WE are reaching a stage in the world's progress when the wisdom of "taking council together" is now widely acknowledged. Congresses and conferences are now the rule in almost every movement, profession and trade. A selective list follows, the choice being determined by their variety. Reference to many others will be found elsewhere in the ALMARACK. A full list with due resumes of proceedings could not be compressed within the compass of this volume.

Int. Con. of the World Asm. for Adult Education, Vienna, Aug. 20-12, Mr. L. Tyson, U.S.A., Prosident. B.C.C. and L.C.C. were officially represented.

7th An. Convention of Advertising Association, Glasgow, June 20-24, Sir J. Gomer Berry, President. Delegates met to "re-examine functions of advertising in relation to trade, interpret its true value and importance to the general public, consider means for maintaining its effective use, power, and adaptability to changed conditions. Lt Col. E F. Lawson, in reforming to lack of confidence in nation, said advertising was the means to remove that depressing influence.

19th Session, Int. Con. for Air Navigation, London, June 1-6. Lt. (10). F. C. Shelmerdine presided over representatives from 23 States. Matters dealt with included: Minimum alrevorthiness certificates, new international magnetin modification of signs used, new code for meteorological messages and methods for their communication, modification of night navigation lights, collection of details of cable obstructions, sanitary control of air navigation. Next session —May, 932, in Paris

British Commoncealth Education Com., Loudon, July 24-30. Sir P. Nunn, President. Sir hundred delegates from Britain and Overseas Empire reviewed progress and needs in education to meet changing conditions of life within the Empire.

Int. Con. on Coal Mining Industry in Europe, London, Sept. 30-Oct. Mr Evan Williams (Mining Assn. 6t. Brt.), President Colliery owners sent representatives from Belgnun, Czechoslovakin, France, Germany, Netherlands and Poland. Methods were sought for meeting the economic position of the coal industry; an agreed statement was achieved, and thus was to be remitted for consideration by national organisations.

zsth Int. Cotton Con., Paris, June. M. Laederich, Chairman. Present over-production, under consumption, loss of markets, rationalisation, passing of cotton spinning from Lancashive to Japan, failure of Britam to work double shifts in mills, trade restrictions, finding of new uses for cotton were included in the discussions.

and Triennial Con. of Empire Surveyors, Colonial Office, July. Methods of survey and issue of map discussed. Sir E. Dowson arranged 300 exhibits collected in mapping, photographing and surveying as a basis for a permanent exhibition. Empire Survey Review, recommended at 1938 Conference, made its first quarterly appearance in July 1921.

ance in July, 1931.

Empire Wood Con., Melbouine, June 22-24.

Empire Wood Con., Melbouine, June 22-24.

Sir G. Waddell (Chairman, Woolgrowers' Con.),

President. Great Britain, South Africa, New
Zealand, all Australian States were represented.

Five different stabilisation plans were produced
and rojected. Closer co-operation between
wool producing countries within Empire was

established for marketing with co-ordination in publicity and research. Australian and South African growers agreed to interchange of complete statistics and reports.

Int. Con. of Geography, Paris, Sept. 16-22.
Amongst Soo delegates were official remesentatives from so Governments, including British War Office and S. Kens. Science Museum.

Int. Illumination Con., London, Glasgow, Sheffield, Cambridge, &c., Sept. z-zz. Mr. C. C. Paterson, President. Methods of lighting under all conditions discussed. British conditions somewhat criticised in being left to Local Authorities without any sense of national standardisation A month of floodlighting of public the transfer of the first of th exhibitions. Many provincial towns had like displays including Dover Castle, Durham Cathe-dral and Hexham Abbey.

27th Meeting of Institute of International Lanc (Founded: Gheut, 1873), Cambridge, Aug. 3-8. Prof. Pearce Higgins, President Discussions included mandates, minorities, navigation of nivers, limit of state criminal jurisdiction.

Inter-Parliamentary Commercial Con. was held in Prague, May. Sir J. S. Allen, M.P. W. Derby, was Chairman of the British Empire Work of League of Nations, tariff Delegation walls and trade development were discussed, but decisions or opinions of delegates have no binding authority from individual Parliaments.

27th Con of Inter-Parlamentary Union, Bucharert, Oct x-6, M. Lafontame (Belgum). President Surplus production, tariffs, arma-ments were again topics. The Union draws its delegates from pailmentary bodies but its resolutions have no binding force and are not recognised officially by Governments.

recognisco omessiy by dovernments. Discussions, however prepare the way for legislation 54th An. Con. Labrary Assn.. Cheltenham, Aug 3z-Sept 3. Lt.-Col. J. M. Mitchell, Carnegie U.K. Truts, President. Dean Ingo introduced opening session with discussion on library. services for hospital patients, Sir B. Bruce-Porter following with suggestion for nationally organised plan. Other debates viewed library

organised p'nn. Other debates viewed library policy from all aspects.

Int.-Fed of Library Assns. Cheltenham, Aug. 29. M. Collign, Stockholm, President Dr. Bishop, Michigan, U.S. A, drew attention to absence in Bittain and U.S. A of any organisation for registering published works. Only brooks included in statistics were those for which copyright had been applied. Result was ferrored to other countries where a reas publics. figures for other countries where every publica-tion had to be registered often exceeded those of Britan and U.S.A.

and Int. Con. of Linguists, Geneva, Aug. 25-29, Pro. Chas. Bally, President. Discussions covered adoption of a recognised medium as an international artificial language, effects and influences on development of languages, origins (Sir R. Paget

dealt with gestural origin, phonetics and linguistics. Next congress will be in Rome, 1934.

2st Int Con. of Neurologists, Geneva and Berne, Aug. 32-Sopt. 5. Professor Sachs (U.S.A.), President. A wide survey of the relation between nerve force and life was made by Seo medical experts, said Int. Orthodontic Con., London, July. (First held, New York, rgsf.) Mr. J. H. Badcock, President. Correction of teeth irregularities in children with subsequent prevention, thus benefiting health and altering shape of face. rith Int. Con. of Navigation, Venice, Sept. 1s-r6. Signor Gurati, President. King of Raly attended opening meeting. 2rd Int. Motor-Boat Meeting was held at same time.

est Int. Con. on Public Cleansing, London, uly. Mr. J. C. Dawes, Ministry of Health, resident. Various methods employed in town President.

cleansing, sanitation, disposal of refuse.

zet Nat. Con. of Rhaldmnancy (divination by rods). Rome, March. Advantages that rhabdo mancers could confer on agriculture were discussed Practical examples were given of divining metals and water supplies.

and Int. Con. of Science and Technology, London, June-July. Dr. C. Singer, President. Importance of science in teaching of history relation between biological and physical science;

interdependence of pure and applied science; interdependence of pure and applied science set Imperal Sugar Cane Research Con., London, July. Conference was called by Empire Marketing Board to survey the scientific needs of the cane sugar industry of the British Empire.

of the cane sugar industry of the Brush Empire, ath (quinquennial) Con. of Universities of the Empire. Opened by Prince of Wales, as President, Guildhall, London, July 3. Seventy Universities were represented by 240 delegates Alectings began at Ediuburgh, July 6. An official luncheon to welcome delegates was given by Government.

World Social Economic Con., Amsterdam, ugust Proposals put forward for stablisation August of world industry by world scale application of principles of scientific business management; war debt moratorium for five years; maintenance of standards of living in advanced countries with levelling up of those in less

developed nations

17th Zunist Con., Basel, June 30-July 15. Dr. Weizman was officially President, but during his absence Mr. N. Sokolow acted and was elected new President Development of Jewish industry in Palestine with establishment of corporations in all countries under a single association to forward business was approved. Forces were to be mobilised to support the Palestine Foundation Fund. The Revisionists, who are opposed to Jewish Agency extension, suffered defeat for their proposal to terminate agreement between Zionists and non-Zionists. Congress resolved to support Government's land development scheme subject to absolute equality of Arabs and Jews.

yast An. Meeting of British Chambers of Com-merce was held in London April 23-4, Sir Walter Raine in Chair. Need for import duties on manufactured goods, re-consideration of expensive social services, and consideration of Russian trading methods were amongst accepted resolutions, but one objecting to the coupon system of trading was rejected

6th Bienmal Con. of International Chamber of Commerce took place at Washinston, in May, President Hoover opening the assembly with a speech that suggested fatility of co-operation between Europe and U.S.A. until the armament

problem had been surmounted.

CO-OPERATION.

THE essential feature of co-operation is the association of individuals, either as communers to purchase goods or services for their own consumption, or as producers to market those of their own production. The object of co-operation is to cheapen commodities to the consumer

or to obtain a better selling price for the producer. Co-operative societies are registered under the Industrial and Provident Societies Acts, but to obtain registration under these Acts it is not essential for a society to be cooperative in character provided that it restricts the interest which any member may have or the micrest which may hember may have or claim in its shares to £seo, and otherwise complies with the statutory requirements. In Great Britain, judged by its growth, the cooperation of consumers has been remarkably successful, but co-operation of producers constitutions. paratively slow and often a failure. A certain measure of production has been undertaken by the retail co-operative societies, and by the wholesale buying agencies established by them. but such production is mostly an assembly of costly materials produced elsewhere into more finished products, and adventures into the more basic forms of industry, such as agriculture and mining, have not as a rule been attended with so much success There have been many proposals to link up the two lines along which cooperation is developing, and to make the one type of association serve the interests both of consumer and producer, but owing to the divergence of interest and the difficulty of arriving at a satisfactory and permanent basis of adjustment, the efforts in this direction have as yet been in the main unsuccessful.

(a) Co-operation of Consumers.—This form of co-operation in Great Britain has been based on an ideal, which in a large measure has been responsible for its successful development Co-operative trading solutions are so con-stituted that interest on share capital is limited to a fixed rate and members' control is not increased in proportion to their shareholding after meeting interest on share capital, any surplus arising on trading is returned to the purchaser in proportion to the value of his purchases. Frequently, however, members do not exercise their right to withdraw in cash their share interest and dividends on purchases. but allow them to accumulate and so provide further working capital for the extension of the movement. In almost any year, societies as a whole, if they were able to alter their constitution and withhold dividends on purchases, could pay a so per cent, dividend on their share capital in addition to the customary fixed rate of interest of from 4-5 per cent. Moreover, reserves are continually piling up in the form of goodwill with every extension of business. They are never distributed, but are handed down free of charge from one generation of co-operators to another. Co-operation among consumers thus grows steadily in spite of outside competition and industrial set-backs. In 1930 there were 1,248 retail, 3 wholesale, and 68 productive † associations controlled by consumers. Sales of the retail societies totalled £216,227,000 and more than half these supplies were obtained from the wholesale societies whose sales at wholesale prices totalled £104,346,000. Sales by the productive societies amounted to only #3,483,000. These r,3rg consumers societies had an aggregate membership of 6,372,000 or 239,000 more than in the preceding year, and capital (share and loan) and reserves of £304,875,000. The societies employed in all some 244,500 persons, and their total wages bill amounted to £33,914,000. The aggregate dis-

posable surplus for 1930 of the retail societies amounted to £25,715,000, out of which the fixed share interest charges absorbed £4,800,000, and dividends on sales £20,433,000, or about 12. 12d. in the £ on the retail sales. The following statement shows the productive output by the three classes of consumers' societies in Great Britain in 1930:—

-	Value of Productions (including Materials)	Cost of Vaterials used	No of Empioyees engaged	Salaries and Wagos.
				-
l	£	ا کد		- ₹
Food and To-				
farm and damy	57.552,000	44.485,000	29,400	4,222,000
Z Clothing and Textiles includ- ing boot mak ing and repairs	8,46x,000	4 730,0co	25,900	2,822,000
3. Building, Wood working and Engineering		2 836,000	x2 800	3,142,000
4. Other Indus-	8 203,000	4 715 000	17,300	2,073,000
Total	79,600,000	56,806 000	85,400	11,249,000

Of the goods distributed by the retail societies, still at most only one-seventh of the whole-sale value is created within the movement. In contrast to the volume of production undertaken by consumers societies, it may be mentioned that co-operation by producers (i.e. associations of workpeople comprising some 9,200 employees) were responsible in 293 for productions valued at only £3,347,000 (including materials), and that three-fourths of this total convergence dictions and test the good service of the contractions.

represented clothing and textile goods.

(a) Cooperation in Agriculture.*—Societies enged in agricultural co-operation fall into three groups. (c) Requirement societies, whose principal function is to supply their members with seeds, manures, implements, dairy utensils, &c.; (a) Produce societies whose chief object is to market members' produce; and (3) Serme societies which supply some agriculture service, eg., threshing As will be seen from the following comparative statements for these three groups, agricultural co-operation in Gt Britain, which showed signs of expansion during the war and immediate post-waryears, has since declined, a decrease since space of 34 per cent. in the number of trading societies (groups x and a) being societies and other societies including some of the larger county fainmers' associations, baccompanied by a decline of 2x per cent. in membership. Many societies including some of the larger county fainmers' associations, baccompanied the past few years, finding themselves in a hopelessly insolvent position, and consequently unable to obtain furtherworking capital or credit. Many of the consumers' societies, too, have ceased to undertake fairing as an anylliary to their ordinary business. In the service societies, but there has since been a reduction

⁺ Including laundries

^{*} A few societies connected with fishing are included; their transactions, however, were relatively very small;

of nearly 14 per cent. in the number of societies 1 and of is per cent. in the acreage under cultivation.

(1) REQUIREMENT SOCIETIES.

·	Number of Societies.	Member- ship.	Sales.
1914	. 274	29,603	1,816,000
IQ80	. 667	¥¥5,553	13,260,000
1988	· 395	87,217	8,717,000
1929	- 374	85,484	8,482,000

This group in 1989 included 273 farmers' societies with 70,972 members. Their sales totalled £8,339,000 (including produce £908,000). The remaining societies included in the figures for 1999 were in respect of associations of allot-ment holders for supplying their members with requisites. The particulars for 1914 and 1920 labeled also figures in respect of the Agricultural Wholesale Society, Ltd., which went into liquida-tion in xezz with a deficiency of nearly £300,000.

(a) PRODUCE SOCIETIES.

Number of Societies.	Member- ship	Sales.
1914 129	10,401 45,688	936,000 8,803,000
1928 287 1929 †291	38,078 39,959	7,143,000 7,480,000

The increase in the sales figure in rose was The increase in the sales figure in 1929 was accounted for mainly by increases recorded by the Scottish Milk Agency, Ltd (£424,000), several newly-formed egg-marketing societics (£135,000), and a new farmers' abattoir m Scotland (£120,000), but these were partly offset by a decrease of £365,000 in sales by English Hop Growers, Ltd., a co-operative central selling agency established in 1925, which found it necessary to go into liquidation in 1920. The successful operations of the small group of 33 Scottish sheep stock clubs again call for mention in the depression which prevailed among agricultural societies generally in 1929. These societies returned the largest aggregate profit for any group of produce societies in 1929, and by the end of the year their accumulated reserves amounted to double their share capital.

The produce marketed by the agr societies in 1929 was of the following descriptions and

amounts :—	England and	Scotland

† In addition 143 consumers' co-operative societies had farming and dairying departments, the value of whose produce amounted to £2 676,000

This group in rese included 666 associations whose objects are to provide their members with small holdings or allotments. The total membership for these associations was 140,085, of whom co, soo were tenants with about \$3,700

acres under cultivation.

Sales by all agricultural trading societies in Great Britain, including the agricultural produce of consumers' societies, totalled £17,638,000, societies in England and Wales disposing of societies in England at £7,305,000, and produce £6,599,000, whilst societies in Scotland sold requirements valued at £479,000, and produce to

the value of £3,355,000.

(c) Co-operation in Housing.—The following table shows the phenomenal growth of the Building Society movement in Great Britain, the figures given relating to all societies registered under the Building Societies Acts. The function of these societies is to assist their members in acquiring dwelling houses, business premises, &c., for occupation or investment, by making loans upon the security of a mortgage on the property.

Advanced during year \$,762,000 No of Members Total Mortgage Annetu. 61,050,000 1914 . 627,240 1920 747,589 . 1,865,389* 25,005,000 68,812,000 1920 268,141,000 74,719,000 1930 ... 1,449,432* 316,314,000

Building Societies are not wholly co-operative in character. It is true that to some extent they are managed by the borrowers, who themselves provide a substantial part of the capital required for advances, but, at the same time, they are open to the membership of persons whose main concern is to find a profitable outlet for their capital. Further statistics relating to Building Societies and a list of the principal ones will be found on pp. 47z-73. The above figures for Bulding Societies completely dwarf the operations of those societies registered under the Industrial and Provident Societies Acts which are connected in various ways with the provision of housing accommodation. As some of the societies registered under the latter Acts are not co-operative in character, and in many the tenants have no interestin the societies otherwise than as tenants, it would seem that co-operation among con-sumers generally (i.e. tenants) in the provision of housing has made no great headway. At the end of 1929 the 288 societies registered under the Industrial and Provident Societies Acts had and reserves) amounting to £12,462,000. Rents receivable by these societies aggregated £753,000 and resulted in a net profit of £66,000 after meeting share interest charges amounting to £40,000. A number of these societies have received State. aid in the form of loans and subsidies. Of the various co-operative housing schemes, mention may be made of the Bournville Village Trust, which has been followed by a number of similar societies, and of societies promoted by colliery and railway companies. In the latter, estates are being developed by the Great Western Railway Co. at Acton and Hayes. Montion may also be made of societies of a semi-philanthropic nature, such as those in Kensington, St. Pancras and Chelsea, which have recently been formed

O These figures represent the number of share investors. The number of depositors was returned at 425,000 and the number of borrowers 720,000 at the end of 1930.

for the conversion of slum property into blocks of residential flats; in the first mentioned the inclusive weekly rentals for flats ranging from 9s. 6d. for s rooms to x8s. 6d. for 4 rooms with addition of bathroom and scullery, with, in certain circumstances, a reduction in the rent by xs. per dependent child. A number of co-operative stores run building or mottgage departments as auxiliaries to their trading departments, and are making headway. For example, the Bolton Co-operative Society, Ltd., which has assisted x3,000 of its members in house purchase, advanced a further £x30,000 in the sound that the Co-operative Society, Ltd., in the same year made further advances of £x05,000. In the south, x,358 houses had been completed by the Royal Arsenal Co-operative Society, Ltd., on its Bostall estate up to the end of x920.

(d) Co-operation in Recreation. - Working men's clubs are registered under either the Friendly Societies Acts or the Industrial and Provident Societies Acts Most of the older clubs were registered under the former Acts, but since 1920 a large number of clubs, particularly those formed for ex-service men, have been registered as Industrial and Provident Societies. Under the two Acts there were 4,448 clubs at the end of 1929 and they had 1,343,000 members. The income of these institutions is mainly derived from sales of refreshments, which amounted to £10,448,000 m 1939, an average of about 2, od per member per week. The balance-sheet value of premises and furniture owned by the clubs was about £8,000,000, and their net balance of assets over all liabilities £3,700,000. The premises, etc., are usually acquired with the aid of loans, which are often obtained from local brewers, or in the ex-service men's clubs from the United Services Fund The older clubs have usually been able to repay their loans, but the newer clubs established for ex-service men are not required to make any periodical repayment to the United Services Fund of their loans, and do not ordinarily make any provision for repayment. In addition to social clubs, special authorities have been given by the Treasury for registration under the Friendly Societies Acts of societies whose object is the promotion of music or sports and games. The advantage of registering such lodies is either not generally known or is ignored, as only a few societies, such as brass bands or quoits clubs, have been registered.

(c) Co-operation in Investment.—A few societies have been registered in the past under the Industrial and Provident Societies Acts with the object of enabling members to co-operate in the investment of their savings, but such societies were of relatively small importance until the advent of the First Co-operative Investment Trust, Ltd. Second, Third and Fourth Trusts have been formed under the same direction, and have received a large measure of public support. The early successes of these institutions led to the formation by other promoters of a number of trusts having similar objects and registered under the Industrial and Provident Societies Acts, but most of these have made little progress. The share capital of the original series of co-operative trusts at the end of their financial years in 1920, or early 1931, was "First," £1.553.943; "Second," £1.565.856; "Third, £4.566.93; "Fourth," £69.214. The total number of share investors in these four trusts at the end

of 1930 was 43,546. The trusts have suffered heavily from the fall in market values of securities, but they contrived to maintain a dividend at the rate of 4 per cent. per annum for the second half of 1930, although their balance sheets showed their investments at values far in excess of market prices, against which their reserves, even in their entirety, offered but a very slender margin of cover. The excess of depreciation beyond reserves was much increased in 1930, and at the end of the year represented 50 per cent. of book values in the "First" and 20 per cent. in the "Second" Trusts. The "First" added about £13,000 to its reserves and undistributed profit for 1930, while the "Second" drew upon its past reserves to the extent of about £8,000. These amounts, however, bore no comparison to the extent of the fall in value of investments suffered during the year, viz, £270,000 in the "First" Trust and £200,000 in the "Second". The experience of the "Tirut" and "Fou. th" Trusts was similar, although the volume of their business was very much smaller. A notable feature of these four trusts is that about two-thirds of their investments are outside Great Britain, the Irish Free State, and the Britash Domlinous. In view of this distribution of investments and the changes which have taken place both in the value of sterling and securities, the balance sheets of these institutions for the second half of 1931

CO-PARTNERSHIP.

An account of Profit-sharing and Co-partnership in 1930, based on inquries made by the Ministry of Labour, is given in the 'uly, 1931, issue of the 'Ministry of Labour Gazette.' From this article, which relates to Great Britain and Northern Ireland, it appears that relatively small progress has been made in adapting schemes based on profit-sharing principles to industry. The total number of undertakings known to have schemes in operation at the end of 1930 was 491. The total number of workpeople employed by those undertakings was 503,000, and of these, 238,000 participated in the benefit of the schemes. Information was available as to the bonus paid under 422 schemes, and the average amount distributed per head was £9 182, and represented an average addition of 55 per cent. to earnings.

170 of the schemes were operated in conjunction with Co-operative societies. The industries on businesses with which the remaining schemes were in operation were as follows:—

Industry or Business	No of Firms.	No of Work- people Par- ticipating
Agriculture	6	300
Glass, chemicals, &c	17	22,000
Metal, engineering, &c		21,100
Textile	44 28	20,600
Food and drink	29	28,500
Paper, printing, &c	29	8,600
Gas, water and electricity .	69	47,500
Insurance, banking, &c	12	23,200
Merchants, warehousemen.	40	11,900
Miscellaneous	47	20,600
Total	321	205,200

The types of schemes comprise "Share Issue" schemes; "Deposit" schemes (where interest varying with profits is paid on employees' deposits); and schemes where (a) bonus is paid in cash or credited to a savings or deposit account; (b) bonus is retained in a provident, supersunnation or similar fund; (c) bonus is paid in shares or invested in capital of undertaking; and (d) bonus is paid in other ways.

It will be gathered from the above particulars

that only a small proportion of workpeople are affected by profit-sharing schemes, and that the total amount distributed in bonus is a relatively small proportion of the total wage distribution. The article includes a great deal of statistical and other detail as to the schemes in operation

and those introduced or terminated in 1939, of which there were only 4 and 8 respectively.

COST OF LIVING.

RETAIL prices have not fallen to the same extent as costs of raw materials and imported goods. Labour in manufacture and merchandising has added considerably to prices, so that the consumers have not felt the benefit to anything approaching the full of the world-wide drop in price levels. If wheat alone determined the price of the loaf, bread would have been cheaper than in Victorian times. Great Britain enjoyed a gradual fall in food prices thanks to the over-production in the world, but the tide began to by with the gold standard change and the lowering of the £r value in the exchanges. Surplus from abroad will still assist in keeping prices on a lower grade, but the adverse exchanges must raise the prices of commodities since Britain depends so much upon imported foods. On July 2, 1921, the Minister of Labour stated in the House of Commons that compared with July, 2914, weekly full-time wages showed an increase of 70 per cent, and hourly rates 90-95 per cent. Taking into consideration the 45 per cent. increase in cost of living, the average increase in real wages appeared to have been 17 in weekly and 30-35 per cent in hourly rates in the 17 years.

The following figures show official Ministry of Labour changes in living costs and in wages of

reporting industries :-

CRIME IN LONDON.

IF Landon is any criterion for the whole of the country, crime is on the increase. In his report for his last full year of office, Lord Byng, the late Commissioner of the Metropolitan Police indicated that all classes of crime in the area showed a large increase during 1930, as compared with the preceding year. Indictable offences numbered 20,553 against 27,654 in 1929, and the latter figure was higher than in 1928. The number of persons proceeded against for these offences also showed a substantial increase; the number was 13,000, while in 1929 it was 11,322. The number of murders was it was 11,332. The number of murders was exceptionally low in 1939 (10), but in 1930 it rose again to the average number for the past 20 year (az). In nine of these cases the murderer year (ar). In line of these cases the intracter committed spicide; in one—the murder of Agnes Kesson at Epsom—the murderer has not been traced. Ten arrests were made in connection with the other in cases, and seven of the accused persons (one of whom had committed a accused persons (one of whom has committee) a double nurder) were found insane. The other three were acquitted, including two who were the survivors in suicide pacts. Manslaughter cases numbered 4x sgainst 27, biganny ros against 83, and blackmail 48 against 20. The latter increase was attributed to the growing practice of permitting the suppression of the identity of the victums. The offences which involve the breaking into buildings—burglary, housebreaking, shopbreaking and the like—accounted for a considerable part of the increase in indictable considerable part of the increase in indicasule crimes. The figures for burglary were 35a, against 36a in 1939; housebrenking 2,865, against 2,543; and breaking and entering buildings other than houses, 2,121, against 2,539. Lord Byng declared that much more could be done by the public to protect themselves. "The number of cases in which entry can be made without the use of any tool and in which once without the use of any tool, and in which once entry has been made there is absolute freedom to roam about the premises, is far too large. It cannot be too strongly emphasized that any precautions which make it more difficult to open doors and windows, and which are likely to cause trouble and delay, are well worth taking. He urged motorists to use garages instead of that a very large percentage of the motor vehicles reported stolen were recovered within a comparatively short time. Of 4,941 cars and 505 motor cycles reported stolen in the year, 4,759 and 407 were recovered. The opinion was expressed that the work of the mobile squad of the C.I.D, ensuring that patrols with wireless communication with headquarters were available by day and night, had resulted in a large number of apprehensions, and there was every reason to believe that their existence was a considerable deterient to crime. As a result of redistribution measures, the force in many of the outer districts had been strengthened, but Lord Byng contended that these measures would not be sufficient fully to meet all requirements. Shortly after this contention was made public it was announced that the force would be increased by 400 men with the object of strengthening still further the protection in suburban areas.

DISARMAMENT.

Mr. HENDERSON (Foreign Secretary) asked House of Commons on March 9, 1932, to approve of chapters I-IV of the General Act for the Pacific Settlement of International Disputes. Farliament had given its approval on Jan. 27, 1232, to ratification of the Optional Clause and the General Act would complete Britain's acceptance of arbitration for non-justiciable disputes that the Fernanent Count might not find a solution on legal grounds. On March 22, the Franco-Italian Naval Agreement was published. Each might build two capital ships up to 23,333 tous with 12-in, guns up to Dec. 27, 1256, subject to scrapping a battleship for each new one; capital tourage for each to be raised to 25,000, as against 173,000 in Washington Agreement; each might complete sireraft carriers up to 34,000 tous, giving due notice of intentions; no further laying down of cruisers of nore than 6'1-in, gun class; limitation of smaller cruisers and submarines to maximum replaceable before 1236. Experts from Britain, France and Italy continued an exchange of naval views following the agreement.

M. Briand's scheme of a Federated Union of Europe with a separate organisation was dropped by the Preliminary Commission of the League in its report of Mar. as, but it became evident that delegates were divided between economic action and political co-operation. An important step taken was to invite Soviet Russis and Turkey taken was to invite Soviet Russis and Turkey taken was to invite Soviet Russis and Turkey taken was to invite Soviet Russis and Turkey taken was to invite Soviet Russis and Turkey to take part in the for there deliberations. In the Aug, meetings of the Commission of Enquiry, a report from a sub-committee of economic experts stated the definite aim must be the "widest collaboration of the nations of Europe in the sense of making Europe a single market for the products of any and every country in it." At the final meeting of the Commission on Sept. 6 it was decided to ask for another Committee to consider a proposal from Russis for an Economic Pact of Non-Aggression. Meantime a recommendation was being sent to the League for its Economic Committee to pursue the questions raised.

The xath Assembly of the League of Nations (M. Titulescu of Rumania re-elected President) met at Geneva Sept. 7. Signor Grandi suggested a real truce of armamenta until Desarmanent Conference had completed its work. M. Briand insisted on comprehensive assu ances before real disarmament Dr. Curtius raised the plea of the alternative of security coming from disarmament, not vice versa. Lord Cecil suggested asking all Governments to state before Nov. whether they were in favour of a truce. The U.S.A. would accept the truce for its psychological effect in spite of embarrassment of American shipbrilding. Japan preferred to leave question over to the Conference.

With a view to preparing the ground for the Disarmament Conference that is to be held at Geneva in February, 1928, Mr. MacDonald, Mr. Baldwin and Mr. Lloyd George spoke at a demonstration at Albert Hall, London, on July 12. The League has been collecting full service details from all Powers in view of the forthcoming Conference.

World Conference for the Limitation of the Manufacture of Narrotic Drugs opened at Geneva on May 27, 1921, under presidency of M. de Brouckere (Belgium). The hope of the delegates was in the developing of an agreement by which the manufacture of narcotic drugs could be limited to the medical and scientific needs of the world. A Russian proposal was in favour of the creation of State monopo les in the manufacture and sale of drugs. A scheme that limited manu-

facture to determined quotas found favour, but had to be dropped owing to disagreement by Turkey and Yugoslavia and Japan's preference to an equal quota for every manufacturing country. Only Great Britain stood out against complete prohibition of heroin; a compromise was accepted that heroin should be experted only to Governments. The ultimately agreed Convention stipulated that countries should estimate the quantity required yearly for medical and scientific purposes, and not manufacture more than necessary to meet orders and maintain stocks. Any excess production one year is to be debited against next year's figures. No new product from coca leaf or opium is to be undertaken unless the Government of the country in which discovery of compound is made is satisfied that it is of medical and scientific use; further. no export business is to be done until the Mealth Committee of the League of Nations has expressed an opinion of its addiction properties. The Convention applies to cocaine, codeline, dionin, heroin, morphine and peronin. The operation of the agreement depends upon ratification by the countries concerned, but as States signed the Convention on July 33, when the Conference concluded The British Government's Report for 1930 on the Hillert Drug Traffic stated that no large seizures had taken place at home, but abroad, especially in India, there was hardly any diminution in illight drug truffic. The continued illicit traffic in cocaine from the Far Kast gave much concern.

EK-SERVICEMEN'S ORGANISATIONS. BRITISH LEGION.

TENTH Anniversary of founding of British Legion was suitably celebrated on July x, 1931, and following Sunday. The B.L. had been formed in rest by amalgamation of four existing ex-Serv cemen's societies, a constitution being accepted at the Whitsuntide Conference of that The Royal Charter followed in zong. The B.L. is now represented in nearly every part of B.L. is now represented in nearly every part of Great Birtain and Ireland, with \$,625 branches, and overseas with 51 branches. The Women's Section has \$,150 branches. It was amounced on May 14, that as a result of the Prince of Wales's Legion Book Fund, the sum of £123,000 had become available for distribution. Of this, nine allocations amounting to £34.500 were made to various ex-Service organisations, and the balance employed in establishing a Pension Fund, the income from which would be used in augmenting official pensions or helping nonpensioners of so years of age and upwards.

Annual Conference of B L. was held at Queen's
Hall, London, May 24-25 In view of 204 motions being on agenda, four committees were formed in hope of considering most of them. Resolutions included-Greater use of Remembrance Day as title in place of old Armistice Day for Nov. xx; No lessening of oustomary observance of that day; Poppy Day to be maintained then; one to provide a wider distribution of the Poppy Day receipts (now restricted to members who served in Great War) was defeated. Prince of Wa'es opened the London Group of Haig Homes at Morden, on May m. He had made an appeal for these three years earlier. There are man houses for disabled mon and adjacent are 68 for disabled officers, these being provided by Housing Association for Officers' Families. The Poppy Day Collection of 1930 amounted to £524,650 from all sources, an increase of £6,160 gs. 7d. over 1929. Popples cost 16 per cent. of income to make, giving work through the year to 276 disabled ex-Servicemen in B.L.'s factory: other cost of collection was a per cent.

of income.

Women's Section of B.L.—Duchess of York honoured Annual Conference at Kingsway Hall, London, April 24, with her presence. Lady E. Spencer-Churchill was Chairman. Haig Cup was won by Maidstone and Thrapston Branches. Lady Haig thanked Conference for passing a resolution calling upon First Commissioner of

Works to secure new design for Haig Statue.

Officers' Association,—This is Officers' Dept. of B.L Expenditure on relief, Feb. z, x920, to Sept. 20, x920, £x,842,472, School fees were

Sept. 30, 1930, £1,842,475. School fees were paid for 1,299 children in 1930.

King's Roll.—Officially announced in House of Commons, Feb. a5, that on Jan. 1, 1931, 25,908 employers were on the K.R., employment being given to 371,792 disabled persons. The K.R. National Council, at meeting of June 30, stated that 738 local authorities had agreed to give a preference to firms on King's Roll.

F.I.D.A.C.—Twelfth Annual Conference of the Federation Interalliée des Anciens Combattants

Federation Interactive test Actions Compared we met at Prague, Sept. 1931.

United Services Fund.—In year ended Sept. 30, 1930, 106,869, cases were relieved at a cost of \$239,727, making a total of £5,756,065 in eleven years. Fund worked in co-operation with the B.L.

years, rund worked me orperation with the Android Association for Employment of Regular Sailors, Soldiers and Arrinen.—Meeting held June 8, 1931, announced 17,852 men had been placed in employment in past year, an increase of 370 over previous year.

Incorporated Soldiers' and Sailors' Help

Society.—In year, 39,319 applications (increase of 2,280) received. Sales from Lord Roberts Workshops, £126,000 (average disability of employees,

6e per cent.).

British Empire Service League. Fifth Bienmial Conference held at Torouto, Sept. 3, 1931, Lord Jellicoe presiding. Amongst resolutions passed was one urging Bitish Government to obviate unrestricted importation of Russian goods in the interests of the Dominions.

In Hospital. - Numbers of war disabled men are still in hospital. Their interests are being watched and entertainments being organised by many voluntary bodies, of whom mention can be made of the Not Forgotten and Lest We Forget Associations

FINANCE AND INDUSTRY.

THE Committee on Finance and Industry, THE Committee on Finance and industry, appointed in November, 1929, under the chaineanship of the Rt. Hon. H. P. (now Lord) Macmillan, presented its report in June, 1931, signed by all the members except Lord Bradbury, whose memorandum of dissent was appended, t gether with addenda by other members. The report, which covers more than 300 pages, is in two parts, the first being historical and descrip-tive, the second giving the Committee's con-clusions and recommendations and, in view of the diversity of the schools of thought on monetary problems represented by the members. the degree of unanimity is impressive. Owing to the wide scope of the report and the complexity of the subject it is only possible in these columns to outline briefly some of the more important findings and suggestions. The economic difficulties of the post-war decade were considered by the Committee to be due, not to any wanton misbehaviour on the part of the monetary factors

changes on the part of non-monetary phenomena viz: (1) unusual instability in the demand for capital, (ii) war debts, (iii) the rapidity of techni-cal changes in manufacture and agriculture, (iv) the shifting character of demand, (v) the rigidity of wage rates, (vi) the growth of tariffs, (vii) embarrassment of Budgets and (viii) violent (vii) embarrassment of Budgets and (viii) violent change in speculative activity in New York and elsewhere. The recent world-wide fall in prices is therefore best described as a monetary phenomenon which has occurred as the result of the monetary system failing to solve successfully a problem of unprecedented difficulty and complexity set it by a conjunction of highly intractable non-monetary phenomena. Stress is laid upon two dangerous defects in the recent works. ing of the international gold standard, the ing of the international gold standard, the excessive rigidity of the reserve requirements of the Central Banks and the maidistribution of gold throughout the world. The disturbing factors, monetary and non-monetary, which prevent the satisfactory automatic working of the gold standard render it necessary that it should be "managed" and this can only be achieved by the international co-operation of the Central Banks whose main objectives should be to raise the world price level, i.e. to lower the international value of gold in terms of wholesale commodities and, after prices have been sufficiently raised, to maintain a stability of prices at the higher level. To deal with the emergency as it existed during the life of the Committee, creditor countries were urged both to buy and lend more freely and Central Banks and Treasuries to remove hindrances to the reception of foreign loans and also to permit a volume of domestic credit which would encourage the market to take full advantage of any foreign issues deemed attractive. As regards Great Britain, while the Committee were not in agreement as to whether the return to the gold standard in 1925 was right, they were unanimous in advocating continued adherence and in re-pudiating a devaluation of the currency, but subsequent events rendered impossible the policy advocated. The Bank of England is recommended as the authority for "managing" the currency, and some important changes are suggested to strengthen its position by means of an increase in capital and in the cash balances deposited by the joint stock banks; the maximum flduciary issue should also be increased from the existing £560,000,000 to £400,000,000, subject to modification by law from time to time; the gold reserve should not fall below a statutory minimum of £75,000,000, except temporarily by permission of the Treasury. Closer co-operation between finance and industry is regarded by the Committee as necessary, and a further develop-ment of financial organisation is suggested by means of institutions to act as financial advisers means of institutions to act as financial advisers to industrial companies and to carry out all types of financing business; the Bankers Industrial Development Company is recommended as a suitable nucleus, and for this purpose should be separated from the Bank of England, have an independent existence, and rely upon its profit-making capacity as a private institution. It must be borne in mind that the report was issued before the suspension of the cold standard in Great Britain. gold standard in Great Britain. FOREIGN FAIRS,

EXHIBITIONS and Fairs held abroad in 1931 included:—Berlin, German Building Exhibition, themselves, but to unusually large and rapid May 9-Aug. s; this was in connection with International Town Planning and Housing display. Florence, first National Fair of Arts and Crafts opened March as, included see exhibitors of Italian productions. Gothenburg, 14th Swedish Industries Fair held May 9-17, at which 1,000 national concerns were represented; construction and furnishing of houses especially featured. Leipzig, opened March 2, was on luig German national lines with cheapness being a characteristic. The Leipzig Autumn Fair was held Aug. 20-80pt. 2 Lyons, International Fair, March -15, comprised some 6,000 exhibits, in which machinery, furnishing, building predominated. Parte, Colonial Exhibition first planned in 1914, fixed for 1919, and postponed until May-Oct. 1921. British Dominions were represented, and Duke and Duchess of York paid official visit July 17-19. Netherlands Pavilion was burnt down June 27; a new one was built and Ocanos. Stockholm, International Aircraft Exhibition was held in May. Vienna, Spring Fair of March 8-15 attracted a large number of foreign exhibitors. Preparations are in hand for the 1933 Century of Progress Exposition to be held at Chicago, but nothing is doing in the way of a big British Exhibition was a means for attracting foreign visitors and developing trade. A Levant Fair will be held at Tel-Aviv in April, 1932, under patronage of High Commissioner of Palestine. An International Exhibition will be held in Brussels in 1935—50th anniversary of Belgian Congo foundation and 100th of first continental milway.

GREYHOUND RACING.

LORD BRENTFORD, as Home Secretary, stated on Nov. 27, 1928, that "next year the sport will be almost at an end." This prediction has been entirely reversed in experience, with as, coco and more people attending nightly single tracks in London. On Saturdays, five or six meetings openate in the Metropolitan area. Most of the big cities in the Provinces have their tracks. Total visitors to dog racing far exceed numbers for horse racing. Every London track will have a totalisator in full operation to compete with the large number of bookmakers who derive excellent incomes from betting on the spot. The development of the sport can be appreciated from the recent construction of training kennels for 600 dogs at Northaw, mainly for racing at Wembley. A world's record was made at Brighton on Aug. 29, 1931, by Sammy's Adventure of 265 yards in 23 52 secs. Mick the willner is possibly London's most popular dog-his winning stakes exceed £7,500 in three seasons. The champion dog is probably Future Cutlet, winner of the Laurels Stakes worth £1,330 at Wimbledon on Sept. 12, 1931, when making record time of 28 52 secs, for 900 yards.

THE IMPERIAL CONFERENCE.

It had been intended that the work of the Imperial Conference of 1930 should be continued by a meeting of the Economic Section at titawa last autumn, but owing to the world situation this was postponed, it being announced when the new Parliament opened that the meeting would take place in 1932. Before the London gatherings concluded, an important statement of the British Government's economic policy was made to the Conference, but whether this has since been modified by the change of Government or the altered conditions is not known.

The statement by the British Government ruled out any question of extending existing preferences. It declared that the interests of the United Kingdom precluded an economic policy which would injure its foreign trade or add to the burdens of the people; but that their fiscal policy did not preclude marketing propaganda and organisation which would secure valuable opportunities for the consumption of Dominion products in the I nited Kingdom. The British Government also declared that the existing preferential margins accorded to other parts of the Empire would not be reduced for three years, or pending the outcome of the Ottawa Conference, subject to the right of the British Parliament to fix the Budget from year to year No decision was reached on the questions of a quota, bulk purchase and import boards, but the British Government undertook to examine carefully the report of the Committee on a wheat quota in consultation with the Governments of the wheat growing Dominions, and of India. Reports on quotas for other commodities and on import boards, bulk purchase schemes. and the organisation of channels of trade were referred to the Governments concerned for consideration. It was agreed that the Imperial Economic Committee should continue its work. and should complete the investigations into the marketing of Empire foodstiffs in the United Kingdom; and the extension of the Empire Marketing Board was recommended It was decided to ask the B.B.C. to obtain views regarding the institution of an Empire Broadcasting Service, which the Conference considered would strengthen the ties of Empire, and tend to stimulate trade. The B.B.C later announced that after consultations with the Dominions and Colonies concerned, they intended to proceed without delay to build an Empire Broadcasting Station at Daventry, which would give a 24 hours' service to all parts of the Empire. The policy of the ultimate establishment of a defended naval base at Singapore was maintained. the existing contact being continued, but expenditure required for completing the equip-ment of the docks and for defence works was postponed for five years, when the matter is to be reviewed. Another decision permitted the Dominions to recommend to the King advice regarding the appointment of Governors-General, and it was agreed that legislation, to be called the Statute of Westminster, should be brought forward in the Imperial Parliament to implement the report of the Conference on the Operation of Dominion Legislation after the Dominion Parliaments had passed the necessary resolutions on the subject. This measure, designed to make clear the power of Dominion Parliaments and to promote the spirit of free co-operation among members of the British Commonwealth of Nations, was the only legislation definitely indicated in the King's Speech when the New Parliament was opened.

INSURANCE.

Voluntary. (a) Industrial.

Under the Industrial Assurance Act, 1923, "industrial assurance business" is, in the main, restricted to assurances on human life in respect of which weekly premiums are received by means of collectors; but here, under this head, is surveyed the whole field of what might be described as Voluntary Working Class Insurance.

From the table appended below it will be seen that the principal types of association which cater for the insurance of the working classes are responsible for about 22,000,000 assurances; and in view of the magnitude of this number, it is obvious that the same individual number, it is obvious that the same individual must be frequently insured in more than one institution. The most popular type of insurance undertaken is insurance against death, and the claims met on this henefit alone exceed £77,000,000 a year. Sickness henefit to the amount of £5,000,000 a year is still disbursed from the voluntary funds of Friendly Soutelles and Trade Unions. The total funds of the mediartations treated in the table overed. undertakings included in the table exceed-£375,000,000.

In illustration of the magnitude of industrial assurances the Commissioner has pointed out that the number of assurances is one and a half times the whole population and the total sum assured is equivalent to nearly one-sixth of the

National Debt. Many friendly society officials are becoming perturbed at the increasing cost of sickness benefit, particularly in respect of members at the lower ages who have been admitted within the last few years. A number of societies have already adopted what is known as the "indi-vidual account" system to remedy matters, and others are considering its adoption. The main principle of the system is that surplus funds are aflocated to members' individual accounts, and allocated to members individual accounts, and claims for benefit are net party from the common fund and party from the numbers individual account. It is maintained that a very much lighter rate of sickness claims prevails under this system. The individual account also provides a fund which may be drawn upon at an attained age or in certain emergencies, and is, thus in some respects. emergencies, and is thus in some respects similar to the endowment insurance undertaken by industrial assurance companies and collecting societies, which, in 1930, met claims on maturity of £6,520,000.

In trade unions the most disquicting feature of benefit expenditure is the rising cost of superannuation benefit

As a result of Industrial Assurance Legislation, companies and societies now have to meet an increasingly heavy charge for surrender values. Since the Industrial Insurance Act of 1923, the amount has risen from £x,x8x,000 to £4,259,000. Surrender value payments are included as benefits in the following table:—

<u>-</u>	Year	Number	Membership	Friendly Na lety Benefits	Funds at end of Year
	-	-	000 B	£000's	£000'r
Friendly Bocieties	1929	az.553	§7.5 8 6	\$20,530	§204,060

Industrial Assurance Companies*	1930	27	62,029	21,930	417,3 24

The Post Office undertaker a small amount of life assurance business, which is not included above. The number of new assurances effected in ross was 5s. for a total amount of £2,85a; and in the same year the receipts in respect of all such contracts (i.e., premiums) amounted to

all suon contracts (i.e., premiums) amounted to only £18,020, and the claims on Death and Surrender to £17,420 in respect of 528 contracts. Both the Post Office and the National Debt Office (in conjunction with Trustee Savings Banks) undertake Aunuity business. The receipts in respect of such husiness were for the Post Office, 1929, £359,131; and the National Debt Office (and Banks) 1929, £307,024.

(b) Ordinary.

The Ordinary business (as distinct from "Industrial" business included above) of Life Assurance Companies may be summarised as follows .

(1) Life Assurance Companies established in the United Kingdom (U.K. business only)

(ii) Do. (business out of the U.K.).
(iii) Do. established out of the U.K. (business in the U.K. only).

State Insurance.

Health .- The numbers of persons entitled to Heatth.—The numbers of persons entitled to benefit in Great Britain in 1930 were: Men, 11,25,000; women, 5,757,000 'The contributions of employers and workpeople amounted to £5,034,000, to which State grants added £7,324,000, and Interest, &c., on funds £5,554,000. The total of benefits disbursed was £32,210,000. Fuller details will be found in the table on

p. 569.
Unemployment.—This branch of State insur-

pp. 568-9.
Widows' and Orphans' and Old Age Pensions
Insurance — The Widows' and Orphans and Old Insurance—The Widows' and Orphans' and end Age Contributory Pensions Act, 1999, modified the provisions of the Act of 1998, and came into operation on Jan. 2, 1990. Under its provisions wives of insured men, who reached 90 before the introduction of the 65-90 old age pension in January, 1998, were given the right to the 65-70 pension. The main provision of the Act giving pensions to elderly widows did not operate until July, 1999. The following particulars relate to Great Britain.

In addition to the contributories for Health.

In addition to the contributories for Health Insurance, who were also insured for pensions, aga, 300 persons were insured for pensions only at

o Industrial Business only, Registered Unions of employees only, Figure 1, Not including Agricos disturred from union funds in unemployment benefit, and Agricos in dispute pay.

the end of 1930. The benefits disbursed in that year were: Widows, £16,428,000; Orphans, £246,000; and Old Age Pensions, £16,328,000. Fuller details will be found in the table on p 266. Since the Contributory Pensions Act, 1923, in all £39,688,000 has been paid in pensions during \$3,43,000,000 has been paid in pensions during the quinquennium 1965-90, consisting of \$30,740,000 (widows); £1,605,000 (orphans), and £47,343,000 (old age).

Apart from the contributory scheme £34,936,000 was disbursed by the State in non-contributory Old Age Pensions and £53,423,000 in West Paragons in the State of the State in the State of the State o

in War Pensions in 1020

THE KING'S ECONOMIES.

THE King gave a striking lead to the country in the direction of economy shortly after the formation of the National Government, and before the revelation of its plans for reducing expenditure. In a letter to Mr. Ramsay MacDonald, the Keeper of the Privy Purse amounced that in the grave financial situation with which the country was confronted, the King wished personally to participate in the movement for the reduction of national expensions. movement for the reduction of national expenditure, and had decided that his Civil List should be reduced by £50,000 while the emergency lasted. When it is recalled that the full sum paul by the State as a provision for the honour and dignity of the Crown is only £420,000, of which £120,000 is applied to their Majesties Privy Purse, the extent of this sacrifice by the King can be appreciated. In his letter to the Prime Minister, Sir Frederick Ponsonby said: "When, after the War, owing to the increasing cost of living and fall in the nurchasing hower of money, the Civil List settled purchasing power of money, the Civil List settled by Parliament in 1920 was found to be quite inadequate, drastic economies were made, and therefore it is not easy to reduce the Civil List further without sacrificing some of the State functions which are traditionally associated with the Monarchy, and without throwing numbers of his Majesty's servants out of work careful consideration, however, the King has arrived at the conclusion that by the exercise of the most rigid economy it should be possible to reduce the Civil List by £50,000." It was also intimated that the Queen and the other members of the Royal Family in receipt of Parliamentary grants were all desirous that reductions of these grants whould be made during the national crisis The annuities granted by Parliament to the other members of the Royal Family were about £100,000 The King's lead was quickly followed. The Prince of Wales, for whom no provision was made in the Civil List, because he receives the income of the Duchy of Cornwall estates, amounced his intention to contribute estates, announced his intention to contribute £20,000 to the Exchequet. When the emergency Budget was introduced, the Chancellor gave some remarkable examples of the widespread desire to help the nation. Old age pensioners had returned their pension books, war pensioners had offered to forgo their pension for the year, National War Savings Certificates had been returned cancelled, onlections had been made and War Loan bonds had been sent for cancellation. Many gifts of each were also sent to the Treasury, and for cash were also sent to the Treasury, and for some weeks after the position was made plain the Ministry of Pensions received daily letters from all classes of war pensioners expressing their intention to resign the whole or a portion of their pensions, either for a period or in per-

petuity. Another kind of ascrifice was provided by the B.B.C., which agreed to forgo out of the revenue derived from wireless licences £50,000 for 1931, and £150,000 for 1932.

THE LABOUR PARTY.

FINANCE has been the problem with the Labour Party. The Annual Report issued at the Soar-borough Conference, Oct. 5-8, 1941, Mr S. Hirst, Chairman, mentioned that unless fresh means were forthcoming for raising funds for fighting bye-elections it would be essential to refrain from action in many cases. The year's income for ago amounted to £44,939, of which the special levy of sd. a member, spread over three years as decided by the 1929 Conference, produced £9,48 There had been 475,Labour candidates endorsed for the next election. The Conterence coincided with the final days of Parlisment, and so proceedings took a platform aspect in view of the forthcoming clash in the con-stituencies. The rejection of Mr J McGovern as an authorised candidate, as proposed by Executive, was continued. A discussion on the Indian problem was avoided by 1,550,000. The I.L.P. delegates objected to the instruction that M P.s should act in harmony with the standard videous of the Daylands to the contract of the contract with the standing orders of the Parhamentary Party, but the Conference supported obedience to orders by 2,127,500 to 103,000. Resolutions maintaining Socialism as the cure for human evils, cancellation of all war debts, public control of banks with a National Investment Board, vigorous trade union policy with public ownership of public utilities plus an Import Board, dealing with imports produced under bad conditions, public ownership of land, full sif-government for India, restoration of economy cuts for teachers. social services and unemployed, were passed without division after discussion. The Labour Party has been associated closely with the Trade Union Congress as usual, the two bodies being jointly responsible for a manifesto on Aug 27, 1931, against the newly-formed National Government. The Trade Unions (Amendment) Bill No. 77, that would have materially assisted the Labour Party in that it restored contracting-out for the political levy, did not become an Act, though a Government Fill. A Conference of Labour Women held at Blackpool in July, 1931, 1 sjected a proposal for the public ownership of rejected a proposal for the phone conference of the liquor trade. The Pope's Enceclical, issued on May 23, 1921, contained the sentence "No one can be a good Catholic and at the same time a true Socialist." The fourth Congress of the Labour and Socialist International at Vienna, August, considered anti-war policy most important task.

COMMUNISM

Communism makes very little progress in Britain Mr. H. Pollitt admitted at the xxth plenum of the E.C.C I, that the membership of the Communist Party in Great Britain was only 2,711, 53 per cent. were unemployed and as per cent in the Minority Movement. In July, the Amalgamated Engineering Union expelled from Amagamaten angineering a non expense from its membership z, some branch officers, who were considered to be supporting the Communist Party contrary to the rules of the Union. The Party has a newspaper mainly circulating in London known as the Darly Worker, but it does not appear to have a wide sale.

ENGINEERS.

In Dec., 2520, the Engineering and Allied Employers' Kational Federation invited the forty trade unions in the industry to discuss the whole wages question in view of grave position in trade. Negotiations went on to June 5, when an ultimatum was issued by the employers. Further meetings by trade unions led to acceptance of new terms to operate from July 6. These did not affect ordinary wages but varied piece rates, overtime, night rates and shifts. Annual Conference of Amalgamated Engineering Union took place at Blackpool May 28-20, Mr. W. H. Hutchinson presiding. It was decided to agitate for a 40-hour week and attempt the limitation of newcomers in industry; the Labour Government came in for criticism. Several members were expelled from A. E. U. for supporting the Minority inovement. Industry is free from strikes, but a quarter of the workers are unemployed.

I.L.P.

Mr. J. Maxton, M.P., presided over 39th Annual Conference of 267 delegates from branches of the Independent Labour Party at Scarborough, April 5-7, 1931. A proposal for I.L.P. to disaffiliate from Labour Party was defeated 173 to 37, as was motion expressing dissatisfaction with lead given by executive, 137 to 109. A national planning commission to ray to 109. A national planting commission to examine and plan control of country's resources was accepted, 125 to 99. A non-contributory unemployment insurance with considerable extensions received unanimous accord. tensions received unanimous accord. Discussions took place on India, national finance and kindred subjects, but the majority of resolutions on the agenda were never reached. Mr. Maxton repudlated the Party headed by Sir O. Mosley, membership of I.L.P. being incompatible with that of Mosley Party. Between Communists and I.L.P. it was a question of tactics and not of priuciple. Mr. F. Brockway, M.P., was elected use Chairman, Mr. Maxton retiring after five years service. Several M.P.'s resigned membership during year. The I.L P. group of M.P.'s often came into antagonism with Labour Government, and, to a request for a statement on the position, the Secretary (Mr. J. Paton) of the I.LP. wrote Mr. A. Henderson, M.P., that his council "cannot give unqualified assent to standing orders of the kind it is now sought to standing orders of the kind it is now sought to impose, and which are contrary to the estab-lished practice and relations of the two parties." The I.L.P. naturally went into opposition against National Government. Scottish I.L.P. Annual Conference was held at Glasgow, Jan. xe-x, Mr. P. J. Dollan being in the chair. A motion to disaffliste I.L.P. from Labour Party was deteated. Welsh I.L.P. Annual Conference met Techarita Glom. Luly area Mr. I.L. diction at Treharris, Glam., July 22-22, Mr. J. L. Adkin presiding. Opinions were expressed that I.L.P. should secure more independence within Labour Party, additional taxation should be levied on incomes in excess of £500 per annum, and that following the Unemployment Royal Commission the conditions of the unemployed should not be worsened. Under the auspices of Labour Party members, a new organization was established in June under the title of the Society for Socialist Inquiry and Propaganda, Mr. E. Bevin being Chairman. Its organizers hope to work on I.L.P. lines and so secure that body's members in a more subservient auxiliary.

MINERS.

Unemployment appears stabilised in the mining industry at about one-third of workpeople available. Though under the spa6 Act, the Ministry of Labour possesses powers to issue regulations to restrict recruitment of labour for mining, these have never been used. An understanding has been in force that apart from certain eligibles, all mine labour must be obtained through Labour Exchanges. The result is new-comers are discouraged. Under the Coal Mines Act, 1930, trouble arose early in the year on the hours question and this was remedied by a new Act on July 8, 1931, for 7½-hour day in the mines. The 19th International Labour Conference at Geneva on June 18 decided in favour of maximum 45½-hour mining week. Miners' Federation of Great Britain held Annual Conference at Blackpool, July 20-24, Mr. E. Edwards succeeding Mr. T. Richards as President. Resolutions passed included — nationalisation of mines, disapproval of majority report on Unemployment Insurance, new Compensation Act for injuries, an international agreement on output and marketing of coal. Lord Mayor's Fund for relief of distressed mining areas received in donations £888,914 1981, 3d., to which Government added an equal amount.

RAILWAYS.

National Wages Board for Railways issued on March 5, 1931, its findings following the Inquiry held in Jan.—Feb. arising out of a proposal of the companies to reduce wages. A reduction of 1/2 per cent. on wages up to 402, weekly and a further 1/2 on remuneration above, in overtime and Sunday duty pay formed basis of award; a spread over of day's work to 1/2 hours was included. National Union of Railwaymen, Locomotive Engineers and Firemen, and Railway Clerks' Association held delegate meetings March 15-26 and accepted the awards. Slight trouble occurred with "go slow" methods of working at goods depots, but this form of protest against changes soon fizied out. Annual Conference of N.U.R. was held at Ipswich, July 6-11, Mr. W. Dobble, of York, as President, being re-elected for fifth year. Resolutions passed included—national organization of all transport under public ownership and control; amendment of 1/2 Trades Disputes Act; approval of railway electrification; against lengthening of driving hours. Arising out of the August political crisis, Mr. J. H. Thomas resigned membership of N.U.R. and Political Secretaryship. R.C.A. held Annual Conference at Portsmouth, May 12-13, with Mr. T. H. Gill, M.P., as President, he being re-elected. The delegates, in spite of the wishes of the leading officials, passed a resolution calling upon their M.P.'s to ginger up the then Labour Government to do more on socialist lines. Nationalization of railways was demanded, Mr. A. G. Walkden, M.P., General Secretary, suggesting the purchase price at \$6-700,000.000. The Prime Minister received a deputation from three unions on May 19, and promised to consider their appeal for nationalization. Mr. C. T. Cramp, N.U.R., gave evidence July 2 before Royal Commission on Unemployment Insurance with a view for the continuation of the "exception" in regard to permanently employed railwaymen. Mr. J. Bromley, M.P., of L.E.F.,

supported present conditions of unions being responsible for own unemployment insurance,

SHIPBUILDING.

This is the most depressed trade of all, over half of the 204,720 insured workers being registered as unemployed. The Great Yarmouth Annual Conference of the Federation of Engineering and Shipbuilding Trades (Mr. W. Sherwood, President) met on May 12 under depressing conditions. Resolutions were passed against further wage reductions, dispossession of jobs without compensation under rationalisation schemes, recent railway wages settlement; public control of transport services was proposed, and demand made upon Government to offer financial facilities to shipbuilding companies. Negotiations between employers and workpeople dragged on, meetings being held in April, May, June, July and August. Complete breakdown occurred on Aug. 20, employers deciding that wage reductions were essential. The first came into force on Oct. 5, and other would be affective on Jan. 12, 1932. The men were advised by leaders to continue at lower terms but under protest; a strike was out of the question in view of trade conditions.

National Shipbuilder's Security continued its buying up and closing of redundant yards purchases having been made recently at Dalmuir, Old Klipatrick, Ardrossan, Lowestoft, Stockton, Middlesbrough, Whithy, Sunderland, South Shield, Hebburn and Howdon By reducing the productive possibility of yards to the probable requirements for new ships, it is hoped to concentrate on profitable work at the remaining yards.

Shipping. Chamber of Shipping in its report of Feb. 12, 1232, pointed out average freights for 1230 were 23 per cent. lower than 1232. In the world laid-up shipping amounted to 7-8,000,000 tons. The Annual Conference of the National Union of Scamen (Mr W. R. Spence, General Secretary) was held in London, July 21. Wages had been maintained but subject to certain reductions in manuing. The Union was bostile to the Minority Movement. The unemployment percentage for scaman has been as high as 35. Germany reported in August that 17's per cent. of merchantile fleet had been idle.

STRIKES.

Textile trades, owing to the January and February dispute over the increase of number of nome per worker, are responsible for the large loss of working days in 1932 compared with other industries. Coal comes second with trouble over wages and numerous small disputes over employment conditions. London electricians stopped wolk in March and April to extent of 3,000 to protest against withdrawal of special addition to London rates consequent upon a strike of 50 Dagenham employees for "London rates" at a border-line firm. Londoners retained their concession and the borderers brought to within 3d. per hour of London rates. Curtain and furniture workers were concerned in strikes over wage reductions. Generally, a spirit of give-and-take has applied and industrial conditions have remained quiet. It is realised that trade conditions necessitate reduction of costs of production, though obviously reduced wages by workpeople can never be welcomed.

TEXTILES.

Cotton has been faced with one unsettled problem—the reorganisation of the industry. Over 4x per cent of the workpeople have been registered as unemployed at the Labour Exchanges. The question of eight instead of four looms per weaver was discussed for at least two years and brought to an issue on Jan. 19, 1931, 1941, 1942, 1942, 1943, 1944

TRADE UNION CONGRESS.

The 63rd Trade Union Congress was held at Bristol, Sept. 7-12, 1931, Mr. A. Hayday, M.P. (General Workers), as President. Membership of the Trade Unions affiliated was 3,719,400 (1930 actual total), being a decrease of 25,000 on 2930 Congress. Opening day was mainly occupied by presidential address and a survey by Secretary, Mr. Citrine, of the negotistions that led up to the fall of the Labour Ministry. The numerous resolutions adopted included—nextmum a-bour week, two weeks annual holiday with full pay for all workers, unremitting hostility to reduced benefits and increased contributions under unemployment insurance, enquiry into cinema employment conditions, new workmen's compensation insurance, reaffirmation of principles in Mond-Turner Report (2,828,000-160,000), planned and regulated economy in national life (2,866,000-749,000), nationalisation of mines and transport, public control of iron and steel trades (1,794,000-1,434,000), acceptance of a long report of 7½ pages from the General Council dealing with the internal situation in August. A resolution to compel by legislation employers to give written references to leaving employees was rejected. Fraternal messages were received from Canadian, Indian, French and U.S. A. trade unionists and the International Federation. The G.C.'s recom-

mandations in the Report were—cessation of deflation policy, reconstruction of basic industries, revision of debts and reparations, international co-operation for raising of level of wholesale prices, devaluation (raising Bank of England price for gold and thus lowering value of sterling in terms of other currencies), a full investigation into fiscal policy; the G.C. made no pronouncement on the question of a revenue tariff. The G.C. of the T.U.C. has been associated with the Lahour Party Executive in practically joint working. A report on the working of the Mond-Turner Conference on Industrial Recognisation and Relations was issued Dec. 37, 1930. After recapitulating the history from 1937, the opinion was expressed that "the fullest consultations between the representatives of organised employers and organised labour is essential to the welfare of British industry." Mr. J. Bromley (Railwaymen) was elected new T.U.C. Charman.

TRADE UNION MEMBERSHIP.

Isbbes were published in the Ministry of Labour Gazette of Oct., 2922, for Trade Union Membership for the years up to 1920. The gradual decline in number of trade unions (due mainly to mergine) and membership has continued following a big drop in 2922—2 from the inflated figures reached in 1920 from war-time effects, shough in 2922 agrid agrid recovery took place. Statistics collected by the Registrars include:—

	memmerani) in 400 s.						
Year.	T U.s	Males	females.	Total.			
4000		z,866	154	2,022

/	- Amuung an	a miliourt	to verigio	n 1			

The membership of the Trade Union Congress, t.e. members of the r69 organisations that sent delegates, was:—

1931....3,744,3so. 1931....3,719,401.
These figures are based on the membership of the previous year and not at the actual meeting date (September) of the Congress.

the previous year and not at the actual meeting date (September) of the Congress.

The Transport Services have the greatest number of trade unionists—Railways, 449,397; Water, 23,444; Road, dook and general, 755,445. Mining and Quarrying are second with 624,591. Metals and Textiles follow with 625,735 and 531.281.

THE LAND VALUE TAX.

An important and much criticised revival of a tax on the ownership of land was introduced in she Finance Act, rggr, by the Labour Government. The scheme differs somewhat from its predecessor of rgro in being a flat rate tax, subject to certain deductions and exemptions, on the freehold value of land, whilst the earlier scheme was a tax on the increase in value of land caused by communal growth. Broadly, the new tax involves the valuation of every piece of land in separate occupation (called a "mit") at its market value at the valuation date antiwith vacant possession, on the supposition that the land is devoid of everything but grass or heather (or trees and hedges in the case of agricultural land), although roads and works for its reclamation or protection from flooding

must be taken into consideration: the value of any minerals, wayleaves, sporting rights, tiliage and manures are to be disregarded. Agricultural land is to be dealt with somewhat differently; from the market value of the site is to be deducted the "cultivation value" of the to be deducted the "outsivation "mills" of the land, i.e., the value of the land with its buildings, &c., as a farm or farmland. The resultant difference is the amount upon which to the unit or entitivation value by giving notice to the Inland Revenue Commissioners, from whose decision appeal may be made to one of a panel of referees. His decision, except on a point of law, is final. Except in the case of agricultural land, the value of any site time ascertained is to be reduced by either (a) an amount equal to four times the annual value of the unit for income tax purposes, or (b) an amount equal to seven-eighths of the land value amount square so sever-eighths of the land value of the unit, whichever is the less. This reduc-tion will also apply in the case of agricultural land where it exceeds the cultivation value of the unit. Numerous exemptions from the tax are provided for; these are land belonging to the Government, local authorities and drainage boards, the National Trust, railways and other statutory public concerns, registered friendly societies and certain charitable bodies, and land used as playing fields (as defined), public parks, burial grounds, and sites for places of public worship. The most important exemption, however, is that on units where the aggregate tax would not exceed xos. per annum. The Act provides for a tax of one penny in the pound on the unit value thus determined, the first valuathe unit value thus determined, the first values-tion to be as at Jan. x, rogs. The task of valuing is entrusted to the Department of In-land Revenue, the Valuation Office being any mented by temporary staff for the purpose. The cost of the first valuation was estimated to be between £x,eco,eco and £x;geo,eco, and involves the appointment of some see valuers, Soo valuation assistants, soo draughtemen, and soo to 800 clerks, at salaries ranging up to £550 per annum. At the time of writing, however, recruitment of the additional staff is being heavily curtailed for a period of at least six months as an economy measure.

LITIGATION COSTS.

In April, rego, the London Chamber of Commerce circulated a memerandum on the high cost of modern litigation, and asked the Lord Chancellor to consider the remedies suggested; the Lord Chancellor received a deputation on the subject in November, and subsequently obtained the views of the General Council of the Bar and the Council of the Law Society on the general question. The Chamber of Commerce, while acknowledging that English procedure was the most perfect of its kind in the world, stated that it was an expensive luxnry beyond the means of the majority of people, except the very peor or the very rich, and that the main cause of expense was the law of evidence, in that, apart from muchual arrangement, every document and every fact had to be formally proved by personal attendance in court of the parties and witnesses. The commente and suggestions of the Chamber of Commerce relate to litigation arising out of ordinary business relations, and exclude therefore cases of divorce, libel or slander. The principal suggestions were: (f) that all documents should be

accepted unless formally challenged and oral proof: demanded, that evidence of witnesses should be in the form of signed statements attested by a credible witness and that evidence accessed by a oredition witness and that evidence from storad should be given by affidavit or declaration, a practice with precedents in commercial cases; (ii) that, in all cases involving technical matters, an assessor to assess damages should sit with the judge as advisor, as in Admiratty cases, and that no expert evidence thanks to extent a fifth that the fifteen thinks. should be given; (iii) that the "two-thirds rule" should be abolished, a practice under which junior counsel is entitled to a fee from three-fifths to two-thirds of his leader's fee; (iv) that proceedings before trial should be simplified; and (v) that dates should be fixed for trials. The reports of the Bar Council and the Law Society do not proceed on the same lines as each other, and do not cover the same ground as the memorandum of the Chamber of Commerce, but they are in agreement with a modifi-cation of the "two-thirds" rule, though they do not consider that in most cases it works unfairly, with the fixing of dates for trials so far as possible and with the desirability of a revision of procedure, various technical changes being recommended by which improvement in the proceedings before trial could be effected. The Bar Council disapproves of evidence being in the form of statements not on oath, and of the proposal for an assessor to sit with the judge in certain cases; to reduce the present expense of expert witnesses, they consider a limitation of their number by the Master or Judge preferable. It is manifest from the memorandum and reports that a reduction in the cost of litigation can best be secured by a revision of the rules of procedure and the law of evidence, but in addition a proposal, not dealt with in the reports, that only one appeal to a higher court should be allowed, has strong support, and would in many cases render less formidable the probable costs of contemplated litigation.

LONDON TRANSPORT.

In rong Bills were promoted by the London County Council and the London Electric Bailway Companies to co-ordinate passenger traffic in the London area by means of agreements between the various transport undertakings embodying the principles of common management and a common fund. The passage of these Bills was interrupted by the dissolution of Parliament in May, 1929, but they were again considered by the new House of Comme is in July and, not receiving the support of the new Labour Government, were rejected; the Minister of Transport, however, promised an immediate examination of the problem. Subsequently, in March, 1921, he in-troduced a London Passenger Transport Bill which provided for a new Board to be set up, on the analogy of the Central Electricity Board, to he known as the London Passenger Transport Board, and composed of five members appointed by the Minister of Transport after consultation with the Tressury, and prid salaries, fees and allowences for expenses as determined by the Minister; its duties would be to secure the provision of an adequate and properly co-ordinated system of passenger transport for the London traffic area, and for this purpose it would take over the existing tube railways, the Metropolitan District Railway and the Metropolitan Railway, but not the suburban lines of the four main line groups, special arrangements being proposed in

order to co-ordinate these suburban services with the Board's; in addition, the tramway under-takings in the London area, the London General omnibus Company and other omnibus under-takings in the Metropolitan Police district would be taken ove . The basis of the transfer would be, in the case of the Underground Groups of undertakings and the Metropolitan Rallway, an exchange of the existing stock for the Board's transport stock, and for other private under-takings payment partly in cash and partly by stock, the amounts to be agreed or, in default of agreement, determined by a specially created arbitration tribunal; in the case of the tramway undertakings the Board would assume responsibility for the service of the outstanding debt on the transferred undertaking. The area affected lies roughly within s miles of Charing Gross, covering approximately 1.846 square miles, and comprises, in addition to the County of London, large portions of Essex, Hertfordshire, Kent, Middlesex, Surrey and Buckinghamshire; the capital involved was estimated to exceed 6330,000,000. Severe criticism was passed upon the wide powers conferred by the Bill on the Minister of Transport and upon the compulsory. expropriation of municipal and private undertakings. During the Committee stage agree-ments as to the terms of transfer were announced as having been settled with the Underground Group, the London County Council and many-of the other interests concerned, after full conof the other increase concerned, after init consideration the Joint Committee passed the Bill at the end of July with certain modifications, and alterations, but no further progress was made owing to the fall of the Government in August and the incretable absorption of its successor in urgent financial measures up to the dissolution of Parliament in October. The Bill was, however, kept alive by the procedure (said to be without precedent in the case of a public Bill) of a resolution passed by both Houses to Bill) of a resolution passed by both Houses to carry it over to the next Pallament; it was stated that about £40,000 had been expended in counsel's fees and other charges, which would fall to be paid by the Treasury if the Bill were dropped, but by the new Transport Board if passed. Among the minor provisions it is interesting to note the inclusion of powers to couns accuracy of passed. run a service of passenger vessels on the Thames.

MUNICIPAL AERODROMES.

MANY municipal authorities have enquired, during 1920, into the possibilities and cost of erecting aerodromes to serve their town, but the difficulty of obtaining a suitable large site within easy distance of the town, the heavy expense of construction and maintenance, and the likelihood of being faced with an annual deficit for some time, have deterred many from proceeding after receiving a preliminary report and survey by aerodrome construction specialists. Interesting figures of the cost of establishing a civic air-pirtor the joint use of Brighton, Hove and Worthing, show the estimated capital expenditure required to be 536,666 for the land, a lock-up langars, r main hangur, club and tearooms, garage and parking ground, workshops, etc., while the sanual cost of upkeep (including wages of ground staff) is estimated at 5,384—but no profit is anticipated for the first two or three years. With the single exception of Blackpool, civic aerodrames are at distances ranging from 3,miles in the case of Bristol to 13 miles in the case of Bristol to 13 miles in

it is hoped that future schemes will incorporate the Continental practice of establishing the aerodrome as near as possible to the centre of the town; this will, however, be a matter of great difficulty in cases where large central sites are scarce as in many northern industrial towns. The improvement of siterati in the direction of shorter take-off runs and the development of vertical flight would solve this problem in many cases, and would certainly encourage municipal authorities who are alive to the ultimate necessity for the establishing too great an expense to proceed with a scheme. To assist air-minded local authorities, the Public Works Facilities Act, 1930, empowered them to acquire land compulsorily for the provision of aerodromes.

THE NATIONAL ANTHEM.

An anonymous protest against the wording and sentiment of the second verse of the National Anthem, which appeared in the Times in February, 1931, condemned the lines, "Confound their politics, Frustrate their knavish tricks," as "unchristian, indecent, disgraceful anywhere, in a church blasphemous, and in a cathedral a brawling obscenity." This vigorous onslaught produced many apologists for the actual words as well as suggested variants from those who felt that the spirit of the verse was in greater accord with the Old Testament than with the New. Dissatisfaction with the words of this verse is no new thing, and the suggestion of alternative verses not without precedent; of the latter, if any change were made, it was suggested by the Dean of Worcester that the most satisfactory would be the one already in use by at least one Philharmonic Society, which substitutes "Thy" and "Thee" for "his" and "him" in the second and sixth lines respectively, and becomes—

O Lord our God, arise, Scatter Thy enemies, And make them fall; Confound their polities, Frustrate their knavish tricks; On Thee our hopes we fix; God save us all.

In reply to a Parliamentary question as to whether the Government would consider the substitution of a new and more appropriate verse when the National Anthem was sung on special occasions for which the Government were responsible, the Chancellor of the Exchequer replied that tradition was everything in the matter, and that the Government did not propose to try to improve on it.

NATIONAL MARK.

STRADY progress has developed the National Mark on home productions. National Mark beef has been placed on sale at Leeds, Bradford and Halifax, as well as in Birmingham and London. There have been attempts by butchers to evade the scheme by displaying private marks on beef or refusing to sell the certified quality of the National Mark. But the public has realised what the National Mark implies, and is extending its insistence on the official marking. The National Mark has been extended to canned fruit and vegetables, fresh apples, cherries, cucumbers, strawberries and tomatoes, table poultry, cider and malt products. Shops to

display National Mark goods have been opened by the Empire Marketing Board and Ministry of Agriculture. A special poster publicity campaign for National Mark goods was held Sept. 30-Oct. sr. The British Steelwork Association adopted on March 3, 1921, a mark for all British steel so that it could be distinguished from the imported variety, some of which often bore the misleading letters of B.S.

NATIONAL PARKS.

In September, 1939, the Prime Minister announced the appointment of a Government Committee with the following terms of reference :-- 'To consider and report if it is desirable and feasible to establish one or more National Parks in Great Britain with a view to the pre-servation of the natural characteristics, including flora and fauna, and the improvement of recreational facilities for the people, and to advise generally, and in particular, as to the areas, if any, that are most suitable for the purpose." The Report of this Committee has now been published as a Blue Book. The Committee points out that the American model of National Park or National Reserve cannot be followed in this country owing to the density of the population and the developed nature of the greater part of the land, while, at the same time, these factors render more urgent adequate measures for the preservation of the country-side. The objects which the Committee desire Reserves and Nature Sanctuaries are: (1) to ensure the preservation of large areas of exceptional natural interest against spoliation and disorderly development: (a) to improve recrea-tional facilities and to afford to the community means of access to the countryside and areas of means or access to the countryside and areas or exceptional natural beauty; (3) to promote protection and preservation of flora and fauna. The Committee consider that these objects could be secured by a planning scheme for the regulation of the public development of areas to be selected and that the present powers of the Regional Committees under the Town Planning Acts should be extended. It is considered premature to select suitable areas, but a National Authority should be set up fer this purpose and to give technical advice and assistance to the Regional Committees The Committee distinguish between National Reserves such as, possibly, the Lake District, Snowdonia, a coastal area in Cornwall or Pembroke, a seca constant area in Cornwan or remotors, a section of the Broads or South Downs, Dovedale, a section of the Wys Valley and of the Scottish Border and Regional Reserves such as the High Peak of Derbyshire and Forest of Bowland, Cannock Chase and areas in Outer London. In the case of the former, preservation is a primary consideration, but in the latter, while this is important, access is a fundamental considera-tion. If it is desired to make a National Park on American lines the Committee suggest that the Caigngorm area would be most suitable, while the Clenmore area, already possessed by the Forestry Commission, might be utilised for recreation and as a base for pedestrians without the need for a more extensive scheme. The extended powers of the Regional Committees suggested are largely incorporated in the Town and Country Planning Bill which has unfortunately now been shelved owing to the financial situation.

NATIONAL TRUST.

Acquisitions by the National Trust during the year ended June 30, 1931, were—Alport Height, Derbyshire; land near Avonmonth, Bristol; Kigbury Rings, near Salisbury; Frankley Beeches, near Birmingham; Haresfield Beacon and Standard Woods. near Birmingham; Haresfield Beacon and Stan-dish Park Woods, Glos; Lady's Well, Hempstead, Glos; Longshaw Moor, near Sheffield; Nare Head, Cornwall; Pendarves Point, Cornwall; Plaitford Common, New Forest; Town Wells Tower, Shrewsbury; additions to previous hold-ings at Bolt Tail, Devon; more land at Burton Wood and Hawksmoor. In August, 1931, it was announced that 13 acres near Ventuor, I.O.W., were being presented to the nation in memory of Nansen. Gifts made now to the National Trust are not subject to Death Duties. An offer of the are not subject to Death Duties. An offer of the remains of Odiham Castle, Hants, was declined by the National Trust in view of the repair and ny the National Trust in view of the repair and maintenance costs involved. In October the National Trust made an appeal for funds to preserve Whitehall, a 1sth century house in Shrewsbury, built by Prynce in 1281. Assembly Rooms, Bath, were acquired by S.P.A.B. for

Rooms, Bath, were acquired by S.P.A.B. for N.T. in Oct., v93r.

In September, 1929, a Committee was appointed by Government to enquire into the question of establishing National Parks. The Report issued on Aug. 1, 1921, stated that it would be impossible to copy methods adopted in other countries owing to the English density of population and lack of available area. A system of National Reserves and Nature Sanctingies was National Reserves and Nature Sanctuaries was suggested Cairngorm area was put forward as a site of a National Park on U.S A. lines in Scotland. As schemes set forth, including compulsory acquirement of common land under conditions, would entail much expenditure, it can be taken for granted that for the present

the ('ommittee enquired in vain.

Other work in preserving ancient sites, obtaining open spaces for the public, is being done by the Society for the Protection of Aucient Buildings, society for the Protection of Aucient Buildings, working through its own £5,000 limited liability company, of which Lord Esher is chairman, Oxford and Cambridge Preservation Trusts; Royal Society of Arts, owners of West Wycombe; Commons, Open Spaces and Footpaths Preservation Society; local authorities in the parks under their control.

OVER-PRODUCTION.

ALUMINIUM.

ALUMINIUM has been maintained in Britain for a long time at a standard price of \$35 per ton owing to the International Cartel formed by Austria, Britain, France, Germany, Norway and Switzerland. The Cartel was due to expire at the end of 1931. Germany was responsible for 30,900, France 29,000, Switzerland 22,400, Norway 20,500, Great Biltain 29,400 tons yearly output. North America has been extending output until it has reached that of the rest of the world. only two producers control America, the Aluminium Company in the U S.A., and Aluminium, Limited, elsewhere. Unless the Cartel is ienewed and extended, there is a prospect of a general increase in output that will result in over-production and price-cutting.

COTTON.

Farm Board had in hand through its Cotton Stabilising Corporation 1, 200,000 belse purchased in previous year with object of maintaining price levels. The surplus so worried the authorities that suggestions were welcomed, and it is said 90 different schemes were submitted. On Aug. 28, the House of Representatives in Louisiana passed a Bill to forbid planting in that State during 1932, contingent upon action by other States. The Federal Farm Board has decided not to add to its stocks. The U.S.A. have been in touch with Egypt, expressing willingness to discuss the disposal of surplus winningness or discuss the disposal or surplus supplies of both countries, but not the limitation of cultivation. Egypt's contribution was a decision on Sept. so to reduce 1932 acreage by as and 30 per cent. according to variety on the assumption that American acreage would be reduced. reduced. On Sept. 8 the Egyptian Government reduced the cotton tax on producers so per cent. to 28. per kantar.

Lack of demand for industry has led to the curtailment of production in the metal trades. Belgium, France, Germany and Luxemburg were all showing considerably less business than permitted them in the flist half-year of 1931 under the quotas of the International Raw Steel Cartel. Germany had produced 1,166,814 tons less than permitted of her quota of 6.581,933 tons. U.S.A. iron and steel trades in September, 1931, were showing a reduced output of 50 per cent. on a year previous.

year previous.

In April, 1931, the lead producers of the world agreed to make a reduction of 15 per cent. on their outputs of 1930 in order to avoid a store of uns.ld metal at end of year. The price of lead had fallen per ton from £36 5s. in 1935 to £12 at the time of agreement for further reduced output. Spelter had fallen 66 per cent, in price in same period. Canadian figures for lead production of first six months of 1930 and 1931 were 172,204,000 and 146,419,000 lbq. respectively.

On March 20, 1931, the Compania de Salitre de Chile was constituted under local laws. This tysix nitrate-producing companies in Chile became part of the combine known as Cosach, the Chilean Government being owners of half of the authorised capital stock, 3,000,000,000 gold pesos. An international loan issue of \$50,456,500 was begun in March through bankers in U.S.A.; an issue of £2,000,000 was made in London. An international meeting held in July at Lucerne broke down without an agreement, the Chileans withdrawing because of the introduction by Germany of a tariff wall against Chilean nitrates. Secret meetings were reported to have been held by European producers, but a world agreement was not in view in the following months. By this time Belgium, France, Germany, Poland and Czechoslovskia had instituted official import restrictions, practically banning the imports of nitrates. The world seems to have a surplus of nitrogenous fertilisers, but the state of much farm land suggests a want of manures.

RUBBER.

Over-planting in 1925-6 has had its result in making rubber a surplus commodity, that it is almost unsaleable at prices to cover cost of pro-Official estimate from Washington Board of Agriculture issued Sept. 8, 1931, was for a duction. In 1930 the shipments from rubber-crop of 15,685,000 bales, compared with 13,932,000 producing companies amounted to 825,000 tons, bales of 1930. At that moment the Federal of which 96 per cent. came from British and

Dutch territories. The companies desire some Dutch territories. The companies desire some plan of restriction, a popular one being a fax on exports to be used in destroying the surplus. The Dutch Government's position is that it would be contrary to their policy to place any computation on the native population. The British Government could hardly adopt restrictive powers alone—Lord Passfield stated, when Colourial Secretary, that the Government could not intifate but it would consider any agreed scheme by producers in all countries concerned. Solution by producers in an container contest not specified as the second of rubber companies in the Malay States. Whilst rubber remains at about 3d. a pound (Oct., 1931), dividends by rubber companies are almost out of the question, and about £225,000,000 British capital is locked up unremuneratively abroad.

TIN.

In March, 1931, the Governments of Bolivia, Dutch East Indies, Malaya and Nigeria agreed to an international restriction scheme of producto an international restriction scheme of production, the quota for each country being hased on the rear output figures. Dutch East Indies had a cut of 25'4 per cent., Federated Malay States and, and Nigeria a5'5 (10.472 tonos of 7292 giving a quota of 7,750. Complaints were made subsequently that Nigeria appeared to be unduly penalized. On Aug. 24, 237, an International Tin Pool was formed with concurrence of the four mentioned Governments. The Pool is to acquire tin for release at prices on a sliding scale sanctioned by those Governments. The first release will take place of 5 per cent of the holding when spot price of tin on the London market exceeds £150 a ton. At that time, tin was quoted in London at £16 per ton.

WHEAT.

Statisticians agree that the world output of wheat for 1931-a will show a drop of 25-20,000,000 quarters compared with previous season. Climatic conditions rather than local contraction of cultivation are responsible. In U.S.A. the production is expected to reach 869,000,000 bushels at a time when a surplus, accumulated over five years, has reached 500,000,000 bushels. A world estimate of the surplus left over from 2930-31 was issued officially from Washington as 579,00,000 bushels. The problem of the disposal of the surplus has been worrying exporting countries. A World Wheat Conference in Rome, April, 1931, favoured extension of wheat in those countries where it was not largely consumed, disposing, if necessary, of surplus stocks at low prices. Wheat-exporting countries held a con-forence in London in May, but no remodia measure found acceptance. It was agreed that acreage could be reduced, other channels of use sorrage count or reduced, other channels of use for wheat discovered, and an international system of orderly marketing established. An International Wheat Information Service was recommended for support officially by Governments concerned. The International Institute of Agriculture that met in Rome in August favoured an international short-credit bank for farmers with the national banks as shareholders. farmers with the national banks as sharenousers. The European Union Commission at Geneva in September had in mind a preferential treatment of E. and S.E. Europe in the disposal of harvest surpluses. The Federal Farm Board of U.S.A., officially authorised to buy local produce for purpose of stabilising prices, made three big deals in surplus wheat. In Aug., \$,500,000

bushels of wheat were exchanged for z,o50,000 bags of Brazilian coffee; Sept., use, occ tons of wheat and flour sold to Chius for exclusive use in flooded areas; Sept., 7,500,000 bushels of 2930 crop sold to Germany (Getreide Handelsgesellschaft). British farmers have suffered owing to foreign wheats being imported at low prices, but the consuming public has not gained to any extent in reduced prices of bread.

PILGRIM TRUST.

WORK began on Oct. 1, 1930, of the Pilgrim Trust, the body presided over by Mr. S. Baldwin, in the distribution of the sum of £2,000,000 presented by Mr. Rdward Stephen Harkmess, the rich U.S.A. philanthropist. The donor was entertained by the Pilgrims to lunch in London on Juneal, 1931, and publicly thanked. Amongst the subscriptions made by the Trust during 1931 were—£25,000 to preserve amenities of Oxford and Cambridge, saving of Durham Castle (these were especially mentioned by the Archbishop of Canterbury at the lunch), £3,000 Cardiff (athedral, £35,000 Foundling Sife appeal, £500 National Birthday Fund (amesthetics in maternity cases), £420 Gloucester Cathedral glass. The office of the Trust is zo York Buildings, Loudon, W.C.

THE POPE'S VIEWS ON MARRIAGE.

COMPANIONATE marriages and divorce, birth control and sterilisation, were roundly condemned by the Pope in an Encyclical upon Christian Marriage issued from the Vatican during the year. Showing a surprisingly wide knowledge of the social questions of the day, the Encyclical claimed that Christian marriage was a Drivine ordinance and consequently indissoluble. The "involable stability" of marriage, the Popesaid, was menaced "not secretly not under cover, but openly with all sense of shame put cover, but openly with an sense of sname per-saside, sow by word and again by writings, by theatrical productions of every kind, by romantic fiction, by amorous and frivolous novels, by cumenatographs portraying vivid scenes, by addresses broadcast by radio-telephone, in short, by all the inventions of modern times the sanctity of mariage was trampled upon and derided; divorce, adultery, and the basest vices are extelled or depicted in such colours as to be free from all reproach and mfamy. The doctrines defended are offered for sale as the productions of a genius which is thought to have emancipated itse if from all the old-fashioned and immature opinions of the ancients, and to the number of those antiquated opinions is relegated the tradi-tional doctrine of Chi istan marriage." Another passage read: "Any use whatsoever of matrimony exercised in such way that the act is deliberately frustrated in its natural power to generate life is an oftence against the law of God and nature, and these who indulge in such are branded with the guilt of a grave sin." "Con-jugal honour," the Encyclical declared, consisted in "a deep attachment of the heart" and a perfect partnership in domestic life. "Conjugal tidelity requires the sacred loyalty of one party to the other, bound by true love. The wife should be subject to the husband, but this subshould be subject to the nusband, but this subjection does not deny the liberty which belongs fully to the women in view of her dignity as a human being and her noble office as wife, nother, and companion. Nor does it bid her to obey her husband's every request when such a request is not in keeping with reason. Marriage

requires, on the part of the wife, her noble obedience." The Pope described "experimental," "temporary," and "companionate" forms of matrimony as "hateful aboninations which beyond all question reduce our truly cultured nations to the barbarous standards of savage people." The burden of children, His Holiness nations to the barksrous standards of savage people." The burden of children, His Holiness went on, "leads some people to frustrate the marriage act. Such action is shameful and intrinsically victous. While the Church sympathizes with those people, who, in extreme want, experience the greatest difficulty in rearing their children, care must be taken lest a more calamitions error about bergalt them." Simicalamitious error should befall them." harly the Pope condemned the proposed sterilization of the unfit. "Those who act in this way, he declared, "are at fault in losing sight of the fact that the family is more sacred than the State and that men are begotten not for the earth and time, but for heaven and eternity."

R101 DISASTER.

THE Court of Inquiry into the loss of the Rior came to the conclusion that the disaster was caused by a sudden leakage of gas from one on more bags in the fore part of the airship associated with a heavy down-current of air. In their report, Sir John Simon and his two assessors pointed out that the precise details of the nature of the accident could never be ascertained as there were no survivors among those who where in the control car at the time. They considered that the airship first dropped her nose and descended at a steep angle but was brought back to an approximately hori-zontal position. Then, in spite of all efforts, she failed to get her nose appreciably up but continued horizontal until she dived again and struck the ground almost at once at an angle of at least fifteen degrees. "Although the vessel had lost much height during the first phase, if she had been in a normal condition there seems no reason why she should not have pointed her nose up again and regained altitude. fact that she failed to do so, it may be argued most conclusively that she was by then crippled beyond recovery, and the inference is that though nomentarily on an even keel she was descending rapidly to earth." Reconstructing the position, they thought it possible that if the vessel, having become somewhat heavy, had been raised by a buffet of wind, the elevator would be put down by the coxswam, who had just come on duty, to check and counteract the movement The conswain might put his elevator rather more down than was necessary, or keep it down longer than was exactly right. The vessel's nose would drop If, when her nose was inclined downwards she received a strong buffet of wind above her nose it would push her nose further down. If she were already heavy from loss of gas-especially if a rent had occurred in a gasgas—especially it a rent had occurred in a gas-bag which involved progressively rapid inflation—the descent was emphasised. The coxwain would put his elevator up, but she did not come out of her dive as rapidly as she should because she was losing more gas all the time—"How the sees began to lose gas can never be definitely ascertained. The weather was exceptionally bad; the gasbags were hard up against padded

possibility of leakage through chaffing, or, if the vessel rolled through an unusually large angle, through intermittent opening of the gas valves. It seems very probable that the more serious and sudden loss of gas which followed was connected with a specific misfortune such as the ripping of the forepart of the envelope. explanation that the disaster was caused by a substantial loss of gas in very bumpy weather holds the field." The Court rejected any idea holds the need. The cours rejected any from that the vessel broke up in the air from internal weakness, and entirely rejected any suggestion of mefficiency on the part of officers and crew. No blame was put upon those responsible for the decision to make the flight at that time, but the Court could not avoid the conclusion that the Rior would not have started when she did if it had not been that reasons of public policy were considered as making it highly desirable for her to do so if she could.

RENT RESTRICTION.

In October, 1930, the Minister of Health and the Secretary of State for Scotland appointed an inter-Departmental Committee under the an inter-repartmental Committee under the chairmanship of Lord Marley "to enquire into and report upon the present workings of the Rent Restriction Acts (excluding the special provisions relating to agricultural cottages) and whether any modifications or an endments should be made to them." A separate Committee, under the Chairmanship of Mr. Walter R. Smith, M.P., was appointed to consider and report upon the conditions of agricultural cottages. The Report of the Principal Committee was published in July, 1931. It is estimated that the total number of houses in England and Wales is now about nine millions, of which about one and a half millions have been elected since the war. Of the seven and a half million pre-war built houses about six and a quarter millions are still subject to control. Of the one and a half million new houses, about six hundred thousand have been built by local authorities and may be regarded as available for letting. These form practically the only supply of new houses to meet the demand of the pooler paid working classes, and there still exists a considerable shortage of houses for this class. As regards houses for the middle class or better paid attisan class, private enterprise has largely met this demand by the provision of houses principally for sale, and here the building societies have rendered invaluable assistance. The Committee divide controlled assistance. The Committee divide controlled houses into three classes. In the case of Class A, he, houses with a lateable value of £45 or over in the Metopolitan Police district. £35 or over clsewhere in England and Wales and £45 or over in Scotland, it is recommended that control shall be discontinued torthwith. More than one-third of the houses of this class have already been decontrolled under the 1923 Act, owing to the greater mobility of the population, and there have been provided over 350,000 houses of this class, so that in fact it is a minority only of this class which is subject at present to control. Class B is defined as houses with a rateable value of less than £45 but over £20 in a Metropolitan Police district, less than assertance. The weather was exceptionary bad; the gashags were hard up against padded projections, some of which may have begin to wear the fairne; the bumpiness of the wind and the pitching of the ship would intensify the strain; and earlier flights had indicated the incommendation of houses elected by private enterprise belong to this class, as do a large proportion of houses built by local authorities. It is considered that the gradual decontrol by possession under the 1923 Act is less objectional than any method of gradual decontrol. Class C includes all houses the rateable value of which does not exceed \$250 in the Metropolitan Police district, \$130 elsewhere in England and Wales, and \$250 s. in Scotland. It is recommended that here control shall be continued and also that Class C houses shall cease to be subject to the decontrolling provisions of the 1923 Act. The

Brentford. It comprises the British Industrial "Safety First" Association, the London and other "Safety First" Councils. It is supported entirely by voluntary subscriptions and is assisted to a considerable extent by voluntary unpaid workers. The "Safety First" movement is concerned with industrial safety as well as with safety on the highway and in the home. On the industrial side the following table, prepared from the Compensation Returns of the Home Office, shows the seriousness of the present position:—

	Number	Number of Cases.		Compensa-	Fatal Acci-	lrisable- ments	Compensation Paid in Shil-	
Year	Employed.	Fatal	Non-Fatal	Total.	tion Paid.	per 10,000 Employed	per zo,coc Employed	lings per Employee
1919 1920 1921 1922 1923 1924 1925 1926 1927 1928 1929	8,359,183 8,348,150 7,315,866 7,205,609 7,342,311 7,512,359 7,541,014 7,001,795 7,403,222 7,433,650 7,450,112	3,293 3,531 2,385 2,489 2,657 2,878 3,030 2,345 2,567 2,735 2,819	365, x76 381,986 a83,36x 390,423 477,378 487,442 473,055 368,563 455,862 461,485 478,608	368,469 385,517 885,746 392,912 480,035 490,320 476,083 370,908 458,419 464,220 481,471	4,616,7#3 5,978,009 5,509,395 6,495,7#8 7,134,096 6,667,038 6,644,930 6,006,9#1 6,315,803 6,457,#73 6,569,918	3'9 4'2 3'3 3'4 3'5 4 0 3'3 3 4 3'7 3'8	437 458 387 542 532 649 627 526 625 620 642	11'0 14'3 15'0 18'0 19'5 17'8 17'8 17'1 17'4 17'6

effect of the 1923 Act is to immobilise working class tenants. The decontrolled rentals of such houses average \$5 to 90 per cent. above the pre-war level as compared with 50 per cent. in the case of controlled houses. Only about one-eighth of ('lass ('houses have become decontrolled, and the 1923 Act has not succeeded in encouraging private enterprise to erect houses of this type. It is not proposed that control shall be reinstated when Class C houses have already become decontrolled, owing to the many difficulties which such a course would involve. Further which such a course would involve. Fulther recommendations propose that all public houses should be decoutrolled, and in the case of mortgages that control should continue so long as the mortgaged house is controlled, and that in the case of Class A houses control should continue for a period of six months after the decontrol of houses of this class. In regard to sub-letting, the tenant should be required to notify the landlord when he proposes to sub-let, and that in certain cases there should be a penalty for extortionate charges to sub tenants, which should also be grounds for an application by the landlord for possession. Unfortunately, it is unlikely that Parliament will be able to give statutory effect to the recommendations of the Committee during the present year, although these would appear to meet with general approval.

SAFETY FIRST.

THE increasing number of accidents, particularly street accidents, during the last few years has aroused considerable public concern. A number of voluntary organisations have been commenced at various times to endeavour to effect some improvement and, in 1924, the National "Safety First" Association was founded. This Association has as patron H.R.H. The Duke of York and is under the Presidency of Viscount

It will be observed that the years 1927, 1928 and 1929, show a progressive increase in the number of both fatal and non-fatal accidents, and a corresponding increase in the compensation paid per employee. The Safety First Association endeavours by propaganda. a Freedom From Accidents competition, a Safety Engineer Service and by other means to educate the workers and employers and to effect a reduction. Other valuable work in the same direction is carried on by the Industrial Welfare Society, the Institute of Industrial Psychology, &c. On the side of public safety, street accidents are, of course, responsible for the great majority of accidents. The following table shows the increase in the numbers of drivers and vehicles during the last to years —

-				
Year.	No. of Motor Driving Licences	Increase over Provious Year,	No of Motor Vehicles (Excluding Trams)	Increase over Previous Year,
1921 1922 1923 1924 1925 19 6 1927 1928 1929	1,106,000 1,210,700 1,416,400 1,644,400 1,923,900 2,122,900 2,349,000 2,527,000 2,687,000 2,810,000	104,700 205,700 238,000 279,500 209,000 216,100 178,000 160,000 183,000	860,08a 962,115 1,187,590 1,312,357 1,523,210 1,704,213 1,874,681 2,012,904 2,149,228 2,237,474	102,033 165,475 184,767 20,844 181,012 170,468 136,224 88,246

Up to 1925 the yearly rate of increase was plogressive, but since then the rate has gradually declined, and 1930 shows a considerable drop. The following table, prepared by the National Safety First Association from the Home Office

and Ministry of Transport figures, shows the | pleased to accept the special Thousand Millionth position for the last zo years:— | Certificate produced in honour of the event.

Yен1.	Number of Accidents in which Mechanically Propelled Vehicles (exclud- ing Trams) were involved.			No of Fatalities per 1,000	No of Accidents per 1,000	Vehicles per Accident	No of Accidents per z,oso Motor
	Fatal	Non-Fatal	Total	Vehicles	Vehicles.	Accident	Drivers Licensed.
1921	2,091	36,609	38,700	2.43	44 9	22	35
1922 1923 1924	2,435	43 058 53,084 64,318	44,280 55,519	3.30 3.19 3.31	46 o 49 a	22	37 39
1925	3,019 3,401	79,377 86,890	67,337 82,778 91,045	2 33 2 44	51'3 54'3 53'4	19 18 18	41 43
1926 1927 1928	4,155 4,480	95,170 106,753	99,650	a.39	53 2	19	43 42
1929 1939	5,#23 5,722 6,222	111,136	111,976 116,858 181,150	2.20 2.66 2.78	55°5 54 4 54 1	13 18	44 43 43

While each year since roat has shown an increase in the number of accidents, the increase for 1930 over 1929 is less than in suy of the previous years shown. Moreover, the relationship between the number of accidents and the number of vehicles and drivers licensed, has remained steady ever since the Association's campaign was started in 1926, whereas previously it had been getting worse each year. The fatality ratio, however, is still rising, and this is probably accounted for by the increase in the average speed and weight of vehicles. The total number of all street accidents in 1930 was 156,793, resulting in deaths to 7,305 persons, and injury to 177,895, a total of 185,200 killed or injured Compared with 1999 this represents an increase of nearly three and a half per cent. in the number of accidents, and four and a half per cent. In the number of killed or injured. These rates are practically the same as those a year ago, and considerably less than the corresponding rates in all other rates since the war. The National Safety First Association carry out an extensive propaganda to avoid road accidents. The Road Kellowship League set up by the Association, does a good deal of useful work to educate drivers of vehicles. An important branch of the work of the Association is the Safety First Institute for Children. The National Safety First work was first started in 1930 and has been very successful. A considerable drop in the number of accidents, both industrial and street accidents, took place during each Safety Week held, and there is no doubt also that the holding of Safety Weeks has a permanent educational value.

SAVINGS CERTIFICATES.

THE popularity of the National Savings Certificate is well maintained. During the twelve months ended August 31st, 1931 (the most recent date for which information was available before this Almanack went to press), the average weekly sales of Certificates was over a million and a quarter. Certificates were originally put on sale in 1916 and by the date given above the total number of Certificates sold was 1,048,574,774, representing a cash investment of £824,469,569, while the amount remaining to the credit of investors (accined interest included) was approximately £499,000,000.

In January, 1931, the National Savings Move-ment celebrated the issue of 1,000,000,000 Certificates and His Majesty the King was graciously 1930-31

An outstanding feature in the development of the Savings Movement during 1921 was the successful implementing of an agreement for co-operation between the Movement and the Trustee Savings Banks. Co-operation with the Post Office Savings Bank having been brought about earlier, the position now is that the three great State-controlled systems of popular invest-ment are working together for their common purpose. An important step with legard to Savings Certificates of the First Issue was taken during the year Powers were given by the Finance Act of 1931 to prolong the currency of any First Issue Certificates to a date not later

than March 31st, 1940.
Three different Issues of National Savings Certificates have been made :-

First Issue Certificates (cost price 158 6d. and ten-year maturity value 26s.) issued from Feb..

1916, to March 31, 1922.

Second Issue Certificates (cost price 16s. and ten-year maturity value 26s.), on sale from April 1,

1922, to Sept. 30, 1923.
Third Issue Certificates (cost price 16s. and tenyear maturity value 24s) on sale from ()ct. 1, 1023. Holders of First Issue Certificates, instead of encashing the Certificates at the end of ten years,

can adopt any of the following courses:—

z. Retain ('ertificates until March 3z, z93s, with interest after the tenth year at one penny per mouth per Certificate.

a. Exchange them for Third Issue
3. Transfer into 4 % National Savings Bonds.
4. Transfer into 4 1/2 % Conversion Loan (1940-44).

Powers have been given by the Finance Act of 1931 to prolong the currency of any First Issue Certificates to a date not later than March 31 1940. Statistics.

SHOPPING CURIOSITIES.

THE first "Automatic Restaurant" was opened I HE HAT ALTOMATIC RESEAURANT WAS opened in England by Presto, Ltd., in the Strand, London, on May 4, 1951. Thirty machines were installed to cater for 2-300 customers. The shop is open for full as hours, customers being in a position to serve themselves when and how they please. Maximum price for a dish is 6d. The Austrian Ambassador was an early patron.

National Flying Services, Ltd., opened in Northumberland Avenue, London, in May, 2932, an "Aviation Shop" in which everything assoclated with flying, from goggles to an aeroplane, could be purchased. Interior of shop was designed like an air liner cabin, with an aeroplane wing for counter. It acted also as a booking-office for air trips. The fundamental idea is to increase public interest in aviation.

British Waltham Watch Company introduced first Public Time Ball signal in London at their Holbern premises on May s. This was worked by signal from Greenwich, whereby at z p.m. a gided ball would fall down a steel shaft, a z,ococandle-power lamp lighted and a gong sounded.

In June, controversy arose over the time taken in making a suit following upon a reminder that in 1808 an American record was set up of 6hrs. 4 min. from sheep's back to completion. On Shirs, 4 min. from sheep's back to completion. On June 23, 1931, Yorkshire firms started clipping of sheep at 8.50 a.m.; wool was carded, spun, warped, dyed, wove, shrunk, pressed, sent to tailors, cut, stitched, with the final button taking its place at 12.27 p.m. The suit was to the measure of Mr. J. H. Thomas, M.P. On the following day Huddersfield, working with Leeds, set up a record of a finished suit from the time of beginning shearing of a hrs 9 min. 46 sec. A suit made under such conditions was said to cost £xoo.

SUBSIDY FOR OPERA.

A season of grand opera assisted by a State subsidy took place at the Royal Opera House during the autumn as a preliminary to performances in the country. The scheme, when appounced by the Chancellor of the Exchequer some time before the financial crisis, aroused considerable interest and some criticism, and the latter was increased when it was later intimated that despite the necessity for severe retrinchment no alteration was to be made in the arrangement. To assist in the performances of operas, both at Covent Garden and in provincial centres, the Treasury agreed to provide £5,000 at the beginning of 1931, and £17,500 a year for five years from April 1, Broadcasting Corporation, who would hand the sums over to the Opera Syndicate in return for the right to broadcast performances. The Corporation thus became the agents for this expenditure, and a revised agreement with the Postmaster-General sauctioning with the Postmaster General sauctioning this new activity was agreed to by Parliament. It was estimated that for the purposes of this presentation of grand opera a sum of £39,000 a year would be required for five years. In addition to the State grant of £77,500 a year, the B.R.C. were to grant £7,500 a year, and it was hoped to obtain the remaining 5, see a year from private subscriptions. The first performances at the Royal Opera House were generally on the lines of those given in former years, and they were then repeated at it is this year, a week later, which will nullify

popular prices, the company afterwards giving performances at popular prices in the provinces. The main purpose of the scheme was to en-courage and stimulate British opera production, and it was unfortunate that the first performauces should coincide with a time of crisis and depression.

SUMMER TIME ABROAD.

THE principle of altering the clock in order to begin the day of business and general life earlier begin the day of business and general life earlier in the solar day was conceived by Mr. William Willett of Chislahurst, the head of a well-known building business, about the year 1907, and was brought before Parliament in 1908 by Mr. Robert Pearce, Momber of the House of Commons for Leek, Staffordshire, who introduced a Bill known as the Daylight Saving Bill which proposed that the clock should be put forward by twenty minutes in the mornings of four Sunday the tree to the solar day the state of the solar day to the solar day to the form the solar day to the s four Sundays in April, so that during the Summer months clocks would be eighty minutes in advance of Greenwich Mean Time. This Bill-passed second reading, but evidently there was much doubt whether it could be carried intoeffect. The Bill was amended in Committee by the proposition that the change should be made by putting the clock forward one hour on the third Sunday in April and one hour back on the third Sunday in September, and in this form it was re-introduced in Parliament in zoog. The matter, however, was shelved until 1975 when it was brought forward as a measure made advisable by direumstances of the war, and a Bill became law in that year which, with some modification, has remained in force in Great Britain since. It was brought into use for the first time on Sunday, May az. Its purpose has been carried out with little difficulty and with little open objection by the majority of the people, though there are some to whom the change of time reckoning twice a year is repugnant, and a plea for its abolition on behalf of the agricultural industry and because of the supposed injurious effects on children sometimes finds its way into the public press. The scheme was approved in the same year, 1916, by the governments of Austria, Denmark, France, Germany, The Netherlands, Italy, Norway, Sweden, and Portugal, and brought into use in all of these countries, but has since been largely abandoned. From the following brief notes, which are not to be taken as complete, the state of affairs in this respect in most parts of the world may be inferred.

In FRANCE the system was adopted for the first time on June 15, 1916, and in each year since a period between certain dates has been set apart for its operation. The Law of May 24, 1923, prescribing the last Saturday in March at 29. and the first Saturday in October, with power to vary, as the limits of the period, is in force in France and Algeria, and it is believed that though there is some small objection in agri-oultural centres there is no active movement against it. The same applies to Belgium. In recent years the system has been in use in FRANCE and BRLGIUM during the same period in each year as it has been in Eng-land, but a note in the Railway Gazette states that the Governments of these countries have

the convenience to Continental travel and to other international relationships that the lately prevailing uniformity has brought about.

In the NETHERLANDS conditions somewhat initiat to those in France prevail. Summer Time was adopted in this country on May 3, 2916, before it was in England, and remained in use until 1998, being continued after the war as a voluntary measure, but was then discontinued ustil 1925, when, because of the much-increased tourist traffic, Summer Time was imposed generally by legal enactment, but because of its dis-advantages to the agricultural and industrial classes, the law was modified in 1928, and made compulsory only in regard to the traffic services, the period being from May to October.

In GERMANY and AUSTRIA Summer Time was brought into use on the night of April 30-May 1, 1916, and was continued until the end of the war; but the law was not renewed in Germany in 10x9, nor has it been since, as there seems to In 1925, nor has it been since, as there seems to be no general feeling in favour of the system, though a society exists with the object of reviving Summer Time. It has also been given up in AUSTRIA. In DENMARK Summer Time was in use from May 15 to September 30, 1916, but was found to be so unpopular with the

farming community that the question of reviving it has not been considered. CZECHOSLOVAKIA is said to have given Summer Time a good trial, but has discontinued it, finding it not economic Norway, where the system was first used at the same date as in England, My 21, 7276, and ITALY, who followed a week later, May 27, 1236, have sluce discontinued it. Summer Time is also not used in SWEDEN. In SPAIN, though it had been tried and found disadvantageous to the workers, and irksome generally to the inhabitants of towns and cities, it was decided to re-introduce the

system in 1931 for the same period as in Great Britain, but this decision was reversed by the new Republican Provisional Government, and Summer Time did not operate in Spain of Portugal last year. According to a newspaper. announcement, Soviet Russia decided to adopt Summer Time on July 18, 1930, but further details are not known.

Western Hemisphere. In Canada there is no general regulation as to Daylight Saving, as the scheme is always called there and in the United States. When a Bill to introduce it was brought before the House of Commons at Ottawa in 1918, there was considerable opposition by the Canadian people, who, however, supported the innovation in the following year, and the result appears to be a species of local option In ONTARIO, and probably in other provinces, each municipality determines what time it will use, and in general clocks are altered in the cities though not in the country places, which is naturally the source of much confusion. In the UNITED STATES a Daylight Saving Act has been repealed as a Federal law, and the actual practice seems to be as in Canada, the alteration of clocks being made, if at all, for local considerations. It appears that Daylight Saving is practised in Chicago, and it is read under date April 25, 2920, that the clocks of the Grain Ex-change at Winnipeg were to be moved for ward one hour to conform with the change in Chicago,

part of the territory, and six hours slow during the remainder of the year, which reverses the usual practice, since in the summer months the clock is slower on the sun than in the winter. In Maxico the Summer Time system is now in operation. It appears that the plan of putting the clock forward throughout the year had: been given up after trial.

As to South America, the Standard Time throughout CHILE is four hours slow on Greenwich during the summer months from Sept. z to March 3s, but hive hours slow in the other part of the year. According to a newspaper note, Summer Time was adopted in ARGENTINA for the first time on Dec. 1, 1930, the clocks being advanced one hour, the system to remain in advanced one hour, the system to remain its force until March 3, and to it learned from a later press note that this proved so successful that it is certain that the alteration of clocks will be repeated. The scheme was adopted in BRAML for the first time on Oct. 3, 1932, for a period ending March 17, 1932, but since the effect or desirability of Summer Time is said to be a matter of latitude, details as to its operation, and reports of its ancess in different marks of and reports of its success in different parts of these large areas, are wanted. In latitudes, where the amount of twilight is almost negligible the new arrangement is considered as a boon toworkers, since it provides them with an extrahour of daylight for recreation.

It appears that the experiment of varying the clock was made in Australia in the year space, but was pronounced to be without advantage after short trial. There is a Summer Time Act, 1929, in force in New Zealand. Summer Time begins throughout the Dominion on the second Sunday in October and ends on the third Sunday in March. During this period the clock is advanced on New Zealand Standard Time by half an hour, so that during the operation of the Act the time is exactly as hours fast on Greenwich.

SUNDAY CINEMAS.

For the last twenty years it has been the policy of the London County Council, while granting cinemas licences subject to a condition prohibiting opening on Sundays, Christmas Day and Good Finday, to receive applications for Sunday opening and then to intimate that they would take no proceedings in respect of such performances no proceedings in respect of such performances on certain conditions, the principal one being that the net profit should be paid to a charity selected by the licensee from a list approved by the Council, as a result of this policy it was stated that about £300,000 had been paid to charities, including hospitals, in the course of recent years. In December, 1990, in an action brought at the instance of the Council of the Cou Entertainment Protection Association, Ltd., a decision was given by a Divisional Court of the King's Bench, and subsequently upheld by the Court of Appeal, that in view of the provisions of the Sunday Observance Act, 1780, the Council had no power to permit the Sunday opening of cinemas. Under the Act of 1780 a common informer was enabled to institute an action to recover penaltics for infringement, and proceedings by informers were commenced forthwith The decision occasioned much controversy as to the expediency of the Sunday New York and Liverpool. In the State of Alabama the Standard Time from Oct. x to strong claim was advanced on behalf of the atres Fab. re (approx.) is 5½ hours slow on Greenwich, if or equal treatment with chemas. After hearing which is nearly the local time of the eastern the views of deputations from the various

interests concerned, the Home Secretary, in merests concerned, the nome secretary, in April, 1921, introduced the Sunday Performances (Regulation) Bill, empowering the council of any county or county borough to license and permit the taking of money on Sundays for musical and cinematograph entertainments, for exhibitions of animals or inanimate objects, and for debates; before exercising this power, how-ever, the Council must satisfy itself that there was a substantial demand in the locality for the grant of such licences, and, after hearing any representations on the matter, must pass a resolution that it was expedient that such should be granted; in the case of cinemas the licence was to be subject to the conditions that such amounts as the Council might deter-mine to represent the profits must be paid to mine to represent the profits must be past of charities approved by the Council, and that none of the Sunday employees should be employed in chiemas for each of the six previous days. The Bill was left to a free vote of the House, and the chief grounds of the strong opposition which it encountered were that it legalised illegality, that it discriminates unfairly between one form of entertainment and another that the ours of of entertainment and another, that the onus of decision should be borne by Parliament and not thrown upon local authorities, that the principle of Sunday opening would later be inevitably extended to other interests, and that the observance of Sunday as a day of worship should be carefully safeguarded, whereas this was an attempt to commercialise it. The main argument in favour of the Bill was that it merely made legal a practice deemed to be within the law for nearly twenty years, and that it was undesirable that the law should remain as at present, whereby every infringement of the Act of 1780 by the licensee of a cinema was open to an action by a common informer, with penalties following automatically on proof of the complaint. During the Committee stage a strenuous attempt was made to place theatres on the same attempt was made to piace theatres on the same footing as cinemas, but the motion was rejected by a substantial majority; consideration of the Bill was not completed before the adjouvnment for the summer recess. Having regard to its controversial character, the National Government during the emergency session decided not to proceed with the measure, but, in order to regu-larise the situation, an Act operative for one year was passed, permitting those licensing authorities which had during the past twelve months allowed Sunday opening for cinemas and concerts to continue their existing practice

SWEEPSTAKES.

HUGE aweepstakes (tickets now each) have been conducted within a year by the frish Hospitals' Trust, a procedure legalised by the South Irish Parliament. The figures are as follows:—

Manchester November Handicar), NOV., 19
Sales	£648.6x8
Hospitals received	131.784
First Prize	204.704
Second Prize	St. cos
Third Prize	
	40,953
Grand National, March, 1931:	
Sales£	,755,963
Hospitals received	438,990
First Prize	354,544
Second Prize	
Third Prize	177,272 118,181
THE A TEMPORAL STREET	,

Epsom Derby, May, 1931:	
Bales £2	,780,696
Hospitals received	697,424
rg First Prizeseach	30,000
re Second Prizes ,,	15,000

to Third Prizes ... ,,

Other prizes were distributed to holders of tickets for runners, sellers of winning tickets, and so forth. The draw on each occasion was done publicly with the aid of large machines for shuffling counterfolls of tickets, and everything was tried to obtain extensive advertisement. A party of M.P.s were special guests at Dublin during the draw. Owners of tickets living in England took over 60 per cent. of the Derby prizes, in spite of endeavours by police and Post Office officials to stop the sale of tickets. Other prizes were gained by holders as far apart as Mexico and New Zealand, the sales being world-wide.

10,000

SWEEPSTAKES FOR HOSPITALS.

The British Medical Association, at its Eastbourne Conference on July 20, 1231, laid two resolutions on the use of sweepstakes for hospitals, but did not record any definite vote, discussions being closured by motions to pass to next business. Dr. Brackenbury, Chairman of the Counell, announced official countenance could not be given to sweepstake methods for helping hospitals. Mr. Clynes, then Home Secretary, mentioned at a public dinner on June 17, 1231, that Parliament was clearly dis inclined to change the law, however unsatisfactory it might be. The Canadian Parliament, on June 19, declined by 34 to 22 votes to give a hospital sweepstake Bill a second reading. The N.S.W. Government decided in June to run State lotteries for hospital funds.

TAX COLLECTORS.

DURING the passage of the Finance Bill in June, 1931, it was stated by the Chancellor of the Exchequer that, out of about 3,000 tax collectors, roughly 750 were under the direct control of the Commissioners of Inland Revenue, but that of the remainder about sooo were parttime men whose salary or commission did not amount to more than £1 a week, their ages ran as high as 86 and ten per cent were over 70. Tax collectors in England and Wales have hitherto been appointed by the General Commissioners of Income Tax in the various districts or in default by the Commissioners of Inland Revenue, whereas in Scotland the collection has for half a century been carried out by permanent Civil servants. The principle underlying the method of appointment by the General Commissioners appears to have been that, to avoid giving the Crown and its servants too much power in the administration of the Income Tax, the duty of assessment was placed in the hands of the locally elected and unpaid Commissioners. who with their officers were to assess and collect the taxes, the power of Somerset House being limited to the supervision of the collection in the interests of the Crown. In 1922 an attempt was made to abolish the assessor and to transfer his duties to the Iuland Revenue, together with the appointment of collectors, but in the face of determined opposition the proposal was dropped. In regr the question was again considered, and successful negotiations took

place between the Board of Inland Revenue and the National Association of Assessors and Collectors of Taxes with regard to the transfer of the appointment of collectors. The General Commissioners for a number of divisions, while advocating an improvement in the pay and status of collectors, passed resolutions urging the retention of the existing system, and representations were made from other quarters protesting against the removal of the buffer between the taxpayer and a bureaucracy, and pointing out that, if the collector were taken over, either the assessor must automatically follow or a separate office of assessor created, for which the remuneration would be insufficient, and that a case would then be made out for a similar absorption. The Finance Bill, 1931, however, contained a clause vesting in the Board of Inland Revenue the power in England and Wales of appointing collectors which, though strenuously opposed during the debate on the Bill, duly became law. The City of London was excluded from the scope of this clause on the ground that about one-sixth of the total amount of tax was collected in the City, with the result that the system of collection had already been perfected, and that none of the criticism which could be brought against the present system in other parts of the country could be applied to that area. With this exception, therefore, tax collectors will, by a gradual process, become Civil servants.

THAMES BRIDGES.

CHARING CROSS BRIDGE.

THE various stages of the protracted consideration of the problem of a new bridge at Charing Cross have been recorded in the ALMANACK since After the rejection of the London County Council's Bill by the House of Commons in May, 1930, the Council endeavoured to secure a final solution by appointing an Advisory Committee in July, 1930, to submit within nine months an agreed scheme for a bridge and approaches an estimated cost of not more than £12,500,000. The Committee was composed of 16 members, representative of all the interests chiefly con-cerned, with Sir Leslie Scott as chairman, and gave detailed examination to nine different schemes, of which six were selected and embodied in their report, but were unable to produce an agreed scheme; a majority, however, recommended the adoption of a scheme (known as No. 6) which, although it followed in some of its features the one put forward in the rejected Bill of 1930, was claimed to be sufficiently changed to constitute a distinct scheme. In view of claims that the character and cost of one of the six schemes had been misunderstood by the Advisory Committee, the Committee, at the request of the Council, gave further consideration to this scheme, but reaffirmed their previous decision. The Council then decided. in July, 1931, to obtain Parliamentary powers to carry out scheme Number 6 at a net cost of were unable to renew the offer of a grant from the Road Fund for the purpose; in coming to this decision the Government were mainly influenced by the serious economic position then developing, but also by the fact that no agreed scheme was forthcoming, and that future events, such as a rapid development in the elec-

trification of main line railways, might pro-foundly affect the considerations which would determine the site of the railway station and the layout of the approaches on the south side of the river. There is, therefore, little likelihood for many years, if ever, of a new bridge at Charing Cross.

WATERLOO BRIDGE.

The fate of this bridge, which has been so long debated, is linked with the scheme for a new Charing Cross bridge. The Royal Commission on Cross River Traffic, in 1926, recommended that the bridge should not be demolished, but that four piers and arches should be rebuilt and the remainder underpinned; this decision was, however, contingent upon the construction of a nowever, contingent upon the construction or a new bidge at Charing Cross to relieve the con-gestion of traffic in the Strand. With the abandoument of the Charing Cross bridge scheme, apparently it rests with the London County Council to decide whether they will revert to their decision in June, 1926, before the appointment of the Royal Commission, to demolish the existing bridge and to construct a new one to take six lines of traffic.

ST. PAUL'S BRIDGE.

To relieve the volume of traffic passing over London Bridge and Blackfriars Bridge, and the congestion of the streets in the vicinity of the congestion of the streets in the violity of the Mausion House, powers to construct a new bridge were obtained by the Corporation of the City of London in 1921. The bridge approach was intended to pass from the south end of Aldersgate Street along the line of Old Change on the cast side of St. Paul's to the bridge head. In ross the London and Home Counties Fraffic Anvisory Committee advised that the bridge should be proceeded with, and steps were taken to acquire the necessary property; but in rest the Royal Commission on Cross River Traffic urged the abandonment of the scheme in favour of a new Ludgate Bildge, to be a high-level road bridge passing from Southwark Street over the river, close to and east of the Southern Railway bridge, to Holborn Vladuct. The City Corporaalternative were unable to agree with the recommendation, and in January, 1929, sought powers to extend until 1921 the time for the completion of the bridge authorised in 1911, but the Bill promoted to secure the extension was rejected. Further schemes have since been put Further schemes have since been put forward, and it is understood that the matter is still under consideration Considering the need for additional means of communication in the western part of the City, much dissatisfaction has been expressed with the decision of Parliament not to extend the time of completion of a scheme which had received its sanction after full inquiry many years before, and under which the City Corporation had made heavy commitments.

TOTALISATOR.

HOPED-FOR success has failed to materialise C12,500,000, subject to the Government agree- with the Totalisator on British racecourses ing to contribute 75 per cent of the cost, but The Racecourse Betting Control Board was were at once informed that the Government forced to announce in August, 1931, that with forced to announce in August, 1931, that with the exception of eight tracks (Ascot, Ayr, Birmingham, Hurst Park, Newbury, Newmarket, Nottingham and Wolverhampton) further employment of the electrical machine would not justify itself for the present, and the electrical indicators on hand-worked machines would be entirely discontinued. The deduction from the pools by the R.B.C.B. has remain d at we per cent, but from Aug. 3x instead of paying to the round sum as represented in pence, reversion was made to the old practice of the multiple of 3t. next below dividend. In some instances this is equivalent to 76 per cent. deduction. Ascot's four days showed the biggest pools—£44,802,222. £65,043 184.

A question of legality arose over the Tote for the greyhound tracks, and to make the use of the Machine possible racing clubs have been established, membership of which permits betting with the Tote. The R.B.C.B. has no connection with the greyhound apparatus in either provision, control or profits. France has tackied the problem of getting bets made away from the course placed in the Machine. On March 3, 232, 7 main and £6 sub-agencies were opened of the Pari-Mutuel-Urbain, whereby people living in towns could have their bets transmitted to the raceourse. In Britain an attempt was made to send money by post direct to the Tote on raceourses, but this was declared illegal. By arrangement with the R.B.C.B., Tote Investors, Ltd., can accept bets on credit to be placed in course Machines.

TRADE DEVELOPMENT.

DELIGHT can be expressed at the greater linking up of industries and departments in industry for the purpose of common improvement in trade that found expression following the Missions of 1930, in various forms during 1931, and promise to extend in 1932.

COTTON.

A Cotton Textile Exhibition, organised by the British Cotton Industry in conjunction with the Government, was held at White City, London, Feb., 16-28. Every section of the home cotton industry was represented, big fashion parades taking place daily with a view to interesting the public and other industries of the uses of cotton. The Queen honoured the Exhibition with a visit on the opening day. The actual net cost to guarantors worked out at £73,648, the industry considering the money well spent. A British Cotton Week followed on May 4-9, in which suitable posters and sold well. On April 4 the Cotton Mission (Sir E. Thompson, Chairman) returned to Inverpool after having been away in the Far East from the previous Sept. 7. The reports were made public on April 35 and May 7. The Report pointed out that the Cotton Industry depended on foreign sales for 80 per

cent. of output. Lancashire's production had fallen from 8,000 million linear yards in 1923 to 4,000 million in 1930. In international trade Britain's sales had fallen from 55 to 45 per cent.; Japan's had increased from 3 to 79 per cent. British exports to China and Hongkong had been four times those of Japan in 1923, but only out-tenth in 1930. Japan had become a closed market for British outton. Though China is increasing her production, she is still a market provided our goods can compete in price with those from Japan. Lancashire had to reorganise and reduce costs if trade was to be recovered. Japan had lower wages and a double shift system, plus a greater output per weaver, who looked after more looms than was the British practice. At every stage, from purchase to packing, Japan had the price advantage. Our marketing was bad. Suggestions made included standardisation in goods offered, maintenance of stocks in China, organisation of a marketing body, long term credits, lut, above all, cheaper goods.

Lancashire has also suffered from a boycott of goods organised by the National Congress Patty. A protest meeting squinst the boycott was held by 7,000 members of the Manchester Royal Exchange on May 5. A Lancashire Cotton Corporation was incorported on Jan. 23, 1299, with the intention of rationalising the industry by the amalgamation of mills. The Corporation issued £8,000,000 64 per cent. debentures in March, 1931, amounting at the time that 72 mills have been taken over and 26 were in negotiation. The Bankers' Industrial Development Council and the issue through the Bank of England. A Lancashire Industrial Development Council is educating public opinion to the need of more industries in the County Pulatine.

WOOL

The Far East Economic Mission also dealt with the position of wool in China. The market was open, apart from the new tarrif, but it was a matter of prices, especially with the low silver figure. An Imperial Wool Fair was organized by the Yorkshire Observer at Bradford in May, and this continued until the Bradford Pageant in July.

ARTIFICIAL SILK

An Exhibition of Artificial Silk was arranged by the Drapers' Organizer at the Albert Hall, Feb. ro-sr. Mr. Amery, M.F., presided at the opening, and The Queen hor oured the Exhibition with a visit on zgth. Great advances were shown in uncrushable cloths and dyes.

LEATHER.

A market enquiry was ordered in Sept. on behalf of the leather trades exporting to Denmark and Netherlands, the Overseas Trade Dept. co-operating with the National Leather Goods Association.

CANADA.

Federation of British Industries sent a Trade Mission (Sir J. Lithgow, Sir A. Duckham and Mr. M. Mackenzie) to Canada at invitation of Mr. Stevens, Dominion Trade and Commerce Minister, April-May. The report stated cooperation between home producers in building up a selling and service force was essential to meet competition from fereign countries.

Easter communications, uniformity of statistical publications within Empire, liaison between strong economic and investigatory committees, need of synapathetic touch between Governments, publicity, flow of hone investment moriey to Canada were amongst recommendations. Britain's strongest competitor, U.S.A. had the advantage of being on the spot. Earl Jellicoe opened the synd Annual Canadian. National Eachbition in Toronto on Aug. 28, at which certain home manufacturers were represented. A World's Grain Exhibition is to be held in Regina in 1922.

EGYPT.

A Trade Mission, Sir Arthur Balfour as Chairman, issued its Report in May covering its visit to Egypt, Jan. 31-Mar. 14. Recommendations included: Complete overhaul of production costs. U.K. manufacturers should study more on the spot the desires and tastes of Egyptians, standardisation of goods with organised trade marketing, knowledge of local languages with vernacular printed catalogues, holding of stocks locally and employment of canema films for publicity. Share of trade in Egypt had fallen with British goods from 30°5 per cent in 1913 to 20°3 in 1930, that of cotton piece goods from 87°8 to 48.8.

to 4.8.

The British Africa Industrial Development Expedition opened in Carro on July 27 with exhibits from 65 home firms, and proceeded later to Alexandria and then to the Cape, using a motor convoy for travelling Lurroses.

SOUTH AMERICA.

H.R.H. Prince of Wales (accompanied by his brother, H.R.H. Prince George) made an extended tour to South America, Jan. 18-April 25, during which he acted as the Empire's Trade Ambassador. He visited Peru, Bolivia, Chile, Argentina, opening at Buenos Aires on March 14 the British Trade Exhibition. Over 1,000 British and Dominion firms were represented at this B.T.E., the value of the exhibits being \$\int_{\text{5}},\infty,\inf

FLOATING EXHIBITION.

Lord Auckland was instrumental in the purchase of the S.S. Letcestershire from the Bibby Line for the purpose of fitting the vessel out as a Floating Exhibition of British Industries. She was renamed the British Exhibitor by Lord Derby on July 29, and was due to sail for South America on Nov. r. Apart from individual exhibitors, chemical, furnishing and Birmingham jewellers were being represented collectively.

IDEAL HOME EXHIBITION.

The interest shown by the public in the Daily Mail Ideal Home Exhibition at Olympis, held during April, is a distinct pointer to increased trade possibilities. During the 23 days of the Exhibition 666,890 people paid for admission, an

increase of 49,852 above previous record. A large volume of sales was done by exhibitors.

TELEPHONES.

Britain has not developed the use of telephones to the extent associated with the leading nation of the world The s.coo.cooth installation was, celebrated by the G.P.O. in June, 1932, with the acceptance of a special micro instrument by the King for Buckingham Palace. A net increase of over 9,000 subscribers is being made monthly, the trunk calls exceed 12,000,000 monthly, being an increase of over 2 per cent. on 1930's figures.

BRITISH INDUSTRIES FAIR.

British Industries Fair was held in London (Olympia, with x,xxx exhibitors of lighter manufactures, occupying 300,000 ft. space; White City, with cotton textiles from aso firms; Royal Albert Hall, for artificial silk goods, and Birmingham (Castle Bromwich, for heavy goods), Feb. x6-a8. Combined attendances of Olympia and White City were x67,0xx home buyers, 4,865 overseas buyers, and 33,844 general public (non-purchasers in evenings only). Birmingham's figures were—x04,833, x 865, xx0,000. The Queen, Duchess of York and Duke of Gloucester paid visits. Large business was reported, the biggest order numerically being nine million jam-pot covers worth £xx,000. The Fair not only means business on the spot, but the establishment of contracts that lead to orders later. The Empire Marketing Board with the Dominions was strongly represented Arrangements for x93x Fair, that will open on Feb. 2x, include a special section for the whole Textile Industry at White City and a big extension at Birmingham to permit a letting space under cover of a quarter of a million square feet. A Committee was appointed in May, x93x, with Sir G. Garuscy as Chairman, for the purpose of secusing permanent accommodation for the London Section and placing the Fair on a self-supporting basis.

TREASURE TROVE.

An official notice was circularised through the British Museum in March, 1931, calling attention to the Laws applying to Treasure Trove. Gold and silver objects found in land or buildings and and shiver objects routed in tank of remaining and apparently without owners become treasure trove, and thus the property of the Crown. Prompt notification of the discovery will lead to either purchase of the articles at market value from the finder, or the goods returned to him if not wanted by the Authorities , in the latter case, the British Museum will attempt to find a buyer, should finder desire The local ('oroner is the official to be advised under the Act of 1887, and he is the Authority who conducts the enquiry mto the finding and declares objects to be treasure trove. Finds in other metals or of ancient objects are not freasure trove, but in the interests of knowledge such discoveries should be described and reported to the British Museum, the Director being in a position usually to suggest a method of disposal if desired Under an old Treasury Minute of 1886, finders received only four-fifths or nine-tenths of the value The removal of this deduction should mean less retention and secrecy of discoveries.

THE 24-HOUR CLOCK.

DURING the past few years efforts have been made by the Royal Astronomical Society and others to secure the adoption of the 24-hour

method of expressing time; the change was recommended by a Home Office Committee as far back as 1910. On the Continent the use of the system on the railways and in post offices is familiar, while in England it is already used in Army Norway and Afr. Express instructions. Army, Navy and Air Force instructions; an example of its usage for the expression of times of high water, sunrise, sunset and astronomical phenomena generally may be found in the early pages of this ALMANACK. The adoption of the system nationally hinges upon its acceptance by the Post Office and the railway companies, and the assent of the latter has been made conditional upon a general desire for the change. The subject has been discussed in the House of Lords on more than one occasion, and in May, 1931, Lord Newton moved that the Ministry of Transport should invite the railway companies to adopt the a4-hour method from a certain date, and that it should be simultaneously introduced into the Post Office; careful and sympathetic consideration of the question was promised by the Government. The advocates of the change point out that the official use of the system for time-tables, notices and formal statements would not necessitate its use in ordinary conversation, and that alterations in the dials of clocks and watches would be unnecessary, but, if desired, the numbers 13 to 24 could easily be added to the numbers 1 to 12. The expression of a general and compelling demand by the public for an alteration of the present system is not easily conceivable, unless a definite lead is given by one or other of the interests mainly concerned.

UNEMPLOYMENT.

THE whoie world seems to be faced with an unemployment problem. Not only has there existed a surplus of labour, but those in work have made a surplus of production. Consumption has not kept pace with machinery increase. In theory, the world solution seems to he in distributing the work available to all, thus leading to a shorter labouring week with the possibility of the majority having to lower their possibility of the majority having to lower their standards of comfort to raise those of the minority. In Feb., 1931, the International Labour Office reviewed the problem, but could only pass it on to the next assembly. On July a the Geneva Unemployment Committee suggested an international exchange of workers, a placing conference, using idle money on public works, the provinced conversation in works assembly. European economic development, and long term credits for transfer of surplus labour to land likely to absorb it. These proposals arose out of the enquiries into Mr. Briand's scheme of European Union. international co-operation in works essential to

Britain.—As will be seen from statistics that follow, unemployment has grown with sevenleague boots. The sole reason is lack of markets abroad for manufactured commodities. Overseas countries have not had the means for purchasing our products. Either goods that we used to supply have been prepared locally at cheaper rates, or our prices have been undercut by com-petitive producing countries, or our manufac-tures have come within the luxury class and thus to be avoided in days of essential economy. Hope for the future lies in better methods of manufacture and merchandising with decreased selling prices, consequent upon lowering of production costs, plus the removal of the tariff walls that automatically raise the price of our Ministry of Labour reported 520,000 unemployed.

goods sent to the countries so surrounded. Failure to sell abroad has meant in turn less money for spending here; that in its cycle has rendered more would-be workers unemployed. Inland trades that have suffered most are iniand traces that have supered most are shipbuilding (as per cent. unemployed), steel and iron mills (45), cotton (42), docks (40), coal (32). Least unemployment has been in the internal transport, printing, tobacco, electricity, gas and water supplies, and especially with train and 'bus men and commercial clerks. London and Southern areas have shown the biggest increases in unemployment, but these have still the fewest unemployed. The Unemployment Fund has been spending over a million more weekly than has been received as contributions, borrowing powers of the Fund being functional Government led in September to a decision not to borrow again, but to increase contributions and reduce benefits, whilst transferring those showing signs of being permanently unemployed to the Public Assistance Committees.

Weekly registrations by the unemployed at the Labour Exchanges have been as follows:—

Date (1931)	Male,	Female.	Total.	Total in previous Year.
Jan. 26 Feb. 23 Mar. 23 April 27 May 18 June 22 July 27 Aug. 24 Sept Insured Persons	2,016,998 2,027,730 1,967,922 1,957,105 2,068,072 2,127,615 2,118,329	624,858 620,822 638,723 678,860 694,834	2,577,916 2,706,795 2,806,475	s, x19,648 s, x88,400

Each month in 1931 showed a gradually increasing percentage, as being reached in August.
Growth of debt on Unemployment Fund has been-

•• •• ••

Australia.-Second quarter of year showed 276 per cent of trade unionists unemployed. Premiers' Conference in Sept., 1931, asked Commonwealth Bank to supply further £5,000,000 for loan works, then giving empleyment to zoo,ooo.

Canada.—According to firms reporting to Statistics Bureau, there has been slight employment increase from x986. On Sept. 4, x931,

Total relief was £14,000,000 in 1930, but 1931 winter expected to be worst with 150,000 drought-stricken Western farmers. Much public work in hand.

France.—Though unemployment returns show only so,coo on exchange registers, short time working is in evidence. In July, 1931, 31 per cent. were working under 48 hours weekly.

Germany.—On Oct. 1, 1931, unemployment benefit was reduced from s6 to so weeks (seasonal trades 16) in view of an increase of unemployment to 6,500,000 in winter. Government Commission recommended in April, 1931, 40-hour week, no overtime and no double jobe as solution; Herr Stegerwald, Labour Minister, at Aug. Congress of General Federation of T.U., favoured some form of short time provided exports were not interfered with. He thought £100,000,000 would have to be raised for relief works before Mar., 1932.

New Zealand.—Camps are being formed for single men to be given work constructing roads and preparing lands for settlemonts, with Unemployment Board as controlling authority. Last available unemployment registration figure was 45.564.

U.S.A.—President Hoover announced on May s. 1931, he did not propose to call an extra session of Congress to deal with the economic situation. "We cannot legislate ourselves out of the world economic depression. We can and will work ourselves out." By Sept., 1931, relief expenditure had been authorised for £18,000,000, apart from private and State schemes on building and roads. Mr. G. Swope, G.E.C., has a proposal in hand that is securing much support for regulation of production according to consumers' needs, with guarantee of involuntary idleness to workers. He includes a contributory unemployment insurance scheme.

WATCHING THE COAST.

THE coast-watching organisation of the Coastguard Service was described as "thoroughly efficient and adequate for the requirements" by a departmental committee appointed by the Board of Trade as the result of the suggestion of a Court of Inquiry into the loss of a vessel At the same time the committee made a number of suggestions for improving the service. They expressed the opinion that the retention of coastguard stations on unfrequented parts of the coast merely to maintain continuity of the watching organisation could not be justified, and they recommended that such stations should either be closed or reduced to auxiliary stations Unless a for use in bad or thick weather only. station is on an important traffic route, overlooks serious navigation dangers, or supervises the work of a busy fishing port, harbour or area, the employment of full-time personnel on coastwatching duties at the expense of the State, they declared, could not be justified, and if local authorities desired a watching organisation for the protection of pleasure craft at seaside resorts, it was not unreasonable that they should themselves bear the cost of providing and maintaining the necessary look-outs. The committee proposed that the system of arranging stations in groups (usually of three stations) and placing each station in turn on night watch in fine weather should be amended, so that only those stations which afford the greatest amount of supervision of the coast and sea should undertake the

necessary duties for a group of stations. The system whereby watch is kept from look-out huts is, in the committee's opinion, preferable to the sign of the committees opinion, presents to keeping watch by means of watchmen on patrol. They proposed to reduce the number of coast-guard stations from ags to ary and to increase the auxiliary stations from g8 to 24s. The total look-out positions would not be less than at present, but the coastguard personnel would be gradually reduced from 820 to 772. The report of the committee added that, at their request, the Board of Trade had developed a scheme for rating the general status of the auxiliary service and organising it in a Coast Life-Saving Corps, which they thought would materially add to the efficiency of the service. The Corps would be enrolled on a voluntary basis and would com-The Corps would be prise life-saving appliance men, coast watchers, and an intelligence section, the groups in some cases including women. As many of the helpers would be working people, it would be necessary for the Board of Trade to provide for the adequate remuneration of the members of the Corps, but the additional cost would be offset by savings secured from the reduction of coastguard stations and personnel. Another recommendation was that each district should be supplied with one or more lamps capable of throwing a good beam for soo or sgo yards, while it was urged that powers should be obtained by the Board of Trade to compel the owners and masters of all vessels employing paid hands to carry efficient distress signals. Finally the committee expressed the view that, with the further development of wireless telegraphy and telephony, the need for visual watching should gradually be reduced

WEIR REPORT.

IN Sept., 1929, the Minister of Transport appointed a Committee of three (Lord Weir as Chairman, Sir Ralph Wedgwood and Sir William McLintock) to examine the "economic and other aspects of the electrification of railway systems in Great Britain, with particular reference to main line working." The Committee held 32 formal meetings and heard 12 witnesses. Their report, known as the Weir Report, which was issued on April 25, 293, pointed out national generation of electricity at low costs constitutes a new favourable factor in favour of electrification, an efficient railway system is essential, and electrified suburban lines are being successfully worked. After observing that the increased demand for electricity would cheapen its supply for industry, and acceleration of rural electrification would follow its application to railways, the division of work was suggested that the Central Electricity Board should provide transmission lines and equip the sub-stations, with the latter controlled by railways. There were to be no half-meashnes; success would hier a comprehensive scheme, leaving out only branch lines that might be worked more profitably by other haulage methods. Direct financial economies would follow from electrification, whilst speed, comfort, improved service avaitage would lie in dependence on the centralised electrical sources of supply.

electrical sources of supply.

Working out in practice would call for z=-se years' programme and an expenditure of £261,000,000 approximately. Gross aggregate costs were estimated at £323,150,000, against which there would be realisable credits of £62,280,000. The Central Electricity Board

would be called upon to spend also £80,000,000 for generating plant, lines and stations. Taking for generating plant, lines and stations. Taking a year's budget, railway working costs would be reduced from £55,600,ray to £35,199,424 (plus additional renewals, £4,451,000), thus making a saving of £17,200,700 (pints coal haulage charges of £35,000) a year. This would be equivalent to 6'2 per cent, on the cost of £35,000,000. Though the bulk of the savings were in connections with unconted labour. the relives trade tion with unwanted labour, the railway trade unions at their Conferences welcomed electrification. It might be noted that the Southern Railway has in hand a main line electrification scheme between London, Brighton and Worthing;

mission to driving-wheels. But experience in that was limited, and might be less economical on well-loaded lines. An independent scheme of railway traction by Diesel-oil-locomotives was submitted to the Ministry of Transport in Aug., regr, in which it was set forth that the cost of oli-electric working would be fraction cost on pared with the far, one, one for the electricity change-over. A list of advantages of the oil system over the electricity grid was set out, but against these needs be placed the statement in the Weir Report that preference should be given to a system using coal rather than oil as being in national interest.

this will be completed early in regs

The Report observed that the most promising afternative to steam haulage, other than electricity, was the oil engine with electrical trans-

Annual Summaries.

THE WEATHER OF 1930-31.

(1230) October was mild in all parts, and on the 18th. The month was on the whole especially so during the third week. The month was wet in Scotland, Ireland and the western districts of England and Wales, but in the east of districts of England and Wales, but in the east of England it was both dry and sunny. The month opened generally cloudy and dry, but about the 4th, 19th and from the 18th to 18th. bright periods occurred in the east and south-east. On the and rain began in the south of resact. On the and rain began in the south of Ireland, and during the night of the 2rd to 4th and on the 4th heavy falls occurred in many parts of the British Isles. This rain marked the beginning of a spell of unsettled weather, which continued almost unbroken until the end of the month. There were, however, some bright periods, especially on the 6th and 4th. Some snow occurred on the hills in Scotland on the oth, and severe ground frost occurred at many places during the nights of the 8th and 9th and the oth and roth. During the period roth to 13th an anticyclone caused more settled conditions over the greater part of England, and good sunshine records were obtained in many places, but the unsettled weather with rain at times continued in Scotland and Ireland. From the 15th to 17th some unusually high temperatures for the time of the year were recorded, maximum temperatures of 65° F. and over in most parts of England and 70° F. m London on all three days, while night minimum temperatures on the 15th or 16th did not fall below 60° F. at places as far apart as Manchester, Ross-on-Wye and Margate. Rain occurred at most places during this period. On the soth con-ditions changed, and during the next six days cool, squally, north-west winds, with occasional local thunder and hall, and gales on the 44th and agth, were experienced. The coldest days were from the 44th to 57th. A renewal of the mild weather occurred on the 38th. On the 36th and 31st cold air again reached Scotland, but the weather continued mild in England. Monthly means of pressure were below the normal in all districts, while the prevailing winds were between south and west. Among the highest gusts were 59 m.p.h. at Butt of Lewis and Pendeinnis Castle on the 32st, and 67 m.p.h. at Lerwick on the 32st. Monthly mean temperature was above normal in all parts, especially in the east and south of England. The extreme temperatures of the month were (England and Wales) 7r F. at Canterbury on the 27th, and 23° F. at Rickmansworth on the 27th; (Sectiand) 69° F. at Rehmans at (Ireland) 50° F. at Dullin (Trinity Cellege) on the 24th, and 23° F at Ballinacurra on the 32th and 23° F at Ballinacurra on the 32th and 23° F at Ballinacurra on the 32th and at Lisburu and Dublin (Plucnix Park) on the 32st. The month was wet in the western districts of Great Britain and in Ireland. and dry in the east of England. Over land, and dry in the east of England. Over the British Isles as a whole the precipitation expressed as a percentage of the normal for the expresses as a percentage of the normal for the period s8r-1935 was 1rg; the values for the con-stituent countries were: England and Wales 87, Scotland 149, Ireland 162. This is the fourth consecutive mouth when the general precipi-tation over Ireland has exceeded the normal. The distribution was very uneven, for while less than half the normal fell in the east of England, bearly twice the normal fell in parts of Cumberland, and in Scotland mean temperatures were berland, and in Scotland 14-36 inches fell at below the normal, and over the country as a Glenbranter, but only regained fell at Smeaton. The heaviest daily fall was a So inches at Ardgour In most parts of England and Wales and

Scotland there was a well-defined concency of bright sunshine. Fog was most widely reported about the 4th, 19th and from the 27th to 29th. Aurora was observed in Scotland on the 18th, 18th, 18th, 18th, 28th, 28th, 28th, 28th, 28th, 28th, 28th, 28th, 28th, 28th and 27th, while that of the 17th was seen as far south as Market Harborough and Norwich.

November was generally wet, especially in England and Wales, where the general precipitation was one and a half times the normal. In spite of this, however, sunshine totals were in excess of the normal. The month opened with mild, rainy conditions, with local mist or fog. On the and a violent squall crossed southern England, its passage being accompanied by severe England, its passage being accompanied by severe thunderstorms in places, and quasts of 8s m.p.h. at Cardington, 78 m.p.h. at Scilly, and 77 m.p.h. at Shoeburyness were recorded. Considerable sunny periods occurred on the 4th and 5th. A depression off the south-west coast of Ireland on the morning of the sth moved south-eastwards, and in the extreme south there was much cloud and rain. The 6th was generally sunny, cloud and rain. The 6th was generally sunny, many places recording more than 8 hours bright sunshine. From the 7th to 9th an unsettled westerly type of weather prevailed. Much rain fell in Scotland and Ireland on the 7th, and widely during the night of 7th to 8th. From the zoth to 13th mainly dry, sunny weather prevailed in the south and east, but the nexthand the south and east, but the next save under the influence of on Leeland. west came under the influence of an Icelandic depression, and though there was not much rain, the wind was frequently strong, gales occurring in exposed places on the roth, rath and rath.
On the rath many places on the south coast on the table and maxima enjoyed over 8 hours sunshine, and maxima reached or exceeded 60° F at many places. There was rain in Scotland on the 14th, and general rain on the sth. A mainly rainy and general rain on the sth. A mainly rainy and generally dull period occurred from the sth to sth. Heavy iam fell in several parts on sach day except the arrol, which was ammy, but heavy falls occurred in the south-west during the night of the aard to auth. Gales occurred along parts of the coast, mainly in the English Channel, between the sand and seth. Show occurred generally in Scotland on the sand, and thundergenerally in Scottaint on the santh and thunser-storms were reported in southern Eugland on the sist, sand and softh. During the period syth to 30th improved conditions, with much sunshine and local night fog, were enjoyed in the north and west, but in the south there was still much rain at times. Cyclonic conditions pre-dominated during the month, and for the fifth consecutive month pressure means were below the normal. Winds were mainly westerly and the normal. Winds were mainly westerly and were frequently strong. Gales were widespread on the and and and, in the south-west on the 5th to 18th, parts of Scotland on the 5th to 18th to 18th widespread on the send to 24th, and in the south-west on the 18th and 18th. Among the highest gusts recorded were 8 m.p.h. at Kriwall and 29 m.p.h. at Butt of Lewis on the 28th and 18th and 79 m.p.h. at Pendennis on the ath, 78 m.p.h. at Scilly on the and and at Birmingham on the and. In Scotland mean temperatures were below the normal, and over the country as a Ireland the mean was within 2° F. of the normal. The extreme temperatures for the month were (England and Wales) 64° F. at Shaftesbury on the 14th, and 12° F. at Rickmansworth on the 17th; (Scotland) 64° F. at Stonehaven and Aberdeen on the 17th, at Stonehaven and Aberdeen on the 17th, at Stonehaven and Logie Coldstone on the 18th; (Ireland) 62° F. at Waterford on the 18th; (Ireland) 62° F. at Waterford on the 18th, and 18th, are 18th, at Phonix Park on the 18th at 18th, and 18th, and 18th, are 18th, at Phonix Park on the 18th at 18th, and 18th, and 18th, are 18th, at 18th, and 18th, and 18th, are 18th, and 18th, are 18th, and 18th, and 18th, are 18th, and 18th, are 18th, and 18th, and 18th, are 18th, and 18th, are 18th, and 18th, are 1

with frequent mist and fogs. During the first six days of the month a persistent ridge of high six days of the month a persistent ridge of high pressure gave quiet, dull and dry weather generally. With the passage eastwards of a trough of low pressure, fairly heavy rain fell in the west and north-west during the night of the 6th and 7th and in most places on the 7th. Unsettled conditions prevailed until the 17th, during which period frequent but generally slight precipitation occurred. Snow or sleet occurred in the north of the 8th and locally in England on the 8th and l on the 8th and locally in England on the 9th. The sharpest frost of the month occurred on the morning of the 10th. During the night 10th to 11th heavy rain occurred in the west and southwest and extended to most districts on the 11th. Gales were reported from exposed places on the 11th, and from then until the 13th mild, rainy conditions with bright periods prevailed. Fog was widespread on the 15th, and in the east and south-east day temperature was only a few degrees south cast day temperature was only a law degrees above freezing. From the 18th to soth mild south-westerly winds spread over the country, and day temperature rose above 50° F. in several places, and in most parts the highest temperature of the month was registered during this period. On the sand an anticyclone extended over the British Isles, and in several places in England dense and persistent fog, with maximum temperature below 40° F., were reported on that day. From then until the end of the month depressions of increasing intensity crossed the country from the Atlantic, bringing generally unsettled weather, heavy rain or snow at times, but periods of bright sunshine, with temperature above normal. The Christmas period was mainly mild, with rain at times, and bright sunshine, although snow fell heavily in parts of north-eastern England on the a5th. Gales occurred generally in the west and north on the a6th and a7th and over southern

districts on the a8th. Rain fell heavily in the west and north on the a8th, when 83 mm. fell at Borrowdale (Cumberland) and 75 mm. at Penrhyn (Carnarvon). In Scotland and Ireland monthly pressure means differed as a rule by less than x millibar from the normal, and in Eugland generally x to a millibars below the normal. Winds were mainly southerly or westerly, and with the exception of gales about the 12th to 13th and at Butt of Lewis on the 28th, 80 m.p.h. at Tiree on at Dunfanaghy on the syth. The month was on the whole mild; the mildest days occurred generthe whole mind; the mindest days occurred generally at the beginning of the month and about the 13th, 13th and 13th. The extreme temperatures of the month were (England and Wales) 60°F. at Rhyl and Colwyn Bay on the 18th, and 15°F at Bellingham on the 12th; (Scotland) 35°F, at Aberdeen and Stouchaven on the 18th and Gordon Aberdeen and Stonehaven on the 18th and Gordon Castle on the 18th and 187° at Braemar on the 18th; (Ireland) 180° F. at Newcastle (Wicklow) on the 18th and at Blacksod on the 18th, and 188° A. Tubbin (Glasnevin) on the 18th and had only 52 per cent., Cromer 22, and Killybegs (Donegal) 63 per cent., Balbriggan had 140 per cent., Blacksod 128 per cent., and parts of Wales 125 to 150 per cent. At Rothesay rain fell on 30 days, while at Kinlochquoich there were 8 days with over as mm., the wettest being the 15th with 6 mm. Sunshine aggregates were below normal in almost all parts of England and Wales. In Scotland there was in general a slight excess, except in the south, whilst in Ireland aggregates were as a rule above the normal in the south and west, and below the normal in the east and northeast. The dull character of the month over the greater part of England is indicated by the large number of sunless days; at Huddersfield there were as and in London and Bradford there were 23 days with no bright sunshine Fog was unas days when no origin sunsinger for was unusually prevalent throughout the month. It was observed in the mornings on 27 days at Hull, 24 days at Nottingham, and 26 at Kensington; in the early afternoon it was reported on za days at Harrogate and zz at Greenwich. The fog in and around London on the sand was one of the most dense of recent years, and caused serious dislocation of all transport services. At Southampton, on no day during the month did the visibility in the morning or evening exceed 6½ miles. Au-rora was observed in Scotland on 7 occasions. On

rora was observed in Scotland on 7 occasions. On the soch it was visible over the greater part of the country. Solar halo, with parhelion, was observed at Oxford on the pil, xith, xith and seth. Year, 292.—The outstanding feature of the years weather was its persistent and excessive wetness, the annual rainfall exceeding the normal almost everywhere. Apart from a short hot spell at the end of August, during which 94° F. was recorded at London (Camden Square), the highest in the British Isles since July 12th, 1923, when 96° F. was recorded at the same station, there were no conspicuous departures from the normal. There were no prolonged and intense cold spells. Sunshine aggregates were in general deficient. The annual pressure means were from s to 3 millibars below the normal. Among the outstanding gales of the year were those of January 1st to 3rd and 12th. On the

and a gust of or m.p.h. was recorded at Liver-pool, and on the rath res m.p.h. at Pendennis, and or m.p.h. at Scilly, with mean hourly wind and 97 m.p.h. at Scilly, with mean hourly wind of 63 and 65 m.p.h. respectively. Annual mean temperatures were slightly above normal, in the majority of districts by leas than ro F. The extreme temperatures of the year were (England and Wales) 94° F. at London (Camden Square) on August 25th, and 3° F. at Newport (Salop) on March 25th; (Scotland) 3° F. at Ruthwell on August 27th, and 4° F. at Braemar on February 25th; (Ireland) 81° F. at Newcastle (Wicklow) on August 27th, and 27° F. at Markree Castle on February 35th. The year was a wet one; with the exception of the north-western scaboard and the exception of the north-western scaboard and small areas in Scotland, English Lake District and the Thames Valley, all districts had an excess. The general precipitation expressed as a percentage of the normal for the period restricts and wales ray, Scotland rao, and Ireland ray. Some memorable incidents of the year's rainfall were the thunderstorms near likley on April 25th, in which 47 mm. of rain and hall fell in 30 minutes, the thunderstorm rains of June 18th, which in London, following heavy rain on the previous day, caused severe flooding and dislocation of traffic, and the persistent cyclonic rains of July 25th to 23rd near Whithy, during which 35g mm. fell at Castleton in the the exception of the north-western scaboard and during which 304 mm. fell at Castleton in the Yorkshire Wolds. Aurora was observed in northern districts in each month except during the months June to August. January was abnormally mild, wet and stormy, with destructive gales in the south on the 1sth. After the first few days anticyclonic conditions prevailed during February. There was a pronounced frequency of winds between north and east and the weather was cold, quiet and decidedly dry. There was a return to unsettled mild conditions at the beginning of March, but after the first week a complete change occurred, and from the eth to sard the British Isles lay in the broad Arctic current between a high-pressure system arcuc current between a high-pressure system to the west and a low-pressure area over northwest Europe. After the sard conditions became mild and wet and continued on into April; from the ard to yth and again from about the right to sast, which period included the Easter holidays site, which period included the Easter holidays (April 18th-arst), cold winds between north and east and wintry, dull weather were prevalent. The last week was considerably warmer. May was generally dull and wet in the south-east of England, but dry in most other districts. In contrast to the dullness of the preceding months, June was sunny, with frequent moderately warm days and nights, a deficiency of rainfall except in parts of Scotland, and frequent thunderstorms from the rath to 19th and on the 19th and auth. July was generally unsettled, dull and wet. Mainly cool, wet and unsettled weather prevailed in August, but from the 18th on 19th weather was unusually hot and sunny in most parts of Great Britain. September was chiefly remarkable for its except in the north-west of England and west of Scotland. Sunshine was very much below the normal in Great Britain. The much below the normal in Great Britain. The

nuch below the normal in Great Britain. The last three months of the year were on the whole mild and mostly wet, with much fog in December. (1931) January.—The first half of the month was cold with much fog, and the second half mild, windy and wet, with fairly heavy rain during the last week. Bright periods were, however, frequent; a prominent feature of the month was

the excess of sunshine recorded in most districts. the excess of sunshine recorded in most districts. The month opened with thick fog locally and low temperatures. During the period 5th to 5th severe frost occurred, both in the acreen and on the grass. By the 1sth mild conditions became general, with temperature reaching 50° F. at some places. From the 1sth to 1sth northerly winds and wintry precipitation prevailed generally, but many good sunshine records were obtained in many parts of Eugland on the 1sth. Westerly to north-westerly winds prevailed from the 1sth to 1sth, with raise on the 1sth and 1sth and 1sth and 3now to 19th, with gales on the 16th and 17th and snow in northern districts on the 18th and 19th. Heavy rain occurred during the night 22nd to Heavy rain occurred during the night saint to agrd and on the agrd. The period a4th to syth was mainly sunny, over 7 hours bright sunshine being recorded at several places, and on the a5th as much as 8 hours at Ross-on-Wye, a record at that station for a January day. The last two that station for a January day. The last two days were rather cold except in the south-west and in Ireland, and on the 31st there were further gales and heavy snow in the north and west. With the exception of south-west Ireland, mean monthly pressure was below the normal. Winds were mainly between south-west and north-west and frequently strong during the second half of the month. Generally the highest wind velo-cities were recorded during the westerly gales on the r6th and r7th. Among the highest gusts of the month were 85 m.p.h at Bell Rock on the 17th, 83 m.p.h at Butt of Lewis on the 17th, 185 m.p.h, at Fleetwood on the 17th. Mean temperatures for received on the 17th. Mean temperatures for the month were generally within 1° F. of the normal. The extreme temperatures of the month were (England and Wales) 52° F. at Dover on the 76th, and 74° F. at Newport (Salop) on the 5th; (Scotland) 52° F. at Cupar on the 76th, and 6° F. at Braemas on the 6th and 7th; (Ireland) 36° F. at Blacksod Point on the 16th, and 20° F. at Newtownforhes on the 3rd and at Lisburn on the 6th. Precipitation occurred frequently during the month, but was generally light, the only falls of importance occurring about the aard and during the last week. The general values expressed as a percentage of the average were. British Isles 107, England and Wales 103, Scotland 128, and Iroland 88. Among the largest daily falls were 70 mm. at Garelochhead and 64 mm. at Ardtornish and Princetown on the 31st. At Strathbefore the monthly total of 6 43 inches was the highest for January there since before 1885. Sunshine totals were in excess of the average, and expressed as a percentage of the average ranged from 138 per cent. in the north-east of England to 103 per cent, in north of Sociland and the Channel Isles. The month was the summest January at Ross-on-Wye since 1914 and

at Eakdalemuir since 1910. Autora was observed in Scotland on the night of the 19th to 19th. February. — Squally, westerly or northwesterly winds and frequent wintry precipitation were the chief features of the month. On the 1st gales prevailed 11 western districts, and then until the 5th quiet, cold weather, with north-easterly winds and varying amounts of sunshine, prevailed over the greater part of the country. During the night of the 5th of 6th and on the 6th rain or snow was widespread. Mild weather was general from the 5th to 19th. There was heavy rain in western Ireland on the night of the 7th to 8th, and over the country generally on the night of 5th to 19th and on the 19th. In the rear of a depression which crossed the country on the 19th to 19th

winds, reaching gale force in exposed places. In the north and west there was hall, sleet or snow. The rath was sunny, many places in south-east Rugland recording over 8 house bright sunshine. On the a4th an anticyclone over the Bay of Bisons spread northwards, bringing with it air of tropical origin; and temperature rose to an unusually high level, and the proper of the control compensation rose to an intuition in in loves, & F. at Worksop and \$9°F. at Aberdeen. On the sith the winds veered north-west, and another cold spell ensued, and locally in the Midlands temperatures did not exceed 32°F. on the sith. Gales occurred in the north and west on the sith. and on the evening of that day snow fell generally over the whole country. With the exception of the extreme south of Ireland and the Channel Isles monthly pressure means were below the normal. The prevailing wind was westerly, and frequently strong and squaily. The highest gusts recorded during the frequent gales were 87 m.p.h. at Butto I Lewis on the 27th, 79 m.p.h. at Tiree on the 2xth, Scilly on the 1st, and at Lerwick on the 2xth, Scilly on the 1st, and at Lerwick on the 2xth. Monthly mean temperatures were generally within 1° k. of the normal. The temperature readings for the seth at many places were the highest in Rebruary for several years. Ground frost oc-curred frequently in most districts. The curred frequently in most districts. The extreme temperatures of the month were (England and Wales) 60° F. at Worksop on the sgth, and 79° F. at Rickmansworth on the sand; (Scotland) 59° F. at Aberdeen on the sgth, and 9° F. at Dalwhinnie on the sgtd; (Ireland) 59° F. at Newcastle, Wicklow, on the sgth, and 80° F. at Dublin (Phomix Park and Hazelhatch) on the seth. "The general preprinted the first Rettien of the Rettien roth. The general precipitation of the British Isles and the constituent countries expressed as a percentage of the normal was: British Isles rish, England and Wales ras, Scotland ris, Ireland ros, A notable feature of the month was the frequency with which precipitation took the form of snow, sleet or hall. Fractically every district had some snow, and owing to stormy conditions there was much drifting at times, and in the north many roads were blocked. Hail also occurred frequently in the north and west. Thunderstorms were reported from various districts on one or two days. Sunshine totals were generally below normal, but a slight excess was recorded in the Orkneys and Hedrides, on the east coast of Scotland, the south coast of England, and the south-east coast of Ireland. Fog occurred locally in various parts of England on the 5th, 7th, 9th and from of Ireland. the a4th to a6th Aurora was observed in Scotland on 4 occasions, that on the rath being observed as far south as West Linton. At Compton (near Wolverhampton) an upper are of contact of the 46° halo with brilliant coloration at approximately so sga.n. on the ath. The arc was reported to be nearly a complete circle.

March was on the whole cold, and, except in

March was on the whole cold, and, except in Ireland and the south-west of England, dry and sunny. Noteworthy features of the month were the spell of wintry weather between the 6th and zeth, and the unusually mild weather round about the sech. The month opened with strong northerly wind, and in parts of the north and west it attained gale force, while snow accompanied it in Scotland on the snd. Heavy rain fell in the south-west on the 3th a trough of low pressure over the southern half of the British Isles, and some heavy rain fell in the south-west during the night of the 4th to 5th

and on the 5th. Cold weather and wintry pre-cipitation were general during the next faw days. On the 5th and rath heavy snew fell in Wales and the Midhands and north of England, some roads remaining impassable until the zath or zath. On the 9th London had its heaviest smowfall of the winter, when from 3 to 4 inches foll. The day was unusually cold in the southeast, followed at night by very severe frost. At Kew Observatory the maximum temperature of 32° F. was the lowest on record for March, while on the grass the temperature fell to 4° F. After the 20th there was an appreciable rise in temperature, but at Kew it was not until the 24th that temperature exceeded the normal for the first time during the month. By the reth mild weather had become general, and prevailed up to the sist. Some good smahine records were obtained during this period. From the sard to the syst mainly dry weather, with fairly. warm days but cold nights, and much sunshine, was general. By the 30th most of Great Britain experienced a return of the cold weather. The extreme south-west, however, had unsettled weather with much rain at times from the 27th to the end of the month. With the exception of a few the end of the month. With the exception of a few exposed places the month was on the whole quiet, with a prevalence of south-easterly to north-easterly winds. Among the highest gusts recorded were ya m.p.h. at Pendennis on the 6th and 70 m.p.h. at Lerwick on the rst. In most parts of the country it was the coldest March since rsa4, and with the exception of the extreme south-west of England and west and south-west south-west of Ragland and west and south-west of Ireland, mouthly mean temperature was below the normal. The extreme temperatures of the month were (England and Wales) 65° At at Cardington and Camden Square on the soft, and 5° F. at Rickmansworth on the xoth; (Sootland) 65° F. at Ruthwell on the soth, and x° F. at Braemar on the 3rd; (Ireland) 60° F. at Rathfarnham on the 3rd; (Ireland) 60° F. at Rathfarnham on the 3rd; And 8° F. at Hazlehatch on the xoth. The rathfall of the mouth was decidedly below the normal, the percentage values being: England and Wales 36; Sootland 48. was decidedly below the normal, the percentage values being: England and Wales 36, Scotland 4a, Ireland ror, and British Isles 5r. At Meltham it was the driest March for more than 50 years, was most pronounced in the Midlands, where many places had less than ze per cent. of the normal. In Scotland over large areas it was probably the driest March on record; at Glan-quoich since at least 1876 there has been only one drier March (ngs.). In Ireland there was an excess in the east and south, while at Cork it was actually the wettest March in 48 years. With the exception of the extreme south-west of England and most parts of Ireland, sunshine was above the normal. At Copdock it was the sunniest March since 1907. Fog was rather pre-valent during the month. Aurora was observed in Scotland on 6 nights.

April was on the whole unsettled and duli, with a pronounced excess of precipitation in England and Wales and in the eastern districts of Scotland and Ireland. Heavy rain, with local flooding, occurred in parts of Ireland-and southeast England on the set and in Scotland on the and. Persistent rain occurred in southeast England on the set and sunny on the grd. On the 4th the scothern districts had bright sunny weather. This improvement was only temporrary, however, and cool unsettled conditions provented.

until about the 7th. In the south-east the 4th and 6th (Easter) were dull and wet. On the 7th and ean (caster) were during the Control with a control was a change to warm, fine weather. The rath and rath were amongst the sunniest days of the month. On the aght there was a decided drop in temperature, and from the aght to reth, with the passage of a low-pressure system across the country, cold inclement weather prevailed. Snow, sleet or hall occurred at most places on the ryth, z8th and zeth, and thunderstorms were experienced locally in the eastern half of England on 17th, 19th and sand and at Durham on the 24th. Sunny conditions prevailed in Ireland and west Scotland during the period 18th to soth. From then until the end of the month the weather became slightly milder but continued unsettled, with some bright periods.

Heavy rain occurred in England and Wales during the period agrid to soth. Many good sunshine records were obtained between the soth and goth. With the exception of the extreme south-west of Ireland, monthly pressure means were below the normal. There was a considerable prevalence of north-westerly to considerance previous or north-westerny to mortherly winds, and gales were recorded at several exposed places. Among the highest gusts were 7g, m.p.h. at Sealand on the 17th, 65 m.p.h. at Lerwick on the 4th, and 65 m.p.h. at Pendeunis on the 17th and 18th of Lewis on the 18th of Lewis on the 18th of 18th and 18th of 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 18th and 18th of 1 the 4th. Mean temperatures for the month were within ro F. of the normal in most districts The extreme temperatures for the month were The extreme temperatures for the month were England and Wales 69° K at Attenborough, Sparkhill and Sealand on the xth, and 24° K at Castleton on the 6th; (Scotland) 69° K. at Liberton on the roth, and 20° K. at Eskdalemuir on the 6th; (Irvland) 68° K. at Kilkenny on the xoth, and 20° K at Markhe Castle on the 29th. In contrast to the dryness of March, rainfall totals for Arrivage appreciably above the nonuel in for April were appreciably above the normal in most parts of the British Isles, the excess being most pronounced in the Midlands and the east most pronounced in the initiating and the east of Lingland. Expressed as a percentage of the normal the values were: England and Wales 173, Scotland 106, 1 icland 121, and the British Island 121, and the British Island 121, and the Wales 143. Over England and Wales as a whole it was the wettest April since 1220. At Reigate (Alvington) three times the normal fell, West-minster had 274 per cent. and Richmond (Surrey), where it was the wettest April since 1871, 251 per cent. In vestein Sootland rainfall was generally well below the normal, while in northern and eastern Scotland there was an excess. Although below normal in the west, there were several areas with only two rairless days. Over the south and south-east of Ireland there was a deficiency, but elsewhere it was in excess of the normal. Monthly aggregates of sunshme were decidedly below the normal At many places in England the average loss exceeded a hours per day. So little sunshine has been recorded at Totland Bay only thrice in 30 years. At Thee there was a total of 38 hours for the three days 18th to 20th, and over 39 hours for the three days soth to soth. For occurred most frequently during the period 8th to zeth. Aurora was observed in Scotland on a nights. On the 18th a solar halo of 25°, with mock sun ring and upper and lower arcs of contact, was observed at Hastings. May .- The weather of the month was unsettled,

May.—The weather of the month was unsettled, wet and cloudy. The month opened in most parts with considerable fine periods, but on the grd there were cold north-easterly winds over most of England, and heavy rain in the south-

sart, although the north-west and Scotland continued to have sunny weather. During the period 5th to 5th it was generally origin, warm and surey from then until the soft unsettled conditions prevailed, with vain at times. The soth and sist were cold and sunny, but then temperature rose generally and continued warm until the end of the month. Rain occurred in most places on the Saturday and Sunday of the Whitsun holidays (and and atth), but on Whit Monday there was brillant sunshine in most places. After this conditions continued un-settled, with local thunderstorms from the settle to agth. Severe thunderstorms, accompanied locally by toriential rain, occurred in the southwest on the 27th. Monthly mean pressures were everywhere below normal. The prevailing winds were routherly and often strong in coastal districts. Gales occurred on the rith and rath and seth to 30th Among the highest gusts recorded were 65 m.p.h. at Dunfanaghy, 63 m.p.h. at Tires on the rith and 63 m.p.h. at Lerwick on the 25th. Mean temperatures were about normal or slightly above, mainly as a result of the right of the result mild nights rather than warm days. warmest days were between the asth and soth, while the coldest spells were from the ast to sth and 17th to 21st The extreme temperatures of the month were (England and Wales) 78° F. 20 London (Camden Square) on the zyth, and zz^o F. at ('astleton (Yorks) on the zxt; (Scotland) zz^o F. at Ruthwell on the zyth, and zz^o F. at Buthwell on the zyth, and zz^o F. at Dublin (Bathfarnham) on the zft, and zz^o F. at Dublin (Phenix Park) and at Newtownforber or the zyth. on the 3rd. The month was decidedly wet, the we test May generally since 1925. Both mouthly totals and the number of days of precipitation were in excess of the normal in almost all districts, the only important exceptions occur-ring locally in the north-west of England and in the north-west and south-west of Scotland. The general precipitation expressed as a percentage of the normal for the period 382-2915 was . England and Wales 150, Scotland 245, Ireland 16s, and British Isles 151. Unusually heavy rain accompanied the thunderstorm of the a7th, among the largest falls being 206 mm. the synt, allowing the intrest tails being as with at Cardiff (or nun. fell in 3;) hours) 83 mm. at Crickhowell, 79 mm. at Watchet 74 mm. at Newport, and 44 mm. at Shanklin in the Isle of Wight. Much flooding occurred as the result, and considerable damage was done by the hall In most parts sunshme totals for the month were below normal, the most notable exception being round about the Firth of Forth, where an appreciable excess of sunshine was recorded. Fog, which was often dense in coastal areas, was recorded on several days.

was recorded on several days.

June — The weather during June was distinguished by a pronounced excess of precipitation everywhere, with the exception of the southeast of England, and by a general deficiency of sunshme. The first three weeks were unsettled, dull and wet, with severe thunderstorms on the 5th, 4th and 19th, followed by generally fine wenther during the last week. Notable incidents in the month's weather were the tornado which visited Blimiugham on the 14th and the wide apread, severe thunderstorms and floods on that day. In most places the 14th was among the warmest days of the month, maximum temperature in London and the south-east exceeding 5c° F. In the Rickmansworth and Chorley Wood district of Heitfordshite the thunderstorm of

the 19th was accompanied by hail of unusual intensity. Mean pressure of the month was slightly above normal in the south, but from millibar to a millibars below normal in the north and west. In most districts prevailing winds were south-westerly and generally light or moderate in force. The tornato which occurred in the Birmingham district on the x4th commenced about 14.40 G.M.T. and travelled rapidly from the south to the north-east, causing rapidly from the South to the horon-east, causing a very great amount of material damage along its path, which varied in width from Soc to see yards. The storm ceased about xz-xz G.M.T. Monthly mean temperatures were below the normal in Scotland and north of England, but elsewhere were above the normal. The extreme temperatures of the month were (England and temperatures of the month were (England and Wales) 82° K. at Bromley on the rath, and 32° K. at Bellingham on the agth; (Scotland) 73° F. at Strathpeffer on the agth and Arbroath and Montrose on the syth, and 32° F. at Balmoral, Logic Coldstone, Wolfelee and Eskdalemuir on the agth; (Ireland) 72° F. at Kilkenny on the syth, and 42° F. at Hillsborough on the 6th, Markree Castle on the 13th, and at Mountmellick and Nawtownforbes on the syth Rainfall was and Newtownforbes on the s5th. Rainfall was much in excess of the normal in most places, and expressed as a percentage of the average for the period 1881-1915 the values were: England and Wales 148, Scotland 193, 1reland 194, and the British Isles 165. The most pronounced deficiency occurred around the mouth of the Thames, and locally in Kent and Essex; Margate recorded only sy per cent. Dungeness 37 per cent. Shoe-buryness 56 per cent. On the other hand, Southport, where the month, with one exception (June 1907), was the wettest June in 67 years' records, had sys per cent. of the normal. Much flooding occurred during the month as the result of torrential rain accompanied by thunderstorms. At Braunton 59 mm. was measured at 9 h. G.M.T. on the 5th, most of which had fallen since 7 h. At Eskdalemuir on the 14th, 31 mm. since 7 h. At Eskdslemuir on the 14th, 31 mm. fell during the hour 18 h. to 19 h.; the rainfall was reported to have been of an intensity unparalleled in living memory. Severe floods followed, involving the death of a farmer by drowning and the loss of numerous sheep and cattle. Sunshine aggregates were again below the normal. The daily deficiency at Eskdale and Harrogate was 14 hours, and at Dumfries and Donglas 13 hours. Some outstanding daily records were obtained, among them being 165 hours at Decreess, 164 hours at Kirkwall, 163 hours at Aberdeen, and 16 hours at Gordon Castle and Lerwick on the 15th. Fog was prevalent during the first half of the month and in the south-west of England on the 15th.

In the south-west of England of the saint-gard.

July, like June, was wet and dull, with widespread thunderstorms. The belt of high pressure which covered the British Isles at the end
of June gave way on July 1st before a depression
advancing from the Atlantic. From then until
the end of the month a series of disturbances
followed one another in rapid succession. The
fair intervals were of short duration, no district
being free from rain for more than a day or
two at a time. Monthly pressure means were
decidedly below normal as a result of the general
cyclonic character of the weather. At Southport the mean pressure was the lowest for July
since 1828. Winds were mainly south-west to
west, light to moderate in force. Among the
highest gusts were 65 m.p.h. at Spurn Head on
the asth, and 6s m.p.h at Liverpool (Bidston)

on the a8th. At most stations mean temperature was round about normal. This was due rather more to mild nights than warm days. Ground frost occurred at Biggin Hill on the 1st, and at Leafield and Hampstead on the 21st. and at Leafield and Hampstead on the sast. The extreme temperatures for the month were (England and Wales) 80° K. at Shoeburyness on the rath, and 38° F. at Rickmansworth on the 7th and sast, and at Cantref (Breconshire) on the 9th; (Scotland) 75° F. at Perth and Stirling on the 9th, and 30° K at Balmoral on the sast; (Ireland) 74° F. at Rathfarnham (Dublin) on the 13th, and 40° F. at Killarney on the 9th. The total rainfall for the month exceeded the normal for the fourth consecutive month, the percenfor the fourth consecutive month, the percentage values for the constituent countries and the British Isles being: England and Wales 153, Scotland 136, Ireland 121, British Isles 142. In spite of this general excess, an area including part of north-east Ireland, Anglesea, south-west Scotland and the Isle of Man experienced less Scotland and the Isle of Man experienced less than the average. At Rhyl and Llaududno the fall was only about half of the normal. The unusual character of the month is shown by the following facts: at Redruth it was the wettest July since 1888, at Newquay by far the wettest July for 39 years, at Strelley only July 1888 and 1915 had more rain, and only three Julya less sunshine, and at Swyncombe House near Henleyon-Thames the month's total of 6.24 inches was equal to more than 50 per cent. of the fall for equal to more than 50 per cent. or the ran 10r the previous six months. Among the heaviest daily falls were 55 mm. at Hawkshead on the 3rd, and Crossdovey (co. Cavan) on the 13th, 5x mm. at Nettlebed (Oxon) on the 14th, and 5x mm. at Oving House (Bucks) on the 7th. Many falls of hail were reported, and flooding that the state of due to the torrential rain caused much dis-location of traffic. Thunderstorms were relocation of traffic. Thunderstorms were reported on no fewer than 19 days during the month, and this accounted for a large proportion of the total rainfall at most stations. Sunshine was very much below normal in all districts, the deficiency approaching 50 per cent. In places. The brightest days generally were the 1st, 3rd, 7th, 5th, 1sth and 13rd, on each of which at least twelve hours of sunshine were exceeded over a wide area. Costal for coursed recorded over a wide area. Coastal fog occurred occasionally during the month, mainly on the northern and south-western coasts. Aurora was observed at Gordon Castle on the 3rd.

August was wet, cool and dull in England and Wales, and sunny and dry in west and north Scotland and outlying islands. In England a spell of thundery weather was experienced from the 3rd to 5th, the storms being accompanied, especially in the south, by heavy local rain and flooding; on the 5th 74 mm, fell at Petersfield in an hour, and in the evening about as mm. fell on the roof of the Air Ministry in half an hour. Meanwhile in the west and north fair sunny weather prevailed. Subsequently, cool northerly winds with cloudy weather and occasional rain prevailed, except in the extreme west, where conditions on the whole were fairer. Heavy rain fell in eastern England on the 5th. Cool northwesterly winds prevailed during the next few days. About the 13th conditions changed, and became very unastiled, with frequent thunderstorms and almost daily rain until the 2st. Little or no rain fell after the 2st. On the 2st a deep depression caused severe gales in the English Channel, the wind in a gust reaching a speed of 79 m.p.h. at Pendennis. By the 25th anticyclonic conditions became established over

most of the country and excellent sunshine records were obtained in several parts during the last few days of the month. The mean pressure of the month was very uneven, for while in the Shetlands it was zo millibars above normal, there was a deficiency of 3 millibars in the extreme south of England. Winds were mainly northerly to easterly, and in general mainly light to moderate, but in the English Channel there was a prevalence of strong winds and gales. With very few exceptions, mean temperatures were below the normal. The only really warm days occurred from the 3rd to 5th. The extreme temperatures of the month were (England and Wales) 8c° N at Hartest on the 5th, and 3s° F. at Rhayader and Rickmansworth on the sch and Newton Rigg on the 3x5; (Scotland) 8x° F. at Onich and Ardtornish on the 4th and at Glenbranter on the 5th, and 31° F. at Daiwhinnie on the sch and Newton Rigg on the 3x5; (Scotland) 8x° F. on the 4th and 33° F. on the 3cth at Markree (nathe. The month was the fifth consecutive month in which the general precipitation exceeded the normal, and completed one of the wettest summers in England and Wales since comparable records began. At Greenwich Observatory the month's fall of 15 mm. was 384 per cent. of the normal, while in the Shetlands less than per cent. of the normal was recorded. Among the largest daily falls were 15 mm. at Black Sluice and 15 mm. at Grand Sluice, Boston, Lincolnshre, on the 8th, 8s mm. at Jersey on the 3th. Aurora was reported from 8kye on the 2th, and a funnel cloud was seen at Newquay in the early days of the month and from the 5th to 38th. Aurora was reported from 8kye on the 7th, and a funnel cloud was seen at Newquay in the early afternoon of the 2snd.

The weather of September was rather cold and dull. Apart from warm days at the beginning and about the middle of the month, the days were generally rather cold. During the first four days of the month there was abnormally heavy rain, but afterwards it was mainly dry but dull. On the 1st day temperatures of about 70° F. were recorded at several places, and thunderstorms were widespread on the 1nd and 3rd, and local on the 4th, 5th and 7th. From the 5th there was a period of cool and mainly fair weather until the 1cth, when a secondary depression south of Ireland moved south-east, and rain occurred locally on the 1cth ard 12th. By the 15th an anticyclone covered the British Isles, and temperature again rose to round about 70° F. at many places on the 15th, 16th

and 18th. Winds became northerly, and a change to cooler conditions occurred about the soth. Slight rain occurred in Eastern England on the sand and 23rd. As the anticyclone moved eastwards the weather became increasingly overeast, and rain set in in the west on the 30th, with warmer conditions in the 30th, with warmer conditions in the 30th, with warmer conditions in the south.

Monthly mean pressure was above normal in all districts, while winds were mainly northwesterly to north-easterly, light to moderate in force. Gales were recorded in exposed places, and on the 4th gusts of 6 m.p.h. at Scilly and 56 m.p.h. at South Shields were recorded.

Mean temperature for the month was generally Mean temperature for the month was generally below normal. In the east and south-east of England the deficit ranged from 3° F. to 4° F. At Hampstead (London) the mean temperature, At Hampstead (London) the mean temperature, say F., was the lowest for September since 1913. Ground frost was widespread during the period 5th to 13th, and in Scotland between the asth and 33td. The extreme temperatures of the month were: (England and Wales) 73° F. at Huddersfield and Attenbrough on the 1st and and accomposing the set and accomposing on the set and ago F. at Rickmansworth on the 7th and 8th, at Rhayader on the 8th, at Castleton on the seth, at Houghall on the 1sth, at Appleby on the 1sth and 1sth, and at Bellingham on the 1sth and 2sth, and at Bellingham on the 1sth and 2st R. at Rickman wir on the 1sth and 2st Raidagnmuir on the 1sth, if Ireland) 72° at Cork on the 1st, at Kilkenny on the 1sth, and at Raidagnmum on the 1st and 2st Astlean and 1st Raidagnmum on the 1st and 2st and 2st Astlean at Raidagnmum on the 1st and 2st and 2st Astlean and 1st Raidagnmum on the 1st and 2st and and at Rathfarnham on the 1st and 17th, and 30° F. at Markree Castle on the 11th. The outstanding feature of the month's rainfall was the heavy falls of the first four days, which caused severe and widespread floods. Among the heaviest falls were 42 mm. at Cantref (Brecknock) on the 1st, 40 mm. at Burnley on the 2nd, 80 mm at Newcastle (Wicklow), 8z mm. at Rathfarnham on the 3rd, and 127 mm. and 126 mm. at Castleton and Kildale (Yorks) respectively on the 4th. In Scotland, rainfall was generally much below normal, and at Deerners, Achnashellach and Glenquoich it was the driest September since x894. While most of Ireland Sentember since 1894. had less than the normal, Dublin had two and a half times the normal.

Sunshine totals were everywhere below the normal, the loss being most pronounced in the Midlands and north of England and in the low-lands of Scotland, where the mean daily duration of sunshine was in several places less than 2½ hours At Southport it was the dullest September since before 1806.

Aurora was observed in Scetland on five occasions, that on the sist being observed as far south as Leuchars.

STORMS AND FLOODS IN 1930-31.

October 9.—A dyke on the left bank of the liver Néthe, near Lierre, gave way, leaving a gap 45 feet wide, and a5 acres of ground and houses were flooded. 24. As the result of heavy rains, serious floods occurred in var lous parts of France. In the valley of the Meuse the water was in some places up to the level of zgro. A terrific wind, lasting only a few minutes, occurred near Grenoble. Many cottages were unroofed and nearly 6,000 broken walnut trees lay on the ground. 25. Floods at Smyrna, following heavy rains, caused the death of 40 persons and about zoo houses collapsed. A heavy north-westerly gale in the Gulf of Lyons delayed and damaged shipping. At Montpellier heavy rain and floods

caused a row of houses to collapse. 28. Government House, Madras, was struck by lightning, and considerable damage done. 30 Further heavy rain in Smyrna caused 2,500 families to be rendered homeless by floods.

Nominber 4.—A non-nile-su-hour gale caused much delay to shipping in the Atlantic. no. A cyclone struck the island of Kvaukpyu, near Akyah, wiping out the town and its suburba. 20. Many persons were killed and injured at Bethany, Oklahoma, when the town was struck by a tornado. no. An express train was derailed between Oudon and Clermont-sur-Loire, due to a subsidence of the track caused by heavy rain and ficolling of the Loire. no. A violent storm

accompanied by terrential main raged over nenthern, central and western france. Many low-lying stretches of country were mooded. Persistent rain caused many rivers in Belgium to overflow, and at some places near Mons the fields were 3 feet under water. 23. Many people were injured as the result of a severe sterm which swept Vienna. Heavy rain over the which had already occurred. At Le Mans the Sarthe reached the highest level since 1882. Much damage was done in Germany by a storm. The gale reached hunricane force. A hurricane of short duration and small radius passed over the Fiji Group, and much damage was caused on the island of Owalau.

Becomber 26.—Buring a severe snowstorm the schooner Warren M. Outp was lost at Burnt Point, Newloundland. Four of the crew were lost. 17. A violent hurricane, with heavy rain, broke over Algiers and raged for three days. Much loss of life, and damage to property occurred. At Blida s inches of rain fell in at

hours

January 7.—Exceptionally heavy rain in Pretoria caused damage estimated at £70,000 reports caused damage estimated at Are, cook to the roads and sidewalks. 72. Show fell in Algiens for the first time for seven years. 25. More than 30 persons were injured in a reliway collision, at Readville, during a heavy snowstorm. 22. The Russian steamer Zavasia. foundered in the Black Sea during a violent storm. The crew of 26 as well as the 14 passen-

gess were drowned.

February 3 — Unusually heavy rains in the south-eastern districts of Queensland caused serious floods. Large areas of Brisbane were under water. The Brisbane River reached its highest level for 30 years. Fourteen inches of main fell in at hours on the Tweed River, seriously flooding the important towns of Lismore and meoning the important towns of Lishiere and Marwilliumbah. 7. During a sudden and heavy snewstorm in New York, a ferry carrying soo passengers was rammed by the steamer Marion while crossing the Hudson. 23. Much flooding occurred at Valcov on the Danube. Out of 1800 houses only about 100 remained unflooded, and many collapsed. az. Much damage was done to shipping by a gale in the Mediterranean. storm of great violence bloke over Sicily and Southern Italy. Torrential rain caused much Southern Italy. Torrents Tain tasked much flooding. Severe snowstorms and the subsequent dufts cut off several of the Alphue regions. sc. Eighty people were killed by a hurricane in the Bardistrict of Fiji, and me in Singatoka. At the hill station of Nadarivatu & inches of rain fell during the week; the Ha River rose 40 feet. About 20 percent of the sugar crop was damaged.

March 4.—Storm and exceptional tides did much damage along the Atlantic Coast. In New England the damage was estimated at \$3,000,000.
C. The Seine, which had been steadily rising for some days, overflowed its banks in the suburbs of Viry-Chatillon and Villeneuve-Saint-Georges. The level of the river at the Pout d'Austerlitz was about 17 feet above the normal. Heavy gales and torrential rain swept New York and New Jersey. Seven people were killed and many injured. 29. A severe storm za miles west of

Algiersuproofed houses and approofed many trees. April 11.—During a storm off the south-west coast of Korea, 125 fishermen were drowned. 20. Thirteen inches of rain fell in the previous 48 hours near Hong Kong. The railway line at

Taipo was undermined and 22 persons were killed in a railway accident. 25. Vilna was seriously flooded owing to the River Villa rising

ry feet above normal.

May 7.—Heavy rains and an unusually rapid thaw caused much flooding in Sweden. Torrential rains flooded large areas in South Germany. 27. Thunderstorms damaged vineyards and fruit

trees in the Rhine valley.

June 22.—A tornado which struck North Adelaide did many thousands of pounds worth of damage. The roofs of over 200 houses were torn off and some houses were wrecked. Buring a thunderstorm over the western end of Jamaica, six persons were killed and twentyone injured by lightning. 24. During a sudden storm the French steamer Saint-Philibert capsized about five miles off Saint-Nazaire; capsized about five mines on Saint-Maxire; between 300 and soffpersons were drowned.

19. Three persons were killed, more than 50 injured, and about 130 houses damaged, when a hurricane of the whirlwind type awept up the valley of the Else, in Westphalic.

July 6.-Four persons were killed in a violent or yelone at Sydney. The wind reached a velocity of 70 miles an hour and 5 inches of rain fell in 18 hours. S. After a long drought there were heavy rainstorms over Denmark. The hay crops were apoiled and many bridges were carried away.

22. During a gale which did great damage to the town of Lublin (Poland) three people were killed

and about as injured.

August z.-A typhoon, with the record wind velocity of 356 m.p.h., struck Hong-Kong, doing much miner chamage. 4. Severe floods in China, reaching in parts to a depth of mg ft., rendered about de, eco, coo people destitute. The floods are likely to last for several months. A thunder-storm of exceptional violence caused 12 deaths and great material damage in Northern France. 6. A cloudburst caused extensive damage in the Valle Aurina to the south-east of Brenner Pass. y A violent storm which swept the comet in the neighbourhood of Toulon caused great damage and the loss of a number of lives. rs. Thousands of persons were rendered destitute and many drowned as the result of floods caused by the mouscon in the Malvan district of Bombay. 25. Floods on the River Murray caused many thousands of pounds worth of damage to settlements and townships in South Australia. The floods reached a depth of xx feet A violent rainstorm drenched Gothenburg, and the Sahlgren Hospital was completely flooded. The damage amounted to about £5,500. as. Torrential rain caused the River Lys to overflow and much flooding occurred in Eastern Flanders. Many small farmers lost their harvest.

September 2.- A typhoon which struck Hong-Kong did great damage to fishing fleets. About soo Chinese were drowned. 8. Several miles of soo Chinese were drowned. 8. Several miles of the Causdian Pacific main ratiway line were swept away by the flooding of the Columbia river in the Bockies. 20. More than 800 people perished in a hurricane which struck Belize. Hardly a house escaped damage, and the progress of the storm reached as far as 50 miles inland. 24. Four persons were killed when a severe storm swept over Timisoars, Rumania. 16. A hurricane struck the city of Vera Cruz and wrecked a number of ships in the harbour, and some damage was done to property. 26. A typhoon in Japan caused the heaviest rainfall recorded in Tokyo for 17 years.

Landships damaged many houses in adjeming

districts and 26 people were killed.

BRITISH ASSOCIATION.—The British Associa-tion for the Advancement of Science held its Sept. 30. General the Rt Hou. J. C. Smuts, who succeeded Prof. F. O. Bower as President, delivered an address in which he described the trend of modern science as leading towards a less materialistic and more "organic" concention of the universe. The world, he said, consists not only of electrons and radiations, but also of souls and aspirations. Beauty and holmess are as much aspects of Nature as energy and entropy, and an adequate world-view would find them all in their proper context in the framework of the whole. Evolution was, perhaps, the only way of approach to the framing of a consistent worldpicture which would do justice to the immensity, the profundity, and the unutterable mystery of the universe

The Presidents of the various sections, and the subjects of their addresses, were as follows:—
A, Mathematics and Physics, Sir J. J. Thomson,
"The Growth in Opportunities for Education A, Mathematics and Physics, Sir J. J. Thomson, "The Growth in Opportunities for Education and Research in Physics during the Past Fifty Years"; B, Chemistry, Sir Harold Hartley, "Michael Faraday and the Theory of Electrolytic Conduction"; C, Geology, Prof. J. W. Gregory, "Geological Problems Contemporary with the British Association"; D, Zoology, Prof. E. B. Poulton, "A Hundred Years of Evolution"; E, Geography, Sir Halford Mackinder, "The Human Habitat"; F. Economics, Prof. E. Cannan, "The Changed Outlook in Regard to Population"; G, Engineeting, Sir J. Alfred Ewing, "Power"; H, Anthropology, Prof. A. R. Radeliffe-Brown, "Present Postton of Anthropological Studies", J. Physiology, Dr. G. Myers, "On the Nature of Mind"; K, Botany, Prof. T. G. Hill, "The Advancement of Botany"; L, Education, Sir C, Grant Robertson, "Educational Development, 1831-1931"; M, Agriculture, Sir John Russell, "The Changing Outlook in Agriculture." culture.

The meeting in 1932 will be held at York, under the Presidency of Sir Alfred Ewing.

BEES COUNTED BY RADIO -The New York Department of Agriculture, Industry and Commerce has worked out a method of counting bees by radio. A microphone is placed in the entrance of the hive, and as the bees crawl home, their feet scrape over the microphone, generating a current which is amplified, causing the operation of a counting device. Thus it is possible to take an effective census of the population of the hive.

BIRD SKELETONS FROM LA BREA PITS .- Dr Hildegarde Howard has completed a census of bird skeletons in the La Brea asphalt pits near bird skeletons in the La Brea asphalt pits near Los Angeles, which in the past have gained world-wide fame on account of the existing number of sabre-toothed tigers and other mammals found embedded in them. Of more than 4,roo birds recovered, 65 per cent. are predatory species; and of these, diurnal birds of prey far exceed nocturnal forms—evidence, similar to that yielded by the mammals, that most of the creatures caught in the glaur were in pursuit of others in difficulties. Some extinct in pursuit of others in difficulties. Some extinct forms are in large numbers: 500 individuals of the turkey, Parapavo, and more than a hundred of Teratornis, a vulture larger than any flying landther bush. The butterflies returned at night-bird of the present day. The caracara, now fall, circled about the old bush, apparent;

confined to more southerly regions, is represented by sac examples. Many species still existing in California occur profusely—the American golden eagle with more than 850 individuals, the California condor 190, the bald eagle 150, the red-tailed hawk 113, great horned owl 104. Ducks and geese are fewer, in all less than 100.

BLACK-NECKED GREBE.-The disappearance of the black-necked grebe as a British breeding bird followed the drainage of the fen area, but ord followed the drainage of the fen area, but its reappearance in recent years shows that it has considerable powers of adaptability. In 2004 it was first discovered to be breeding in Wales, in 2015 in a western lough in Ireland, in 2018 at Tring Reservoirs, and in 2020 in a loch in the Forth area of Scotland. Now Mr. C. V. Stoney and Mr. G. R. Humphreys have found in western Ireland a close which they extremely taken to a close which they extremely the second of the second which they extremely the second of the s western Ireland a colony which they estimate to consist of about two hundred and fifty pairs, in a lough not more than two or three miles long and half a mile wide. It has been assumed that the colonists in the British Isles were immigrants from the Continent, where the species heeds in Denmark, Germany, and Livonia. But the presence of the Irish colony makes it possible that the new breeding places may have been peopled from the west rather than from the east.

Blue Goose,-After several years search in Baffin Island for the breeding ground of the blue goose, Mr. J. Dewey Soper has tracked the bird to its home on the Foxe Basin coast, near to the Arctic Circle The blue goose was one of the few North American birds known only as a migrant. Its wintering grounds were on the coast of Louisiana, and before the breeding season it vanished northward Mr. Soper began his explorations in 1923, and year after year he continued them, and eventually learned from the natives that the birds were known to breed in large numbers on the tundra beside Foxe Basin He and two Eskimos pitched then summer camp on and two Estations pictures are same raining camp on a tundra stream near foxe Basin in latitude 65° 35' north, and there he found the blue goose in thousands on the Blue Goose plain. His report, published by the Canadian Department of the Interior, gives a complete account of the breeding ground, migration, ne-ts, eggs, and general habits of the bird, which, though for long regarded as a colour phase of the snow goose, with which it associates, now ranks as a distinct species. Mr. Soper's travels in search of the blue goose amounted to 30,000 miles.

BUTTERFLIES' PLACE-MEMORY -Mr F Morton Jones has made a number of experiments in the Royal Palm Shade Park in Florida to check the observations of Mr William Beabe that zebra butterflies possess memory, sociability and caution. Heliconia clarithoma is usually fairly abundant in the Park from mid-Jai.uary to April. Six roosting places were discovered, and about these, while dayinght was failing, the butterflies collected in numbers, makin, preliminal, explor-ing surveys, and finally settling down for the night. The marking of several individuals showed that for several nights in succession the same butterfly may return to a particular twig the homing due to place-memory or to scent " A simple experiment settled the question. Branches on which a number of Heliconias had 100sted observed that something was anias, continued their exploring flights, and finally actived down on twigs in the old roosting bush. Some paused on the transferred twigs, only to leave them again and rejoin the flying group. After dark, sy were found in new positious in the old bush, and only so the transferred twigs, so feet away. Apparently place-memory is the guiding power.

CENTRAL HEATING FROM VOLCANO.—Professor Ponte, the director of the observatory on Mount Etna, has installed a system whereby steam from the volcano has been used to keep the building warm against the severity of winter. Pipes have been fixed deep into the steaming fissures near the principal crater and led into the observatory building, where the natural volcanic heat is regulated by a system of valve and stop-cock. As the strength of the furnace is somewhat out of proportion to the needs of the house, Professor Ponte has installed a system of overflow pipes, safety valves, and alarm whistles which come into operation when Etna begins to overdo the work of central heating.

CLOCK GOING FOR FOURTEEN YEARS.—T. Dieden, of Carlslund, Sweden, has invented a clock that apparently can go on continuously until any part wears out, and has already been running for fourteen years. According to a description in Engeneering, in its main features it is similar to an ordinary clock, having a driving weight, a train of wheels driving the hands, and a torsion pendulum consisting of a heavy metal disc suspended by a thin steel ribbon. The power is obtained by the ordinary variations of the atmospheric pressure and temperature. The case of the clock contains seven closed elastic metallic boxes of the typused in an aneroid barometer. The lower box is attached to the case, but the column of boxes is otherwise free. The expansion or contraction of all the boxes due to changes in the temperature or pressure is communicated to the top box. When the column of boxes either increases or diminishes in height, the spindle carrying the ratchet wheels always rotates in the same direction and the driving weight is wound up. When the weight reaches its topmost position they are thrown out of action. The pendulum has a period of 73 seconds, so that the length of the equivalent simple pendulum is about 28 feet.

COLOURED GLASS AND HOUSE FLIES.—Further experiments on the lines described in the 1932 WHITAKER have been made on the susceptibility of house files, wasps, and bees to coloured glass. Prof. J. W. Muuro made a number of tests with the object of fluding whether rooms glazed with "Calorex" are freer from insects than rooms glazed with ordinary glass. Calorex glass is of a pale greenish-blue tint, and is dealigned to afford protection from excessive colour radiation by strongly absorbing infra-red radiation while transmitting the radiation within the visible spectrum. He found that house files, exposed to sunlight in a box, one half of which was glazed with Calorex and the other with ordinary glass, showed a marked preference for the ordinary glass, the ratio of the numbers of insects in the two halves, averaged over several experiments, being about 9:4. These results were verified by other tests in which the insects were not enclosed within the box but were

attracted to it by a suitable bait. Wasps and bees were found to behave in the same way as files. Much of the preference is ascribed to the inequality of temperatures beneath the two kinds of glass, the disparity in insect population being greatest when the maximum temperature differences were observed. That an effect can definitely be ascribed to the colour of the light which has passed through Calorex was demonstrated by an experiment in which bees were enclosed in a glass cylinder, one end of which was closed with Calorex and the other with ordinary glass. By interchanging the glasses an immediate reaction was obtained, the bees moving to the end covered with ordinary glass.

CRAB'S LONG CRAWL.—Professor Greuvil, of the Paris Zoo, who, in collaboration with scientists from Cambridge University, has been studying the movements of sea-fish and crustaceans between the Indian Ocean and the Mediterranean Sea, has revealed the fact that a crab has crawled through the Suez Canal from the Red Sea—roughly rox miles—in 29 years, an average speed of about 22 inches an hour. The crab in question, Neptumus Pelanquines, is one of a number of his family specially marked 20 years ago in the Red Sea, and he arrived, still wearing his identity disc, at Port Said.

DAVID DUNLAP OBSERVATORY.—Mrs. D. A. Dunlap and her son, Mr. D. Moffat Dunlap, have decoded to erect near Touonto an astronomical observatory, in memory of her husband, a keen student of astronomy. The outstanding feature of the David Dunlap Observatory, as it will be called, will be a large reflecting telescope 74 inches in diameter, made by Sir Howard Grubb. It will be housed in a circular metal building, in the midst of a large acreage which will be converted into a park, to be known as the David Dunlap Park. When the observatory is completed, it will be under the Department of Astronomy of the University of Toronto, while the park will be developed in a scientific way by the Faculty of Forestry.

DYING GLACIERS.—Experiments made on fifty glaciers of the Eastern Alps in Austria show that they, like the glaciers in Switzerland and the Canadian Rockies, are generally retreating. Only one, the Simonykees, in the Venediger group, showed any growth, the reason in this case being that the moraine debris surrounding it protects it from the effects of the sun. The growth was not more than 15 to 56 feet. On the other hand, in the Silvertia group, on the Vorarlberg-Swiss frontier, at the Bielthaler Ferner the glacier had shrunk 15 feet. At the top of the Fermunt Pass the carcass of a horse had come to the surface through the evaporation of the glacier top. Not for decades have horse-driven conveyances crossed this pass. The reduction of the glacier top. Not for decades have horse-driven conveyances crossed this pass. The reduction of the glacier has been very considerable in the Octztal Alps in Tyrol; the Rosenkarferner shows a diminution since 16 gr feet, and the Marzellferner 32 feet. The famous Pasterze Glacier, in the Glockner group, has lost in length from 3 feet to 15 feet. The depth of this glacier was found with the aid of seismic instruments to amount to 947 feet. It may be added that the great Nisqually Glacier on Mount Rainier, in Washington, has retreated 1.500 feet.

ELECTRICITY FROM THE JORDAN.—Mr. H. J. Shepstone, in the Engineer, gives an account of the progress made with the scheme for supplying Palestine with electricity, generated in the valley of the River Jordan. In its passage from its source in Mount Hermon to the Dead Sea, the river has a fall of 3,000 feet, and it discharges more than 5,000,000 tous of fresh water into the Dead Sea daily. The scheme includes the provision of three hydro-electric plants, the first of which is situated at Jisir-el-Mujameh, seven miles south of the Sea of Gaillee. For the storage and control of the water two dams and two concrete-lined canals have been constructed, and the first two units of 8,000 h.p. each have been installed in the power-house. Later on a second power-house will be built at Abadieh and a third at Jisir Banah Yakoub, which lie respectively south and north of the Sea of Gaillee. Transmission lines will connect the hydro-electric plants with three fuel power-stations at Jaffa, Haifa, and Tiberias, and in the near future, it is hoped, every city, town, and agricultural settlement will be able to obtain electrical energy.

EMBALMED WHALES.—Mr. Percy Stammwitz, an official of the Natural History Museum, South-Kensington, has been successful in emhalming two whales, each 45 ft. long, and weighing az tons, in a Norwegian harbour, and bringing them to England. Immediately after capture the whales were towed as quickly as possible to the port of Aalesund, and there he at once set to work on embalming them. The whales were cleaned, and then packed with sait. Afterwards more than 6c gallons of formalin (embalming fuld) were pumped into their veins in the usual way. For the two whales he used 6c tons of sait and 130 gallons of formalin. The task was carried out successfully, and now the whales look just like crystallused fruit. Thus is the first time that whales have been embalmed in Europe They were brought to England lying in sait in the hold of a ship, and each 24 hours they were injected with preserving fluid by means of a hypodel mic syringe. It was expected that the whales would last two years.

ESKIMO CHÁRACTERISTICS.—Dr. Aleš Hrdlička has reported to the Bureau of American Ethnology the results of a journey among the Eskimo, which he made in 1936 for the purpose of an anthropological survey of these people. His conclusion is that the Eskimo throughout their territory are one and the same people. The strain is fundamentally related to that (or those) of the American Indian. It is also undoubtedly related to the yellow-brown strains of Asla. The Eskimo are remarkably slike over their whole territory in such characters as pigmentation, build of body, physiognomy, large brain, fullness of forehead and largeness of face and lower jaw. They differ in stature, form of head, and breadth of nose. Between east and west there is a regular gradation, due to adaptation and differentiation. They suzgest a moderate stream of people of fairly broad but with a mesorhine nose, and other characteristics in common, reaching America from northeasternmost Asia after the related Indians, spreading along the coast until blocked by the preceding Indian tribes, and gradually modifying physically in adaptation to environment.

The evidence shows that the more highly differentiated and divergent the Eskimo becomes, the greater the gap between him and his Indian neighbour. The facts point, therefore, to the original identity of the source from which the Indian, more particularly the latest branches, and the Eskimo were derived, and to the identification of this source with the palmo-Asiatic, yellow-brown peoples of lower northern Asia.

FACSIMILE TRANSMISSION AT 180,000 WORDS AN HOUR.—A new facsimile transmission system, which, it is claimed, will send 180,000 words which, it is ciantica, with sent 180,000 would from station to station in an hour, has been demonstrated at the International Telephone and Telegraph Laboratories at Hendon. Through a machine on which a number of lights played in and out, sheets of typescript were passed at the late of one every minute. The receiving machine was in semi-darkness, relieved only by the glow of shrouded red lights. A blue lamp flickered little points of yellow light glowed within a tube; and to the other end of the machine a long roll of white paper came pouring out. This was taken to a dark 100m, and a minute or two later perfect facsiniles of the typescript were supplied. The system consisted of scanning the messages in a series of fine parallel lines with a point of intense light. The reflections of light are led to a photo-electrical cell, which delivers signals corresponding in amplitude to the tone value of the picture element The signals as transmitted are received on photo-electric paper, which can be quickly developed. The first machines to be put on the market will, it is claimed, transmit reo pages of vords. In this way it will be possible to transmit a complete newspaper from London to Melbourne in an hour.

FISHES LIKE COMPANY—At the Plymouth Laboratory of the Marine Biological Association Mr. G M. Spooner has been trying to find out, by means of mirrors held in front of fishes, if they recognised their mage and wanted to swim beside it. Sight is believed to have an important influence on the desire of fish to swim in shoals and schools, and M. Spooner's fish-mirror tests tend to uphold this theory, By an ingenious tirck, he made fish want to swim in hime with other fish which were not there, thus proving that fish like company, and therefore swim in shoals. Describing the behaviour of a fish when swimming near a looking-glass, Mr. Spooner says the fish spends a good deal of time swimming to and fro across the mirror surface with its face close against the glass, as though attempting to pass through it. It passes up and down, often making fullie snaps at the surface and displaying other reactions characteristic of frustrated effort. Other tests show that fishes group more readily if disturbed or alarmed, and least when hunting for food. Little fishes will group with htt lishes.

FOAMING OF BREE.—Prof. Alexander Findlay has described a number of experiments on the phenomena of the foaming of heer which were made by himself and his colleagues. While the stability of the foam, he says, will depend mainly on surface tension and viscosity, the size of "head" formed under the ordinary conditions

of pouring out a glass of beer will depend mainly on the rate of evolution of carbon dioxide from its supersaturated solution in the beer. This rate varies with the degree of supersaturation, which, in turn, depends on the nature of the beer and the method of its manufacture. A pale ale was found to evolve carbon dioxide more rapidly than a stout or export beer. The rate of evolution, moreover, depends greatly on rate of evolution, moreover, depends greatly on the walls of the containing vessel and their effectiveness in supplying gas "nuclei" to start the evolution of carbon dioxide. Traces of grease on the surface of the glass are very effective in promoting the escape of gas; and the difference in "head" obtained with a dry and wet glass is probably due to this fact. In the case of a wet glass, there will be an absence of air bubbles on the surface to act as nuclei.

FRUIT MADE TO "SWOON."-A remarkable new refrigerating agent, which is 60 deg. colder than the temperature of the North Pole, is being manufactured at Billingham-on-Tees by Imperial Chemical Industries, Ltd. Known as "Drikold," Chemical industries, Ltd. Allown as "Drikold, this material, which is a preparation of carbon dioxide in solid form, resembles in appearance blocks of compressed snow, but since it has a temperature of 144 deg. of frost, it has some four times the refrigerating power of ordinary ice. It is intended to be used for the production of carbon dioxide gas, or as a refrigerating agent, which should last any time up to three months. It is well suited for the transport of fresh fruit. Fruit breathes, and if subjected to a suitable quantity of the gas "swoons," or goes into a state of suspended animation, until it is again exposed to the air. The gas may also be used to replace the usual vacuum for packing materials such as cocoa or tobacco. As a refrigerating agent, its complete absence of moisture enables it to be used in the packing of parcels to be sent by rail or through the post.

GLIDING ACROSS THE CHANNEL .- On June 10 the English Channel was crossed for the first time by a British-built girder with a British pilot, Mr. Lassant Beardmore. The pilot, having been towed by an aeroplane to a height of at, ooo ft. above Lympne, at 4.30 p.m. released his machine and glided in a continuously falling path, landing at St. Inglevert serodrome just after 6 p.m. He was not, however, officially recognized as being the first person to glide the Channel, since he was prevented from applying to the British Gliding Association for the proper observation of his performance by the anomaly that he did not hold the most advanced of the certificates awarded to glider pilots, and was therefore not judged competent to undertake the feat. Herr Kronfeld, on a German-built machine, accomplished the same flight under official observation, on June 20. He flew from France to England, and thus became the holder of the official distinction. He afterwards made a return glide from Dover to St. Inglevert.

GREENLAND ICE CAP.—Dr. Sorge and his companions on the German Greenland Expedition have, by means of artificial earthquakes, tested the thickness of the ice cap which covers the interior of that country like a dome. Twenty-five explosions were made, and the resulting waves observed. At the Central Station, equidistant so miles from Greenland's eastern and western coasts, and on the 72° of ing the researches begun as a study of the

latitude, they found, by reckoning the time taken for the return of the explosion wave reflected from the base of the ice-sheet, that the remetted from the base of the fee-sheet, that the ice was 8,8co ft. thick at 9,84c ft. shove sea level. Other members of the expedition working on the border of the inland ice, 35 miles from the coast, found the ice to be from a,200 ft. to 3,000 ft. thick at 5,900 ft. above sea level. Greenland is therefore, as the late leader of the expedition, Professor Wegener, believed, an ice-filled bowl surrounded by mountains up to s,oco metres in height. The valley in between falls away to 300 metres, and over this great expanse of rocky ground curves the enormous ice cap, which rises from 100 metres at its outer extremities to 3,000 metres at the top of its arch. Here millions of cubic miles of ice cover the rocky surface. It was Professor Wegener's theory that the conformation of freenland was caused by this enormous mass of ice, the weight of which had during the ages gradually depressed the interior of the island.

GYROSCOPIC CHECK TO SEA-SICKNESS. - In order to reduce rolling movements to a minimum, and to save passengers from sea-sickness, the new ocean liner, Conti di Savoia, which the Italian Lloyd Sabando is building for the Atlantic service, will be equipped with three gyroscopic stabilizers at a cost of £300,000. Each of the gyro-stabilizers weighs x00 tons and has a diameter of 13 ft. They will be placed in the lower hold of the ship under the bridge. the three big wheels, representing a total weight of 300 tons, are spinning in unison, the gyroscopic power they exert will be sufficient to counteract the motion of this so.coc-ton ship labouring in a heavy sea. The tendency of the ship to roll one way will be met by an opposing force, and the hull will thus be kept steady. It is estimated that the vessel will never roll more than 5 deg., no matter how boisterous the weather. Each wheel is driven by an electric motor of 560 h.p., but the full power will rarely if ever be required. The cost of running all three gyro wheels is estimated at not more than £xx a day.

GYROSCOPE IN WELL-BORING .- In the boring of oil wells many things lead to the deflection of the path of the drill from the vertical, and it is important that the mining engineer should be informed of such deflection. In conjunction with the Sun Oil Company the Sperry Gyroscope Company has now brought out the "Surwel" gyroscopic clinograph. The apparatus consists of a gyroscope with its axis set north and south, of a gyroscope with its axis set north and south, a box-level gauge, a chronometer and a film camera, these parts being contained in a steel cylinder 5% in. In diameter, which can be lowered down the well. The bubble in the box-level shows the inclination; a pointer on the gyroscope gives the direction of the inclination; while the camera, timed by the chronometer, takes a series of photographs of bubble, pointer, and chronometer hands. As the rate of lowering and chronometer hands. As the rate of lowering is known, the exact depth at which each camera observation is made can be found, and thus the inclination and its direction can be determined at any given depth. The data recorded on the film can also be plotted on squared paper and a graphic picture of the well's course through the ground can be obtained.

HAIR AND CRIME. - Dr. John Glaister, continu-

significance of human and other hair in the detection of crime, has made a comparative investigation of the hairs of a large number of mammals. The results appear in "A Study of Maria and Wools." published by the Faculty of Medicine of the Egyptian University, where the author is professor of forensic medicine. Dr. Cliaster concludes that a critical examination of hair will always reveal the mammalian order or sub-order to which it belongs, in a very large number of instances will betray the family, and in many cases the species. If it be a human hair, in an appreciable number of cases it is distinctive of sex, in most cases it can be allocated to its site on the body, and in a very approximate manner may decide the age of the possessor, as very young, adoloscent, adult, or aged, provided a number of hairs are available.

IRON ROAD.—The first cast-iron road in the world has been laid on a stretch of about zoo yards of Romford Road, Stratford, E., one of the busiest thoroughfares in London. Triangular plates of iron were laid on butumen, which had been sprinkled on a concrete foundation. Mr. Frank Hough, the inventor of the new road, claims for the new surface less noise and vibration in all forms of traffic, an absence of skidding, and rapidity of renovation. It is not a yard cheaper than the cheapest foreign granite, and it will last 50 years, after which 45 per cent. of the original value of the iron can be made out of the sale of the old road.

LARCH POLES FOR TELEGRAPH LINES—Experiments have been carried out at the Forest Products Research Laboratory at Princes Risborough in the treatment of home-grown larch poles to render them suitable for use in telegraph, telephone, and power transmission lines. The objections to larch for transmission lines are based on the behaviour of creosoted poles used during the War. It was found that the poles were liable to crack or split severely. Experiments carried out with poles from the larch woods in Tintern Forest have shown that these difficulties can be overcome. By peeling and making a number of incisions in the poles with a broad kniffe, a satisfactory penetration of the preservative is obtainable. Although the incisions have a slight weakening effect on their strength, home-grown larch poles so treated are said to be 25-20 per cent. stronger than imported poles of Scots pine of the same dimensions.

MECHANICAL EYE FOR FLYING.—A mechanical eye for aeroplanes, which can find any airway beacon at a distance of two miles in an ordinary fog has been devised by engineers of the General Electric Company. The device involves the use of photo-electric cells. It is mounted in two parts on the tail of an aeroplane. As the aeroplane approaches a beacon the device indicates by one set of signals whether the beacon is to the right or the left of the aeroplane, and by another whether the aeroplane is approaching or departing from it. The two sets of signals, together with attitude readings, make it possible for a pilot to calculate his landing exactly. The "eye" can be set so as to select the beacon desired from among hundreds of others merely by the rate of winking peculiar to that beacon.

Moon's TEMPERATURE.—Messrs. Pettit and Micholson, of the Mount Wilson Observatory, have made a series of experiments on the temperature of the Moon, using a delicate thermopile on the zoo-inch reflector. They found that the Moon's surface under a vertical Sun has a temperature of zoz' C., just above boiling water; at altitudes 60°, 30°, and x0° the temperatures are 88°, 40°, and -30° respectively were registered. During an eclipse of the Moon, a region that was at 60° C. before the eclipse began, fell to — x00° when the region entered the umbra; and the return of heat after the eclipse was also rapid, suggesting that the Moon's surface is composed of loose volcanic ash and that the heat only penetrates a few maches below the surface. The temperature at night was found to fall below — x50° C. There is thus a range of a50° C between day and night in the equatornal regions of the Moon; which would tend to disintegrate rocks by alternate expansion and contraction.

MUSIC OF ELECTRIC VIBRATIONS—The "new music of electric vibrations" was discussed in a paper read by Dr Goldsmith before the New York Electrical Society. He illustrated it by an electric carillon, which can send out bell tones louder than any hell in the world. A series of small steel chimes, something like those of a household clock, are struck by electric hammers actuated by a keyboard similar to that of a piano. The sounds thus produced are only audible a few inches away, but the vibrations of the steel chimes create small electric currents in devices like the "pick-up" used in electric gramophones. These feeble currents are amplified millions of times by vacuum tube amplifiers, and can be clearly heard in the largest concert hall or for miles round a church tower by means of grant amplifiers. The operator of the electric carillon not only controls the notes to be played, but also can vary the volume of the tone to any desired extent. Dr. Goldsmith believes that the musical artist of the future will become more indispensable. The number of notes which the musician can play per second will not be limited by the speed of his fingers. Tones of any origin can be made to resemble those of any desired instrument by electrical methods. Each musician will be able not only to play the melody, but also to make it sound as if produced by any type of instrument. The new electric music will gradually evolve a new type of composer capable of utilising to the full the capabilities of emotional expression contained in electric music

NEW PHOTO FLASH LAMP.—A fireless, smokeless, odourless and noiseless photographic flash lamp has been developed by the General Electric Corporation. Cleveland, Ohio. It consists of a clear bulb of standard design, filled with oxygen, with the flashlight filament coated with a special preparation, and with a quantity of thin aluminium foil in crumpled sheet form within the bulb. When the circuit is closed, the filament is lighted, and this, in turn, lights the foil. The flash is confined entirely within the bulb. The lamp operates on any 125-volt house supply, or with dry, storage, or flashlight batteries. A new lamp is needed for each flash. Requiring only a one-hundredth of a second to act, and being without hazard, the lamp will

make possible the taking of fiashlight photographs in places heretofore practically impossible to "aboot," such as in trains, airships and theatres, and under water, and by insurance companies requiring night photographs in all weather conditions.

NIAGARA NOT "COMMITTING SUICIDE."—An international board of engineers, appointed in 1926 by Canada and the United States to study the past, present, and future of Niagara, has presented its final report, with a message of reassurance to those who have predicted the exhibition of Niagara at a comparatively early date. The board finds quite unwarranted the statement that the famous cataract is "committing suicide" by degenerating into a mere cascade. These engineers find that the cliff now is cutting back at a decreasing rate; that the rate will continue to decrease; that in a century or two there will be little apparent difference in the Falls; and that inevitable recession will not endanger the Falls in less than a,coo years. Certain remedial steps are recommended for the even diffusion of water over the shallow rims of the great horse-shoe. In recent years a great deal of water has been diverted for power purposes, but it is claimed that, by diverting to the fanks part of the deep stream which pours over the centre of the cataract, the beauty of an even and far-flung torrent may be maintained for many centuries.

Noise Measured in "Decidels."—A series of experiments in the measurement of noise has been conducted at the National Physical Laboratory at Teddington. A scale of measurements of loudness has been invented, zero being known as the "threshold" or point at which a noise becomes easily perceptible to the human ear. Degrees above this are calculated in "decibels," based on the fact that while loudness in the ear advanced by simple addition, the energy corresponding increased geometrically. Each "decibel" represents approximately the least change in loudness which the ear can detect. A table of noises has been worked out as follows:—

Quiet whisper	zo d	ecibel
Quiet garden	20	**
Clock ticking	30	11
Soft radio music	40	,,
Conversation	50	**
Loud radio speech	бо	,,
Loud radio music	70	21
Restaurant noises:	•	
Quiet restaurant	40 d	ecibel
Moderate clatter	Šo	**
Average music	Ğо	
Noisy clatter	70	•
Loud music	70 80	11
Street noises:		•
Quiet suburban	30 d	ecibel
Quiet London	40	••
Quiet car passing	50	,,
Moderate London traffic	·60	.,
Accelerating traffic	70	
Motor horn	80	**
Pnenmatic drill	90	**
Vehicle noises:	-	••
Saloon car (25 m.p.h.)	40 d	ecibel
Quiet tram (windows shut)	50 -	
Bus, train	50	"
Tram, 'bus, train (windows open)	70	"
, ,	,-	•••

Quiet aeroplane	So decibels
Noisy Tube train	90 ,,
Noisy aeroplane	110 ,,

ten decibels louder than in Loudor	
the Niagara Falls roar equally loud	lly. But the
arch offender of all is the aeropla	ne engine at
close quarters.	

OCEAN BRD SHIFTED.—The United States Coast and Geodetic Survey has confirmed the observations of Captain David Bone, commander of the Transylvania, that the ocean bed off Georges Bank, which is in the track of the great liners between Europe and New York, had shifted. An earthquake in xaga shook the Atlantic seahoard from New York to Nova Scotia and Newfoundland. Subsequently Captain Bone made the discovery that the ocean bed, in an area approximately in latitude 47-so north, longitude 56'so west, had moved. Three attempts to touch bottom were without success. He anticipated that he would find a depth of 55 to 85 fathoms. He lost two lead lines with no results, and the third lead was paid out to aco fathoms in another futile attempt at sounding. In subsequent experiments by sea surveyors, however, a new depth of more than 350 fathoms was charted.

OH-WELL 10,030 FT. DEEP.—The long projected depth of a 10,000 ft. oil-well has been reached by the drilling of a hole to 10,000 ft. in Ventura County, California. This establishes a record, and it is anticipated that American oil-engineers will not rest content until a two-mile hole (20,560 ft) has been drilled.

OLD ENGLISH MILE —In a paper in the Geographical Magazine, Lt. Col J. B. P. Carslake shows that the old English mile was not less than 1x furlongs. This can be proved to be the mile of 1,500 paces. It was identical with the leuga, the common unit of maximum linear measurement in early Saxon times. It was introduced into England in the first century s.c., and it is the measurement used in the Domesday survey. Apparently it was replaced by the mile of eight furlongs by the use in Saxon times of the Roman mile of 1,000 passus, divided into eight stadia. So early as the ninth century, the stadium became the equivalent of the furlong. This mile of eight furlongs was adopted by the Post Office on its establishment in the reign of James I. for the determination of rates of horse hire for postal purposes. Thus milestones eight furlongs spart were set up, and this mile became the accepted standard of measurement in Great Britain.

ORIENTATOR.—An instrument known as the "Orientator," for enabling architects and builders to determine visually from plans the direction in which the sun's rays will fall on any window or wall during summer or winter, has been produced by Messrs. Cooke, Troughton and

Simms. It consists of a flat metal ring, to the central end of a radius of which is attached a thread which ends in a ball representing the sun. A portion of a second ring (which, if complete, would form a short cylinder), is fiel to it at such an inclination that if the first ring is horizontal the edges of the second follow respectively the paths of the sun in the sky at the summer and winter solatices. The instrument is placed on the plan with the centre of the horizontal ring over the window or wall and with an appropriately marked point in the north direction, and the thread is stretched by holding the ball between the fingers. When the thread rests against an edge of the inclined ring (on which a scale is engraved giving the hours of the day) its direction is therefore that of the sun's rays at the corresponding solatice. Observation of the plan from above then shows immediately what obstacles to sunlight are encountered. The instrument can be supplied for any latitude, north or south. It weglis x lb. and is 6 in, in diameter at the base.

OZONE AND THE WEATHER .- In a discourse at the Royal Institution an ozone and its relation to meteorology, Dr. G. M. B. Dobson described the chief results which have been obtained from researches on the ozone in the upper atmosphere carried out in many parts of the world during the last five years The ozone, which is situated at a height of some so km. above sea-level, has a well-marked annual variation that is different in different parts of the world. At all places outside the tropics, there is a maximum in the spring and a minimum in the autumn, the range being greatest in high latitudes and least in low latitudes. In temperate regions there are large changes from day to day which are closely related to the weather conditions, cyclones and anti-cyclones each having their own characteristic distribu tion of ozone. The ozone in the upper atmosphere is responsible for shielding the earth from intense ultra-violet radiation from the sun. which would cause serious effects if it reached the surface. It further causes the upper atmos phere at a height of 40-50 km. to be at a temperature in the neighbourhood of the normal boiling-point of water. Thus, in its turn, gives rise to the zones of abnormal audibility of sound from large explosions at a distance of some hundred miles from the explosion itself.

PARAGUTTA.—For nearly 80 years the standard materials for insulating deep-soa cables have been gutta-percha and balata. In the Bell Laboratories Record Mr. A. R. Keing gives a description of a new material, Paragutta, with which the new telephone cable between the United States and Cuba is insulated. Paragutta is a mixture of about 50 per cent. gutta-percha, 40 per cent. rubber, and 10 per cent hydrocarbon wax. Its mechanical qualities are fully equal to those of gutta-percha, its electrical stability in water is the same, but it has much better specific electrical properties. The mixture can be extruded on to the conductor in a continuous sheath of multiple layers free from mechanical defects. The insulated conductor has then only to be drawn through cold water, when it quickly sets into a firm covering sufficiently tough and flexible to resist rough bandling in factory or cable ship. The specific conductance of Paragutta is only one-thirtieth

of that of ordinary cable gutta-percha, and its dielectric constant is so per cent. smaller. It is claimed that if Paragutta had been available to insulate the permalloy-loaded telegraph cable laid five years ago its speed would have been 30 per cent. greater, and its revenue-earning capacity increased 30 per cent.

PARASITES TO DESTROY A WHEAT PEST.—A cargo of 90,000 insects has been sent from England to Canada to wage war on the wheatstenn sawily, which is Canada's most deadly wheat pest. They are grubs of the sawily, and about 60 per cent. cont-in parasites—smaller insects which will ultimately destroy their hosts. The insects will go at first to the parasite breeding laboratories at Belleville, Untario, and will afterwards be released in the Canadana wheatfields, where the parasites will be passed on to the local sawilles, and by this means it is hoped that the wheat pest will eventually be eradicated. Some parasitised rawiles, released in the summer of 1930 in Western Canada, have settled down well in their new surroundings, and the lesser fleas are biting the little fleas to some purpose.

PEKING MAN — In an address on "Peking Man," delivered b fore the Bilitsh Association, Prof. G. Elliot Smith said that the discoveries still being made at Chou Kou Tren, near Peking, only confirmed the profound significance of the Skull found in December, rgay. The skulls of the Peking man were of unquestionable geological ago (Early Pleistocene), and their qualities were not due to reconstitution. While definitely nione primitive and generalised than Pither, anthropies and Evanthropies, they revealed characters not intherto known except in those, and gave coherence and conviction to our knowledge.

Photographing the Earth's Curvature,—Captain A W. Stephens, of the United States Anny Air Corps, whose photograph of Mount Raniet, taken at a distance of 270 miles, was described in the 1931 Whitaker, has since succeeded in taking what is described as the first photograph to show the curvature of the earth's surface. It was taken from an aeroplane over a small town in South America—By using supersensitive plates he succeeded in photographing what was invisible to him, a range of the Andes some 300 miles distant and the peak of the volcano Aconcagua, 230 miles distant, as well as the unbroken Panipas intervening—The mountain range appeared as a straighth horizontal line, but the distant horizon of the Pampas was not straight, but bent slightly downward at one end.

Photographic The Stomach.—A camera which takes flashlight photographs of the interior of the body is the latest application of photography to medical uses. It is the invention of two Austrian scientists, and has been demonstrated with succest in London and the United States. The apparatus consists of a semi-flexible tube, carrying at one of its minute pinhole cameras, divided into two groups of eight each, and the resulting photographs can be pieced together to give a complete map in 6 sections. The tube is ½ in, in diameter, and the cameras occupy a space of about two inches, he patient swallows the cameras, which are

introduced by means of the tube. Between the two groups of cameras is a source of light operated by the transformer. This yields a operated by the transformer. This yields a flash for the duration of x-xzoth of a second. Through the tube are passed two wires, one for the flash and the other to operate the shutter which uncovers the z6 pinholes of the cameras. The films used are about the size of a piece of onfetti, and the photographs have to be enlarged one hundred times. The value of the instrument will, it is hoped, lie in enabling cancer and other diseases to be recognised at a stage where present methods of diagnosis are inconclusive.

RAIL-ZEPPELIN. — The Rail-Zeppelin, a propellor-driven coach, invented and constructed by Dr. Francis Kruckenburg, has made a trial by Dr. Francis Kruckenburg, has made a trial run on the ordinary railway track between Berlin and Hamburg, over a distance of for miles, during which it attained an average speed of rog miles an hour and a maximum of rag miles an hour. The coach is 85 ft. long and stream-lined throughout. It is built of steel, aluminium, wood and fabric, and weighs x8 tons. The agents is of really a gamble of getting The engine is of 500-li.p., capable of getting up a speed of 80 miles an hour within two minutes of starting. There are two compartments, one for smokers, and a luggage room and vestibule. It has accommodation for 40 passengers. Dr. Kruckenburg claims that the speed of 143 m.p h 18 by no means the maximum of the Rail-Zeppeliu's possibilities, but he was obliged to keep within this limit in order to comply with the requirements of the State Railway.

RESTFUL SLREP.-Investigations at the Mellon Institute, Pittsburgh, by Dr. H. M. Johnson, on movements during sleep, show that the healthy movements during sleep, show that the healthy adult during deep sleep makes some gross change of bodily position on an average every 7-8 minutes. Every sleeper has a dozen or more very different poses in which he takes his rest. On any typical night he will make use of all, or nearly all, of this dozen, changing from one to another twenty to sixty times, according to his sensitivity to various kinds of bodily irritation. Among different persons, some have a strong preference for supme positions, others favour prone ones. By means of an ingenious device, photographs were obtained of every change of position assumed by a sleeper during a night, and show an extraordinary range of positions.

RINGED PLOVER AND ITS EGGS .- A series of experiments relating to the eggs of the ringed experiments relating to the eggs of the ringed plover has been carried out by Mr. George Marples in an area where he had more than forty nests under observation. When the eggs were removed a short distance from the nest, the birds found them and dragged them back; but they also dragged and sat on egg-shaped pebbles which had been painted to resemble their own eggs. The disguising of the shape of their own eggs by adding lumps of plasticine their own eggs by adding lumps of platficine did not deceive them, nor did painting the eggs with bright yellow, blue and red. The theory that the ringed plover keeps its eggs in the positions of the cardinal points of the compass was tested, with the result that after the deliberate derangement of the clutches in zar cases, it was found that so were rearranged exactly north and south, xx were nearly but not exactly north and south, zz were nearly but not | SOIL HEATED BY ELECTRICITY.—A success-guite restored to the cardinal point position, ful experiment has been made by engineers

and 30 clutches remained in disarrangement. north-east and north-west. Tests with various scents placed on the eggs indicated that the birds were deficient in sense of smell

RUBBER STATUES. — Public statues made of rubber are a practicable possibility of the future, rubber are a practicable possibility of the future, as the result of tests made by the Dunlop technical staff for the memorial tablet to the late J. B. Dunlop, in Belfast. The memorial was made from a solid block of ebonite, or hard rubber, weighing s70 lb., of which 70 lb. were removed by the sculptor in chippings and shavings. The block was built up from layers of unvulcanised chointe under a roller weighing cavet and trimmed to fit a proceed steel would 5 cwt., and trimmed to fit a special steel mould. where it was placed under a pressure of 250 tons and "cooked" for more than 220 hours. The portrait of Dunlop was pointed off from a full-sized clay model, and the lettering was done by a burr with six microscopic cutting edges, such as is used by dentists in preparing teeth for filling. For cutting and carving the block was perfect throughout. It did not vary in density or colom, and it was capable of being freely cut without cracking, giving a good sharp finish.

SAFETY CABLE IN MINES .- A cable has been invented by Dr. A. G Allsop, at the Safety in Mines Research Board laboratory in Sheffield, which, it is claimed, may enable miners to discard the small hand lamps and work at the coal face under the glare of flood lighting, and result in the abolition of nystagmus—miners' eye disease. Dr. Allsop's cable differs from the ordinary electric cable in that a screen of fine wires forms a sort of cage round the main cable, and if any one of these wires breaks, by being run over by a tub or othewise injured, the current through the main cable is automatically switched off. Only a small current runs through the screen wires, and if these are damaged the current is not enough to cause a spark capable of igniting fire

SKYSCRAPER TO SWAY IN THE WIND.—The highest skyscraper in the world; is the Empire State Building in New York, which was formally mangurated on May 1, 1933, by President Hoover, in Washington, pressing an electric key. The structure has been erected on a site previously occupied by the Waldorf Astonia Hotel. The office building proper has eighty-six stories and is 1,048 ft. high to the base of the mooring mast for dirigibles, and x, 348 ft. high to the top of the mast. It will have a working population of 25,000 persons when fully occupied. There are more than x0,000,000 bricks in the building, and 57,000 tons of steel, enough to build a double-track railway from New York to Montreal. There are also 6,400 windows and 58 lifts, which journey through seven miles of shafts. A lift takes go seconds to make a non-stop trip to the eightleth floor. The steel cage of which the skyscraper consists is so arranged that when the wind blows it yields slightly, but at the same time it locks together more strongly than ever. It has been calculated that the wind pressure on any one face of the Empire State Building may rise to 4,340,000 pounds, and that the swaying motion of the skyscraper in a strong wind will take four seconds.

connected with the Southern California Edison Company, in the use of electricity to heat the soil round plants so as to force their growth, and so place the product on the market at an earlier date and at a higher price. Two exactly similar plots of land were taken. One had insulated wires running through it about 4 ft. apart and at a depth of 8 in. The current in the wires was regulated by a thermostat so as to maintain a temperature of about 70° F. Current flowed on an average two hours out of every five. The other plot was prepared in the same way, but was not electrically heated. Cucumber seeds were planted in both plots, in rows about 4 ft. apart. It was found that more than one half of the crop in the wired portion had matured and been marketed before the first cucumber had reached maturity in the unheated plot. The net revenue obtained from the electrically heated plot was about £so greater than from the other.

STARLIGHT TO START MACHINERY.—Rays of light from Arcturus, which left that star during the Chicago World Fair of 1893, are to be captured, converted, amplified, and used to start machinery in the Hall of Science at the opening of the World Fair in Chicago on June x, 1933. It is hoped to accomplish this feat by collecting the light rays in a 40 in. telescope and passing them through a photometer connected with an electrometer, which in turn will be connected with the switches controlling the machinery.

TAKING BRACON.—Messrs. Chailes A. Stevenson and David Alan Stevenson, engineers to the Northern Lighthouse Board, have been awarded the Thomas Gray Memorial Trust Prize of £ 700 for their invention of the "talking beacon" which is installed at Cumbrae Lighthouse on the coast of Ayr, consists of a combination of fog-signal and wireless transmitter, and enables a ship fitted with even the simplest form of wireless receiver to ascertain her distance from the lighthouse up to about five miles in thick weather. The fog-signal consists of three blasts, followed by a short silence, and then two further blasts. At the same time, on a wireless receiver, a listener hears—(a) the name of the "beacon" in speech (Cumbrae), (b) the three blasts of the fog-signal. This is followed by a slient interval lasting 27 secs. and ic) the two blasts of the fog-signal. This is followed by a slient interval lasting 27 secs. and is then repeated. Immediately before each mile is spoken a bell is sounded. The distance which the observer hears in his receiver coinciding with the end of the third blast heard through the air gives him the distance of his ship from the lighthouse. The spoken words in the signal emanate from a gramophone record, which revolves on a turn-table, which in turn is engaged and disengaged by means of a clutch with another turn-table kept constantly revolving by air turbine or motor.

TRLEGRAMS BY TYPEWRITER.—The General Post Office is setting up the first teleprinter exchange, by which a person sitting in his own office may send telegrams privately, or get into communication with other subscribers and carry on written conversations with them when subscribers wish to get into touch with each other they will type out an exchange

number which will then be automatically switched on. Fifty words a minute is a low estimate of the speed which may be obtained by a proficient operator on the teleprinter. There will be ample opportunity to attain a high rate of speed, since subscribers will become their own telegraphists, the speed of the instrument being limited only by the operator's abilities. Among the advantages of the system are that a typed record is kept of all messages at the sending and receiving ends; there is great speed of communication, secrecy, and the possibility of sending messages even if there is no attendant at the instrument of the called subscriber.

TELEVISION PROGRESS.—The prophecy that TELEVISION PROGRESS.—Ine propnecy that television will soon be in every home? seems likely to be fulfilled in the United States and direat Britain in the next few years. In the United States a transmitting station of enormous power, which will be used in connection with the National Broadcasting Company of America, is being erected, and it is expected that in 1332 television will be installed in thousands of American houses The first television wedding, that of Mr Frank Borie du Vall, an eugineer, and Miss Grace Lilian Jones, took place in New York. It was conducted in a skyscraper studio, and hundreds of television enthusiasts " looked in," and thousands of wireless-set owners listened in. Mr. J L. Baird's plans to televise the Derby race—for the first time in history—proved a race—for the first time in history—proved a great success. Seven televisors were equipped and connected up with the Baird Studios. Punctually at \$45 the first actual scenes came filtering through; these clarified after the race had started, and within a few minutes Campropolity. Other and Similated Cameronian, Orpen and Sandwich were to be seen quite distinctly passing the winning post. The surging crowds, and the faces of the owners and their friends as they came forward to lead in the victors, were clearly seen. Mr Baird has since announced that by improving the optical system and by adopting a more efficient method of "scanning" it has been possible to double the width of the pictures and show scenes with as many as eight full-length figures This opens up the opportunity of increasing the entertainment value of the programmes.

TEN MILES HIGH—On May 27, 1232, Prof. A. Piccard, of the University of Brussels, accompanied by Herr Kipfer, ascended at 4 a.m. from Augsburg, Bavaria, in an airtight aluminium sphere, about a metres in diameter, raised by a balloon which was stated when fully inflated to have the capacity of half a million cubic feet. Anticyclomic conditions prevailed at the time, and the balloon, after remaining in the air for 18 hours, fell at a spot about 16 kilometres to the south Prof. Piccard succeeded in reaching a height of about 18½ kilometres, probably penetrating into the stratesphere by some 4 kilometres, and beating "Il previous records of a manned halloon or acropiane. On the descent trouble occurred with the gas valve, and after long delay the balloon landed safely on the Gross Gurgi glacier in the Austrian Tyrol. The air in the cabin was renewed by two oxygen cylinders, each capable of maintaining a good atmosphere for eight hours. The aeronauts suffered considerable discomforts, for the temperature inside the sphere was most upplessantly high while the external air was 55°C. below freezing point, dun to intense solar radiation in the rarefield

stmosphere. Prof. Piccard found that at a height of 48,000 ft. the conductivity of the air was only half as strong as at the height of 29,000 ft. previously reached by balloonists. A second observation was that the cosmic rays could not proceed from any ordinary type of radio-activity. He was of the opinion that they seemed to have their origin not in massive bodies, but in attenuated bodies which possessed not more than 100 grammes per aquare centimetre of density at their surface. He could not preceed from any ordinary type of claimed that his ascent had proved that the aeroplane of the future would seek to fly in the higher altitudes, because the atmosphere there enabled a speed to be attained three times greater than that which was possible in the lower strata. The aeroplane industry could confidently build with this object in view, because these upper altitudes presented no difficulty from the physiological point of view provided that aeroplanes were fitted with airtight cablus.

TREE RINGS AND SURSPOT CYCLE.—Dr. A. E. Douglas, whose work on the correlation between the growth-rings in trees and the sunspot cycle has given a probable sunspot curve for many certain districts back to yoo R.C. By examining the timbers in some ancient Indian buildings he has been able to give the dates when the trees were cut, and thus to date the buildings. Dr. Anters, of the University of Stockholm, has found correlation between the structure of clay layers in ancient lake-beds and the sunspot cycle. Both the tree-rings and the clay layers are supposed to depend directly on the rainfall.

TRENCHES IN THE NORTH SEA BRD.—In recent surveys of the North Sea a trench r30 fathoms deep has been discovered about no miles east of Montrose. The Devil's Pit, as it is called, is the deepest of a group of depressions found in a floor which was supposed to be an undulating plain at \$8 to 50 fathoms. Another group of depressions, with a greatest depth of \$7 fathoms, occurs farther south, about 65 miles east of Berwick. Professor J. W. Gregory does not accept the suggestion that the treuches have any connection with the carthquake in eastern Scotland and southern Norway on January as, 1397. He believes that the features are not new, but were formerly missed by soundings having been too far apart. He argues that the treuches are remains of the pre-glacial valley of the Rhine, and date from the days when the Rhine and its British tributaries discharged to the North Sea about a hundred miles east of Kinnaird Head. The existence of these pre-glacial trenches adds to the improbability of a Scandinavian ice-sheet having reached the British coast, since it would have filled the trenches with moraine matter. In this case floating ice must have been responsible for the transport of Scandinavian boulders to eastern England.

TWO-MILLIONTH TELEPHONE.—The King has accepted the s.oco.ocoth telephone for use in Buckingham Palace. The instrument is one of the latest hand-microphones, fluished in old gold. It carries a decorative plate surmounted by a crown, and bearing the inscription:—"This instrument, installed for his Majesty, King George V. is the s.oco.ocoth telephone concected with the Post Office system.—June 1931."

When Sir William Thomson (Lord Kelvin) introduced the telephone into this country by exhibiting Processor Graham Bell's instrument to a meeting of the British Associatios, at Glasgow, in 1876, few people could have foreseen the enormous development which has taken place in 55 years. In those days, the world marvelled at the possibility of two persons conversing over a few yards of wire. To-day, with London as the telephonic centre of the world, subscribers talk every day to the most distant parts of the globe as easily as if they were speaking to friends a few streets away.

TRAIN WITH RUBBER TYRES.—A railway motor-driven coach, fitted with pneumatic tyres and capable of a normal speed of 65 miles an hour, was demonstrated on July 25 on the Palaissau-Chartres branch line. It may transform the working of branch railway services if all that is claimed for it is substantiated. The train consisted of a 24-h.p., 24-sester coach, having pneumatic tyres fitted on its flanged wheels. The tyres were of special shape, stronger and thicker than the type used in motor-cars, in order to bear the greater weight of the railway coach, and wider and flatter than lorry tyres. The coach reached a speed of so miles an hour in 650 yards, and was brought to a standatill within xee yards, while the demonstrators claim that, by use of the new type, it will be possible to dispense with signal-men, level-crossing keepers and guards. Each coach is manned with a driver only, and similar coaches can be despatched at xee-yard intervals without danger of collision.

Wireless typewriter, invented by Mr. Glen Watson, and known as the "Watsongraph," has been given in Detroit. The instrument enables an operator sitting at a typewriter to type out a message which is automatically and simultaneously conveyed by short-wave wireless to another typewriter at any distance. The receiving typewriter at any distance. The receiving typewriter automatically types out the message as sent. A transmitter for ordinary commercial use can be made, to weigh only about solb. The speed of transmission is limited only by the skill of the operator, since the typewriter can record 1,200 letters a minute. Any receiving typewriter, synchronized with the transmitter, could be tuned in wherever the receiver might be, and the message could be typed simultaneously on several receivers. If secrecy is desired, it can be arranged that only the transmitter and the required receiver are synchronized. The owner would thus be independent of all public means of communication. The typewriter could be carried on police patrol cars and used for sending messages to headquarters in absolute secrecy without code. It would also revolutionize newspaper work, since, as mong other things, it would enable correspondents to evade a censorship.

WORLD'S FASTEST TRAIN.—The "Cheltenham Flyer," the Great Western express, drawn by the Launceston Castle locomotive, established a world record on Sept. 14, 1921, by running from Swindon to Paddington, a distance of 77% miles, in 59 min. 30 sec., an average of 78 miles an hour. On Sept. 15 the train made the run between Swindon and Paddington in 38 min., at an average speed of 30 miles an hour.

New books continue to be published at the rate of about forty a day, and several new publishers have started business during the year. This would seem to imply that current literature is in a healthy state. On the other hand, booksellers have not escaped the prevailing "pluch," sellers have not escaped the prevailing "pinch," and are exploiting various contrivances to stimulate the buying (rather than the borrowing) of books. Impoverished Germany, it is to be noted, with a population only half as large again as that of Great Britain, manages to assimilate the property of the twice our output. Some readers, dazed by the volume of new works, delegate selection to book societies and clubs; many, probably, would hear with complacency that Mr. Snowden had ex-tended the Entertainment Tax to new books, and hope that a reduced birth-rate of these would give renewed vitality to neglected older masterpieces.

Lord Crawford wrote last April in The Nineteenth Century. "If critics, for a change, would tell us what is bad; if they would occasionally recommend a book which was not produced the day before yesterday, better still if they would order of cleen time, one wough two months enjoin a close time—one month, two months, three months! how justly would they earn our

praise.

If the year has not produced any book of It the year has not produced any book of outstanding celebrity, the output of good literature, particularly in the realms of Biography. Philosophy and Science, shows no falling-off. Novels—appearing at the rate of no a day—still tend to grow longer, but the spate of sexpsychology seems somewhat to have spent its strength; studies in terror and brutality and the grueouse to some extent taking its place. the gruesome to some extent taking its place. Crime and detective stories hold their vogue, but their writers are realising that intricacies of plot need not be spoilt by crudities of style, or perfunctory love-interests. Whilst the War naturally continues to figure in most contemporary fiction, War books, as such, decline in number.

At the Annual Meeting of the Associated Booksellers at Harrogate last May, Mr. Geoffrey Faber, in an interesting address, prophesied that the serious and difficult time through which we are passing will lead to an increase in the demand for more serious literature, "not cynical, demand for more serious iterature, "not cylical, not destructive, but rather reconstructive. People," he said, "begin to get tired of drifting, of not knowing where they are going, they begin to want to read books which will not only ask questions but try to answer them. I am sure," he added, "that the next ten years will see a very marked increase in the sale of such books. I think there will be a big swing back towards religion, perhaps even philosophy and poetry, a reaching out for some firm ground to stand on, a realisation that it's not enough just to have a good time, and that the twentieth century hasn't yet done much to give life a meaning. And I think this reaction is going to be helped by sheer boredom with too much easy mechanical amusement. Cars, cinemas, wireless—how ex-citing and absorbing these things are for a time, and, after a time, how easy it becomes to have too much of them." Sir Nigel Playfair has also the pendulum swings back; but, like the great Foucault one in the Science Museum, it never returns precisely to the same starting place as

before. And that, after all, is progress.
The Irish Censorship, it may here be noted,
has banned (up to June, 1931) 89 books issued by

London publishers, including works by Havelock Ellis, Rosita Forbes, Gerhardi, Maxim Gorki, Hergesheimer, Aldous Huxley, Sinclair Lewis, Somerset Maugham, T. F. Powys, Eric Remarque. Marie Stopes, John van Druten and Marcel Prevost.

Amongst literary events of the year under review may be mentioned the celebration of the centenaries of John Donne and Dryden; the influentially signed appeal on behalf of Sir William Watson; the unveiling of memorials to Pierre Loti in France, and Rupert Brooke in Seyros; the interesting exhibitions at Mesars. Bumpus's of fine bindings, of Byron-Murray Bumpus's of fine bindings, of Byron-Murray documents, &c.; the achievement of "Science as a best-seiler" in the sale of \$0,000 copies of Jeans's "Mysterious Universe"; and the publication of the first volume of the new British Museum Cutatogue, for which the subscription price is £400. Notable feature of the year have included the Mund nus (Gollancz) experiment of new three shilling novels—(similar dollar issues are proving successful in America); the popularity of "Omnibus" collections; the increased length of the stories by leading novelist; and the large number of translations from German and other foreign works of fiction. and other foreign works of fiction.

Literary Luncheons, at which popular authors may be seen and heard in postprandial discourse, have proved very attractive; and booksellers, in their efforts to improve the "lay out" of their premises, are realising that the best book society is to be found in a well arranged bookshop, with intelligent but discreet attendance, and room to

browse about. 'Ir Alden, at the Booksellers' Conference last spring, recalled with emphasis the reference to book-selling in the Report of the Departmental committee on the English educational system. "In every town," said this report, "the book-seller's shop should become what in University cities and in one or two other favoured spots it is already, a centre of literary and artistic interest and enlightenment, a place where the best books, new and old, can be expected at leisui e.

Whilst the weekly book talks of the B.B.C. have been generally welcomed, the criticism of books has, not unnaturally, been itself the subject of a good deal of recent criticism. As regards quantity, it was stated that the whole space devoted by the London press to reviews only provides for about thirty lines each to one fifth of the new books published; whilst, as to quality, the selections of the book clubs and societies, and the reviewing of fiction by well known novellsts have been called in question with some severity.

"If our critics became young (wrote the editor of The Bookman, courageously) and our novelists old, we might be rescued from the present state wherein criticism is a laughing-stock and fiction

a disgrace.

The boosting of second-rate books is likely to prove a boomerang both for their authors and booksellers. Masterpieces do not happen twice a week.

Unlike the product of the graphic arts, the appeal of literature is not instantaneous. To appeal of interature is not instantaneous. To judge them, books have got to be read; softuntur ambulando, and a terribly pedestrian jogtorot it may prove. Hence the necessity, and the immense importance, of guidance, of criticism and reviews. The complaint re-echoed from various quarters during this past year is that criticism has become, as regards popular literature, not indeed corrupt, but so indiscriminately amiable and so exaggerated in eulogy as to be a snare and delusion. The public, perplexed and incensed at this manufacture of fictitious masterpieces, turns to the book clubs to guide its choice; and in accepting their selections is doubtless protected from many experiments in trash. But it must be obvious, without enquiring into their constitution, that these societies are business and not merely philanthropic adventures, and that their commercial success must largely depend on the very large discounts obtainable on orders, before publication, of fifteen or twenty thousand copies—allowances said to amount to sixty per cent, and even more of the published price. Such business is perfectly legitimate, but its implications must be frankly recognised; the sudden (and perhaps short-lived) exaltation of a new author may not conduce to his ultimate reputation; the concentration of emphasis upon a single book may prove unduly hard on others of almost equal merit; and in so far as these clubs tend to damage the bookseller's legitimate business their influence can only be deplored.

business their influence can only be deplored.
Awards of some of the Literary Prizze during the past year are appended: Priz Goncourt—
"Malaisie," by H. Fauconnier; James Tait Black Memorial—" Miss Mole," * by Miss E. H. Young, and "Bengal Lancer," by Major Yeats-Brown; Nobel Prize—to Sinolair Lewis; German Youth Prize—"Oseph and Peter," by Anton Gabele; Northctife Prize—"Regain," by Jean Glono; Huwthornden Prize—"The End of the World," by Geoffrey Dennis; London Pen Club—"Tohit Transplanted," by Stella Benson; Femina Vie Heureuse—"High Wind in Jamaica," by Richard Dayles.

Davies.

Davies.

The following are notable amongst book sale prices: Blake's "Songs of Innocence" (1750-94), £,500; Samuel Pepps, Letters, £,1500; Shukepeare First Folio (1623), catalogued at £18,000; Holograph MS. of Byron's "Don Juan, Cantos X-XII, £6,000; "Pickwick," prime copy in parts, £3,600; Block Book, "Passio Christi," £1,200.

Twenty-three of the York Minster Caxtons were, very injudiciously, sold to America for

\$20,000.
Speaking generally, however, there has been a decided slump in great sale prices since the peak records of the Kern Sale in 1929; and the drastic marking down of the catalogued prices for many first editions of modern authors during the past year should also be noted by collectors who indulge in this very speculative whim.

The list of deaths amongst literary men and

The list of deaths amongst literary men and women during the year includes the names of Arnold Bennett, Sir Hall Caine, Dr. H. R. Hall, Katharine Tynan (Mr. Hinkson), Ronald Maefie, Oliver Madox Hueffer, Dr. C. H. Turner, Lord Birkenhead, and Lady Newton.

In speeding a classified list of selections from

the books of the year it should be noted that the period covered is from October, 1930, to September, 1931; that translations and students' manuals are not, as a rule, included; and that where only a very small percentage of the year's output can be listed many good and useful books must obviously be left unnoticed.

"Miss Mole," and "Three Daughters" by Jane Dashwood were also recommended to the Paris Com mittee for their final selection.

ART.

"Thirty Years of British Art, by Sir Joseph Duveen; "An Introduction to the Language of Drawing and Painting," Vol. II, by Arthur Pope; "Persian Art," edited by Sir E. Denison Ross (the Winter Exhibition at Burlington House led to several publications on this subject); "The Philosophy of Art," by C. J. Ducasse.

BIOGRAPHY.

BIOGRAPHY.

"Cnapters of Autobiography," by the 1st Earl of Balfour (an interesting fragment, political rather than personal); "The Ladies of Llangollen," edited by Mrs. G. H. Bell; "Henry Irving," by Gordon Craig; "St. Loe Strachey," by Amy Strachey; "John Wilmot Earl of Rochester," by J. Prinz; "I'm Alone," by Captain Jack Randell; "Verney Letters of the 18th Century," edited by Lady Verney; "Wolsey," by Hilaire Belloc; "The Diaries of John Bright," edited by R. A. J. Walling; "Pepys, His Life and Character," by John Drin'water; "Lord D'Abernon's Diary" (3rd and concluding volume); "Comments and Criticisms," by Sir John Simon; "Whistler," by James Laver; "The Bise of General Bonaparte," by Spenser Wilkinson; "Al Capone," by F. D. Pasley (the amazing story of the bootleggers and racketeers); "Men and Memoirs," by W. Rothenstein (an artist and his friends); "The Private Papers of James Boswell" (from Malahide Castle, in the collection of Colonel Isham, prepared by Geoffrey Scott and F. R. Pottle, Vols. VII-IX); "Marshal Foch's Memoirs," translated by Colonel Bentley Mott; "Life and Letters of Edmund Gosse," edited by Memoirs," translated by Colonel Bentley Mott;
"Life and Letters of Edmund Gosse," edited by Memoirs," translated by Colonel Bentley Mott;
"Life and Letters of Edmund Gosse," edited by
Evan Charteris; "An Oxford Portrait Gallery,"
by Mrs. Janet Courtney; "According to the
Flesh," by Fleta Campbell (a biography of Mrs.
Eddy); "World Without End," by Helen Thomas;
"Bulwer: a Panorama." by Michael Sadleir;
"Portraits in Miniature," by Lytton Strachey;
"Son of Woman: the Story of D. H. Lawrence,"
by J. Middleton Murry; "Swift," by Carl van
Doren; "Savage Messish," by H. S. Ede; "Sir
Philip Sidney," by Mona Wilson; "The Diary of
a Country Parson, 197-280s," the last volume
of James Woodforde; "The Odyssey of an Out
of Work," by T. Horsley; "Millicent Garrett
Fawcett," by Ray Strachey; "Miorence Nightingale," by I. B O'Malley, "After Ten Years," by
Constance Malleson (Colette O'Neil); "In My
End is My Begtinning," by Maurice Baring (Mary
Queen of Scot's story as told by her four Maries);
"Life of Robert Marquis of Salabury," by Lady
Gwendolen Cecil (Vol. III); "Marshal Lyautey,"
by André Maurois; "Heury Kingsley: Towards
a Vindication," by S. M. Ellis (a timely apologia);
"Charlton" (Autobiography of an Air Commodore); "Ellen Terry and Bernard Shaw: a Correspondence" (delightful love letters): "Time "Charlton" (Autobiography of an Air Commodore); "Ellen Terry and Bernard Shaw: a Correspondence" (delightful love letters); "Time Was," by W. Graham Robertson; "A Bachelo's London," by Frederic Whyte; "Guilty but Insane: a Broadmoor Autobiography," by Warmark; "Nelson," by Clennell Wilkinson; "Lord Kilbracken's Reminiscences"; "Mock Turtle: Memoirs of a Victorian"; "Friends and Adventures," by T. (of Punch); "Autobiography of Lincoln Steffens"; "My Eighty Years," by R. Blatchford; "The Duke," by Philip Guedalla; "Everyman Remembers," by Ernest Rhys.

ESSAYS AND BELLES LETTRES.

"The Resurrection of Rome," by G. K. Chesterton; "Essays and Observations," by Lord

Hewart; "The Victorian Tragedy," by E. Wingfield-Stratford; "On Being Ill," by Mrs. Woolf; "It's a Fine World," by Robert Lynd; "Vulgarity in Literature." by Aldous Hurley; "England's Crisis," by André Siegfried (a friendly and penetrating indictment); "A Treasury of English Aphorisms," by Logan Pearsall Smith; "Out of Soundings," by H. M. Tomlinson; "Conversations with a Cat and Others," by Hilaire Belloc; "A Cousideration of Thackersy," by George Saintsury (a valuable re-view by our veteran critic), "Essays of a Catholic," by Hilaire Belloc; "Music at Night," by Aldous Hurley; "Visibility Good," by E. V. Lucas; "Countries of the Mind," by J. Middleton Murry.

FICTION.

"On Forsyte Change," by John Galsworthy, who is reported to have another family Saga in preparation; "The Fool of the Family," by Margaret Kennedy; "Grand Hotel," by Vicki Baum; "Cakes and Ale," by Somerset Maugham; "Imperial Palace," by Arnold Bennett, his last story; "The Man who Died," by D. H. Lawrence, completed just before his death; "But not for Love," by B. K. Seymour; "Mackerel Sky," by Helen Ashton; "Philippa," by Anne D. Sedgwick; "The Diarye of a Provincial Lady," by E. M. Delafield; "Certain People," short stories by Edith Wharton; "Bitter Tea," by Grace Z. Stone; "The Deepening Stream," by Dorothy Canfield; "A Woman on her Way," by J. Van Druten; "Hamenco," by Lady Eleanor Smith; "The Winding Lane," by Sir Percy Gibbs; "Hunger and Love," by Lionel Britton; "Tobit Transplanted," by Stella Benson; "Richer Dust," by Storm Jameson, completing the Hansyke trilogy; "Susan Spray," by Shella Kaye Smith; "Juan in America," by Eric Linklater; "Father," by the author of "Elizabeth and her German Garden"; "The Loving Spirit," a promising first novel by Daphne du Maurier; "The Career of Julian Stanley Williams," by Adrian Alington, a fine achievement; "Red Like Crimson," by Jaue Paradine; "The Phoenix-Kind," by Peter Quennell, "Broom Stages," by Clemence Dane; "Star Dust," by D. L Murray; "All Passion Spent," by V. Sackville-West; "The Grasshoppiers Come, by David Garnett: "Challenge to Clarissa," by Frank Dihot; "Judrith Paris," by Hugh Walpole (Rogue Herries' daughter); "Early Closing," by Miss D. Wynne Willson, an excellent first novel of school life; "So. San Pedro. A Tale of the Sea," by James Cozzens; "Return I dare not," by Margaret Kennedy; "Mad Puppetstown," by M. Farrell; "Month of May," by Jane Dashwood, "Surging Tide," by F. H. Dorset; "And Now Good-bye," by James Hilton; "The Blanket of the Dark," by John Buchan; "Aphrodite in Aulis," by George Moone.

CRIME STOKIES.

"Plain Murder." by C. S. Koroster: "Green

CRIME STORIES.

"Plain Murder," by C. S Forester; "Green Lane," by Alec Brown; "Murder at Fenwold," by C. Bush; "Murder of Judge Macfarlane," by Mary Plum; "The Second Shot," by Anthony Berkeley; "Murder at the Pageant," by V. L. Whitechurch; "The Box Hill Murder," by J. S. Fletcher; "The Bill Street Murder," by Syduey Fowler; "Persons Unknown," by Hallewell Sutcliffe; "Who Goes Home," by A. P. Nichol-

son; "The Hanging Woman," by John Rhode; "The Sands of Windee," by A. W. Uffield; "The Yellow Viper," by S. Fairway; Mr. H. D. Thompson has produced in "Masters of Mystery" a comprehensive guide to the best "Thrillers."

HISTORY.

HISTORY.

"Liason 1914," by Brig.-Gen. Spears; "Turning Points of History," by the late Lord Burkenhead; "Loyalties. Mesopotamia 2914-27," by Sir Arnold Wilson, "The Jameson Raid," by Hugh M. Hole: "Brigland in the Nueteenth Ceutury," by A. P. Fremantle (the second volume, 1806-10); "Survey of Lutenational Affairs, 2929," by A. J. Toynbee; "An Economic Hutory of Australia," by Edward Shann; "Official History of the Great War" (Egypt and Palestine, Vol. II); "By Guess and by God," by William Guy Carr (Submarine War Adventure); "The Suffragette Movement," By Sylvia Pankhurst; "A History of Europe 1875-293," by Sir John Marriot; "Mesopotamia 1917-20," by Sir Arnold Wilson; "Official History of the War," Naval operations, Vol. 5, by Sin H Nowbolt; "King, Queen, Jack," by Milton Waldman; "At G.H.Q," by Brig.-Gen. John Charteris; "The Endless Adventure," Vol. 2, by F. S. Oliver; "Advance from Mons," by Bloem, from the German side, "Missing," by Bruce Blackwood. Blackwood.

MISCELLANEOUS

"Thy Servant a Dog," edited by Rudyard Kipling; "Flynng," by Claude Grahame-White; "Archie and Mehitabel," by Don Marquis; "Some Bookhuning Adventures," by E. S. Garnett; diverting tales and humorous character studies by a bibliophile; "The Anatomy of Bibliomania," by Holbrooke Jackson; "Seventy Fathoms Deep," by Scott, record of the work of the Artable. the Artiglio.

POETRY AND DRAMA.

"The Poems and Verses of John Keats," edited by J. Middleton Murry, "The Winding Stair," by W. B. Yeats; "Poems of Edmund Blunden"; "The Signature of Pain and other Poems," Nalan Porter; "The Torch Beaters, Vol. III. The Last Voyage," by Affied Noyes, "The Apple Cart," by Bernard Shaw, with a very Shavian preface; "Last Poems," by John Freeman; "Ploughed Eatth," by C. C. Abbott, "New Poems," by A. E. (G. W. Russell); "Verses," by Elizabeth Daryush; "Poems of Wilfred Owen," edited by Edmund Blunden, "Post Mortem," by Noel Cowand, a war inquest; "The Caedas," by Aldous Huxley, "Poems 1935-30," by Robert Graves; "A Collection of Poems (witten between the ages of 14 and 17)," by Joan Easdale; "Shorter Poems," by Robert Bridges; "The Heart's Unreason," by Edward Davison; "The Heart's Unreason," by Edward Davison; "The Slot A Study," by T. McGreevy Mi Williamson says Elnot must". "we be reckoned with as a force instead of being defended as a fad." a force instead of being defended as a fad.

POLITICS AND ECONOMICS.

"A Searchlight on America," by J. Truslove Adams; "Dawn in India," by Sir Francis Yong-husband; "The New Survey of London Life and Labour, Vol. I. Forty Years of Change"; "Ac-count Rendered 1900-1930," by Sir Ernest Benn; "A Treatise on Money," by J. M. Keynes; "Democracy on Trial," by Lord Eustace Percy; "Hitler," by Wyndham Lewis; "South Africa,"

by Jan Hofmeyer, dealing with the Colour problem; "The Terror in Europe," by H. H. Tiltman; "India Insistent," by Sir Harcourt Butler.

SCIENCE AND PHILOSOPHY.

SCIENCE AND PHILOSOPHY.

"Man and his Universe," by J. Langdon
Davies: "The Biological Basis of Human
Nature," by H. S. Jennings; "The Philosophy
of the Good Life," by Dr. Gore; "Social Control
of the Mentally Deficient," by Pr. Stanly Davies;
"The Conquest of Happiness," by Bertrand
Ruasel; "Instinct and Intuition," by G. B
Diblee; "The Mysterious Universe," by Sir
James Jeans; "The Faith of a Moralist," by
Professor Taylor; "Climate," by W. G. Kendren;
"The Science of Life," by H. G. Wells, Julian
Ruxley and G. P. Wells; "New Discoveries
Relating to the Antioutvof Man," by Sir Arthur Huxley and G. P. Wells; "New Discoveries Relating to the Antiquity of Man," by Sin Arthur Keth; "The Stars in their Courses," by Sir James Jeans; Everybody's Business," by Hartley Withers; economies of to-day; "The Scientific Ontlook," by Bertrand Russell; "Grades of Significance," by G. N. M. Tyrell (Psychic Research); "Mind and Matter," by G. P. Stout; "The Philosophical Basis of Biology," by J. S. Haldane.
The Centenary Meeting in London, at the end September, of the Bittish Association for the

of September, of the British Association for the advancement of Science, has stimulated interest

in the works of our leading Scientists of which the principal booksellers arranged special displays.

SPORT, TRAVEL, TOPOGRAPHY.

"Fy Fishing," by Viscount Grey (enlarged edition); "A Year on the Great Barrier Reef," by Dr. C. Yonge; "The Kanchenjunga Adventure," by F. S. Smythe; "Survey of Loudon," Vol. XIII (Westminster and Whitehall); "The Andree Diarles," translation by E. Adams Ray; "Africa View," by Prof. Julian Huxley; "Green Hell," by Julian Duguid; "Impacts," by Douglas Goldring; Oxfordshire," by Earl of Mayo, S. D. Adshead and P. Abercromble; "London Memories," by St. John Adcock; "Jungles Preferred," by Janet Miller; "Jungle Ways," by W. B. Seabrook. by W. B. Seabrook.

THEOLOGICAL.

"Science and Religion," a symposium by various churchmen and scientists; "The Prospects of Humanism," by Lawrence Hyde; "The Nature of Belief," by M. C. D'Arcy; "The Foundations of Bible History," by John Gartang. In the year ending last March, the British and Foreign Bible Society distributed 11,888,226 copies of the Scriptures, in 27,000 packages weighing 490 tons, at a cost of over £400,000.

THE NOBEL PRIZES.

THE Nobel Prizes are awarded from the income of a fund bequeathed to trustees by the Swedish scientist Alfred Nobel, the inventor of dynamite, who died December 10, 1866, leaving a fortune of about £1.750,coo. The first awards were Astrobuted on the fifth ammorrary of Nobel's death, Dec. 20, 1901 (for awards before those recorded below see former issues of WHITAKER). The awarding authorities are lars concerning cond the Swedish Academy of Science—(a) Physics, (b) Chemistry; the Stockholm Faculty of Stockholm, Sweden.

Medicine—(c) Medicine or Physiology; the Swedish Academy of Literature—(d) Litera-ture; and a commutee of five persons elected by the Norwegian Storthing—(e) Peace. The fund is managed by a Board of Directors elected by fifteen deputies appointed by the authorities above named The Swedish Government appoints a President of the Board of Directors. Particulars concerning conditions, &c., can be obtained from Nobelstiftelsens Styrelse, Sturegatan 14.

LIST OF AWARDS (Value, 1931, Kroner 173,206).

Yeur	(a) Physics	(b) Chemistry.	(c) MIDICINE OF PHYSIOLOGY	(d) LITERATURE	(e) Prace.
1920	Ch. E. Guillaume	W. Nernst	A. Krogh	Knut Hamsun	Léon Bourgeois.
1921	Albert Einstein	F. Soddy	No award	Anatole France	K. H. Brauting. Chr. L. Lange
1922	Niels Bohr	F. W. Aston	A. V. Hill O. Meyethof	J. Benavente	F. Nansen.
1923	R A. Millikan	F Pregl	(F. G. Banting J. J. R. Macleod)	W. B. Yeates	No award
1924	K.M.G Siegbahn	No award	W. Einthoven	W. Reymont	No award.
192 5	{J. Franck G. Hertz	R. Zsigmondy	No award	G B. Shaw	(A. Chamberlain, G. Dawes.

THE Exhibition of Persian Art, which was opened at Burlington House on January 7, was an experiment of which many doubted the wisdom. Of its purely artistic interest, of its attraction to those capable of appreciating the work of the great designers and craftsmen of the East there was no question. The only doubt was whether it would appeal to the public at large, and any fears on this score were dispersed during the first week of the exhibition. The attendance was extraordinary, and was maintained until the last day of the season, during which agg, oc-visitors paid for admission. This number, though it did not approach the attendance of the phenomenal Italian Exhibition of 1930, easily excelled those of the Flemish and Dutch Exhibitions of 1928 and 1929, both of which were regarded as successful. The Persian Exhibition was the only one of a remarkable series in which was the only one of a remarkant series in which pictures were not the predominant features. There were Persian paintings of beauty, but they were outshone by the magnificence of the carpets, to which were given most of the wall space in six or seven of the galleries. Ancient pottery and goldsmith's work were also well represented.

For the Summer Exhibition of the Royal Academy, which succeeded the Persian Exhibition at Burlington House, 10,902 works were submitted by outsiders to the judgment of the submitted by outsiders to the judgment of the Selecting Committee, by which 8,403 were rejected, 3,497 were made doubtful, and only two accepted outright The Selecting Committee was composed of the President (Sin William Llewellyn), Mr. Augustus John, Mr. Lee, Mr. Kelly, Sir W. Goscombe John, Sir G. G. Seott, Mr. Munnings, Mr. Russell, Mr Dodd, Mr. Turner, Sir E Cooper, and Mr. Rusbury. The Committee of Arrangement for oil numbers Committee of Arrangement for oil paintings consisted of Mr. Lee, Mr. Kelly, Mr. Munnings, Mr. Bussell and Mr. Dodd. The arrangement of the watercolours, drawings in black and white, and minutures, was undertaken by Mr. Dodd and Mr. Rushbury; the architecture by Sir G. G. Scott, and the sculpture by Sir W. Goscombe

Scott, and the sculpture by Sir W. Goscombe John.

The principal works sold at the exhibition were: "A Road above the Valley" (£125), by Sir H Hughes Stanton; "Seen in the Mirror" (£250), and "Girl Combing her Hair" (£125), by Mr. Harold Knight; "East Angha" (£125), and "Early Spring in the Wye Valley" (£125), by Mr. Bertram Priestman; "Cupid's Mirror" (£130), by Mr. W. G. de Glehn; "The Hostess of the White Horse" (£130), by Mr. I. Campbell Taylor; "The Darlings" (£250), by Mr. John Wheatley; "Cows in the Rickyard" (£120), by Mr. James Bateman; "Amiens" (£120), by Mr. Terrick Williams; "Nancledra. Old Cornish Village" (£160), and "Spring Evening; the Deveron, Rothieuns, Aberdeenshire" (£1350), by Mr. S. J. Lamorna Birch; "Artenis and Chione" (£260), and "Ladies and Gipsies" (£1350), by Mr. Russell Flint; "Delphiniums by the Lake" (£130), by Mr. Melton Fisher; "The Convex Mirror" (£1200), by Mr. John Colher; "The Landord of the Chequers" (£1350), by Mr. Stanhope A. Forbes; "Composition in Pink and Green (£200), and "Live Stock" (£260), by Mr. Stanhope A. Forbes; "Composition in Pink and Green (£200), and "Jane Posing" (£200), and "The Paddock, Epsom" (£200), by Mr. Alfred J. Munnings; "Autumn by the River (£200), by Mr. Reginald G. Brundrit; "A

Blonds Woman "(£175), by Dod Procter: "The Footstep" (£175), by Mr. T. C. Gotch; "Chateau Galllard" (£175 ros.), by Mr. Alfred Hayward; "Loch Grogach" (£186), by Mr. Osmund Pittman; "Through the Goblin Wood" (£180), by man; "Through the Goblin Wood" (£150), by Mr. Noel L. Nisbet; "The Maiden" (£250), by Mr. Noel L. Nisbet; "The Maiden" (£250), by Dame Laura Knight; "A Victorian Richmond Hill" (£150), by Mr. William T. Wood; and "Artemis—statuette, carved wood" (£160), by Alec Miller. Pictures marked sold, but unpriced, included "Soft the sunight in Derby Dale;" by Sir David Murray; "The Estuary—gathering clouds," by Mr. Arnesby Brown; "Jane XXXI," by Mr. Gerald Kelly; and "In my Garden," by Joseph Farquiarson.
Only one work from the exhibition was bought

Only one work from the exhibition was bought for the Chantrey collection, "The Birth of Venus—three-quarter figure, Portland stone" (£1,000), by Mr. William McMillan. From other (£1,000), by Mr. William McMillan. From other sources were acquired "Spring Days" (£300), by Mr. Henry Tonks; "The Green Dress" (£325), and "Old Battersea Bridge" (£126), both by Walter Greaves; and a watercolour, "St. Paul's "(£25), by Mr. Henry Rushbury. Several exhibitions of great interest were held in the deviation that the serious hearts."

in aid of various charities the principal of which in an of various charloss the principal of which was organised by Sir Philip Sassoon, and illustrated the period of "The Four Georges." It included by chance, the first and last portraits painted by Gainsborough; and many other fine works by that master, and by Reynolds, Raeburn, Romney, Lawrence, Horpner, Cotes, and Canaletto. This exhibition was in aid of the Royal Northern Hospital; and another, almost Royal Northern Hospital; and another, almost as important, held by Messrs Knoedler in Old Bond Street, was for the benefit of the Cheyne Hospital for Children. This was composed of English Eighteenth Century portaints of Children, among which were Lawrence's famous "Master Lambton"; Romney's group "The Leveson-Gower Children"; and one of the finest achievements of Gainsborough, "The Cottage Girl with Poor and Pitcher" Girl with Dog and Pitcher.'

Messrs. Agnew made a new departure at their annual exhibition of watercolours by showing the work of Turner and Girtin in the same room with that of some of the more advanced members of the modern school. At the Leicester Galleries the most important exhibition was of work by Rodin, to the catalogue of which Mr. Bernard Shaw contributed an amusing introductory note. Other exhibitions of sculptor's work at the same gallery were those of Mr. Epstein and Mr Henry Moore; and of paintings and drawings by Camille Pissarro, Steinlen, and Mr. Richard Sickert. Paintings and water-colours by the late Mrs. Evelyn Cheston were shown in the gallery of the Royal Society of Painters in Water Colours, of the Royal Society of Painters in Water Colours, Pall Mall East; and pictures by the late H. H. Lathangue, R. A., at the rooms of the Fine Art Society in New Bond Street, where a fine collection of etchings and engravings by Durer, Rembrandt and other Old Masters was on view in July and August Drawings of Spanish scenery by Mr. Muirhead Bone, of sportling prints is colours, and of painting, by Old Masters, were the subjects of three exhibitions at Messrs. Coinaghi's; and work by Mr. Michael Rothenstein at the Warron Gallery, Maddox Street. Examples of Indian art formed the Summer Exhibition at the Burlington Fine Art Club. At hibition at the Burlington Fine Art Club. At Messrs Knoedler's, Mr J. Davidson showed a number of busts of contemporary men of letters, and at the Goupil Gallery collections were on yiew of works by Sir William Rothenstein and the late Walter Greaves. At Messrs. Tooth's

in New Bond Street was shown a landscape by Gainsborough, painted for the Prince of Wales in 1784, which had been lost to sight for seventy

years.

In the auction room the year was a dull one, and there were no dispersions of collections of works there were no dispersions of collections of works of art of the first rank. At Christie's, the pictures sold included a portrait by Sir Joshua Reynolds of the Hon. John Tufton, £1,995; two by Raeburn, £1,573 and £1,260; and three by Romney, of Lord Aucram, £1,732; of Lady Wilhelmina Emilia Kerr, £4,630; and of Richard Meyler when a child, £6,845. At Sothely's one of the most important items sold other the form of the control of the contr was the famous Italian renaissance pendant known as "The Canning Jewel," and attributed to Benvenuto Cellini, and the property of the Earl of Harewood. There was only one bid for the pendant, of £10,000, at which the hammer fell. At the interesting sale of the Pepys collec-tion, of portraits silver, and relics of all kinds which had belonged to the famous darist, his portrait by Sir Godfrey Kueller, a half length,

realised £1,750. At the dispersal of the late Arthur Severn's collection, which included many relics and former possessions of Ruskin, Turner's watercolour sketching box, and the china palette last used by him, were among the lots disposed of. The palette was given to Ruskin by Mrs. Booth, in whose house at Chelsea Turner died.

Very few new pictures were placed on view at the National Gallery. The principal were "Judith and Holofernes," by Giovanni Liss, "Judith and Holofernes, by Grovanin Line, presented by Mr. J. W. Dollar; a still-life study by the Dutch artist, J. J. Treck, "Pewter, China and Glass"; and a "Portrait of a Lady," by Terburg, bequeathed by Sir Otto Beit. The by Terburg, bequenthed by Sir Otto Beit. The chief acquisition at the Victoria and Albert Museum was the Howard Grace Cup, long in the Museum was the Howard Grace Cup, long in the possession of the Howard family and sold in May for £12,000 by the Duke of Norfolk. It was purchased by Lord Wakefield, who presented it to the Museum. At the National Gallery, Millbank, the year was marked by an excellent exhibition, held in the summer, of the earlier paintings in oil by Turner.

THE YEAR'S MUSIC.

OPERA.

Although the long-established Carl Rosa Company did not find it expedient to give the company the found in the content of while the performances have long yielded "value Incidentally, the company is a for money." national musical asset.

Covent Garden commenced its season with the usual German works, and, if no representa-tion actually rose to the heights, the ensemble frequently afforded satisfaction to captious listeners. Easily-pleased and ignorant musiccritics often found everything perfect:—those who occasionally ventured to instruct the singers who occasionally venture to instruct the singers (by pointing out supposed limitations) cut an equally poor figure. Some considered the seenery madequate, though it satusfied their betters, others belittled the orchestra—and without cause. Meanwhile, the German season without cause. Academine, the definition season (a lengthy one) always filled the house; appliance was unstituted; the manager and his satellites beamed. So what else matters?

peamen. So what else matters?

The Italian programme included the production of Romani's "Fedra" and the revival'of Verdi's "La Forza del Destino," an opera which had its first performance in St. Petershurg sixty-nine long years ago. The musical structure of the Verdi work resembles that of "Un Ballo in Maschera," and, if the plot is of the old-time, uninteresting variety, the music contains plenty of (what singers term) "fat," the barritone air being a notable instance. Ponselle, as the ill-starred heroine, enhanced her reputaas the ill-starred heroine, enhanced her reputation; Franci, as Carlo, often thrilled one with the power and fine quality of his voice; Pertile, who did not sing in the best Italian style, forced most upper notes, and with the usual immentable result. It must, however, be admitted that in the effective duet, "Solenne in quest' ors," he reframed from bellowing each A natural. Italy has acclaimed Pertile as "Caruso's legitimate successor"; his musical compatriots also have rashly dubbed him "a second Tamagno." He is neither.

"Fedra" cannot possibly become a success.

Despite occasional snatches of melody, the opera makes little appeal; indeed, one is relieved to find that Romani has confined his enterprise to a couple of short acts. The role of Kedra is unsuited to Ponselle's art, though irrepressible representatives of the American colony in London, foolishly anticipating something different, caused an enormous floral wreath to different, caused an enormous norm wream to be handed across the footlights at the close of the initial performance. Formichl, as Teseo, was quite wasted on so insignificant a part; Cortis, as Ippolito, was ludicrously stiff in his acting, though he sang more or less acceptably. It would be illuminating to know why the

It would be illuminating to know why the management should have ridden for a fall? The outstanding feature of the "Gianni Schicchi" performances was the excellent singing and acting of Badini, who, in buffo parts, certainly has no superior—perhaps no equal. Heddle Nash, as Rinnuccio, displayed a voice of pleasant quality, but with the usual (and fatal) suggestion of British throatness; he would do well to grow out of it and outside. well to grow out of it, and quickly. "Rigo-letto," now eighty years old, "La Bohème," "Tosca," "La Traviata," and other things which please where novelties fail (and serve them right) were included in the repertoire. Each was adequately cast.

The dignity of Covent Garden has been sadly imperilled by a collection of inferior caricatures, representing men and women mostly of very little account. These unsightly pictures are permitted to disfigure the walls of the principal

staircase. An eyesore.

Chaliapin, at the Lyceum, quickly outlived the bad impression which he made at Covent darden a year or so ago, when, as Mephis-topheles in "Faust," this daring Russian took liberties with both the music and the character. His tone, as in the past, again use alive with emotional colouring; the manner in which he entered into the skin of a role might well have been envied by all singers; he—legitimately—focussed upon himself the attention of everyone in the house. Amongst the works given were "Prince Igor," "Boris Godounov," "Sadko," which failed to please everybody, "Roussalka," and the last act of Massenet's disappointing "Don Quichotte"—with Chaliapin as the demented knight. Various ballets were included in the scheme, the worst of them being "Pet-

in the scheme, the worst of them being "Petruska," a very poor thing.

Opera has been heard elsewhere. Martin
Shaw's "The Thorn of Avalon," in which the
composer wisely refrains from mintating other
musicians, was produced at the Crystal Palace,
Purcell's "Dido and Æneas" had the attention
of the Trinity College Operatic Class at the New
Scala: the Royal Academy of Music pupils tried
conclusions with "Suor Angelica" and scenes
from "Roméo et Juliette," and with the usual
results. Other academical institutions also have
thought it advisable to exploit the lyric drama.
So very bold of them.

INSTRUMENTALISTS

Renata Borgatti is amongst the several planists who, new to London, impressed themselves on the copnosecut. The artist's rate musical insight, to which she joins perfect technique, made her interpretations of Vivaldi, Scriabin, Prokoflev and Schumann memorable. Tovey, who has long been identified with musical life in London, afforded less satisfaction: the strange trick which he played with triplets was more original than correct At one of his recitals the planist was heard in Beethoven's Variations on Rightmi's "Vient Amore," a composition which takes up nearly half an hour of the listener's time. Reducing the length of a classic may be a hethous offence; but, with all respect to Beethoven and to a musician of Tovey's standing, one can have too much of a good thing, especially on a warm June afternoon For the programme also included the Variations in C mnor, the six Bagatelles and the E flat, F major and C minor Sonatas The many variations, in fact, blunded the appetite of all except Beethoven's most devoted admirers. Schnabel essily filled the Queen's Hall, and if more could have been made of the Schumann Concerto, the planist's efforts did not lack applause—which so often is bestowed in wrong directions. Mozart's (little known) C major Concerto met with the same fate, though Schnabel's treatment of the Rondo gave pleasure. In justice to so eminent a pianist, it must be pointed out that he may have been handicapped by the instrument allotted to his use. There are pianos—and planos.

The violinists were headed by Kreisler, who, amongst other things, played Lalo's somewhat hackneyed and unequal "Symphonic Espagnole," and with much of his old form. Helfetz, in the rather unnecessary arrangement of Debusay's "L'Après-Midi d'un Faune," Buch's "Scottish Fantasia," the ever-welcome Bach "Aria" and Ravel's "Tzigane," displayed his accustomed technical mastery Fachiri and d'Aranyi joined forces in a recital for two violus Dushkin gave so fine a performance of Tartin's difficult "Trillo del Diavolo," that a young reporter, with Harmsworth leanings, drew a flattering comparison between the violinist in question and Paganini, writing as though Paganini, who died ninety-one year's ago, and Dushkin were contemporaries. A little knowledge is particularly dangerous where music is concerned.

nany dangerous where music is concerned.

Notable, too, was the appearance of Viola
Mitchell, a newcomer from America, her tone
being powerful and distinctly appealing. Lisa
Simpson, a Royal Academy of Music pupil,
made an excellent impression; her future, so
far as really admirable playing is concerned,
seems assured. Many other violinists also were

heard, several of whom, if extremely venturesome, lacked that complete equipment which is so necessary to success. While pleasing easilysatisfied and, therefore, ignorant listeners, they should have remembered the "chief amang ye takin" notes," that hugbear of many a performer. Truly an inconvenient presence; even an unnecessary one.

Organ recitals abounded, the most recondite suburbs having been favoured. In some cases, however, organists failed to make effective use of the stops; not were the compositions which they played always of interest. The year's music also has included the successful appearance of various 'cellists, while Segovia's guitar recital, which held a special interest for those who understand this instrument, drew many sympathetic amateurs to Wigmore Hall No double has players figured as soloists; consequently, none can tell if a second Bottesini has anisen.

SINGERS

Vocal recitals have been even more numerous than in former years, amongst the most notable being Saia Fischer's concert For this particularly well-versed artist has everything that a singer can desire, added to which she brought with her an enviable reputation from the Paris Opéra Comique. Emmi Leisner, though in-clined to make unnecessary use of the portamento, accomplished much in Brahms and Schubert Roland Hayer's voice apparently has lost its former beauty of tone; still, he knows how to construct an interpretation, a knows now to consente an interpretation, a point which is greatly in his favour 'Olive Rubens is greatly to be commended for disintering "When I am Laid in Earth"; Bernard Friedman successfully tried concussions with Schubert's "Promethens"; Gwenydd Gatrell, in "Care Selve" and "L'Amero," exhibited a pure tone; Jan Glennie pioved himself to he a singer of distinction Lissie de Rosen's to lea singer of distriction Lissie de Rowens happy thought in reviving Montevorde's "Lasciatemi morire" gratified her audience; Ritter-Ciampi sang "Ah' Lo so' as Mozart should be sung, though she occasionally phrased oddly; Elizabeth Schumann's breath-control, on the other hand, was a model Eleanor Toye's choice lighted upon the lutenist songs of Attey, Campion and others.

Amongst the younger artists special attention must be drawn to Lesley Dudley, who, as may be expected of a Herbert Oliver pupil, is a singer of very considerable ment. A well-placed voice and musical feeling are noticeable in her equipment.

SUNDRY MATTERS.

"Hiawatha" and "The Dream of Gerontius," from which there is no escaping, were given in London and in the provinces; Vaughan Williams' "Sea Symphony" and other compositions by this industrious worker have been performed in towns both near and far. Brahms' "Requiem" had the attention of the St Paul's School Choir, and with grafifying results; Cheltenham kept up its reputation with suitable programmes; Eton and Wellington did likewise. The London Promenale Concerts achieved their usual orchestral success; Hull, Fournemouth, Manchester and so forth catered for the provincials.

Francis Toye, Goossens, Holst and McEwen have faced criticism with the fruit of their learning and musicianship.

The Lordon Stage.—Definite steps to meet the are the lawrence Hanray and Meedames North by the theatre during regs. Several of the more enterprising managers evolved new methods of the first the most important production and lighting, the most important version by W. A. Darlington (Messrs. Nicholas innovation being the development of the reinnovation being the evertophien of the involving stage, enabling speedy changes of scene and big sets. In one successful play, Late Night Frinal, which came from America, four distinct scenes were built up and shown at the same time, a novelty which went some way towards rivalling the rapid transformation on the film. The most ambitious use of these new methods was made at ampitions use of these new methods was made at the Colliseum, which, abandoning variety, scored a great success with a German musical play, White Horse Inn. For once, Mr. Noel Coward did not occupy the leading position among dramatists, although his Cavaleade, a remarkable series of pictures of the chief events of the past thirty-two years, with but little dramatic value, but a notable patriotic appeal, promised to fill Drury Laue for many months. Chief honours fell to Mr. John Van Druten, with three arresting plays—After All, London Wall and There's Always Juliet—in each of which he displayed a real sense of the theatre and a gift for natural dialogue. sense or one meanre and agint for natural dislogue. The Barretts of Wimpole Street, by Mr. Rudolf Besier, ran throughout the year, and The Improper Duchess, by Mr. James B. Fagan, produced in January, looked like achieving an anniversary. Mr. Edward Knoblock had a dual success, as adapter of Vicki Baum's novel Grand Mr. J. B. Priestley, of The Good Companions. A new woman dramatist was "C. L. Anthony," whose Autumn Crocus captured the public fancy, whole Mr. Ashley Duke's Elizabeth of England and The Midshipmand by Ian Hay and Stephen King-Hall were two other notable successes of the year.

The following is a list of productions between Nov. z, 1930, and Oct. 31, 1931 :-

ADELPHI, 421 Strand, W.C. a.—(1930) Dec. 3.

Roer Green, Mr. C. B. Cochran's musical show, by Benn W. Levy, music by Richard Bodgers (Messrs. Sonnie Hale, Leon Morton and Albert Burdon and Mesdames Jesse Matthews, Jean Cadell and Joyce Barbour). (1931) Sept. 3.

Grand Hotel, adapted by Edward Knoblock from Vicki Baum (Messrs. Lyn Harding, Ernest Milton, Hugh Williams and Ivor Barnard and Mesdames Ursuls Jesus and Elens Miremovel. Meadames Ursula Jeans and Elena Miramova).

ALDWYCH, Aldwych, W.C. z .- (1930) Nov 24. ALDWYCH, AIGWYCH, W.C. S.—(1930) NOV 24, Marry the Girl, by George Arthurs and Arthur Miller (Messrs. Ralph Lynn, Tom Walls and J. Robertson Hare and Mesdames Mary Brough and Winifred Shotter). (1931) May S. Turkey Time, by Ben Travers (Messrs. Ralph Lynn, Tom Walls Shotter, Mary Brough and Ethel Coleridge).

ALHAMBRA, 23 Charing Cross Road, W.C. 2.— (1931) June 3. The Desert Song, musical play, revived (Messra Alec Fraser, John E Coyle and revived (Measra, AICC Fraser, John E Coyle and Dennis Hooy and Mesdames Sylvia Welling and Elsa Palmer). Aug. 17. Waltzes from Vienna, operetta with Strauss music (Messra. Dennis Noble, Bobert Holliday and Davy Burnsby and Miss Marie Burko.

AMBASADORS, West Street, Cambridge Circus,
W.C. 2.—(1230) Dec. 17. To See Ourselves, by
E. M. (Delafield (Messrs. Nicholas Hannen and
Maurice Reass and Messlames Hards Vanne and
Maurice Reass and Messlames Hards Vanne and
Helen Spencer). (1231) May 11. The Hairy

First Play, Bernard Shaw s play, revived (Messrs.

Ashcrott and Joan White). June 22. Not, by André Obey (La Compagnie des Quinze from the Théatre du Vieux-Colombler, Paris). July 9. Mrs. Fuscher's War, adapted by Joan Temple and Henrietta Leslie from the latter's novel (Messrs. Tristan Rawson, Louis Hayward and Neville Brook and Mesdames Joan Temple and Gladys Brook and Alesdames Joan Pemple and Change Tudor). Oct. 6. The Queen's Husband, by Robert E. Sherwood (Messrs, Barry Jones Maurice Colbourne and Reginald Bach and Mesdames Grace Lane and Barbara Wilcox

APOLLO, Shaftesbury Avenue, W. r.—(1930) Dec. 22. The Private Secretary, revived (Messrs. Charles Walenn, Barrie Livesey and Fewlass Llewellyn). (1931) Jan. 29. Bed Rock, by Eden Phillpotts, H. F. Maltby and Macdonald Hastings (Messrs. Ivan Samson, B. F. Lewin and Stanley Drewitt and Mesdames Zillah Bateman Stanley Drewitt and Mesdames Ziliah Bateman and Rosalinde Fuller! April 7. The New Gusson, by George Shiels (Messrs. Barry Fitzgerald, Bydney Morgan and J. A. O'Rourke and Mesdames Sara Aligoud and Moya Nugent). Aug. 5. Queer Fush, by Will Scott (Messrs. D. A. Clarke-Smith, H. Arthur Hardy and Denys Blakelock and Miss Margaret Scudaniore). Oct. xs. There's Always Juliet, by John Van Druteu (Messrs. Herbert Marshall and Cyril Raymond and Mesdames Fats Bat and Mary Willer). dames Edna Best and May Whitty).

CAMBRIDGE, Cambridge Circus, W.C. 2 .- (1931) Feb. 5. Kong, by Harold Kingsley (Messrs. Oscar Asche, Lyn Harding, Godfrey Tearle and Geoffrey Davis and Mesdames Ursula Jeans and Dorothy Black). March 20. New season of Nikita Balieff's Chauve-Sourie. June 2. The Nikita Balieirs Chause-Souris. June 2. The Sign of the Seven Diale, an "onnibus entertain-ment" (Messrs. Seymour Hicks, Billy Leonard and Ronald Frankau and Mesdames Betty Stockfield, Renee Gadd and Elizabeth Pollock). Sept. 30. Elizabeth of England, by Ferdinahd Bruckner, adapted from the German by Ashley Bruckner, adapted from the German by Asmey Dukes (Messrs. Matheson Lang, Leslie Perrins, A. Bromley-Davenport and Frank Vosper and Mesdames Phyllis Neilson-Terry and Margaretta Scott.

COLISEUM, St. Martin's Lane, W.C. z.—(1932) April, 8. White Horse Inn, adapted by Haus Mueller, with music by Ralph Benatzky and Robert Stolz (Messrs. Clifford Mollison, Jack Barty and George Gee and Mesdames Lea Seidl and Rita Page).

COMEDY, Panton Street, Haymarket, S.W. z.by Hen Travers (Messre, Raiph Lynn, Aoin Walls (1930) Dec. 4. Twelve Hours, by John Willard (Messre, Douglas Burbidge, Eric Maturin and Ethel Coleridge). Charles Carson and Mesdames Martita Hunt and Charies Carson and Mesdames Martita Hunt and Phyllis Thomas). (1931) Jan. 23. Hawk Island, by Howard Irving Young (Messrs. Henry Hewitt, Ivor Barnard and Hugh Williams and Miss Vers Lennox). March 12. Naughty Conderella, by Rene Peter and Henri Falk, adapted by Avery Hopwood (Messrs. Arthur Margetson, Reginald Gardiner and Albert Brouett and Mesdames Olga Vido and Venne Prasall) Lindo and Irene Russell).

Wilfrid Lawson, Gerald Lawrence and Charles Macdona and Mesdames Ann Trevor and Iris Baker). March 30. Mrs. Warren's Profession, revived (Mesars. George Bancroft and Wilfrid Lawson and Mesdames Miriam Lewes and Rosalinds Fuller).

Carrenton, ar8-as Piccadilly, W. 1.—(1930) Nov. 25. General John Regan, George A. Birmingham's farce, revived (Messra. Fred U'Donovan, Sydney Morgan, Percy Walsh and J. A. O'Rourke and Mesdames Joyce Chancellor and Helena Pickard). Dec. 23. A Pair of Troussers, by Frederick Jackson (Messrs. Ian Hunter, Ivo Dawson and Hayden Coffin and Mesdames Alice Delysia, Cicely Byrne, Violet Vanbrugh and Grizelda Hervey). (2931) Feb 2. After All, by John Van Druten (Messra. Aubrey Mather and Robert Douglas and Mesdames Lilian Braitiwatte, Madeleine Carroll and Murela Aked). Aug. 27. Those Naughty Nineties, by E. Savage Graham and Bonald Simpson (Messras. Maurce Evans and Lamont Dickson, Sir Nigel Playfair and Mesdames Thea Holme, Mary Jerrold and Helen Ferrers).

DALY'S, 2-6 Cranbourne Street, W.C. 1.—(1930)
Nov. 19. Little Tommy Tucker, musical comedy, by several authors, music by Vivian Ellis (Messrs. Melville Cooper, Dudley Rolph, Gene Gerrard and Leo Sheffield and Mesdames Ivy Tresmand, Rita |Page and Jane Welsh) (1932)
April 2. The Belle of New York, musical comedy, by C. W. McLellan and Gustave Kerker, levived (Messrs Bert Byrne, Johnny Schofield, Patrick Waddington and Norman Page and Mesdames Kathleen Burgis, Dorothy Ward and Lorna Hubbard). June 2. The Geseha, musical comedy by Owen Hall and Sidney Jones, revived (Messrs. Donald Mather and Leo Sheffield and Mesdames Rose Hignell and Lorna Hubbard). July 29. Floradon a, Owen Hall's musical comedy, revived (Messrs. George Graves, Geoffrey Davics, Char'es Stone and Dudley Rolph and Mesdames Dorothy Ward, Violet Code and Lorna Hubbard). Sept 29. A Country Girl, musical comedy, revived (Messrs. Dudley Rolph and Roy Mitchell and Mesdames Stephanie Stephens, Lorna Hubba dand Dotothy Ward.

DOMINION, Tottenham Court Road, W. r.— (1930) Dec. 24. Aladdm, pantomine (Messis Lupino Lane and Albert Darniey and Mesdames Ella Retford, Stella Browne and Nellie Wallace).

DRURY LANE, (atherine Street, W.C.s.—
(1931) Jan. 9 The Song of the Drum, by Fred
Thompson and Guy Rolton, music by Vivian
Ellis and Herman Finck (Messrs. Derek Oldhan,
Peter Haddon, Bobby Howes and Allan Jcayes
and Mesdames Helen Gilliland, Marie Burke and
Clarice Hardwicke). May 8. The Land of Smiles,
English version by Harry Graham of Victor
Leon's musical play, music by Franz Lehar
(Messrs. Richard Tauler, George Vollaire and
Bruce Winston and Mesdames Renee Bullard,
Hella Kurty and Lena Haliday). Oct. 3. Cavalcade, by Noel Coward (Messis. Fred Groves,
Edward Sinclair, Arthur Macrae and Eric Purveur and Mesdames Mary Clare, Una O'Connor,
Irene Browne and Alison Leggatt).

DUCHESS, Catherine Street, W.C. 2.—(1930)
Nov. 5. An Object of Virtue, by Edward Percy,
from the French (Messrs. C. V France, Horace
Hodges and George Curzon and Miss Jean
Forbes-Robertson). Dec. 16. Jane's Legacy, by
Eden Phillipotts (Messrs. Colin Keith-Johnston,

Frank Pettingell and Henry Caine and Mesdames Louise Hampton and Barbara Gott).

DUKE OF YORK'S, St. Martin's Lane, W.C. 2.—
(1931) Feb. 4. The Rocklitz, by "George R.
Freedy" (Messrs. Dennis Neilson: Terry, Lawrence
Anderson, Felix Aylmer and Norman V. Norman
and Mesdames Mary Glynne and Beatrice
Wilson) May 1. London Wall, by John Van
Druten (Messrs Frank Lawton, John Mills and

In a year when change and uncertainty were experienced in many departments of national life the progress of British broadcasting provided a reassuring record of development and achievement. The British Broadcasting Corporation, which took the place of the old British Broadwhich took the place of the old British Broad-casting Company, came into being on January 1, 1927, and at the close of 1921 it had thus com-pleted the first five years of its existence. Its fifth year fully maintained the standard and variety of the broadcast programmes, and a detailed survey of the year's work would touch life at almost every conceivable point.

The popularity of broadcasting was demonstrated once more by the increase in the number of wireless licences. In 1928, the year's increase was a33,218, in 1929, 328,344; in 1930, 455,174; and the first eight months of 1931 saw an increase of 438,192, thus making it certain that the full figures for the year would show a record increase. The actual number of licences in force on August 31, 1931, was 3,844,10s, including 25,428 free licences for the blind.

The financial position of the Corporation was reviewed during the year by the May Committee reviewed during the year by the May Committee on National Expenditure, which suggested a drastic revision of the scale on which licence receipts are shared by the B B.C., the Treasury and the Post Office. The Committee's proposals, which might have seriously impaired the quality of the programmes, were not adopted by the Government, but the B.B.C. made its own contribution to the general national retrenchment insurgrated in the authurn. It series do force inaugurated in the autumn. It agreed to forgo, out of its allotted proportion of licence revenue, a sum of £50,000 for the period up to March 31, 1932, and a sum of £150,000 for the following financial year. On the assumption of a continued increase in the number of licences, £,,000,000 of wireless licence receipts will be given to public funds during the year 1938-1993, while £x,250,000 will be actually devoted to Lr a leasting purposes.

GENERAL DEVELOPMENTS.

One of the year's developments which aroused considerable interest in I ondon was the com-pletion of Broadcasting House, the new B.B.C. headquarters in Portland Place. With nine floors and three basements, and twenty studios encased in a sound-proof central tower, Broad-casting House is a far more comprehensive building than the old headquatters at Savoy Hill, which were ingeniously adapted from a block of flats, a Turkish bath and a department store. Architecturally the new building has been compared to a battleship, and its curving structure presents a slightly bizarre but thoroughly modern appearance. The trans-ference of the B.B.C. to its new headquarters began in September.

As regards the actual programmes broadcast, a much more important development was the opening of the new high-power transmitting station near Slathwaite, Yorkshire, known as the North Regional Station. This was part of the B.B.C. regional scheme, which is designed to enable as many listeners as possible to obtain a service of alternative programmes. Instead of a service of alternative programmes. Instead of receiving one programme only from a local low-power relay station, the North of England listener can now choose between two wave-lengths which are used by the new station at Slaithwaite. One of them (479'2 metres) sends out the North Regional programme, which contains a fair proportion of material of local

interest, under the general direction of the B.B.C.'s Manchester station; and the other (30's metres) relays the National Programmer from Daventry. This dual service began in July, and constructional work on similar lines is in and constructional work on similar lines is in progress at Westerglen, near Falkirk, which will eventually provide an alternative programme service for as large an area of Scotland as it is possible to cover. The introduction of the new Slatthwaite transmitter caused a reshuffle of the wave-lengths used in the provinces, the Midland Regional transmitter being given 395 metres and the Glasgow transmitter 3764 metres.

There is not much to report about the technical development of broadcasting itself. Television is still in its experimental stage, and those who are following its development have had the advantage of receiving frequent experimental transmissions by the Bail d process. These transmissions have been generally given from the Baird studios, but on August 19 a television programme of song and dance was transmitted for the first time from a B.B.C. studio. The date may have an historical value in the future.

Another useful invention which has made its debut during the year is the Blattnerphone, an instrument which records sound on a magnetic steel tape and can reproduce it either immediately or at any later time. An important broadcast item can thus be preserved for future use. The first occasion on which the Blattner-phone was publicly operated by the B.B.C. was in the second general news bulletin on Derby Day, when the running commentary on the Derby was reproduced exactly as broadcast at the time of the race.

HEARING THE WORLD.

However good and admirable the B.B.C. programmes may be, it is inevitable that the widest popular appeal is generally made by what are known as "outside broadcasts." This phrase covers the broadcasting of actual events, speeches and ceremonies, and the delivery of running commentaries on those events which cannot be broadcast; and it is through the medium of "outside broadcasts" that the listener is enabled to hear the world while sitting by his own fireside.

A prominent place among such items must be given to speeches by members of the Royal Family and leading figures of British national life. An opportunity of hearing His Majesty the King was provided in 1931 by the opening of the Ilford Hospital extension, and the Prince of Wales, whose speeches were broadcast from several dinners and ceremonies, was also heard from Buenos Aires in March, when his speech at the opening of the British Empire Exhibition was most successfully relayed across the Atlantic. A few weeks later, when he was to address a crowded Manchester meeting on the lessons of his South American tour, His Boyal Highness himself requested that his speech should be broadcast; and although his request was received only a short time before the meeting a trans-mission was at once arranged in the North

Regional programme.
Speeches by the Duke of Gloucester, Mr.
Ram ay MacDonald, Mr. Stanley Baldwin and
Mr. Lloyd George were relayed from various ceremonies during 1931, and a notable (if rather recondite) broadcast was that of General Smuta's presidential address to the British Association. The addresses of Lord Rutherford, Senatore Marconi and others were broadcast from the Faraday Commemorative Merting in the Queen's

Hall in September.

Two ceremonies which the B.B.C. relayed from abroad deserve special mention in this connection. One was the opening of the Vatican broadcasting station on February 22, when listeners in Great Britain and all over the world heard the voice of His Holiness the Pope; and the other was the funeral service for Maréchal Josses a Notre Dame, followed by M. Barthou's funeral oration

at the Invalides.

Listeners were also able to hear the Trooping the Colour ceremony on June 6, as well as the Aldershot and Southern Command Tattoos; while events on which running commentaries were relayed from the scene of action included were relayed from the scene of action included the opening of the new Shieldhall dock at Glasgow by the King and Queen, the launching of II.M.S. Leander, the Schneider Trophy race, the Royal Air Force Display at Hendon, the Grand National, the Derby and the St. Leger, the Kenther Derby (or American convenience) the Kentucky Derby (an American commentary), the Boat Race, the Wimbledon lawn-tennis championships, the T.T. motor and motor-cycle commponency, sec 1.1. motor and motor-cycle races, the fly-weight boxing championship of Great Britain, and a large number of Rugby and Association football matches, including the F.A. Cup Final. Unfortunately there is a good deal of doubt about the future of Association football broadcasts, for the Association football authorities have adopted the theory that running ties have adopted the theory that running commentaries are harmful to gate receipts During the summer they decided to place a ban on all commentaries, with the exception of the Cup Final, and this part of the broadcasting service is therefore in abeyance

Relays from theatres and opera houses provide another method of extending the broadcasting service outside the studio. relays in 1932 were too numerous to be men-tloned in detail, for in addition to many broad-casts from Covent Garden during the international season and the season of opera in English, there were also a large number of congusal, there were also a large number of operatic relays from provincial theatres during the tour of the Covent Gaiden Opera Company. Great interest was taken in the relays of "The Barber of Seville" and "The Secret Marriage" from the Salzburg Festival, and of "Tristan and Isolde" from Wagner's Festspielhaus in Bayreuth. This was the first occasion on which a Bayreuth performance had been broadcast, and it was well received in England. It was also broadcast throughout Europe and in the United

Although the regional programmes included a number of relays from local theatres and musichalls, there were very few theatre relays (apart from opera) in the National Programme during 1931. Excerpts from the Royal Command Performance at the Palladium, from "Little Tommer and Little Tucker" at Daly's Theatre, and from "Folly to be Wise" at the Piccadilly Theatre were successfully relayed, and it is to be hoped that more theatrical relays will be given in the future.

SPEECHES AND TALKS

Apart from those which were relayed from ontside ceremonies, the talks and speeches in the 1932 broadcasting programmes fell as usual into two main classes—the isolated speeches, many of which were arranged in groups or series, and the formal talks arranged in groups or series, and the formal talks arranged in groups or series, and the formal talks arranged in groups or series, and the formal talks arranged in groups or series, and the program of the p given either by a single lecturer or by a number

of different speakers. Among the isolated speeches the most important were those by Mr. Ramsay MacDonald and Mr. Philip Snowden, in connexion with the political and financial developments of the late summer and autumn. Mr. MacDonald's speech on August ss, in which he explained to the listening world his reasons for accepting the leadership of the National Government, was one of the most arresting speeches that have ever been made before a British microphone, and Mr Philip Snowden's explanation of the British suspension of the Gold Standard was also of the first importance Other notable addresses were those by Mr. Snowden

notable addresses were those by Mr. Showden on his two Rudgets and by party leaders during the General Election campaign
Among other isolated talks of the year should be mentioned those by Mr. J. H. Whitley on the report of the Royal Commission on Labour in India; Sir Josiah Stamp on "A Thousand Million Saving Certificates" (in which he stressed the threatener of seving, and attacked an the importance of sving, and attacked an opposite theory broadcast by Mr. J. M. Keynes a few weeks earlier); Mr. Bernard Shaw on Joan of Arc; Mr. Gordon Craig on the theatre: Sir Malcolm Campbell on his speed-record achievement at Daytona Beach, Mr. J. A. Mollison on his record flight from Australia to England; Sir his record flight from Australia to England; Sir Ian Hamilton and Mr. Compton Mackenzie on Gallipoli; Mr. W. S. Paley, President of the Columbia Broadcasting Company, on the present position of American broadcasting; Sir Oliver Lodge on "A Hundred Years of Science", Sir Landon Romald on Melba; and Senatore Marchese G. Marconi on "The Beginnings of Wireless." Oddly cnough, this was the first occasion on which Marconi had spoken into a

B B.C. microphone

The ordinary programme of talks covered a commendably wide field, ranging from the National Lectures, in which Sir Walter Morley Fletcher gave a fast insting address on "Biology and Statecraft," and Sir William Bragg discussed the achievements and influence of Faraday, to the fitvolous series of "Idle Thoughts," in which Mr. Dems Mackall, Lord Ponsonby, Iady Diana Cooperand others discoursed amiably on anything that came into their heads. Of the various sories which dealt with matters of national or interwhich dealt with matters or national or inter-national importance there were two which attracted particular attention—that on "The Problem of Unemployment," which concluded with statments of the Liberal, Labour and Con-servative attitudes by Mr. B. Seebohm Rowntree, Mr Heibert Morrison, and Mr. Stanley Baldwin, and that on "Russia in the Melting Pot," in which the speakers included Mi H. R. Knicker-bocker, Sir Bernard Pares, and Mr. H. G. Wells. Another political series was that on "The Effects anouner political series was that on "The Effects of Tariffs on Unemployment," in which Mr. Lloyd George, Mr William Grsham, and Mr. Neville Chamberlain took part, and in the autumn Mr. H G. Wells initiated an interesting symposium on "What I would do with the World."

World."
Subjects of topical importance were "Numbering the People," in which the Registrar-General and others gave a useful introduction to the taking of the Census, and "The Treasures of Persia," which coincided with the Persian Art Exhibition at Burlington House. The literary talks included Mr. J. C. Squire's brilliant series on "The Enjoyment of Literature," Mr. T. S. Eliot's study of Dryden, Mr. Bonamy Dobree's appreciation of Defoe, and Sir Henry Newbolt's

"The Progress of English Prose"; and among the other subjects discussed were India, British Mandates, Science in the Making, Chemistry in Industry, the Health of the Worker, Marriage Past and Present, World Finance, and the Pro-gress of English Music. In a series of talks and dialogues called "The World and Ourselves," listeners were given the opportunity of learning something about life in Finland, Sweden, Bulgaria, the Netherlands, Spain, and Czecho-slovakia; and the Sunday series included Mr. E. F. Carritt's "What is Beauty?" and Dr. C. H. Dodd's " History of the Bible.

The concluding months of the year saw the inauguration of a new scheme of talks programme in which the talks were designed to illustrate different aspects of one main subject—"The Changing World." The early speakers in this ambitious scheme, which was intended to cover amoritous scheme, which was intented to cover the whole of the winter, were Professor Arnold Plant "How Wealth has Increased," Mr. Harold Nicolson "The New Spirit in Literature," Pro-fessor H. Levy "What is Science?" Mr. Leonard Woolf "(an Democracy Survive?" and Professor

J. Dover Wilson "Learning to Live."

Although for six days of the week the majority of the broadcast talks attained a high level of seriousness there was some relaxation on Saturday nights The earlier Saturdays of the year provided instalments of a serial detective story, The earlier Saturdays of the year which proved to be rather poor entertainment, in spite of the efforts of Mr. E. C. Bentley, Mrs. Agatha Christe and others. A series of dia-logues on "The Ideal Holiday" was more enterand a great success was achieved by the talks on "Escape," in which escaped prisoners of war, both British and German, explained how they had outwitted their captors.

Poetry, which has perhaps been unduly neglected in the broadcast programmes, was represented by a series called "Mosaic," in which music and verse - reading were ingeniously blended; and in an Itish programme on Sep-tember 8 Mr. W. B. Yeats gave a recital of some

of his own poems.

of his own pocms.

The regular talks of the year included criticism of music (Mr. Ernest Newman), drama (Mr. James Agate), general literature (Mr. Desmond MacCarthy and Miss V. Sackville-West), fiction (Mr. Michael Sadleir, Mr. A. Duff Cooper and Miss Chemence Dane), and the cinema (Mr. Francis Birrell). In the earlier part of the year Mr. Harold Nicolson gave a weekly talk on topical events, and Mr. Vernon Bartlett continued, his invaluable weekly expositions of international affairs. affairs.

MUSIC.

It is unnecessary to refer in detail to the broadcast concerts, for the most important of these were given in public at the Queen's Hall, and they belong to the year's music rather than the year's broadcasting. The B.B.C. Symphony Orchestra is now acknowledged to be one of the Orchestia is now acknowledged to be one of the finest orchestras in Europe, and the regular broadcasts of Symphony and Promenade Concerts provided listeners with a large number of magnificent performances, in which many new works received their first performance in England. In the earlier part of the year the conductors who were engaged for the Symphony Concerts were also persons with for Sunday awaring. concerts were also responsible for Sunday evening studio concerts, but this system was abandoned for the 1931-1932 series. The B.B.C. also gave concerts in connexion with the International restival of Contemporary Music, which was held

in England in 1931, and Arnold Schonberg and Manuel Falla were among the conductors of its own interesting series of Concerts of Contemporary Music. The works which received their first English performance in studio concerts included English performance in studio concerts indinded Frederic d'Erlanger's Requiem Mass, which was performed by the B.B.C. orchestra (conducted by Adrian Boult), a section of the National Chorus, and Miriam Licette, Astra Desmond, Frank Titterton, and Keith Falkner as soloists. In addition to the important Sunday evening

concerts, which were conducted by Stravinsky, Dohanyi, Ansermet and others, the innumerable studio concerts covered a wide range of classical, modern and light music, with the apparent aim of enabling listeners to hear as much as possible of the best music of the past and the present. Although the Symphony Orchestra is divisible into various combinations for the presentation of different kinds of music, the orchestral resources of the B.B.C. were extended during the year by the formation of the B.B.C. Theatre Orchestra, which devotes itself to lighter nusical requirements; and more lowbrow tastes were still served by the Wireless Military Band and Jack Payne's B.B.C. Dance Orchestra.

Among the distinguished singers and musicians

who gave studio recitals during the year may be mentioned Pouishnoff, John Coates, Maggie Teyte, Herbert Heyner and Paul Robeson, and although most of the year's opera was relayed from outside there was an excellent studio per-formance of "Kitesh," conducted by Albert Coates. Listeners were also able to hear relays of concerts by the Hallé Orchestra, the Liverpool Philharmonic Society, the City of Birming-ham Orchestra and the Hastings Municipal Orchestra, and frequent concerts were given by the now defunct National Orchestra of Wales. The Bach Cantatas, which caused endless dis-cussion of the "Do we have too much Bach?" problem, were continued on Sundays.

The dramatic side of broadcasting has not yet been fully developed, and at present there is a wide divergence between the aims of broadcast music and those of broadcast drama. Whereas the musical programmes of the B.B.C. are designed to include a large proportion of the best music of the past as well as modern novelties, the diamatic programmes have too many novelties or second-rate offerings and make little appeal or second-rate onerings and make little appeal to the student of English drama. Apart from a good version of "The Tempest" (with John Gielgud and Augela Baddeley) and a deplorable condensation of "King John" (which even Robert Farquharson and Irene Vaubrugh could not render tolerable), very few plays by notable English dramatists were given in the National Programme in 2222. Among the few were English dramatists were given in the National Programme in 1932. Among the few were Marlowe's "Edward II," Galsworthy's "The Forest," C. K. Munro's "The Rumour," Clemence Dane's "Will Shakespeare" (with Laura Cowie and John Gleigud), Lord Dunsany's "H" (with Henry Alnley) and Clifford Bax's "Midsummer Madness"; and other stage-plays which were broadcast included Martines Sierra's "The Romantic Young Lady" (with George Grossmith), Bruno Frank's "Twelve Thousand," E. M. Delafield's "To See Ourselves" and Ian Hay's "Tilly of Bloomsbury." No doubt there are grave difficulties in the adaptation of ordinary plays for broadcasting, but surely some doughtier for broadcasting, but surely some doughtier effort could be made to acquaint listeners with

the past and present masterpieces of English drama.

The dramatic novelties of the year included a number of plays specially written for broadcasting, such as Compton Mackenze's "The Lost Cause," L. Du Garde Peach's "The Path of Glory" and "The Mary Celeste," Felix Mendelssohn's "Assault on Professor Weltmann" and Holt Marvell's "Across The Moon," and a larger number of adapted novels and short stories. The most successful of these were Michael Talbot's adaptation of Leonard Merrick's "Little Talbot's adaptation of Leonard Merrick's "Little Flower of the Wood" and Cecil Lewis's version of Joseph Conrad's "The Rescue" (with Robert Loranne), R. L. Stevenson and Lloyd Osbourne's "The Wrecker," Somerset Maugham's "Mackintosh," A. E. W. Masou's "The House of the Arrow," G. K. Chesterton's "The Napoleon of Notting Hill" and "Sapper's" "Raymond Blarr—Prunkard" were also adapted for migraphona Drunkard," were also adapted for microphone purposes, and scenes from "Handley Cross" were broadcast under the title of "The Conquer-

ing Hero.

In addition to the drama in the National Programme the Regional Stations also presented gramme the Regional Stations also presented plays in their own programmes. The most notable were Lennox Robinson's "The Far-off Hilla" and J. M. Synge's "Riders to the Sea" (Belfast), Githa Sowerby's "Rutherford and Son," James R. Gregson's "Young Imeson" and Stanley Houghton's "The Younger Generation" (North Regional), Miles Malleson's "A Man of Ideas" (Midland Regional), and J. O Francis's "The Beaten Track" (West Regional)

LIGHT ENTERTAINMENT.

The large quantity of vaudeville programmes which were broadcast during the year enabled which were broadcast untiling the year enabled listeners to hear many popular stage performers, some of whom adopted entirely new styles for broadcasting purposes. Two of the most interesting recuits were the "negro" back-chat comedians, Alexander and Mose, who were later revealed as the English actors, James Carewand Phills Persetts and Leavne de Cambra curtical. Billy Bennett ; and Jeanne de Casalis created a new microphone personality in the ramblings of a hypothetical Mrs. Feather. A series of duo-logues between Jack and Claude Hulbert were another prominent vaudeville feature, and among other contributors to the many programmes may other contributors to the many programmes may be mentioned Cicely Courtnerdge, Losile Henson, Nellie Wallace, Bert Coote, the Houston Sixters, Clifford Mollison, Antia Elson, Ella Retford, Ronald Frankau, Ernest Thesizer, Isobel Elsom, Norah Blaney, Harry Tate, Chick Farr, Aithur Prince, Wish Wynne and Melville Gideon, as well as such established broadcasters as Clapham and Duron W. Flotger, and Mr. Lefaen. "Comment as such established broadcasters as Clapham and Dwyer, Mr. Flotsam and Mr. Jetsam, Trommy Handley, Mabel Constanduros and Michael Hogan, Gillie Potter, Ann Penn, Stainless Stephen, Elizabeth Pollock, Paul England, Pat Patenson and Enid Trevor. Performances by Sir Harry Lauder, Richael Tauber, Jeanette Macdonald and Nikita Balieff's Chauve-Souris were also given during the year, though they did not actually figure in the vaudeville programmes. While the average vaudeville programme had much in common with the work of the modern music-hall there were some oleasant experiments.

music-hall there were some pleasant experiments in the presentation of more sophisticated programmes, which were more akin to the original Continental cabaret than to any form of enter-tainment known in England. These programmes,

ducted by Lady Tree, Elsa Lanchester's burlesque renderings of old songs, a musical setting of some of "The Bab Ballads" and a reading of some of his own verses by Captain Harry Graham, were obviously designed to make quite a different appeal from that of the ordinary B.B.C. vaude-ville; and the experiment is one which should certainly be continued.

Musical comedy and revue also figured in the Musical comedy and revue also figured in the B.C. programmes. The most important of the musical comedy productions was Gordon McConnel's adaptation of the Continental musical comedy "Evelyn," which was presented under the title of "Rich Gil, Poor Girl," with Phyllis Nelson-Terry in the pinucpal rôle. It was the first time that this production had been heard in England and although it turned out to be evite England, and although it turned out to be quite a modest affair it showed a commendable entera modest anair it snowed a commendance enter-prise on the part of the B.B.C. Other musical comedies broadcast were "The Cousin from Nowhere," "The Gypsy Princess," and C. Denis Freeman's "The King can do no Wrong," There was a plentite' supply of revues, ranging from the builliant "Pursuit of Pleasure" to Philip

Ridgeway's depressing "Ridgeway Parades"
"The Pursuit of Pleasure," for which Lance
Sieveking and Harold Scott were jointly responsible, was a delightful reconstruction of the various forms of popular entertainment of the 18th, 19th and 20th centuries, and it was certainly one of the best pieces of broadcast entertainment during 1931. In the latter half of the year Archie De Bear made a welcome appearance as a producer of microphone revues, and his "Listeners Inn "(which he wrote in conjunction with Regi-nald Arkell) and "Crikey" (in which Robert Hale, Minn ('nawford, Enid Stamp-Taylor, Anona Winn and chees recalled some successful items from his own theatrical productions) showed that a gifted producer of stage revues can be a useful gilted producer of stage review can be a userui asset to broadcasting. Among other revues were Gordon McConnel's anusing "More Airy Nothings" and "A Piccadill, Dally," C Denia Freeman's "From Montmatte to Montparnasse" and "A Seat in Hyde Park, "Graham Squiers" "B, B C - B.C., "Encest Longstaffe's "River Eide-lights," John Watt's delightful "Stop Press" and "riber thespine "An Lann (bit Santa" and rather thesome "Au Lapin Qui Saute," McConnel and Watt's "Theatrescope," and L. Du Garde Peach's "Our Town"

The agreeably fantastic productions of E. J. King-Bull, such as "Precession," "The Decadence of Terpsichore" and "Yes and Back Again," defy classification, as being not exactly drama and not exactly revue, but they made a distinct appeal to more sophisticated listeners.

EDUCATION AND RELIGION.

The furtherance of adult eduration by means The furtherance of adult education by means of cultural and educational talks is one of the acknowledged objects of the BBC, and in recent years a great impetus has been given thus work by the formation of discussion groups, which meet to hear the talks and discuss the subjects In the autumn and winter of rego-1931 more than a thousand of these groups were formed, and two important conferences were organised in this connection in 1931. The first, which was held in London in January, was a national conference of group-leaders and student listeners; and the second, which took place at Oxford in June, was a summer school for the tainment known in England. These programmes, which included such items as Lady Gregory's was under the auspices of the Central Council for "The Gaol Gate," a poetical guessing-game conalso discussed at an international conference in Vienna in August, when Sir John Reith, the Director-General of the B.B.C., was present. A great deal of work was also done with regard

A great deal of work was also done with regard to broadcasts to schools. The Central Council for School Broadcasting, which is under the chairmanahip of Mr. H. A. L. Fisher, and is composed of representative teachers and others engaged in educational work, entered its third year of office in 1931, and it continued its task of arranging broadcast lessons which could be used by schools to supplement the ordinary class teaching. The subjects for 1931 comprised world history, nature study, biology and hygiene, music, English, French, German, geography, rural science and speech training; and among the speakers were Mr. A. Lloyd James, Sir Walford Davies, M. E. M. Stephan, Miss Rhoda Power, Mr. Frank Roscoe, Mr. Harold Nicolson, Mr. Gerald Heard, Mr. S. P. B. Mais, Mr. Eric Parker and Professor Winffred Cullis.

The attitude of the Church of England towards broadcasting was discussed at the Convocation of Canterbury in January, when the Joint Committee on the Religious Value of Broadcast Services placed on record its "grateful appreciation of the debt which was owed to the British Broadcasting Corporation for its determination that religion should be given its due and proper place in its programma as a whole." In addition to the morning studio service and the Sunday evening services, which were relayed from places of worship all over the country (the various denominations being represented in turn), a series of short Thursday evening services was begun in October. These services, which were initiated as being appropriate to the national emergency, were taken from St. Michael s, Chester Square, London.

During the year an important change was made in the membership of the B B.C.'s Religious Advisory Committee, with the result that three leading Nonconformist bodies are now directly represented on the Committee. Members of the Regional Advisory Committee were also incorporated in the central body, which has thus been provided with greater variety of membership and brought into closer touch with the provinces.

MISCELLANEOUS.

The deaths of Sir William Bull, Sir Laming Worthington-Evans and Mr. Vernon Hartshorn during 1932 robbed the B.B.C. of three men who were closely connected with the early struggles of British Broadcasting. Sir William Bull was Vice-Chairman of the old British Broadcasting

Company, whose functions were taken over by the present Corporation in 1255 Sir Laming Worthington-Evans, while holding office as Postmaster-General, was largely responsible for the efficient development of the licensing system; and Mr. Vernon Hartshorn, who was Postmaster-General in 1253-1254, first authorised the broadcasting of controversia political spaceches.

and Mr. Vernon Hartsnorn, who was rosumster-General in 1293-1294, first authorised the broadcasting of controversial political speeches.

Although the conduct of the B.B.C. does not often engage the attention of Parliament, an important debate on the Corporation's policy took place in the House of Lords in March, when the Earl of Badnor, who raised the subject, suggested that the B.B.C. programmes seemed to indicate a tendency to try to educate the people of Great Britain towards Socialism, and even towards Communism. He was answered by Lord Gainford, Vice -Chairman of the B.B.C., and Lord Crawford, Lord Astor and Lord Pousonby also defended the Corporation against the charge of political bias. Lord Radnor eventually withdrew his motion, with the admession that the general opinion appeared to be that the B.B.C. could not be better.

Sir John Reith, the Director-General of the B.B C., paid a visit to the United States in 1931, in the course of which he gave an address in New York to the National Advisory Council on

Radio in Education.

At the general assembly of the International Broadcasting Union, held at Lausanne in June, Vice-Admiral C. D. Carpenda'o, the Controller of the B.B.C., was re-elected President for x931-1932.

A newspaper ballot which was held in regr gave vaudeville, dance music, and news as the three most popular items in the b.B.C. pro-

grammes.

A survey of European wireless licences at the end of 1930 showed that Great Britain occupied third place, with regard to the relation of the number of its receiving sets to the total population. Demmark was first and Sweden second.

In the later months of the year a rearrangement of programme timing was accompanied by an extension of the time devoted to bulletins for farmers.

A programme item called "Crisis in Spain" was the first British attempt to give a broadcast impression of a recent political event. Though the innovation was not entirely successful, its further developments should prove interesting.

Mr. A. J. Alan's infrequent appearances before the microphone enhanced his reputation as the supreme broadcast story-teller.

The text of the Abnormal Importations (Customs Duties) Bill was issued on November 17, 1931. The measure was backed by Mr. Runciman (Chancellor of the Exchequer), Major Elliott (Financial Secretary to the Treasury), Major Hore-Belisha (Parliamentary Secretary, Board of Trade), and Sir Thomas Inskip (Solicitor-General). It consists of seven clauses as follows:—

- I.—(r) If the Board of Trade are satisfied that articles of any class or description comprised in Class III. of the Import and Export List issued under the authority of the Treasury and the Commissioners of Customs and Excise for the year 1921 are being imported into the United Kingdom in abnormal quantities, it shall be lawful for the Board, with the concurrence of the Treasury, by Order to apply this Act to articles of that class or description.
- (a) An Order made under this section shall be laid before the Commons House of Parliament so soon as may be after it is made, and shall cease to have effect on the expiration of a period of as days from the date upon which it was made unless at some time before the expiration of that period it has been approved by a resolution passed by that Mouse.—
- Provided that in teckoning any such period of a8 days, as aforesaid, no account shall be taken of any time during which Pathament is dissolved or protogned or during which the Commons House is adjourned for more than four days.
- (3) An Order so made may be varied or revoked by a subsequent Order made in the like manner and subject to the like provisions
- II—(1) Subject to the provisions of this Act, there shall, on the importation into the United Kingdom of articles of any class or description to which, by virtue of an Order made under the last preceding section, this Act for the time being applies, be charged thereon such duties of Customs as may be specified in the Order not exceeding 100 per cent. of the value of the atteles.
- (a) No articles which are Empire products within the meaning of that expression as used in sub-section (r) of section 8 of the Finance Act, 1919, shall be chargeable with duty under this Act
- (3) Any duty chargeable under this Act on any article shall be charged in addition to any other duties of Customs chargeable on that article.
- III.—(1) The value of any imported articles for the purposes of this Act shall be taken to be the price which an importer would give for the articles if the articles were delivered to him, freight and insurance paid, in bond at the poit of importation, and duty shall be paid on that value as fixed by the Commissioners of Customs and Excise.
- (a) The Commissioners of Customs and Excise may make regulations for the purpose of giving effect to the provisions of this section and in particular for requiring any person con-

cerned with the importation of articles into the United Kingdom to furnish to the Commissioners in such form as they may require such information as is in their opinion necessary for a proper valuation of the articles, and to produce any books of account or other documents of whatever nature relating to the purchase, importation, or re-sale of the articles by that person

(3) If any person contravenes or fails to comply with any regulations made under this section he shall in respect of each offence be liable to a customs penalty of £50.

IV .--If--

- (a) any dispute arises whether any articles imported into the United Kingdom are articles specified in an Order made under this Act, or
- (b) in accertaining the proper rate of duty chargeable on any articles under this Act, any dispute arises as to the value of the articles;

the question shall be referred to the arbitration of a referce appointed by the Lord Chancellor, who shall not be an official of any Government department, and the decision of the referee with respect to the matter in dispute shall be final and conclusive, and sections thirty and thirty-one of the Customs Consolidation Act, 1876, shall apply as if the dispute were such a dispute as is referred to in the said section thirty, with the substitution of the application for a reference to a referee under this section for the action or suit mentioned in those sections.

- V—Subject to compliance with such conditions as to the security for the re-exportation of the articles as the Commissioners of Customs and Excise may impose, this Art shall not apply to articles imported for exportation after transit through the United Kingdom or by way of trans-shipment.
- VI—Anything authorised under this Act to be done by the Board of Trade may be done by the President of the Board, or, in his absence, by a Secretary of State.
- VII.—(z) This Act may be cited as the Abnormal Importations (Customs Duties) Act, 1931.
- (2) In this Act the expression "the United Kingdom" does not include the Isle of Man.
- (3) This Act shall continue in force for a period of six months and no longer.

L'ACADÉMIE FRANÇAISE.

THE FRENCH ACADEMY is composed of 40 members, elected for life, and is the highest of the five Academies constituting *!Institut de France (Secretary of the Institute, M. Robert Regnier). The Academy was founded by Cardinal Richelieu in réas and re-organized in 1816. The special object of the Academy is the composition of a Historical Dictionary of the French Language, and the property of the Secretary Institute (1818).

WORCESTERSHIRE. U.D.C. rso miles from London.
Pop. 15,632. Means of Access—G.W. Railway and L.M. & S. Railway. Location—On the slopes of the Malvern Hills, water Supply—Pure, constant Drainage—Modern. Soil—Gravel. Season—Summer and winter.
Annual Fixtures—Shakespeare Week in May; Croquet and Lawn Tennis tournaments in May and June. Malvern is an inland watering-place important educational centre, and a pretty residential town, consisting mostly of villas standing in own grounds. The highest point of the Malvern Hills is the Worcestershire Beacon, 1,400 feet high, from the summit of which is obtained one of the most extensive panoramic views in Great Britain, embracing the Severn and Wye Valleys, the Cotavold, Mendip and Welsh hills; and in the plain below can be seen Droitwich, Worcester, Evesham, Cheltenham, Gloucester and the Bristol Channel.

The Malvern Hills being a single chain, there are no lateral intervening valleys in the range. This has much to do with the dryness of the climate. The Malvern district is rich in botanies, geological, entomological and crimitological specimens. Assembly rooms (high-class bands and theatrical companies), public library, three clubs, tennis, bowls, croquet, golf—gentlemen's course (as holes), ladies' course (a holes)—hunting, boating, fishing. Places of Interest—Rivers Seven (4 m), Teme (6 m.), Avon (12 m.); boating, fishing, 11ver scenery. Deerhurst (17 m.)—Saxon church. Tewkesbury Abbey (15 m.). Porshore Abbey (16 m.), Bosbury (8 m.)—Edna Lyaffstonb. Valley of the Wye—by rail to Liss, and boat down river to Chepstow.

ORTHI

is noted for the causbility of its climate. which is largely due to its geographical situa-tion. The proximity of the sea and the shelter

afforded by the South Downs combine to modify the climate and avoid extremes. The absence of hills enables convalescents

derive the greatest benefit from the high percentage of ozone in the air and the large amount of sunshme. A palatral Pavilion at the Pier entrance and a commodious Bandstand Enclosure on the Parade have been added to the town's many attractions. An all-the-year orchestra plays in the Pavilion There are facilities for sports of all kinds

Law Reversionary Interest Society, Ltd.

ESTABLISHED 1853.

MANY persons have interests either for life or in expectation in property arising under Wills or Settlements. The operations of this Society enable such interests to be sold on most favourable terms, or loans to be obtained thereon at moderate rates of interest.

REMOTE interests which may never come into possession at all can be made available for immediate use if supported by Policies to be effected with the EQUITY & LAW LIFE ASSURANCE SOCIETY, which is under the same management.

For full information apply personally, or through your Solicitor, to the Secretary at the Society's Offices,

19, LINCOLN'S INN FIELDS, W.C. 2.

Insurance Advice

MR. T. G. ROSE (Author of Cost Price Assurance and Hon. Lecturer to University Economic Dept.) is at all times willing to give intending ASSURANTS assistance on Assurance matters, without any charge falling upon the applicant. All proposals and premiums may be sent direct to the Company concerned.

THE TABLES PRESENTED below indicate the advisability of writing to or seeing the author before investment. Letters, giving the fullest possible information as to date of birth, etc., should be addressed:

Provision for Death Duties

The following are examples of reduced rates of premium for ordinary whole-life non-profit policies of £1,000:—

Age next	Annual	Age next	Anrual		
Birthday	Premium	Birthday	Premium		
25 30 35 40	£ s. d. 13 18 4 15 16 8 18 9 2 21 17 6	45 50 55 60	£ s. d. 26 9 2 32 13 4 41 5 0 52 19 2		

For policies of £5,000 and upwards a reduction of $2\frac{1}{2}$ per cent. on the premium is allowed.

The sums assured may be paid wholly or partially to the Commissioners of Inland Revenue on account of death duties before the grant of probate, an arrangement which avoids the interest on the duties.

Write for the new Leaflet "Provision for Death Duties by Whole Life Assurances at Minimum Rates" to the Manager:

Brincipal Charitable Bequests of the Year. cxlii

APPENDED is a list of the principal bequests for charitable purposes recorded during the year. The amount for charitable purposes is, in a considerable proportion of the cases, approximate, owing to the bequests including a share of the residuary estate, or consisting wholly, or in part, of

business interests, or of blocks of shares for which a definite value cannot be given.

business interests, or of blocks of shares for which a definite value cannot be given.

Reversionary bequests, rhiere these are absolute (usually on the cessor of life interests or a period of years) are included, but contingent reversions (dependent upon failure of issue, the failure of prior trusts or the failure to observe certain conditions, &c.) are not included, unless it is known the reversion, though nominally contingent, is, in the events which have happened, absolute. The amounts of residuary bequests are subject to variation on the final winding-up of the estate, owing possibly to variations in the amount of duty payable, as the final figures may place an estate for duty purposes in a different category (either higher or lower) as compared with the original value submitted on obtaining the grant of probate.

The list records the principal bequests published during the year, not necessarily those becoming payable during the year.

The list records the principal bequests published during the year, not necessarily those becoming payable during the year.

The fount of charity shows no signs of serious abatement in volume, notwithstanding the recent general decline in values and the increasingly large amounts to which both the income and the capital of the well-to-do are subjected in taxation. There is a notable loss due to this cause, but this appears to have been partly compensated for by an increasing number of bequests from estates not in the largest category.

The proportion of the bequests for educational trusts, for hospitals, and for "social purposes" continues to show a steady increase, while the decline in bequests for purely religious and sectarian purposes is more marked, although this year there have been several large bequests to the Bristol Diocesan Board of Finance and for Jewish and Roman Catholic charities.

The largest single bequest—for an approximate value of £700,000—recorded during the year is not included in the table, as the grant of probate was subsequently revoked, and as the disposition of the property is now the subject of litigation, this bequest may not become payable. The estate was that of the famous motor engineer, Mr. Motague Stanley Napler, who left this sum (in the will originally proved) for research into the causes and cure of cancer and allied diseases.

The Proprietors of "Whitaker."

DOES NOT THIS APPEAL OF THE CHILDREN TOUCH YOUR HEART?

1,100 young children, some fatherless, some motherless, some total orphans, but all taken from dire poverty, are now under the care of

IAFTESBURY

(Founded 1843)

28. 6d. will keep the Homes and Training Ship for one minute. £7 10s. Od. will keep the Homes and Training Ship for one hour. Please send a gift to help the Society in this great work of caring for, and providing for, these young ones.

SHAFTESBURY AVENUE, LONDON, W.O. 2

ALEXANDRA ORPHANAGE

Haverstock Hill, LONDON, N.W. S.

Founded 1758.

Patrons: Their Majestice The King and Queen.
President: H.R.H. The Prince of Walce, K.G.
Treasurer (since 1897): The Rt. Hon. Lord Marshall, P.C., K.C.V.O.

The Orphanage is unsectarian, and helps fatherless and other necessitous children from all parts of the country and the Dominions, without restriction as to class or creed. Boys and girls are admitted at all ages between infancy and 11 years of age, and are cared for until 15. Their education fits them for useful positions in after-life. Opportunities occur for suitable children to have a secondary education; same boys are relected for training as Officers of the Mercantile Marine. During the past 173 years over 7,300 have been received; 370 are now resident, and others await vacancies.

More annual subscribers are needed. Out of £17,000 required annually only £7,000 are assured. The balance must be raised by donations. Legacies are a useful means of helphing. Please include the School in your Will. Annual Report sent on request, and the School may be visited by interested friends.

Forms of application for the admission of children and all needful information may be had of the SECRETARY, FRED. J. ROBINSON, A.C.I.S., 34-40, LUDGATE HILL, LONDON, E.C. 4.

Miss Smallwood's

Society for the Assistance of Ladies in Reduced Circumstances

AN URGENT APPEAL

"Their works do follow them"

There are many people who, alas, cannot give to this Society during their lifetime, but we shall be glad if they will remember that a Legacy, large or small, will be very useful and gratefully received. The need of permanent help is greater than ever—also New Annual Subscriptions will be thankfully received.

Please make cheques payable to—
Miss Smallwood's Society, Lancaster House, Malvern

10 MILLION LEPERS IN THE WORLD

OF THIS MUMBER THERE ARE MORE IN THE BRITISH EMPIRE THAN IN ANY OTHER POLITICAL GROUPING. WE ARE FIGHTING LEPROSY WITH THED HANDS.

Will you help to Free them?

Money is needed to control the world's worst scourge. Grants to governments, missionaries and others engaged in the fight, exceeding £18,000, have already been given. Much more is needed if the Empire's million sufferers are to be adequately helped.

Donations, however small, will be gratefully received by the Hon. Treasurer,

The British Empire Leprosy Relief Association

Address: 106, Whitfield Street, Tottenham Court Road, London, W. 1.

Why we need LEGACIES and BEQUESTS

THE need of ex-Bervicemen, including the disabled, and their dependants, and the care of those left behind by men who fell in action, are an ever-present and recurring charge on the Legion. Its work that must go on indefine the present the sate of Poppies—a slender support for so great a work that must go on indefinitely that the year since the inception of the Fund the expenditure has sworedes, and it is vitally necessary that the Fund should be strengthened and fortified against any possible diminution of income in the future by means of Legacles and Bequests.

EARL HAIG'S BRITISH LEGION APPEAL FUND

Full particulars and Forms of Bequest can be obtained from the Organising Scoretary, Capt. W. G. WILLCOX, M.B.E., Haig House, 26, Eccleston Square, London, S.W. 1.

The Cry of the SICK CHILD

HELP is desperately meaded by Dockland's very poor sick little ones are being cared for by the East London Hospital for Children. Many thousands of little lives have been re-made. To-day the Hospital is in desperate need. Will you help relieve the strain? Donations gratefully received by Secretary, Shadwell, London, E.

FAST LANDON HOSPITAL & CHILDREN

York Road. Lambeth, S.E.1.

ESTABLISHED 1765.

Patron-H.M. The Oueen.

This Hospital is situated in one of the poorest parts of London, in the district South of the Thames, with a population of nearly two millions.

Married women in indigent circumstances, especially the wives of Soldiers and Sailors, and certain single women (with their first child, after investigation by the Committee), are admitted to the Hospital from all parts of the kingdom, but mainly from the immediate neighbourhood, from which, owing to its poverty, little pecuniary help is obtainable.

Subscriptions and Donations thankfully received by the Treasurer, or Miss Lili Hearn, the Secretary, at the Hospital.

The RRIGADE

Seeks to develop Christian character and to inculcate useful habits for life's struggle. FIVE GREAT AIMS:

To awaken in girls a sense of their responsibility in life.
To help them to make the best of their powers of body and mind.
To train them to be self-reliant, useful women.
To influence them to dedicate all their powers to the Service of God.
To keep them in touch with the Church and Sunday School during those years when they often become lost to both.

FOUR-FOLD PROGRAMME: Spiritual, Physical, Educational, Social.

Headquarters' Secretary, 56, Old Bailey, London, E.C. 4

THE GORDON BOYS'

(THE NATIONAL MEMORIAL TO GENERAL GORDON). Vict-Patron-H.M. THE OUREN. Patron-THE KING.

Chairman Executive Committee-H.R.H. THE DUKE OF YORE, K.G.
THE HOME IS SITUATED AT WEST END, WOKING, between BAGSHOT and BISLEY.

THE HOME IS SITUATED AT WEST END, WOKING, between BAGSHOT and BISLEY.

The Home is constructed to accommodate 280 Boys, chosen from the necessions classes between the ages
of about 14 and 15, and give them a training, up to the age of 17 or thereabouts, which will fit them alike for civil
fite in this country or its tolonies, and for service in the Army, Nat. Force or Percan, 2. A boys
notion of the Committee, be really necessition. 3. To such that to the large of the committee, be really necessition as the net to the total to the commodal infirmity as
would disqualify him for service in the Army or Navy, or for civil employment in the Colonies or elsewhere, which
would require active bodily exertion. 4. Roys of known bad charactor are meligible.

Free admission is given to such number of boys as above as can be provided for out of the general income of the
Roms. A guaranteed payment of 283 annually during his stay at the Home will give a right of nomination for a
lad fulfilling the conditions of admission. Subscriptions and Donations are wipenity needed in order that the
Bulscriptions are received by The Westminers Bars, Limited, 1, 3, 3, 3, 4, 5, 5, 5, 6, 8, 9, and by the
Commandant at the Home, from whom any further information can be obtained. For financial reasons the
London Office has been abolished.

COMMANDANT :- LIEUT-COLONEL H. C. HERBERT, O.B.M.

HOSPITAL

70-71, BLACKFRIARS ROAD, S.E. Telephone: Hop. 1021.

ESTABLISHED 1841.

Treasurer-The Rt. How. The Lord Morris. P.C., K.C.M.G.

This Hospital, established in 1841, was the first and for many years the only one of its kind established in the United Kindom. Donations and Subscriptions are urgently desired in order to re-open its beds for In-patients. Since its foundation no less than 600,000 patients have been treated, and the scientific equipment of the Institution has always been kept thoroughly abreast of modern developments in research and treatment. The Light Department is provided with X-rays, radium and ultra-violet light apparatus. It is a centre both of dermatological therapeutics and education, and welcomes at its clinics medical practitioners and students. Patients should attend daily at 1.80 p.m., or on Fridays at 6 p.m. They are expected to contribute to the funds of the hospital according to their means and position.

FREDERICK HAYTER, Secretary,

OSPITAL

LONDON BRIDGE, S.E. 1. URGENTLY NEEDS HELP.

President: H.R.H. THE PRINCE OF WALES, K.G.

Founded in 1725 by Thomas Guy, a Bookseller and Publisher in the City of London, Incorporated and Governed by Acts of Parliament, 11th George 1st, ch. xii., and 61st Victoria, ch. vi., as "The President and Governors of the Hospital founded at the sole costs and charges of Thomas Guy, Esquire."

The Hospital is empowered to receive gifts of, and to hold, land up to an aggregate yearly yalls of Sixty Thousand Pounds (exclusive of the site of the Hospital), notwithstanding the provisions of the Mortmain Acts.

IN-PATIENTS (1980) 12.249

OUT-PATIENTS (1980) 123.971

Expenditure: £191,494 :: Income from Endowments: £67,641 ::

The Governors earnestly appeal for further Subscriptions and Donations. The present Subscription List is only about 26,000 a year, although the Charity is dependent upon support from sources other than its endowments to the extent of over £120,000 aye annum. To form a permanent Memorial, if desired, a Donation or Bequest should be allocated to the Re-endowment Fund, which is permanently invested and the income only applied for the general purposes of the Hospital.

A Gift of £1,000 to this Fund, or an Annual Subscription of £50, will respectively endow or support a Bed, over which a brass tablet, inscribed in accordance with the wishes of the Benefactor, can be placed.

A copy of the Annual Report of the Hospital can be obtained on application to Mr. W. J. Curry, Clerk to the Governors, Guy's Hospital, S.E. 1. Telephone: Hop 1086.

Bankers: THE BANK OF ENGLAND. Treasurer: F. P. WHITBREAD, Esq.

Imperial Cancer Research Fund.

Pairon-HIS MOST GRACIOUS MAJESTY THE KING. President-His Grace the Duke of Bedford. Hon. Treasurer-Sir George Makins, G.C.M.G., C.B. Director-Dr. J. A. Murray, F.R.S.

The object of the Research is for the good, not only of the whole British Empire but of the whole world. The scope of the work embraces detailed investigation of Cancer is every part of the Empire as it occurs in the human race and in the vertebrate animal in the control of the Empire as it occurs in the human race and in the vertebrate animal in the control of the Empire as it occurs in the human race and in the vertebrate animal in the vert and it is not too much to hope that the further procedulon of the investigations will ultimately yield results of the greatest importance on the nature and treatment

Donations and Subscriptions may be sent to the Hon. Treasurer, Imperial Cancer Research Fund, 8, Queen Square, London, W.C. 1, or may be paid to the Westminster Bank, Marylebone Branch, 1, Stratford Place, London, W. 1, A/c, Imperial Cancer Research Fund.

FORM OF BEQUEST.

to the Treasurer of the Imperial I hereby bequeath the sum of £
Cancer Research Fund under the direction of the Royal College of Physicians of London and the Boyal College of Surgeons of England for the purpose of Scientific Research, and I direct that his receipt shall be a good discharge for such legacy.

Central Office (W.A.): 58, Fenchurch Street, LONDON, E.C. 3

The most desperate of human calamities.

So Dr. Johnson wrote of the

DEAF AND DUMB

OF WHOM THERE ARE 5,000 IN LONDON.
THERE ARE ALSO 150 WHO CAN NEITHER MEAR NOR SEE.

They know Loneliness in a way that people who enjoy the gifts of hearing and speech cannot realise.

All Subscriptions gratefully acknowledged by Royal Association in Aid of the Deaf and Dumb, 413, Oxford Street, W. La section

FOR THREE-OUARTERS OF A CENTURY

The Reformatory and Refuge Union, Incorporated, has been a centre of help for all sorts of children and wemen in need.

Through its branches the Children's Aid Society and Woman's Mission to Women, it seeks out and saves those in danger of body or soul. Many thousands have been rescued from circumstances likely to cause their ruin.

It provides for the future welfare of those rescued as well as for thousands of orphan, friendless or homeless boys and girls.

It is responsible for

FOTHERBY HOUSE, West Norwood, and BLUNHAM BABIES' HOME, for little ones in need of a mother's care.

1

BRIGHTON HOME FOR LITTLE BOYS, for little fellows under ten years of age similarly handicapped.

GIRLS' PROTECTIVE HOME, Hastings, for young girls—especially those from moral peril.

GROTTO HOME FOR WO LADS having no other home.

- ABERDARE MEMORIAL HOME FOR BOYS, Highpate.
 A MATERNITY RESCUE HOME for girls with the first child.
- TEMPORARY REFUGE for girls and
- young women.

 HOME FOR YOUNG MOTHERS
 requiring training.

 HOSTEL FOR MOTHERS AND
 BABIES, to avoid the separation
 of Mother and Child during the allimportant first two years.

£25,000 a year is needed, most of which has to be raised from voluntary sources.
